HALLGJERD AKSNES

**Hegel, Georg Wilhelm Friedrich** (*b* Stuttgart, 27 Aug 1770; *d* Berlin, 14 Nov 1831). German philosopher. He was the son of a civil servant and began his education at the Stuttgart Gymnasium, after which he joined the seminary at the University of Tübingen in 1788. Having decided not to enter the clergy, he became a private tutor, firstly in Berne (1793) and then in Frankfurt (1797). In 1801 he moved to Jena and entered the university there, eventually becoming a lecturer, but in 1806 he fled in the path of the advancing French forces and took up the editorship of the *Bamberger Zeitung*. He eventually moved to Nuremberg, where he became headmaster of a Gymnasium and married Marie von Tucher, with whom he had two sons.

In 1816, Hegel accepted a professorship at the University of Heidelberg. Two years later, he moved to Berlin University, where he eventually died during a cholera epidemic.

Hegel's aesthetic thought is a response to Immanuel Kant's propositions in his *Kritik der Urteilskraft* that aesthetic facility is merely an inferior activity to reasoning, and in his *Kritik der reinen Vernunft* that we can never really know reality as it is, since that reality is always constructed by the human mind. Hegel rejects both propositions as solipsistic, and contends that philosophy can apprehend reality in its totality – hence his quest for what he terms *Geist* ('spirit' or 'mind'), the absolute idea, the principle of generality, the collective consciousness. The aesthetic facility plays a vital role in this quest.

This 'absolute' *Geist* is analysed by Hegel in three ways: in terms of its own internal construction; in its manifestation in human history; and on its trajectory to its *telos* or final goal. Characteristic of Hegel's philosophy is the use of dialectical forms of argument, and this is reflected in his tendency to use arguments that fall into three distinct phases. In short, the dialectic constitutes for Hegel a universal form that the human mind brings to reality: every affirmative action has its own negation, and this contradiction always implies some future resolution (often referred to as 'thesis', 'antithesis' and 'synthesis', although he rarely used these terms himself).

In the *Vorlesungen über die Ästhetik* (usually translated as 'Lectures on Fine Art'), first published in 1835, Hegel organizes the arts according to this three-part structure: the symbolic arts, represented by architecture, demonstrate a 'naive' unity of *Geist* in which, 'it is identity already, and therefore it generates reality out of itself already'. The classical arts are exemplified for Hegel by the external shapes of sculpture, 'because the external shape, determined as external, is a particular shape, and for complete fusion it can only present itself again in itself as determined and therefore restricted content'. The romantic arts – painting, music and poetry – represent the apex of the arts' achievements: 'in romantic art the shape is externally more or less indifferent, so that art introduces, in an opposite way from the symbolic, the separation of content and form'.

Music occupies an important position in Hegel's system since it 'mediates the spatial sensuality of painting and the abstract spirituality of poetry' and its location in time is analogous to that of the thinking subject: 'tone ... places the Ego in movement by means of the motion in Time'. These two roles – mediation [*Vermittlung*] and the accord [*Anklang*] with subjectivity – mark music out as important within Hegel's system. He is nonetheless critical of music as an 'empty' form that can represent a content only in its most general terms. In this, Hegel was at odds with much Romantic theory that held music to be a superior (even 'original') language.

Hegel has had an enduring impact on aesthetic theory in the 19th and 20th centuries. Moritz Hauptmann, A.B. Marx, Wilhelm Dilthey and Friedrich Theodor Vischer were all self-proclaimed admirers of Hegel, and even his German positivist critics took from him a fascination for historical schemata, teleological master narratives and a desire for comprehensive systems of knowledge. With the recent resurgence of interest in Theodor W. Adorno and the Frankfurt School, musicologists are turning again to Hegel and finding new inroads into the problems of how musical forms mediate (and are mediated by) extrinsic historical and cultural discourses.

IAN BIDDLE

**Heger, Robert** (*b* Strasbourg, 19 Aug 1886; *d* Munich, 14 Jan 1978). German conductor and composer. He studied in Strasbourg with Franz Stockhausen (1900–02), in Zürich with Lothar Kempter (1902–5) and in Munich with Schillings (1907–8). His conducting career began in Strasbourg, and he worked in Ulm (1908) and Barmen (1909) before securing a post at the Vienna Volksoper in 1911. In 1913 he conducted in Nuremberg before moving to the Munich Opera (1920–25) and the Vienna Staatsoper (1925–33), where he also served as director of the Gesellschaft der Musikfreunde. In 1933 he moved to Berlin as conductor at the Staatsoper and also served as music director in Kassel and at the Waldoper, Zoppot (now Sopot, Poland). After the war he remained in Berlin at the Städtische Oper before returning to Munich in 1950 where he conducted at the Staatsoper. From 1950 to 1954 he was president of the Hochschule für Musik in Munich.

Heger's reputation as a conductor, enhanced by his numerous appearances at Covent Garden (between 1925 and 1935, and in 1953 for the Bavarian première of Strauss's *Capriccio* with the Staatsoper) and by his famous abridged commercial recording of *Der Rosenkavalier* with Lotte Lehmann and Elisabeth Schumann, has tended to overshadow his achievements as a composer. In general he followed the late Romantic traditions of Strauss, Reger and Pfitzner without achieving any distinctive originality. Nonetheless, he wrote extremely effectively for orchestra, and such works as the *Verdi-Variationen* (1933) featured in concert programmes during the 1930s. Of his five operas, *Der Bettler Namenlos* remained the most successful: it was produced in several German opera houses and revived by the composer in Munich in 1967. During the Third Reich, Heger received prestigious commissions from the Dresden Staatsoper to compose *Der verlorene*

*Sohn* and from the Berlin Staatsoper to compose *Lady Hamilton*. The latter, the subject matter of which concerned the relationship between Lady Hamilton and Admiral Nelson, could not be staged in Germany during the war, and when first performed in 1951, aroused a mixed response and its musical style seemed outmoded.

WORKS
(*selective list*)

Ops: Ein fest auf Haderslev (3, Heger, after Storm), op.17, Nuremberg, 1919, rev. Klagenfurt, 1943; Der Bettler Namenlos (3, Heger), op.22, Munich, National, 1932; Der verlorene Sohn (2, Heger), op.25, Dresden, Staatsoper, 1936, rev. Kassel, 1942; Lady Hamilton (3, Heger), op.27, 1942, Nuremberg, 1951; Das ewige Reich, op.29, rev. as Tragödie der Zwietracht (3), op.46, 1972, unperf.

Orch: Vn Conc., op.16; Sym., op.18, 1921–2; Sym., op.21, 1928; Nocturne and Perpetuum mobile, 2 symphonische Sätze, op.21b, 1921–2; Variationen über ein Thema aus Verdis Maskenball, op.23, 1933; Präludium und heitere Fuge, op.26; Sym., op.30, 1942–3; Chaconne und Fuge über eine Zwölfton-Reihe, op.35, 1955; Vc Conc., op.43, 1964; Don-Carlos Variationen, op.44, 1969; Sym. Poem: Hero und Leander

Chbr: Pf Trio, op.14, 1908; Str Qt 'De profundis', op.45, 1971

Choral: Lieder, op.6; Die Jüdin von Worms, op.13; Ein Friedenslied, op.19, 4 solo vv, SATB, orch, 1924; Lieder, op.20; TeD, op.45, 2 solo vv, SATB, orch, 1971

Arr.: G. Rossini: William Tell, Berlin, Staatsoper, 1934, collab. J. Kapp

Principal publishers: Bote & Bock, Drei Masken Verlag, Hug, Leuckart, Universal

ERIK LEVI

**Hegyi, Erzsébet.** Hungarian musicologist, wife of DEZSŐ LEGÁNY.

**Heibel, Jacob.** *See* HAIBEL, JAKOB.

**Heidegger, John Jacob** [Johann Jakob] (*b* Zürich, 19 June 1666; *d* Richmond, Surrey, 5 Sept 1749). Swiss impresario, active in England. He was the son of a professor of theology from Nuremberg. He married in 1688 and had four children, all of whom predeceased their parents (Heidegger's wife died in 1747). Leaving Switzerland as the result of a love affair, he travelled in Europe, reaching London by 1707. He remained in England until his death, but was apparently not naturalized. According to the *Scots Magazine* he served for a time in Queen Anne's Life Guards. He soon acquired a reputation as a man of taste, critical judgment and business acumen, and played a considerable part in the establishment of Italian opera in London. He selected the arias for the pasticcios *Tomiri*, produced at Drury Lane in April 1707, and *Clotilda* at the Queen's Theatre in March 1709. He became assistant manager of the opera house by 1711 and succeeded to the management in January 1713 when Owen Swiney absconded to Italy. Between 1710 and 1715 Heidegger signed the dedication of a number of librettos, including that of Handel's *Amadigi*, but there is no evidence that he had a hand in the authorship. He was active in the arrangements for the foundation of the Royal Academy of Music in the winter of 1719 and remained in joint or sole control of the opera house until at least 1745. Between 1729 and 1734 he and Handel acted in partnership, borrowing the scenery, costumes and properties of the defunct Academy. He let the theatre to the Opera of the Nobility in 1734, and when that enterprise failed in 1737 engaged Handel as musical director for one season at a fee of £1000. On the failure of an attempt to raise public subscriptions for opera in the summer of 1738 Heidegger let the theatre to Handel for oratorios, and from 1741 to Charles Sackville, Lord Middlesex, for operas.

Opera was not Heidegger's most profitable concern. He arranged many public and private festivities, including the illumination of Westminster Hall for the coronation of George II in 1727, and from 1711 (if not earlier) organized masquerades at the opera house. These continued for more than 30 years, and brought Heidegger wealth and notoriety in abundance. They were attacked by moralists, including the Bishop of London in a celebrated sermon in 1724; attempts were made to suppress them by act of parliament and royal proclamation, and in February 1723 a Middlesex grand jury censured Heidegger as 'the principal promoter of vice and immorality'. Perhaps in consequence the masquerades remained popular and gave rise to lively pamphlet warfare. Heidegger figured in satires by John Hughes, Fielding, Pope (*The Dunciad*) and others, and in caricatures by Hogarth (*The Bad Taste of the Town*, 1724, and *Masquerade Ticket*, 1727). He was notoriously ugly, and won a bet that Lord Chesterfield could not produce a more hideous face in London.

Heidegger's income in some years is said to have amounted to £5000, but he spent freely on charity as well as gambling and helped indigent Swiss immigrants. The *General Advertiser* wrote on his death: 'Of him, it may be truly said, what one Hand received from the Rich, the other gave to the Poor'. He left a natural daughter, Elizabeth Pappet, who became licensee of the King's Theatre in 1750 and married a future vice-admiral. His house in Richmond, decorated with landscapes by Antonio Jolli, a scene painter at the King's Theatre in 1744–8, still stands. Portraits of Heidegger include a mezzotint engraving by John Faber after J.B. van Loo (1749), and an engraving by Joseph Goupy after a sketch by Marco Ricci, showing Cuzzoni and Farinelli standing in front of a seated Heidegger (1730).

WINTON DEAN

**Heidelberg.** City in Baden-Württemberg, Germany, on the Neckar river. In 1346 the Elector Palatine Ruprecht I (who later founded the university) established a court chapel (*Sängerey*). The Elector Friedrich I, who ruled from 1449 to 1476, was an enthusiastic musician; Michel Beheim and the Sängermeister Johannes von Soest worked for some time at his court. In the early 16th century the blind Arnolt Schlick was organist at Heidelberg Castle, and from about 1525 to 1540 a group of young men,

now known as the 'Heidelberger Liedmeister' – Lorenz Lemlin, Georg Forster, Caspar Othmayr, Jobst vom Brandt and Stephan Zirler – attended the university. A catalogue of 1544 of the court chapel library lists more than 3000 compositions; at that time the chapel had 12 singers and an unknown number of instrumentalists. Important Heidelberg musicians of the later 16th century were Sebastian Ochsenkun, Johann Knöfel and Andreas Raselius.

The Heidelberg Castle theatre, built by Elector Heinrich V in 1616, was one of the first independent theatres in Germany. Opera performances can be traced back to 1687, when an Italian opera was given there, but six years later the castle was partially destroyed during the War of the Palatine Succession. It was almost 150 years before a temporary theatre was opened in the inn 'Zum Prinzen Max', and in 1853 an imposing municipal theatre (the Städtische Bühne, now the Theater der Stadt Heidelberg) was built. It survived both world wars unharmed, but was renovated in 1924–5, in the 1950s, in 1978 and in 1990 (cap. 619). The Städtisches Orchester (founded 1889, renamed the Orchester der Stadt Heidelberg in 1995) plays for the opera and gives subscription concerts in the Stadthalle (1330 seats), which was opened in 1903 with the first performance of Richard Strauss's *Taillefer*. Serenade concerts take place in the castle courtyard, mostly with the Heidelberger Kammerorchester. There is also a Heidelberger Sinfoniker (formerly Schlierbacher Kammerorchester). The Heidelberger Bachverein, founded in 1885 by the Bach biographer Philipp Wolfrum, gives its concerts in the Peterskirche. Since 1973 there has been an annual Castle Festival in August for opera and concerts, which always includes a performance of the musical *The Student Prince*.

In 1825 the Heidelberg law professor A.F.J. Thibaut published his book *Über Reinheit der Tonkunst*, which was an important contribution to the revival of early church music in Germany. Spohr, Weber and Schumann were all members of the Singverein, which Thibaut founded. Church music flourishes today in the 15th-century Heiliggeistkirche, the Jesuitenkirche (a famous Baroque church), the Friedenskirche and the Lutherkirche. In 1931 Hermann Meinhard Poppen founded the Evangelisches Kirchenmusikalisches Institute, from 1990 called the Hochschule für Kirchenmusik der Evangelischen Landeskirche in Baden.

In 1894 Otto Seelig and Heinrich Neal founded a conservatory which was amalgamated with the Hochschule für Musik in 1947 but was separated again in 1971. The conservatory was affiliated to the Städtische Singschule and the Volksmusikschule Hekler and is now called Städtische Musik- und Singschule. The Hochschule has become a department of the Staatliche Hochschule für Musik Heidelberg-Mannheim. The Musikwissenschaftliches Seminar of Heidelberg University was instituted in 1923. Theodor Kroyer, Hans Joachim Moser, Heinrich Besseler, Thrasybulos Georgiades, Walter Gerstenberg, Reinhold Hammerstein, Siegfried Hermelink and Ludwig Finscher are among the eminent scholars who have taught there.

WERNER STEGER/GÁBOR HALÁSZ

**Heiden.** *See* HAIDEN FAMILY.

**Heiden, Bernhard** (*b* Frankfurt, 24 Aug 1910; *d* Bloomington, IN, 30 April 2000). American composer of German birth. He studied with Hindemith at the Berlin Hochschule für Musik (1929–33) and in 1935 moved to the USA. In 1941 he became a naturalized American. He studied musicology with Grout at Cornell University (MA 1946). Later that year he was appointed to the music school of Indiana University, eventually becoming professor of music and chair of the composition department; in 1981 he became professor emeritus. Heiden was the recipient of many awards and commissions, among them a Guggenheim fellowship (1966–7) and an NEA grant (1976).

Heiden's music is neo-classical in its formal structure, the early works portraying the influence of his teacher, Hindemith. Strongly polyphonic in texture, his prolific output, especially in the genre of chamber music, demonstrates a mastery of sonorous balance and effective instrumentation. He made an important contribution to the solo sonata and concerto repertories, writing for many relatively-neglected instruments like the horn, tuba and viola. His Sonata for viola and piano (1969) is intensely lyrical, with clear contrapuntal writing and chromatic melodies. The Sinfonia for wind quintet (1949), a staple of the woodwind repertory, employs modal harmonies, accentuated by the lyrical shapes of his melodic lines and sonorous voicings. In his vocal music the melodies are often free and daring (as in the *Sonnets*), while never obliterating the text. Unlike other composers, he did not take part in the postwar avant-garde movement but remained true to his own musicality.

WORKS

Dramatic: Conspiracy in Kyoto (film score), 1953; Dreamers on a Slack Wire (dance drama), 2 pf, perc, 1953; The Darkened City (op, 3, R.G. Kelly), 1961–2, Indiana U., Feb 1963; incid music to 2 Shakespeare plays

JAMES P. CASSARO

**Heider, Werner** (*b* Fürth, Bavaria, 1 Jan 1930). German composer and conductor. He studied the piano and composition with Willy Spilling in Nuremberg (1946–50), and composition with Karl Höller, the piano with Maria Landes-Hindemith and conducting with Heinrich Knappe at the Musikhochschule in Munich (1951–3). During these years he also attended several Darmstadt summer schools, which had a significant influence on his work. He was co-founder, in 1966, of the ensemble Colloquium Musicale and of the crossover group Confronto: Kammermusik und Jazz. He has directed the Ars Nova ensemble (Nuremberg) since 1968 and has also appeared with several well-known German symphony orchestras as guest conductor. His awards include the Förderpreis (1957) and Kulturpreis (1990) of the city of Nuremberg, the first composition prizes of the cities of Stuttgart (1965), Erlangen (1968) and Fürth (1970), the Wolfram-von-Eschenbach prize (1985) and the Otto-Grau Kulturpreis (1995), among others. Heider's activity as a composer is characterized by broad stylistic variety; he has no qualms about exploring different genres. Jazz plays a role in his works, as do collective and free improvisation. His pitch organization ranges from a free tonality to strict serialism, with an emphasis on rhythm and comprehensible formal structures.

STEFAN FRICKE

**Heidsieck, Eric** (*b* Reims, 21 Aug 1936). French pianist. He studied with Blanche Bascourret de Gueraldi at the Ecole Normale de Musique in Paris, then with Marcel Ciampi at the Paris Conservatoire (where he received a *premier prix* in 1954) and privately with Cortot and Kempff. His international career began in 1955 with acclaimed débuts in Paris and London, followed by recitals and appearances with leading orchestras throughout the world. In Paris he performed Mozart's last 12 concertos (1964) and Beethoven's 32 sonatas (1969 and 1979). His strong and personal Beethoven cycle is among the most distinctive of his numerous recordings, which include subtle accounts of most of Fauré's piano music, an elegant version of Ravel's *Le tombeau de Couperin*, and several Mozart concertos; he has also published cadenzas for Mozart's concertos. Heidsieck is active as a chamber musician, and often performed and recorded with Paul Tortelier. From 1980 to 1998 he taught at the Conservatoire National Supérieur de Musique in Lyons.

CHARLES TIMBRELL

**Heifetz, Jascha** (*b* Vilnius, 2 Feb 1901; *d* Los Angeles, 10 Dec 1987). American violinist of Russian birth. He had his first lessons from his father, Ruvim, a professional violinist. Soon afterwards he went to Elias Malkin, a noted teacher, and at the age of six was able to perform Mendelssohn's Violin Concerto. In 1910 he was admitted to the St Petersburg Conservatory, first to Auer's assistant Nalbandyan, then to Auer himself. On 30 April 1911 he played at a concert in St Petersburg and made a sensational début in Berlin on 23 May 1912. As a result, Nikisch invited him to play Tchaikovsky's Violin Concerto with the Berlin PO on 28 October 1912. The offer of a tour of the USA enabled Heifetz to leave Russia in 1917; his début at Carnegie Hall on 27 October was a triumphant success. In 1925 he became an American citizen.

Heifetz first appeared in the Queen's Hall, London, on 5 May 1920. He toured Australia (1921) and East Asia (1923). He played to enthusiastic audiences in Palestine in 1926 and in 1967 went back there to play with the Israel PO. No less emotional was his return to Russia in 1934. After World War II Heifetz reduced his appearances. From 1962 he taught at the University of Southern California, Los Angeles, where the Heifetz Chair in Music was established in 1975, with Heifetz as its first occupant. In 1964 he gave three chamber music concerts at Carnegie Hall with Piatigorsky and other artists. For his 70th birthday a one-hour film made in France was shown on television: Heifetz played Bach's Chaconne and Bruch's Scottish Fantasy and demonstrated his accustomed mastery.

The name of Heifetz has become synonymous with violinistic perfection. Yet he did not stress technical exhibitionism. His stance was almost immobile; he held his violin high and far back, with his face turned towards his fingers. His right elbow was held rather high, owing to an almost exaggerated 'Russian-style' grip of the bow.

His tone was powerful and produced with great pressure; equalizing this was an intense vibrato giving a glowing tone without a trace of sentimentality. Heifetz's interpretations were sometimes criticized as cold, an impression reinforced by his severe appearance – a chiselled, unsmiling face, even when acknowledging an ovation. But this immobility concealed the utmost concentration, boldness, grandeur and impetuosity. His preference for fast tempos was encouraged by his technical virtuosity, but the speed was always controlled. He had the ability to blend his tone and interpretation with other artists, as is proved by his chamber music playing with Feuermann, Primrose, Piatigorsky and Rubinstein.

Heifetz commissioned and performed a number of concertos, including those by Walton, Castelnuovo-Tedesco, Korngold and Louis Gruenberg. Among his many transcriptions the most famous is the *Hora staccato* by Dinicu.

BORIS SCHWARZ/MARGARET CAMPBELL

**Heighington, Musgrave** (*b* Durham, 1679; *d* Dundee, early June 1764). English organist and composer. He referred to himself as 'sometime of Queen's College, Oxford', although it is not possible to authenticate a university education; he was, however, often referred to as 'Doctor' Heighington in the 18th century. From 1717 to 1720 he was organist at Hull; from there he went to Dublin, where he gave concerts between 1725 and 1728. In 1726 he set Dryden's *Ode on St Cecilia's Day* (*Alexander's Feast*), which was performed in Dublin on 22 October 1726, and later repeated at Cambridge and elsewhere. The pantomime *The Enchanter, or Harlequin Merlin* may also come from this period.

In 1733 Heighington went first to London and then to Great Yarmouth, where on 4 August he and his family gave a concert in the town hall; he was subsequently chosen city organist. In October 1734 his *Ode for His Majesty's Birthday* was performed in Yarmouth, followed in March 1735 by a song for the queen's birthday. Three months later he and his family gave a concert at Beccles and, on 30 June 1736, another in Peterborough. On 2 September 1736 he was chosen as an honorary member of the Gentlemen's Society of Spalding, for which he composed numerous works; in October he founded the Yarmouth Music Club. He divided his activities between Yarmouth and Spalding, but in 1745 the Yarmouth city fathers cut the salary of the city organist from £60 to £40 and Heighington and his family moved to Spalding. In 1748 he became organist at St Martin's, Leicester.

About 1756 Heighington became organist at the English Episcopal Church in Dundee. Bishop Pococke, describing his visit of 1760, said he found 'a neat chapel and organ of which Dr Heighinton, a very eminent musician (who took his degree in music at Oxford and Cambridge, and is about 80) is the organist'; evidently Heighington was not satisfied to claim merely a single doctorate. During the last few years of his life he founded the Dundee Musical Society, one of the earliest societies of its kind in Scotland. He was married first to Anne Conway and then to Mary Conner; some of his family were musically gifted. An assessment of Heighington as a composer is difficult because most of his works are lost; the extant pieces show him to have been an agreeable if not excessively gifted composer.

WORKS

6 Select Odes of Anacreon in Greek and 3 [6] of Horace in Latin Set to Musick, 1v, orch (London, n.d.)
4 songs: Descend each goddess (London, *c*1740); Fast by the margin of the sea, *Chloe, or the Musical Magazine*, xcv (London, *c*1760); The Dream of Anacreon, *Calliope, or English Harmony*, ii (London, 1746); When I survey that matchless face (London, *c*1750)
Ps tune, 'Abingdon', *GB-Lbl*

CHARLES CUDWORTH

**Heighted.** An adjective describing notation that indicates the pitch of notes by their vertical placing on the page. *See* DIASTEMATIC.

**Heije, Jan Pieter** (*b* Amsterdam, 1 March 1809; *d* Amsterdam, 24 Feb 1876). Dutch music educationist, poet and physician. He had his first poems published in 1830 while still a medical student in Leiden. Until 1861 he was editor of several literary and medical journals, and a board member of societies promoting music (1842), welfare (1844) and the medical arts (1848); he then devoted himself entirely to music in his role as secretary of the Maatschappij tot Bevordering der Toonkunst, a post he held from 1843 until his death. At his instigation the Vereniging voor Nederlandse Muziekgeschiedenis was founded in 1868. Heije's dedication to the general welfare of the lower classes is exemplified in his poetry and in his striving to improve community singing to facilitate their introduction to art music. He also encouraged the production of good editions of chorale settings and textbooks for music education.

JAN TEN BOKUM

**Heiller, Anton** (*b* Vienna, 15 Sept 1923; *d* Vienna, 25 March 1979). Austrian organist and composer. He

entered the Vienna Academy of Music in 1941 to study the piano, harpsichord, organ (with Bruno Seidlhofer) and composition. He graduated only a year later, and at the end of the war took up an appointment teaching the organ at the academy. Soon he became established internationally as an organ recitalist, his performances of Bach winning particular acclaim. In 1952 he gained first prize at the International Competition for Improvisation at Haarlem. In his youth he was highly esteemed as a conductor and harpsichordist, but he concentrated increasingly on playing the organ and teaching.

Heiller first attracted attention as a composer in 1945 with his Toccata for two pianos, which he performed with his wife Erna. After that he devoted himself more and more to writing Catholic church music and concert works of a similar type. He was a modern polyphonist, following in the tradition of Hindemith and Johann Nepomuk David; his music displays a melodic affinity with Gregorian chant. Like David he progressed through increasing chromaticism to the use of a thematic 12-note technique. In 1954 he received the Austrian State Award for Choral Music, in 1963 the Vienna Award for Culture and in 1969 the Grand Austrian State Award.

WORKS
(*selective list*)

CHORAL

Masses: Mass, mixolydian G, unacc., 1944; Mass, lydian F, vv, org, 1948; Missa in nocte, female/boys' vv, org, 1949; Missa brevis C, unacc., 1951; Missa super 'Erhalt uns Herr', female/boys' vv, 1953; Missa super 'Salve regina' und 'Vater unser im Himmelreich', female vv, 1957; Missa super modos duodecimales, vv, 7 insts, 1960; Kleine Messe über Zwölftonmodelle, unacc., 1961; Deutsches Ordinarium, unacc., 1967; Kleine deutsche Messe, vv, org, 1976

Other works: Der Heiland ist erstanden, motet, unacc., 1945; Ach wie nichtig, ach wie flüchtig, motet, unacc., 1949; Tentatio Jesu, short orat, solo vv, vv, 2 pf, 1952; TeD, vv, org/wind, timp, org, 1953; Psalmenkantate, solo vv, vv, orch, org, 1955; François Villon (F. Krieg), ballad, solo vv, vv, orch, 1956; Ps xxxvii, vv, orch, 1963; In principio erat verbum, cant., 1v, vv, orch, org, 1965; Stabat mater, vv, orch, 1968; Geistliches Konzert, vv, 6 ww, 1970; Adventmusik, children's vv, ob, vn, org, 1971; Passionsmusik, children's vv, org, 1973

Smaller pieces for mixed/male/female vv

ORGAN

Sonata no.1, 1945; Sonata no.2, 1947; 2 Partitas, 1947–8; In festo corporis Christi, 4 pieces, 1957; Fantasia super 'Salve regina', 1963; Ecce lignum crucis, 1967; Tanz-Toccata, 1970; Meditation über die gregorianische Ostersequenz 'Victimae paschalis laudes', 1974; 3 Little Chorale Preludes, 1975

OTHER WORKS

Orch: Org Conc., 1963; Conc., hpd, org, chbr orch, 1972

Inst: Toccata, 2 pf, 1945; Kammer-Symphonie (Sextet), 6 insts, 1946; Ein wenig über B–A–C–H, 3 little pieces, hpd, 1975

Principal publishers: Doblinger, Universal Edition

RUDOLF KLEIN

**Heilmann, Uwe** (*b* Darmstadt, 7 Sept 1960). German tenor. He studied in Detmold, made his début there as Tamino in 1981 and joined the Stuttgart Staatsoper in 1985. There he rapidly established himself as the house's leading Mozartian tenor with admired performances as Tamino, Don Ottavio and Belmonte. He made his début at the Metropolitan in 1990 as Belmonte, the role with which he also made his La Scala début in 1994. Heilmann also developed a flourishing career as a concert singer, especially in Bach and the major Classical choral works, and was an acclaimed interpreter of lieder, notably at the Hohenems and Salzburg festivals. Among his many recordings, those of his four most celebrated Mozart roles (Tamino, Belmonte, Titus and Don Ottavio), Flamand (*Capriccio*) and *Die schöne Müllerin* stand out, all displaying his incisive tenor, his fine line and his gift for characterization through the text. In 1999 he retired from singing to devote himself to academic study.

ALAN BLYTH

**Heina, François-Joseph** (*b* Mieschitz [now Měšic], nr Prague, 20 Nov 1729; *d* Paris, 28 Feb 1790). Czech musician and publisher. He was in Paris from 1764, as *cor de chasse* to the Prince de Conti and later *trompette de chevau-léger de la garde du roy*, but received his discharge in 1775. From that date he was a teacher of the trumpet and hunting horn; from 1785 until his death he was a member of the orchestra of the Comédie Française.

In January 1773 he petitioned for a six-year privilege for the publication of Stamitz's instrumental music. For at least ten years (1775–85), he published instrumental works, especially chamber music, by fellow Czechs (Vanhal, Fiala and Stamitz) and composers of the Mannheim school (Eichner and Schwindl). Heina was a good friend to Mozart in Paris, particularly at the time of his mother's illness and death. He also published the first editions of seven of Mozart's works, including three piano sonatas.

FRANÇOIS LESURE

**Heindl, Franz Sebastian.** *See* HAINDL, FRANZ SEBASTIAN.

**Heindorf, Ray** (*b* Haverstraw, NY, 25 Aug 1908; *d* Los Angeles, 3 Feb 1980). American musical director, orchestrator and conductor. His association with cinema music began as a young man with employment as a pianist and organist for a silent movie theatre in Mechanicsville, New York. He became a protégé of Leo Forbstein, the first musical director at Warner Brothers' studios, after helping with the scoring of the first sound film, *The Jazz Singer* (1927). He effectively served his apprenticeship with Warner Brothers, rising through the music department as a performer and orchestrator-arranger. During this period he orchestrated for Steiner on *Daughters Courageous* (1939). When Forbstein retired in 1947, Heindorf succeeded him, remaining as head of the department until 1959, although he continued to conduct and arrange scores. He was nominated for 18 Academy Awards between 1942 and 1968, and received three: for the musical direction on *Yankee Doodle Dandy* (1942) and *This is the Army* (1943), the latter of which was based on the songs of Irving Berlin; and for the adaptation to film of the Broadway musical *The Music Man* (1962). Despite the traditional pedigree of the Warners' department, Heindorf was supportive of developments in film scoring style, most notably in his conducting of Alex North's original jazz score for *A Streetcar Named Desire* (1951). Among the few scores for which he was principal

composer are *Hollywood Canteen* (1944), *Young Man with a Horn* (1950), a biography of Bix Beiderbecke, and *Pete Kelly's Blues* (1955), which achieved minor cult status largely due to its score.

KATE DAUBNEY

**Heine, (Samuel) Friedrich** (*b* Leipzig, 15 Sept 1764; *d* Schwerin, 26 Nov 1821). German composer and flautist. His father was the physician Johann Abraham Heine. He was chamber musician in the Mecklenburg-Schwerin court chapel at Ludwigslust from 1788. In 1789 he married Felicitas Agnesia Rietz, the singer and former wife of F.L. Benda. He became registrar (1809) and secretary (1815) of the Archives in Schwerin. He composed symphonies, an overture, concertos, flute duets, a sonata for clarinet or violin and piano, and church music, but he was considered to be at his best as a composer of songs; several collections of these were published including the *Lieder und Gesänge mit Begleitung des Klavier oder Harfe* (1801), *Lieder mit Begleitung des Pianoforte* (1803) and *Sechs deutsche Lieder mit Fortepiano*.

E. VAN DER STRAETEN/JOHN D. DRAKE

**Heine, Heinrich** [Harry] (*b* Düsseldorf, 13 Dec 1797; *d* Paris, 17 Feb 1856). German poet, prose writer and critic. Heine received his early education at the Lyzeum in Düsseldorf and in 1816 went to Hamburg to work in the banking office of his uncle, Salomon Heine. After the failure in 1819 of a business venture his uncle had financed for him (Harry Heine & Co.), he entered the University of Bonn and attended A.W. Schlegel's lectures on literature. In 1820 he matriculated as a law student at the University of Göttingen but was suspended the next year for participating in a duel. Between 1821 and 1823 he continued his studies in Berlin, where he had the opportunity to hear Hegel. A frequent guest at the salon of Rahel Varnhagen von Ense, he made the acquaintance of Alexander von Humboldt, Bettina Brentano and Adalbert von Chamisso.

During his Berlin years he published *Gedichte* and *Tragödien*, the latter containing the drama *William Ratcliff*. A walking tour of the Harz region in 1824 provided the impetus for the satirical-idyllic *Die Harzreise* (published in volume i of *Reisebilder*, 1826–31). After completing his law studies at Göttingen in 1825, Heine – by birth a Jew – was baptized by a Lutheran pastor, presumably to facilitate entry into the civil service or an academic career. The appearance of his *Buch der Lieder* in 1827 consolidated his reputation as one of the foremost lyric poets of the day.

Following an unsuccessful attempt to obtain a professorship in Munich and a period of travel in Italy, he settled briefly in Hamburg. His republican spirit was aroused by the revolution of July 1830 and he moved to Paris in May 1831. Apart from two short trips to Germany (1843 and 1844), he remained in the French capital for the last 25 years of his life, earning his living as a correspondent for various German journals and as a contributor to French periodicals on subjects ranging from literature and music to politics. While his works were banned as subversive by the German Federal Assembly in 1835, in the following year he was granted a small pension by the French government. His penetrating critique of recent trends in German literature, *Die romantische Schule*, also appeared in 1836. Between 1834 and 1840 his journalistic writings were published in four volumes as *Der Salon*.

In 1841 he married Eugénie Mirat, a woman of little education with whom he had lived since 1834. By 1848 spinal tuberculosis of syphilitic origin was diagnosed; Heine soon became paralysed and was confined to what he called his 'mattress-tomb' for the remainder of his days. In these last years, however, he produced some of his finest verses, publishing them in *Romanzero* (1851) and *Gedichte 1853 und 1854*. In both collections the poet faces the pain of a slow death with characteristic irony.

Heine's writings on music are among the first to accord primacy of place to social issues. As correspondent for the Augsburg *Allgemeine Zeitung*, he painted a vivid portrait of the Parisian musical scene between 1830 and 1840. Witty, brilliant and sometimes malicious, his reports document the important shift in cultural dominance from the aristocratic salon to the large audiences of industrial society. For Heine, the contrast between the styles of Rossini and Meyerbeer is emblematic of this shift. Whereas the ingratiating melodies of the Italian opera composer represent a form of individual expression, Meyerbeer's emphasis on harmony, spectacle and striking orchestral effects was directed towards the masses. So too were the 'primeval grandeur' of Berlioz's music (which Heine was among the first to champion) and the pyrotechnics of virtuosos such as Liszt and Paganini. Heine's thoughts on other musicians were equally trenchant. He predicted that Chopin would have a greater impact on the development of composition than on the history of performance, described Spontini as consumed by jealousy of Meyerbeer, and found Donizetti's fertility 'not inferior to a rabbit's'.

Heine's poetry was set by almost all the major composers of the 19th century (beginning with Schubert, whose six settings were posthumously published in *Schwanengesang*, 1829) and by a host of minor figures as well. While his verses remained popular as vehicles for music well into the 20th century, the previous century alone witnessed the production of approximately 8000 lieder on Heine texts. Schumann launched his 'year of song' (1840) with a *Liederkreis* (op.24) on a poetic cycle from the 'Junge Leiden' section of the *Buch der Lieder*. For the ever-popular *Dichterliebe*, he selected 16 (originally 20) poems from the *Lyrisches Intermezzo*. Altogether Schumann set 43 of Heine's verses. Other settings include those of Robert Franz (68), Mendelssohn (7), Loewe (9), Liszt (7), Brahms (6), Wolf (18), Grieg (8), Richard Strauss (6) and Berg (3).

Although Heine's poems contain many echoes of the *Volkslied*, a feature that helps to account for their immense attraction to composers, they often cast the genre in an ironic light. According to the poet Eichendorff, 'almost every one of Heine's beautiful lyrics ends with a suicide', a destruction of the illusion created by his recourse to the stock-in-trade of romantic imagery. Even the most adept composers found it a challenge to convey Heine's irony in music.

Heine also exercised a notable impact on music for dance and the theatre. Although a performance of the ballet for which he wrote a scenario in 1846 (*Der Doktor Faust*) failed to materialize, a narrative from *Elementargeister* served as the basis for the Adam–Perrot–Gautier

*Giselle, ou les Wilis* (1841). Wagner drew on *Aus den Memoiren des Herrn Schnabelewopski* for the text of *Der fliegende Holländer* and his *Tannhäuser* may owe something to Heine's version of the tale in *Götter im Exil. William Ratcliffe* in turn served as the point of departure for opera librettos set by Cui, Mauritius Vavrinecz, Mascagni, Leroux, Dopper and Andreae.

JOHN DAVERIO

**Heinefetter.** German family of singers.

(1) **Sabine Heinefetter** (*b* Mainz, 19 Aug 1809; *d* Illenau, 18 Nov 1872). Soprano. She made her début in 1824 in Peter Ritter's *Der Mandarin* at Frankfurt. She was advised by Spohr to sign a contract for life with the Kassel Opera; but in 1829 she fled to Paris, where she studied with Davidde Banderali and Giovanni Tadolini, and sang at the Théâtre Italien until 1842. She created Adina in *L'elisir d'amore* at the Teatro Cannobiana, Milan (1832), and sang Alaide in *La straniera* at Danzig (1833). In 1846 she appeared in Marseilles, where she married shortly afterwards. She continued to sing occasionally until 1856.

(2) **Clara Stöckl-Heinefetter** (*b* Mainz, 7 Sept 1813; *d* Vienna, 23 Feb 1857). Soprano, sister of (1) Sabine Heinefetter. After studying with her sister and then with Giuseppe Ciccimarra in Vienna, she made her début there in 1831 as Agathe (Sabine sang Aennchen) at the Kärntnertortheater, where she was engaged for many years; her roles included Smeton (*Anna Bolena*), Lucrezia Borgia, Zayda (*Dom Sébastien*), Alice (*Robert le diable*) and Spohr's Jessonda. She made her London début in 1840 at the St James's Theatre as Agathe, returning in 1842 to Covent Garden, where she sang Donna Anna, Susanna, Pamina, Leonore (*Fidelio*), Norma and Valentine in the British première of *Les Huguenots*; she was praised for her 'exquisite sweetness of tone'. She retired in 1850.

(3) **Kathinka Heinefetter** (*b* Mainz, 12 Sept 1819; *d* Freiburg, 20 Dec 1858). Sister of (1) Sabine Heinefetter, with whom she first studied. She made her début at Frankfurt in 1837, then appeared at the Théâtre de la Monnaie (1840). After further study with Louis Ponchard, she sang Donna Elvira at the Paris Opéra (1841). Her career was temporarily halted in 1842 by the scandal when one of her lovers murdered a rival in her apartment, but she later appeared in Hamburg, Berlin, Vienna and Budapest, singing Norma, Rachel (*La Juive*), Agathe and Valentine. She retired in 1858, only months before her early death.

CHARLES JAHANT/ELIZABETH FORBES

**Heinen, Jeannot** [Jean-Baptiste Heinen] (*b* Luxembourg, 25 Dec 1937). Luxembourgeois composer. Originally self-taught (he wrote his first compositions when nine years old), he studied in Luxembourg with Edmond Cigrang and Walter Kolneder, in Saarbrücken with Heinrich Konietzny, and in Karlsruhe with Roland Weber and Humphrey Searle. He also took a composition course with Krenek. On the recommendation of Krenek and Kolneder, he left Luxembourg and in 1970 was appointed as head of music documentation at SWF in Baden-Baden.

His prolific output shows the influence of Impressionism as well as atonality, the neo-baroque and experimental trends, while retaining a distinctive personal style. He has written over 400 works in a variety of genres, especially for orchestra and for chamber groups. He is married to the violinist Dora Entcheva who has performed his works for violin in Luxembourg, Germany and elsewhere. He organized the Baden-Baden Brahms symposia (1986–92) and is president of Korrespondenzen, a society for the promotion of new music in Baden-Baden.

WORKS

Works for organ, songs, choruses, numerous arrs.

LOLL WEBER

**Heinichen, Johann David** (*b* Krössuln, nr Weissenfels, 17 April 1683; *d* Dresden, 16 July 1729). German composer and theorist. He was the son of David Heinichen who, after an education at Leipzig's Thomasschule and the university, moved to Krössuln for a lifelong career as pastor. Like his father, Heinichen studied at the Thomasschule, having displayed considerable musical gifts as a child. (According to his own testimony in *Der General-Bass in der Composition*, these involved composing and conducting sacred music in local churches.) He enrolled at the Thomasschule on 30 March 1695 and his education included harpsichord and organ lessons with Johann Kuhnau. Heinichen's talent impressed Kuhnau, who employed the young student as his assistant, with responsibility for copying and correcting Kuhnau's own manuscripts.

In 1702 Heinichen entered Leipzig University as a law student, completing the degree in 1706 and immediately moving to Weissenfels to begin a practice as an advocate. Here the musical life of the court, under the patronage of Duke Johann Georg, seems soon to have attracted Heinichen away from his career in law. Johann Philipp

Krieger, the Kapellmeister, apparently encouraged Heinichen to write music for court occasions. In addition, Heinichen came into contact with other composers including Gottfried Grünewald, Krieger's assistant, the court organist Christian Schieferdecker, and for a while Reinhard Keiser, Hamburg's leading opera composer. In 1709 Heinichen returned to Leipzig at the request of the manager of the opera house, for which he composed several operas. He also became the director of the collegium musicum that met at Lehmann's coffee house. During this period Heinichen was appointed composer to the court of Zeitz and opera composer to the court of Naumburg. During this year, if not earlier, he found time to write the first version of his thoroughbass treatise, published in 1711.

In 1710 Heinichen gave up his successful career in Leipzig to travel to Venice, the centre of Italian operatic music, the style of which Heinichen was determined to learn at first hand. In Venice he was commissioned to write two operas for the Teatro S Angelo, *Mario* and *Le passioni per troppo amore*, both successfully produced in 1713. In Venice Heinichen came into personal contact with numerous important Italian musicians and composers, including Gasparini, Pollaroli, Lotti and Vivaldi. In 1712 he went to Rome, where he gave music lessons to the young Prince Leopold of Anhalt-Cöthen, later J.S. Bach's patron. No further details of Heinichen's travels in Italy have been found. He remained in Italy, mainly in Venice, until 1716. His growing fame as a composer attracted the attention of the Prince-Elector of Saxony, who engaged him as Kapellmeister to the court at Dresden, a post Heinichen assumed in 1717 and retained all his life.

In Dresden Heinichen shared the duties as Kapellmeister with Johann Christoph Schmidt. The court of August the Strong maintained one of the most important musical establishments in Europe. In the court orchestra Heinichen found such outstanding musicians as the violinists Veracini, Volumier and Pisendel (one of Heinichen's pupils), the flautists Buffardin, Hebenstreit and Quantz, and the lutenist S.L. Weiss. For the court theatre he wrote only one opera, *Flavio Crispo*, which was never performed. For reasons which remain obscure, the Italian opera company at court was dissolved by order of the king when quarrels broke out between the composer and the singers Senesino and Berselli. The score of *Flavio Crispo* breaks off without explanation near the end of the final act, as if the composer gave it up at the time of these disagreements. Although opera no longer had any significance in Heinichen's career, he wrote a large amount of music, both secular (in the form of cantatas, serenades and instrumental works) and sacred, in numerous scores largely performed in the royal chapel. During Heinichen's final years he revised and rewrote his earlier thoroughbass manual, publishing it in 1728 at his own expense. He died from tuberculosis, and was buried on 19 July 1729 in the cemetery of the Johanniskirche.

Heinichen composed in almost every popular form of his day except keyboard music. Most of his scores were written specifically for his duties as court Kapellmeister. Seibel listed more than 250 works, many of which – including some of the operas and church music – were lost in World War II. None of his music was published during his lifetime, and very little has appeared in modern editions. His musical style proves his own credo that music should be composed in a style mixing the national idioms of German, French and Italian music. As such, his music is somewhat more *galant* or pre-Classical in character than reminiscent of the contrapuntal complexity associated with north German Baroque composers. His instrumental concertos, solo and trio sonatas are clearly Italian in stylistic origins; however, Heinichen was particularly interested in deriving unusual instrumental colours, and his works (as Hausswald showed) are masterful displays of unusual instrumental combinations and sonorities. His vocal music, especially the secular works, shows obvious connections with Venetian operatic practice of the early 18th century, and little remains in these scores of the greater musical-dramatic scope of earlier German opera composers such as Keiser.

It is, however, his great treatise, *Der General-Bass in der Composition*, that assures Heinichen's continuing position at the forefront of Baroque theorists. He was praised and honoured by his contemporaries for this work; Charles Burney (*General History of Music*, ii, 459) called him 'the Rameau of Germany'. Mattheson and Scheibe were among the many prominent 18th-century writers to draw attention to Heinichen's treatise. *Der General-Bass* is an encyclopedia of knowledge not only for thoroughbass practice but also for a wide range of information both theoretical and philosophical concerning the art of composition (see Buelow, *Thorough-Bass Accompaniment*). The study of thoroughbass was for Heinichen not just a means of acquiring keyboard facility to accompany from a basso continuo, but also the best method for learning the entire technique of composition.

*Der General-Bass in der Composition* is not a new edition of his first treatise, but rather a complete rewriting that almost doubles the content of the original book. It was completed following Heinichen's rich musical experiences in Italy, and its new content reflects Italian influence on his ideas, especially as related to performing practices. The *Einleitung*, new to the second version, comprises a manual for composers, and this section provides us with our most concrete insights into German compositional principles of musical rhetoric and the expression of the affections. Another invaluable addition to his treatise are the extensive comments on the realization of unfigured basses, which conclude with a practical demonstration of how one would realize the unfigured bass to Alessandro Scarlatti's cantata, *Lascia, deh lascia, al fine*. Throughout the *General-Bass* Heinichen inserted copious footnote annotations sounding very much like a teacher's enthusiastic asides to his students. These remarks frequently give important clues to Heinichen's aesthetic and theoretical doctrines. Few composers of the Baroque have left us such confident, experience-tested opinions about their musical art.

WORKS

OPERAS

Der Karneval von Venedig, oder Der angenehme Betrug, ?Weissenfels, 1705, 1 aria *D-SWl*

Hercules, ?Leipzig, *c*1709, 11 arias *SWl*

GEORGE J. BUELOW

**Heininen, Paavo (Johannes)** (*b* Helsinki, 13 Jan 1938). Finnish composer. After taking private lessons in composition from Meriläinen he studied at the Sibelius Academy, Helsinki (1956–60), with Aarre Merikanto, Rautavaara, Englund and Kokkonen, at the Staatliche Hochschule für Musik, Cologne (1960–61), with B.A. Zimmermann and Rudolf Petzold and at the Juilliard School (1961–2) with Persichetti and Steuerman. Heininen taught music theory at the Turku Music School (1963–6) and from 1966 theory and composition at the Sibelius Academy, where he succeeded Rautavaara as professor of composition in 1993. His teaching is known for its stress on strict methods while encouraging broad perspectives, and an entire generation of Finnish composers, several of them well-known internationally, can be counted as his former students. He has performed as a pianist and, occasionally, conductor of his own music. As a writer he is known for his detailed and penetrating essays on the music of contemporary Finnish composers as well as other subjects related to composing.

Two distinct periods can be identified in Heininen's output: 12-note and post-serial. In his Symphony no.1 (1958, revised 1960) he adopted a 12-note method which in some later works governed other parameters than pitch alone. This is exemplified in his large-scale orchestral works (e.g. the crypto-Mahlerian *Adagio*, 1963, revised 1966, and Symphony no.3, 1969, revised 1977); they are characterized by richness and variety of detail within a monumental form, a quality he admires in the symphonies of Bruckner, Mahler and Hartmann. In contrast to these heavy and complex works, often of considerable length, there is another strain of compositions which are more airy and spacious in character; they play with traditional forms and techniques in a quasi neo-classical manner but without relinquishing an opulence of stimuli or his own integrity of style (*Petite symphonie joyeuse*, 1962; Piano Concerto no.2, 1966). His move into a post-serial style was a gradual development from the early 1960s through to the latter half of the 1970s. The treatment of pitch organization became less rugged and less dominant, restricted aleatory and field-type textures gained importance (Piano Concerto no.1, 1964), timbre became more significant (*Musique d'été*, 1963), rhythm more varied and harmony more powerful. The synthesis of all these developments is a multi-dimensional style, in which the rationalism of the serial period is replaced by a fuzzy logic, as if the music has evolved from a stream of consciousness in which, as the composer says of *Dia* (1979), 'all parameters are of equal value as directions of musical argument, and all their combinations equally probable'.

Essentially a composer of instrumental music, Heininen tends also to treat his vocal parts instrumentally, as in *Reality* for soprano and ten instruments (1978) or the opera *Silkkirumpu* ('The Damask Drum', 1983), subtitled a 'concerto for singers, players, words, images and movements'. Especially rich and varied is his solo and chamber music, which, along with delightful smaller pieces (the *Jeu*, *Discantus* and *Cantilena* series), also includes such important works as the piano sonata *Poesia squillante ed incandescente* (1974) and the two string quartets (1974; 1992, revised 1994), equal in weight to his symphonic works and concertos.

Worthy of mention also are Heininen's reconstructions of two scores by his teacher Merikanto (*Symphonic Study*, 1928, and String Sextet, 1932). This enabled him to imagine what Merikanto's Third Violin Concerto, which the composer destroyed, would have been like; in a rare act of identification that went far beyond completing an unfinished score, Heininen composed the violin concerto from scratch (*Tuuminki*, 1993) from scratch in the style and spirit of Merikanto. He has continued this idea in *Supplements to the History of Finish Chamber Music* (1999) which consists of two string quartets in the style of Leevi Made toja.

WORKS
*(selective list)*

STAGE

Silkkirumpu [The Damask Drum]: Conc. for singers, players, words, images and movements ... (op, 1, Heininen after nō play, trans. E.-L. Manner), op.45, 1983; Veitsi [The Knife] (op, 2, V. Meri), op.55, 1988

ORCHESTRAL

Sym. no.1, op.3, 1958, rev. 1960; Preambolo, op.4, 1959; Tripartita, op.5, 1959; Adagietto, op.5a, 1959; Conc. for Str Orch, op.6, 1959, rev. 1963; Petite symphonie joyeuse (Sym. no.2), op.9, 1962; Soggetto, op.10, 1963; Adagio ... concerto per orchestra in forma di variazioni ..., op.12, 1963, rev. 1966; Pf Conc. no.1, op.13, 1964; Pf Conc. no.2, op.15, 1966; Arioso, op.16, str, 1967; Sym. no.3, op.20, 1969, rev. 1977; Sym. no.4, op.27, 1971; Dia, op.36, 1979; Tritopos, op.38, 1977; Attitude, op.44, 1980; Pf Conc. no.3, op.46, 1981; Tyttöjen kävely ruusulehdossa [Floral View with Maidens Singing], op.47, str, 1982; Dicta, op.49, 9 + 14 players distributed among the audience, 1983; Sax Conc., op.50, 1983; KauToKei, op.52, double str orch, 1985; Vc Conc., op.53, 1985; Tuuminki [A Notion], vn conc., 1993; 2 Movements, op.66a, str, 1994–5; 2 Essays, op.66b, str, 1994–6; 3 Proceedings, op.66c, 1994–6; 3 Beings, op.66, 1994–7; Lamentation and Praise, op.68, str/pf, 1995; 5 Lightings, op.66f, 1998; Fanfaareja [Fanfares], op.70, 1997; Murasaki in Casa Ando, op.72, chbr orch, 1998; Une sourir – un sphinx, str, 1998

CHAMBER

Sonata basso, vc/db, pf, 1957, rev. 1993; Qnt, op.7, fl, a sax, perc, vib, pf, 1961; Musique d'été, op.11, fl, cl, perc, vib, pf, vn, vc, 1963, rev. 1967; Sonata, op.25, vn, pf, 1970; Arietta, op.25b, vn, pf, 1970; 2 chansons, op.31, vc, pf/orch, 1976; Str Qt no.1, op.32c, 1974; Gymel, op.39, bn, tape, 1978; Jeu I, op.42, fl, pf, 1980; Jeu II, op.43, vn, pf, 1980; Short I, op.58, cl, vc, 1990; Veitsivalssi [The Knife Waltz], op.55b, 2 pf, 1991; Belline, op.59 no.1, tuned perc (5 players), 1996; Utazawa no e (Short II), op.61, fl, gui, 1991; Anadry.img, op.63, sax qt, 1993; Cantionale piccola, op.65, hn, tpt, trbn, tuba, 1993, rev. 1995; Str Qt no.2 'Anadyr.mpl', op.64, 1994; Lamentation and Praise, op.68, 8 vc, 1995; Small Wolfstock, sax qt, 1996; Vanajana, sax qt, 1996; Bookends, big band, 1997; Wolfstock, big band, 1997; Kiasma Fanfares, op.73, 9 players, 1998; Mikä ilta, mikä valaistus [What an evening, what a lighting], 9 insts/str wnt, 1999; Supplements to the History of Finnish Chamber Music – Chapter 'Leevi Madetoja and the Str Qt': Q1, F, 1999, Movts from Qt 'The Bird' or 'The Parisian', 1999

KEYBOARD

Muistovihko [Memorabilia], pf, 1956, rev. 1990; 'Sonata II', pf, 1956, rev. 1992; Toccata, op.1, pf, 1956; Sonatina 1957, op.2, pf, 1957; Easter Music, org, 1962, rev. 1990; Dedicatio FH, org, 1966, rev. 1990; Oculus aquilae, op.18, org, 1968; Libretto della primavera, op.28, pf, 1971; ... irdisch gewesen zu sein ..., op.29a, org, 1972; ... des säglichen Zeit ..., op.29b, org, 1972; ... poesia squillante ed incandescente ..., sonata, op.32a, pf, 1974; Préludes – études – poèmes, op.32b, pf, 1974; Poésies – periphrases, op.32d, pf, 1975; Cinq moments de jour, op.51, pf, 1984; Triple aperçu d'une amie qui fut, pf, 1984; Touché, op.57, org, 1989; Objects, op.62, pf, 1993; Kellot ja kuorot [Chimes and Chains], op.62b, pf, 1992; Belline, op.59 no.2, pf, 1996; Sinipiano [Bluekeys], pf, 1998

OTHER SOLO INSTRUMENTAL AND TAPE

Discantus I, op.14, a fl/fl, 1965; Discantus II, op.21, cl, 1969; Poésie des pensées, op.23, vc, 1970; Cantilena I, op.24, va, 1970, arr. vn/vc; Cantilena II, op.26, vc, 1970; Discantus III, op.33, a sax, 1976; Cantilena III, op.34, vn, 1976; Maiandros, op.37, tape, 1977; Touching, op.40, gui, 1978; Beateth, op.48, perc, 1982; Exercises, op.60, accdn, 1991; Winter Ballad, op.65b no.2, trbn, 1993; Neljä vaskirunoa [4 Brass Poems], op.65, [no.1] hn, [no.2], tpt, [no.3] trbn, [no.4] tuba, 1995; Utazawa no midori e, op.61 bis, gui, 1996; Siniloimi, op.71 bis, gui, 1997; Huiluviia [Flute Line], op.7 bis no.2, fl, 1998

CHORAL

The Autumns (Basho and others, after R.H. Blyth), SATB, 1970; ... cor meum ... (G. Björling), op.35, SATB, 1979; Virsi -81 [Hymn -81] (Heininen), SATB, org, 1981; 4 Lullabies (S. von Schoultz, J. Linjama, Heininen), op.56a, TTBB, 1986; Readings in Music History, op.xyz, speaking singers, 1986, rev. 1992; Poetiikka (Heininen, R. Queneau, trans. Heininen, Meri), op.56b, TTBB, 1986–90; Kasvot (Visages) (G. Fröding, H. Juvonen), op.56c, TTBB, 1990; Etydejä [Etudes] (textless), op.56d, TTBB, 1990; Tarinankulmia [Peripeties] (Homeros, trans. O. Manninen, M. Proust, trans. Heininen, Saiichi Maruya, trans. Heininen, J. Joyce, trans. P. Saarikoski), op.67, SATB, 1994; Me [We] (E. Johnson, textless, M.L. Vartio), op.74 no.1, TTBB, 1998; Kaikuja [Echoes] (textless, E.A. Karlfeldt), op.56/74 no.2, SATB, 1998; Taivas, kukkamaa [Heaven, Blooming Earth] (3 tangos), TTBB, 1999; Toinen taivas, kukkamaa [Another Heaven, Blooming Earth] (3 tangos), TTBB, 1999

VOCAL

Canto di natale (da Todi, Finnish trans. Tynni), op.8, S, pf, 1961; Eri-aikaisia lauluja [Multi-Timely Songs] (Meri, Jacopone da Todi, trans. A. Tynni), S, pf, 1961, 1990, 1992; Cantico delle creature (St Francis of Assisi), op.17, Bar, org/pf/orch, 1968; Schatten der Erde (A. Gryphius, R.M. Rilke, F. Hölderlin), op.30, S, pf, 1973; Reality (E. Montale, P.J. Jouve, A. Nin), op.41, S, fl, ob, cl, bn, hn, perc, pf, vn, va, vc, 1978; 3 Songs from Reality, op.41b, S, pf, 1991, rev. S, 9 insts, 1997; Kustantajan tyyliharjoitukset [The Publisher's Exercises in Style] (Meri, Eng. trans. A. Bentley), op.55c, Bar, pf, 1992; Runoilija puhuu [The Poet Speaks] (Meri), op.55d, T, pf, 1992; Hyräilyjä [Hums] (textless), op.69, 1v, pf, 1997

ILKKA ORAMO

**Heiniö, Mikko (Kyösti)** (*b* Tampere, 18 May 1948). Finnish composer and musicologist. He studied at the Sibelius Academy in Helsinki (1971–5), where he was taught the piano by Liisa Pohjola and composition by Kokkonen. He then studied composition in Berlin with Szalonek (1975–7) and musicology at the University of Helsinki, where he lectured between 1977 and 1985. He received his doctorate in 1984 and has been professor of musicology at the University of Turku since 1986. As well as holding other administrative positions, he is chairman of the Society of Finnish Composers.

One of the most versatile personalities of Finnish musical life, Heiniö successfully combines roles of both composer and musicologist, and his pioneering research into modern Finnish music has had influence upon his creative work. His early compositions were neo-classical and freely tonal, in which he also experimented with serial, aleatory, colouristic and minimalist procedures. His mature work can be described as post-modernist, characterized by a Mahlerian plurality: dodecaphonic features are juxtaposed with melodic borrowings, Latin rhythms and popular dances. His music refreshingly mixes structural awareness and spontaneity and evokes an emotional response thanks to its Mediterranean sensuality and rhythmic energy, while the dramaturgical contours of his works are always easy to grasp. As the composer has said, 'My ideal is of music in which the great surface spans and the spirit of the piece are immediately discernible.'

One of Heiniö's central orchestral works is *Possible Worlds: a Symphony* (1987), which, with its irony, nostalgia and pathos, presents a universe of diverse moods and styles. In his unique series of six piano concertos he moves far from the traditional genre: the Third Piano Concerto (1981) combines dodecaphony with Latin tone colour; the fourth, *Genom kvällen* ('Through the Evening', 1986), with its two movements (a structure typical of Heiniö), includes mixed chorus and the piano is given a chiefly colouristic role; the Sixth Piano Concerto 'Hermes' (1994), based on Greek mythology, contains parts for a soprano and dancers. Other notable works include the song cycle *Vuelo de alambre* (1983), which utilizes polyrhythmics, carnival tunes and minimalist repetition, *Wind Pictures* (1991) for synthesizer, mixed chorus and strings, in which biographical and historical dimensions are interlocked, and the Trio for violin, cello and piano (1988), subtitled 'Self-Portait with Reich and Joplin – in the presence of Schumann'.

VEIJO MURTOMÄKI

**Heinisch, József** [Joseph] (*b* before 1800; *d* Pest, 7 Nov 1840). Hungarian composer and theatre conductor, probably of Austrian origin. In his youth he moved in the society of Beethoven. About 1812 he entered the service of the Transylvanian Count Farkas Bethlen as a music teacher. From 1824 to 1830 he worked as a theatre conductor in Kolozsvár (now Cluj-Napoca), and from 1830 to 1835 he was active in Kassa (now Košice,

Slovakia), where the first performance of his opera *Mátyás királynak választása* ('The Election of Mátyás as King') was given. From 1836 to 1837 he was conductor of the Hungarian theatre company in Buda. The Hungarian Theatre in Pest, centre of opera in Hungary until 1884, was opened on 22 August 1837 with his overture *Thalia diadala az előítéleteken* ('Thalia's Victory over Prejudice'), and on the same day he also conducted the first opera performance there, Rossini's *Il barbiere di Siviglia*. Until his death he was the conductor (from 1838, under Ferenc Erkel, second conductor) of the theatre.

Heinisch was one of the pioneers of opera in Hungary, and his compositions and arrangements contributed significantly to the enlargement of the repertory of the Hungarian theatre. He composed mainly in the international opera style of his time but could also express himself in the *verbunkos* style. Although possessing little originality himself, he was one of the forerunners of the 'father of Hungarian opera', Erkel. His compositions and arrangements, all left in manuscript, include an opera, three ballets, a pantomimed comedy, incidental music and arrangements of earlier Hungarian operatic music for the Hungarian theatre.

FERENC BÓNIS

**Heinitz, Wilhelm** (*b* Hamburg-Altona, 9 Dec 1883; *d* Hamburg, 31 March 1963). German musicologist. He began his career as a bassoonist. In 1915 he became assistant in the phonetics laboratory for African and South Sea languages at the University of Hamburg. After taking a doctorate in psychology at Kiel (1920), and completing his *Habilitation* in Hamburg (1931), he founded the department of research into comparative musicology at the Colonial Institute of Hamburg University, which he directed until his retirement in 1949. He became successively lecturer (1931), reader and research fellow (1935). In 1945 he founded the Landesverband Hamburg der Tonkünstler und Musiklehrer. In addition to his writings on music, psychology and phonetics, he wrote ten volumes of lyric poetry and gave some 300 radio talks.

In the Colonial Institute his association with Carl Meinhof, an expert in African studies, and the phonetician Panconcelli Calzia developed his own interest in African studies, theory of tone and sound, and phonetics. His early scientific articles concerned biological factors involved in music, including motor components and the relationship between bearing and attitude on the one hand and production and reproduction of music on the other. His theory of homogeneity is founded on the works of Ellis, Rutz, Sievers and Bekking. His papers are in the Staats- und Universitätsbibliothek in Hamburg (*D-Hs*).

E. SCHULZE-MEISTER/PAMELA M. POTTER

**Heinlein.** *See* HAINLEIN family.

**Heinlein** [Funcke], **Federico** (*b* Berlin, 25 Jan 1912). Chilean composer and critic, of German descent. He started his musical training in Argentina and continued it at the University of Berlin (1929–34), where he studied composition with Wilhelm Klatte and Paul Graener, and musicology with Schering and Blume. On his return to Buenos Aires he worked as an assistant to Fritz Busch and Erich Kleiber at the Teatro Colón (1935–40), and in 1940 he emigrated to Chile. In 1949 he travelled to the Blandford Summer School, England, to take courses in composition (Boulanger), clavichord and harpsichord (Dart), and choral direction and piano teaching (Anthony Hopkins). Back in Chile he became active as a teacher and piano accompanist, also appearing in chamber music recitals. He taught chamber music and other subjects at the University of Chile (1954–89). He became music and dance critic on the daily newspaper *El mercurio* in 1954 and also published essays in specialist journals such as the *Revista musical chilena*.

Heinlein became known as a composer in Chile in 1943 with his *Dos canciones*, based on folk motifs. Since then, several of his works have been published, recorded and awarded prizes. He has had commissions from diverse institutions and performers, both in Chile and abroad. He became a member of the National Association of

Composers in 1952 and has represented the country at international events. Heinlein is particularly drawn to vocal music and that designed for intimate venues. His rigorously constructed pieces show an eclecticism that ranges between tonality and 12-note serialism.

WORKS

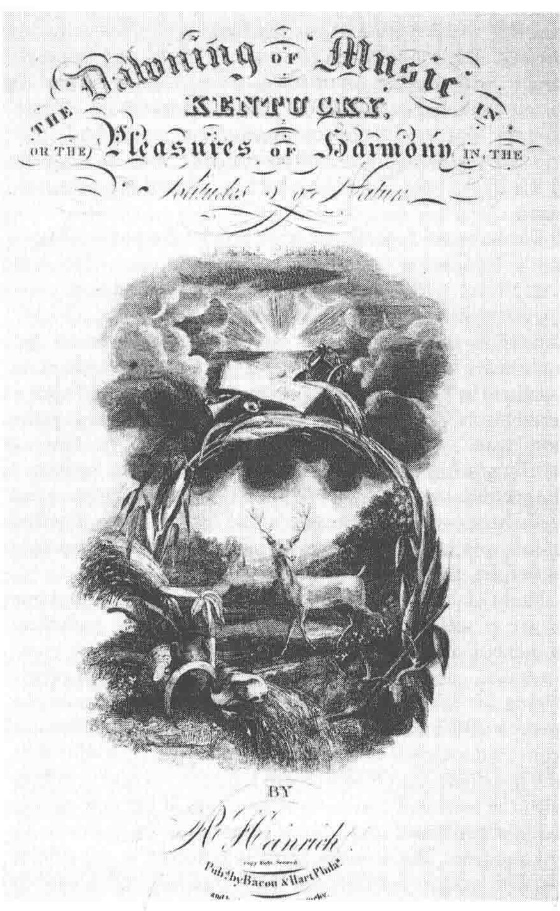
FERNANDO GARCÍA

**Heinlein, Paul.** *See* HAINLEIN, PAUL.

**Heinrich, Anthony Philip** [Anton Philipp] (*b* Schönbüchel [now Krásný Buk], Bohemia, 11 March 1781; *d* New York, 3 May 1861). American composer of German-Bohemian birth. The adopted son of a wealthy uncle, Heinrich inherited property and a prospering business. However, the Napoleonic wars and the ensuing Austrian financial crash of 1811 destroyed his entire inheritance. He had visited America in 1805, and in 1810 had tried unsuccessfully to establish his business there. Following another abortive business venture in America (1816–17) and the death of his wife, a Bostonian, he remained to embark upon a musical career.



Although Heinrich had studied the violin and piano in his youth, he was essentially self-taught. Nevertheless, he became a dominant American figure as composer in the mid-19th century. His career led him to Philadelphia, Pittsburgh, Kentucky, Boston and finally New York, where he settled in 1837. He was considered America's first 'professional' composer, and critics termed him 'the Beethoven of America'. At New York in 1842, 1846 and 1853, and at Boston in 1846, 'Father' Heinrich was the featured composer in festival concerts that included several of his large orchestral works.

Heinrich's life is prominently linked with the history of concert music in America during the first half of the 19th century. As a violinist he led one of the first known performances of a Beethoven symphony (probably the First Symphony) in America (Lexington, Kentucky, 12 November 1817). He was chairman of the organizational meeting on 12 April 1842 of the New York Philharmonic Society. The scope of his personal contacts and acquaintances with important men in fields outside music is astonishing: he was close to diplomats, legislators, judges, lawyers, doctors, professors, naturalists, poets and writers. Indeed, he was granted an audience with a president of the USA, John Tyler, at which he played his compositions.

Unlike most American composers of the period, Heinrich's reputation extended beyond America. He was acquainted with Mendelssohn, and Marschner praised his compositions. He spent the years 1826–31, 1833–7 and 1856–9 in Europe, at times playing violin in the orchestras of Drury Lane and Vauxhall Gardens in London. In 1836 his compositions were acclaimed after a concert at Graz. The same year, his international reputation was acknowledged by his inclusion in Gustav Schilling's *Encyclopädie* and it was confirmed in Fétis's *Biographie universelle* (1839). His career was crowned with three concerts at Prague in 1857, the last one devoted exclusively to his orchestral works. Despite this notable career, he died in poverty and neglect.

Heinrich's compositions exemplify the Romantic view of art as self-expression. Many of his works, including numerous autobiographical songs and descriptive compositions, can be traced to specific experiences and events during his life. Shortly before beginning to compose, he made a 300-mile journey by foot through the wilderness from Philadelphia to Pittsburgh, followed by a 400-mile journey down the Ohio River to Kentucky. This encounter with the frontiers and natural wonders of the new nation made a profound and lasting impression on his creative imagination. The frontier spirit is reflected in the title of his first major publication, *The Dawning of Music in Kentucky, or The Pleasures of Harmony in the Solitudes of Nature* (1820), a large, ambitious and varied collection of songs and pieces for piano and violin (see illustration), and in *The Sylviad, or Minstrelsy of Nature in the Wilds of N. America* (1823, 1825–6), both without precedent in American publishing. Heinrich had written his first composition (1818) and others during his solitary habitation of a log house in the woods around Bardstown, Kentucky. Throughout his life he fostered the Romantic image of himself as the log-house composer, 'tutored by nature'.

Like many other 19th-century composers, Heinrich was particularly interested in writing descriptive music. From his frontier experiences, the American Indian made the deepest impression, as nine of his orchestral works show; his first composition conceived for orchestra concerned the Indian (*Pushmataha, a Venerable Chief of a Western Tribe of Indians*, 1831). He seems to have been the first to attempt a serious treatment in music of the idea of the American Indian, at any rate in the larger forms. One of America's natural wonders was orchestrally described in *The War of the Elements and the Thundering of Niagara*, and Heinrich's patriotism found expression in, among other works, *The Jubilee*, a large composition for orchestra, chorus and solo voices, tracing the history of America from the Pilgrims up to the War of Independence. Two other descriptive works for orchestra show fruits of his friendship with John James Audubon: *The Columbiad, or Migration of American Wild Passenger Pigeons* and *The Ornithological Combat of Kings, or The Condor of the Andes and the Eagle of the Cordilleras*, the

*Title-page of Heinrich's 'The Dawning of Music in Kentucky' (Philadelphia: Bacon & Hart, 1820)*

latter considered by Heinrich as his best work. Heinrich is buried in the Audubon vault in New Trinity Cemetery, New York.

Heinrich's compositions are out of the ordinary and quite original. Although eccentric, occasionally rough, and unusually complex and elaborate, his works are truly expressive and never without interest. The sources of his musical style are found in Haydn and to some extent Beethoven, but they have the greater ornateness of Italian opera and often a freer use of chromaticism both melodically and harmonically. Heinrich's melodic style is strongly influenced by classical dance music, and melodic quotation plays an important role in his compositional technique, particularly self-quotation and the quotation of popular, patriotic tunes (e.g. *Hail Columbia*, *Yankee Doodle*, *God Save the King*). The forms Heinrich favoured most are those of the dance and the theme with variations. Generally, he did not develop material thematically or formally, but juxtaposed successive sections. As a result, his works often have the characteristics of an extemporized fantasy (e.g. *A Chromatic Ramble of the Peregrine Harmonist*, for piano).

Heinrich consistently rewrote his works and composed for a wide variety of performance media, frequently employing the same musical materials in different ones. Since he was a violinist and pianist, and his first creative efforts were improvisations on the violin, it is not surprising that the majority of his works exhibit a strong instrumental bias. Although he wrote many excellent songs and piano pieces, he was an orchestral writer by temperament and choice, and the orchestral works form the truest expression of his musical personality. He wrote for a large orchestra, with scores employing up to 44 individual parts. The years 1834–5 and 1845–7 produced most orchestral works. Unfortunately, in America at this time there were no orchestras and few vocalists capable of executing properly Heinrich's extremely complex music.

Although none of his orchestral music was published, the great majority of Heinrich's other work was. His orchestral manuscripts, personal scrapbook and a large number of music prints are in the Library of Congress. Another, smaller collection of prints is in the Národní Muzeum, Prague.

DAVID BARRON/J. BUNKER CLARK

**Heinrich, Nikolaus.** *See* HENRICUS, NIKOLAUS.

**Heinrichshofen.** German firm of music publishers. Wilhelm von Heinrichshofen (1780–1881) took over Theodor Keil's publishing concern in 1797; in 1806 he founded a firm in Magdeburg under his own name and published mostly historical and theological works. His son Theodor (1805–1901) and grandson Adalbert (1859–1932) built it into a music publishing business, issuing keyboard works by J.S. Bach, Haydn, Mozart, Beethoven, Schubert, Schumann and Chopin, as well as folksongs and lieder. Otto Heinrich Noetzel, grandson of Adalbert, became director in 1932, and a subsidiary office was established in Leipzig; the head office was established at Wilhelmshaven in 1947. Heinrichshofen has issued about 30,000 titles since its foundation and has represented several 20th-century composers, including Nico Dostal, Mark Lothar, G.F. Malipiero, Schoenberg and Richard Strauss. It also published school music and music for recorder. On 1 January 1986 the company divided into two independent businesses with Heinrichshofen books being published by the new imprint Florian Noetzel GmbH. The firm specializes in books on ballet, theatre and musicological research.

THEODOR WOHNHAAS

**Heinrich von Augsburg.** *See* HENRICUS OF AUGSBURG.

**Heinrich von Meissen.** *See* FRAUENLOB.

**Heinrich von Morungen** (*d* Leipzig, 1222). German Minnesinger. Of noble birth from Thuringia, he spent much of his life in the service of the Margrave Dietrich of Meissen, and it was as the margrave's *miles emeritus* (knight honourably discharged from duty) that he entered the monastery of Thomaskirche in Leipzig. 33 Minnelieder survive, all but one without melodies: in the Codex buranus (*D-Mbs* Clm 4660) the strophe *Ich bin keiser âne krône* appears with neumes. The poem *Lanc bin ich geweset verdrâht* (ed. Lachmann, 147.17) may be a contrafactum of the anonymous *Je ne suis pas esbahis* (R.1538) and is published with this melody by Müller-Blattau and Aarburg; it is also possible that *Mir ist geschehen als einem kinderlîne* is a contrafactum of *Ainsi m'ave cum al enfan petit*.

BURKHARD KIPPENBERG/LORENZ WELKER

**Heinrich von Ofterdingen** (*c*1200). German Minnesinger. He is sometimes wrongly referred to as Osterdingen. There is no documentary evidence relating to him, although identification with a 'Henricus de Oftendinh filius Henrici de Rospe', documented in 1257 and who worked in Thüringen, would be chronologically possible. However, the form of his name seems rather to point towards south Germany. Earlier scholars attempted to identify him with Tannhäuser or Heinrich von Morungen, but it is likely that he existed as a separate person. He is first mentioned in the poem of the Wartburg song contest (*c*1260); in it he challenges Wolfram von Eschenbach and Walther von der Vogelweide by defending the honour of the Duke of Austria. The Jena and Colmar song manuscripts (*D-Ju* E.1.f.101; *Mbs* Cgm 4997) contain music for the first part of the Wartburg poem ascribed to Heinrich von Ofterdingen and given the title, in Colmar, 'Gekaufter Ton' or 'Fürstenton'. The Colmar manuscript presents a less florid version than Jena.

In the 19th century Heinrich was integrated with Tannhäuser and as such appears in Wagner's *Tannhäuser* and in numerous literary works of all types.

BURKHARD KIPPENBERG/LORENZ WELKER

**Heinrich von Veldeke.** *See* HENDRIK VAN VELDEKE.

**Heinricus de Libero Castro.** Composer, possibly identifiable with HEINRICH LAUFENBERG.

**Heinroth, Johann August Günther** (*b* Nordhausen, 19 June 1780; *d* Göttingen, 2 June 1846). German musical educationist and writer. He was the nephew of Gottlieb Heinroth, a singer, harpist and composer. He received his early musical instruction from his father, organist of the Peterskirche, Nordhausen. At the universities of Leipzig (1798) and Halle (1800) he studied literature, theology and education. His second post (1804) was at Israel Jacobson's boarding school at Seesen, where he taught and composed new devotional music for the Jewish communities of Kassel and Berlin. At this period hatred of the French occupation prompted Heinroth to write popular songs against Napoleon which were circulated in manuscript.

In 1818, on Forkel's death, Heinroth was invited to become musical director of the University of Göttingen. His predecessor's great reputation made this a demanding position, but from the beginning Heinroth showed

considerable enterprise. He formed and directed a choral society, lectured in both music and theology, and in 1823 he initiated a series of 'academic concerts' in which students played an active part. His reports were published in the *Neue Zeitschrift für Musik*. Heinroth was always concerned with music education in the widest sense, which is evident in such books as the *Gesang-Unterrichts-Methode*, the *Musikalische Hülfsbuch für Prediger* and the *Kurze Anleitung, das Clavier oder Forte-Piano spielen zu lernen*. He was also preoccupied in devising a new notation for beginners in singing. He wrote a musical short story, *Das fatale Fragen*, and partsongs.

E. VAN DER STRAETEN/DAVID CHARLTON

**Heinse** [Heintze], **(Johann Jakob) Wilhelm** (*b* Langenwiesen, nr Ilmenau, 15 Feb 1746; *d* Aschaffenburg, 22 June 1803). German aesthetician and writer on art and music. As a youth he was a mediocre student, but he eventually pursued law at the universities of Jena and Erfurt. At Erfurt he studied with the aesthetician F.J. Riedel and made the acquaintance of Wieland, who recommended him to Gleim at Halberstadt. With the sponsorship of Gleim he became a private tutor and freelance writer at Quedlinburg. In 1774 he collaborated with the Jacobi brothers on the magazine *Iris* at Düsseldorf. He began a three-year trip to Italy in 1780, staying mostly in Rome, where he immersed himself in art and translated *Orlando furioso* and *Gerusalemme liberata*. Back in Düsseldorf, he wrote on the aesthetics of art in the novel *Ardinghello* (*c*1784–5), but his interests soon returned to music. Entering the service of the Elector of Mainz, Heinse became lecturer in 1787, then privy councillor and electoral librarian in 1789. To escape the political turmoil of the Revolution he returned temporarily to Düsseldorf in 1792 and after the Peace of Basle (1795) followed the elector to Aschaffenburg, where he spent the rest of his life.

In his three-part 'novel' *Hildegard von Hohenthal* (Berlin, 1794–6), Heinse expressed his most important thoughts on music through the conductor Lockmann. Equating music with speech, he maintained that music is of all art forms the most direct and is capable of expressing (rather than imitating) true feeling. He attributed a far greater potential for expression to vocal music than to instrumental, which he felt was best restricted to preludes and ritornellos or to an accompanying role. All keys and intervals were for him endowed with unique expressive characters, and he affirmed genius above rule in composition. Favouring Italian opera for its union of feeling and action (aria and recitative), he especially admired Jommelli, Traetta and G.F. Majo, whom he found superior to Gluck. References to music and musicians also appear in his letters and diaries; a volume of *Musikalische Dialogen* (Leipzig, 1805/*R*), attributed to him by its editor and publisher J.F.K. Arnold, is (if authentic) an effort of his youth.

SHELLEY DAVIS

**Heinsheimer, Hans (Walter)** (*b* Karlsruhe, Germany, 25 Sept 1900; *d* New York, 12 Oct 1993). American music publishing executive and writer on music of German birth. Following law studies in Heidelberg, Munich and Freiburg (JD 1923), he was employed by Universal Edition in Vienna. At Universal he headed the opera department (1924–38), working with such composers as Berg, Krenek, Weinberger, Weill and Antheil, and supervising the publication of *Wozzeck*, *Schwanda the Bagpiper* and *Mahagonny*, among other works. After emigrating to America in 1938, he joined Boosey & Hawkes in New York. From 1947 to 1974 he was associated with G. Schirmer, first as head of the symphonic and operatic divisions, then, from 1957, as director of publications, and finally, from 1972, as vice-president; among the composers whose works he promoted were Menotti, Bernstein and Barber. Heinsheimer's articles have appeared in such journals as *Musical Quarterly* and *Reader's Digest* in America and *Melos* and the *Neue Zeitschrift für Musik* in Germany. During the 1930s he wrote for *Modern Music*, in particular reporting on the state of music in Germany.

PAULA MORGAN

**Heinsius, (Michaël) Ernest(us)** (*b* ?Hulst; *d* Arnhem, 4 Jan 1764). Dutch composer. He was an organist and singing teacher at Arnhem until 1738, when he became organist at the Grote Kerk in Bergen op Zoom. The following year he married; several children were born from the marriage.

After his church was destroyed by fire, Heinsius became organist, carillon player and commissioner of barges at Purmerend. Two years later he returned to Arnhem as organist and carillonneur at the Grote Kerk; he also assisted the collegium musicum there, the St Caecilia-Concert. He had already composed a Caecilia Concerto for the collegium musicum in 1736; this work is now lost, as is his vocal trio for the organization, which was perhaps identical to the work that Heinsius wrote for the 200th anniversary of the collegium musicum in 1755. Among his surviving works, the violin concertos are in the style of Vivaldi, and the three Dutch songs, which are short but imaginatively composed, are also late Baroque in idiom. The symphonies are described on their title-page as being intended for 'ceux qui apprennent la musique' and are more modern and *galant*.

WORKS

Caecilia Conc., 1736; lost; Trio, 3vv, 1755, lost; 6 concs., vn, str, org, op.1 (Amsterdam, *c*1757); 3 songs in De vier muzykale jaargetyden (Amsterdam, 1757–8); 6 simphonies, str, bc, op.2 (Amsterdam, before 1762)

L. VAN HASSELT

**Heinsius, Peter** (*b* Brandenburg; *d* in or after 1590). German composer. In 1579 he was Kantor at the grammar school at Salzwedel, and in 1590 (according to *EitnerQ* and *FétisB*) he held a similar post at the University of Wittenberg. Between 1579 and 1590 he brought out nine publications, each containing either one or two sacred settings of German or Latin texts for four to six voices. Most, or possibly all, of them are occasional pieces of various kinds such as wedding and funeral songs.

EVA BADURA-SKODA

**Heintz** [Heintze], **Wolff** [Wolfgang] (*b* *c*1490; *d* Halle, 1552). German organist and composer. He was cathedral organist in Magdeburg from 1516 to 1520. By 1523 he was in Halle, where he may have been vice-Kapellmeister and second organist (as a deputy for Ruprecht Kumentaler) in the chapel of Cardinal Albrecht of Brandenburg. Heintz contributed new melodies to the first Catholic hymnbook, *Ein new Gesangbüchlin geistlicher Lieder* (Leipzig, 1537/*R*), which was edited by Michael Vehe. After Cardinal Albrecht left Halle in 1541 (by which time the town was wholly committed to the Reformation movement) Heintz converted to Lutheranism and began working on the musical aspects of the draft for a Protestant liturgy. From this time until his death he was organist at the Marienkirche. Luther (who had been friendly with Heintz since about 1523) seems to have regarded him as the perfect example of the performer of sacred instrumental music, ascribing great importance to his work.

Only six compositions by Heintz are extant, apart from the melodies he contributed to the 1537 hymnbook. Two four-part secular German lieder printed in the second volume of Georg Forster's *Frische teutsche Liedlein* (RISM 1540[21]) place the cantus firmus in the tenor and, although tending towards a homophonic style, they still follow Isaac's tradition. Two sacred lieder printed in Rhau's *Newe deudsche geistliche Gesenge* (1544[21]) also have the cantus firmus in the tenor. These four pieces, like the psalm motet *Judica me* (related to Josquin's style in its expressive technique), frequently vary the texture with duet passages. *Laudate Dominum* is a canonic work for four four-voice choirs entering at the distance of four breves.

WORKS

Christ unser Herr zum Jordan kam, 4vv, 1544[21], ed. in DDT, xxxiv (1908/*R*); Da trunken sie die liebe lange Nacht, 4vv, 1540[21], ed. in EDM, lx (1969); Gar hoch auf jenem Berge, 4vv, 1540[21], ed. in EDM, lx (1969); Nu bitten wir den heiligen Geist, 4vv, 1544[21], ed. in DDT, xxxiv (1908/*R*)

FRANZ KRAUTWURST

**Heintze, Gustaf (Hjalmar)** (*b* Jönköping, 22 July 1879; *d* Saltsjöbaden, 24 March 1946). Swedish composer and organist. A scion of a musical family of German origin, he passed the lower organists' examination in Lund in 1896 and studied at the Swedish Royal Academy of Music. He was also a pupil of Joseph Dente in composition and instrumentation (1897–1900) and a piano pupil of Richard Andersson (1901), in whose music school he taught from 1901 until 1918, when he founded a piano school of his own. At first principally a pianist, Heintze developed a career as an organist and improviser; from 1910 until his death he was organist of Maria Magdalena, Stockholm, composing cantatas for church festivals. He held the government composer's stipend (1920–24), was elected to the Academy of Music in 1942 and was one of the founders of the Society of Swedish Composers. His best works, among them the seven concertante pieces, are in an individual Romantic style showing formal clarity and virtuoso writing, particularly for the piano.

BERTIL WIKMAN

**Heintze, Wilhelm.** *See* HEINSE, WILHELM.

**Heinz, Jerome.** *See* HINES, JEROME.

**Heinze,** Sir **Bernard (Thomas)** (*b* Shepparton, Victoria, 1 July 1894; *d* Sydney, 10 June 1982). Australian conductor and musical organizer. He won a South Province scholarship in 1911 and studied at the RCM in London; during and after World War I he spent five years in the Royal Artillery. In 1920 he won a Gowland Harrison Scholarship and studied under d'Indy and Nestor Lejeune at the Schola Cantorum in Paris and later under Willy Hess in Berlin. In 1923 he returned to Australia, where in 1924 he joined the staff of the Melbourne University Conservatorium, of which he was professor from 1925 until 1956. In 1924 he formed the Melbourne String Quartette and drew together a number of orchestral groups to develop the University SO, which he conducted until

1932. In that year the orchestra was amalgamated with the Melbourne SO, which Heinze conducted from then until 1949 when it became the Victorian SO and Heinze its conductor by invitation. He conducted the Melbourne Royal Philharmonic Society from 1927 to 1953.

It was, however, in his positions as director-general of music to the Australian Broadcasting Company (1929–32) and music adviser to its successor the Australian Broadcasting Commission (from 1932) that Heinze made his greatest contribution to Australian musical life. He arranged for many outstanding performers to visit Australia, and through him the traditions brought by immigrants from Europe were spread throughout the country. His influence was particularly strongly felt in the youth and school concerts at which he lectured and conducted and with which he had been involved as early as 1925; in 1947 he inaugurated the ABC's series of youth concerts.

Heinze was knighted in 1949, and from 1956 to 1966 he was director of the New South Wales Conservatorium. He became chairman of Commonwealth Assistance to Australian Composers in 1967 and of the Australian Council of the Arts music advisory committee in 1968. In 1976 he was created a Companion of the Order of Australia for his services to Australian music. Detailed documentation of Heinze's career is to be found in the Heinze Collection in the La Trobe Library, State Library of Victoria, Melbourne.

THÉRÈSE RADIC

**Heinze, Gustav Adolph** (*b* Leipzig, 1 Oct 1821; *d* Muiderberg, nr Amsterdam, 20 Feb 1904). Dutch conductor, composer and clarinettist of German birth. In 1835 he became clarinettist in the Gewandhaus and Euterpe orchestras of Leipzig, but four years later was given leave by Mendelssohn to study the piano with Friedrich Wieck and composition with Reissiger. In 1844 he was appointed second Kapellmeister at the Stadttheater in Breslau, where his opera *Lore-Ley* had been produced with great success in 1842. In 1849 Heinze was dismissed for his democratic feelings. He settled in Amsterdam in 1850, teaching music and conducting several choral societies, for whom he wrote oratorios, masses and festival cantatas. For the Excelsior Lutheran choir he arranged chorales and motets by Bach, Pachelbel and Romantic composers. In 1862 he founded a singing school in the Amsterdam section of the Maatschappij tot Bevordering der Toonkunst, which he directed until 1871. He founded a music school in Bussum in 1885.

As a composer Heinze was conservative; he was important less for his operas than for his oratorios. His *Die Auferstehung* (1862), written in an early Romantic style for the Vincentius choral society, was the first oratorio of the 19th century to be printed in the Netherlands. He composed three other oratorios showing modern tendencies both in their harmony and in the polyphonic texture of their accompaniments. Among his instrumental works are the brilliant *Konzertstück* op.1 (1837) for clarinet and the Concertino op.12 (1852) for oboe.

JAN TEN BOKUM

**Heirmologion** [hirmologion] (Gk., from *heirmos*: 'stanza'). A liturgical book containing the *heirmoi* for the *ōdai* (odes) of the *kanōnes* (*see* KANŌN), used at the Byzantine Office of ORTHROS. The *heirmoi* texts are invariably paraphrases of the biblical canticles, which the *kanōn* had supplanted in Orthros as celebrated in Byzantium by the end of the 7th century.

1. History and use. 2. Types and organization.

1. HISTORY AND USE. A heirmologion contains only the first stanza (i.e. the *heirmos*) of each ode and is thus a handbook to remind the singers of the melodies of the *heirmoi*: these melodies, in full performances of the *kanōn*, would be repeated during the singing of the additional stanzas (*troparia*) of each ode. The mēnaia contain the *troparia* for the immovable feasts of the church year, and the triōdion and pentēkostarion those for the movable feasts. Since, therefore, heirmologia were auxiliary manuscripts containing only model stanzas, they were well suited to serve a didactic purpose; the chanters would use them to learn the basic melodies necessary for performing the *kanōnes*, which required the knowledge of a different melody for each of the nine odes. The mēnaia occasionally gave the texts of the *heirmoi* in full but more often cited only their incipits; the full texts of the *heirmoi* together with their melodies were always found in the heirmologia. After the golden age of *kanōn* poetry (8th–10th centuries), poets and musicians frequently composed new *kanōnes*, most often adapting new texts to pre-existing melodies.

Heirmologia with neumatic notation survive from about the mid-10th century, the earliest known being *GR-AOml* B.32. A number of heirmologia without musical notation have yet to be examined. Unnotated heirmologia from later centuries may have functioned simply as auxiliary manuscripts, that is, to remind singers of the full texts of the most frequently used *heirmoi* whose melodies would have been universally known to professional chanters. A singer would probably be required to master the melodies assembled in a heirmologion and then be able to sing any text, when reminded of its original incipit, by adapting it to the melody associated with that text.

Approximately 40 heirmologia survive from the period between the 10th and 15th centuries. However, a proper comparative study of the melodies of the *heirmoi* contained in them would require an examination of the notated triōdia and other types of Byzantine manuscript in which *heirmoi* occasionally appear, especially the 14th- and 15th-century AKOLOUTHIAI. No such work has yet been undertaken, and many later heirmologia also await investigation.

There are fewer heirmologia than other types of Byzantine medieval music manuscript. It may be that because heirmologia were required for mastering the basic chant melodies, they were used more frequently than other manuscripts (e.g. stichēraria) and therefore wore

out more quickly. They might also have been more susceptible to variation in content as well as in melodic style: those melodies sung once a week or more frequently would have evolved more easily than melodies sung only once a year; the latter, which are mostly found in stichēraria, have fewer melodic variants, since they were copied with great care and in greater number. There is another probable reason for the comparatively short life of heirmologia: once the basic melodies were learnt, a manuscript could, at least theoretically, be discarded, or, if it were being copied, the order of *heirmoi* could be rearranged according to their content. This view is supported by variations of arrangements of *heirmoi* in existing manuscripts, and it seems likely that in the course of time only the most popular *heirmoi* (i.e. those needed most frequently) were copied, the less popular being omitted.

2. Types and organization. Since heirmologia dating from after 1500 have yet to be studied in depth, the following discussion is restricted to the medieval material. Medieval heirmologia may be divided into two groups according to their means of organization, both having in common a division according to the eight modes; subdivision within each mode accounts for the differences between the two groups.

In the first group – designated *KaO* in the modern literature – the *heirmoi* are given in the order of the *kanōnes*: the *heirmoi* are copied for each ode of a *kanōn*, one after the other, that is, the *heirmos* for *Ōdē* 1 of *Kanōn* 1 is followed by the *heirmos* for *Ōdē* 2 of *Kanōn* 1; after the first *kanōn*, the *heirmoi* for each ode of *Kanōn* 2 will follow, etc. After all the *heirmoi* for *kanōnes* of the 1st mode, there follow the *heirmoi* of *kanōnes* sung to the melodies of the 2nd mode, etc., ending with the *heirmoi* for *kanōnes* sung in the 4th plagal mode.

The second type of heirmologion – designated *OdO* – again divided into eight segments, one for each mode, has a different arrangement of *heirmoi* within each mode: all the *heirmoi* for *Ōdē* 1, regardless of the *kanōnes* to which they belong, are grouped together; these in turn are followed by the *heirmoi* for *Ōdē* 2, etc. This means that all eight segments are further subdivided into nine sections, each of which contains the *heirmoi* for one particular ode of the *kanōn*. When using this type of manuscript for a specific feast on which a particular *kanōn* was prescribed, the chanter would presumably locate the *heirmos* for *Ōdē* 1, sing it, then turn over a number of pages until he located the *heirmos* for *Ōdē* 2 etc., and would thus perform the whole *kanōn*, provided that the necessary *heirmoi* for that *kanōn* were included in the manuscript. In the case of feasts for which no particular *kanōn* was prescribed, or if the required *kanōn* had become obsolete, the chanter might have improvised a *kanōn* by choosing one of the *heirmoi* of *Ōdē* 1 and then making a selection from the available *heirmoi* for *Ōdai* 2, 3 etc., singing only those *heirmoi* that he considered appropriate. This procedure could (and did) lead to composite *kanōnes*: in at least one manuscript (the 'Washington Heirmologion' in *US-Wc*) the *heirmoi* were assembled haphazardly, with no regard for their sequence in the original *kanōn*.

Yet another, unusual type of organization of the *heirmoi* occurs in *GR-AOml* 95. The *kanōnes* in this manuscript are copied in the order of feasts without regard to the modes.

It has been suggested that the *OdO* type of heirmologion came into existence when the selection of the most popular *heirmoi* led to the elimination of the less common *heirmoi*. However attractive this theory may be, heirmologia of both types appear together as early as the 12th century. The *KaO* type is exclusively Greek, whereas the *OdO* type, though unquestionably of Byzantine origin, is found only in a small number of Greek specimens but in all surviving Slavonic heirmologia, the earliest of which dates from the 12th century. It is possible that regional preferences account for this difference in internal organization, but too little is presently known about the origin of surviving copies to permit such a deduction.

With regard to the number of *heirmoi*, three stages may be distinguished in the evolution of the *KaO* heirmologia. To the first stage belong the five oldest manuscripts, dating from the 10th century to the 12th, with Chartres- and Coislin-type neumes from the earliest stages of Byzantine neumatic notation (*see* Byzantine chant, §3(i)). While there are distinct differences in the number of *kanōnes* within any given mode, the average number of *kanōnes* per mode is close to 40, and thus there are about 300–350 *kanōnes* in such a manuscript, and about 2500–3200 *heirmoi*. There is no uniformity in the order of *kanōnes* in these manuscripts.

From the second half of the 12th century to the end of the 13th, the number of *kanōnes* was reduced to approximately 20–25 per mode, amounting to about 160–200 *kanōnes*, and about 1200–1800 *heirmoi*. The six known manuscripts representing this stage show an unusual degree of uniformity in the ordering of *kanōnes*, although there are minor differences, particularly in the choice of some *heirmoi*.

The final stage of evolution of the *KaO* heirmologion in the Middle Ages, from the 14th century until the fall of Constantinople in 1453 and perhaps later, shows a further reduction in the number of *kanōnes* per mode. At this stage the number of *kanōnes* seldom exceeded 12–15 for any mode, or about 100–120 *kanōnes* in all, and only about 800–1000 *heirmoi*. The reduction in the number of *heirmoi* is in fact more drastic than the figures suggest, because a certain percentage of the *heirmoi* copied were missing in the second stage and may be located only in the earliest stage. Such *heirmoi* appear to have enjoyed a revival after a period of neglect.

The *OdO* heirmologia on the other hand first appeared in Byzantium as early as the 12th century, yet surviving fragments are far too small to give a reliable picture of the repertory. The number of manuscripts increased in the 13th century and there are a few from the 14th; none is known from the 15th. Generally, these manuscripts seem to have been compiled in the first instance with a relatively small number of *heirmoi* for each ode, and to have been expanded somewhat at about the beginning of the 14th century. The *OdO* manuscripts, like the *KaO* heirmologia of the third stage, contain individual *heirmoi* that had been omitted at the second stage of the *KaO* heirmologia but which reappeared after a period of neglect.

Our knowledge of the melodies contained in the heirmologion depends on the notation employed. Manuscripts copied in the so-called Middle Byzantine neumatic notation, that is, those dating from approximately the last quarter of the 12th century, may be transcribed relatively easily. Studies of Byzantine neumatic notation

have progressed considerably since the publication in facsimile of three manuscript heirmologia in the series Monumenta Musicae Byzantinae: *GR-AOi* 470 and *I-GR* ε.γ.II belong to the second stage of the *KaO* type and use the round notation; *IL-Jgp* Sabas 83 belongs to the earliest stage of the *KaO* type with early Byzantine notation, although a number of its *heirmoi* were later retouched and their notation modernized, presenting some problems with regard to transcription.

The melodies contained in the heirmologion are generally syllabic, with occasional mildly melismatic passages. These melodies have frequently been cited as examples of formulaic structure in Byzantine chant. The *heirmoi* on the whole use a wide spectrum of melodic formulae for each of the modes. (For a discussion of melodic formulae *see* ĒCHOS; for illustration *see* BYZANTINE CHANT, fig.3)

MILOŠ VELIMIROVIĆ

**Heise, Peter (Arnold)** (*b* Copenhagen, 11 Feb 1830; *d* Tårbaek, nr Copenhagen, 12 Sept 1879). Danish composer. He came from a family of scientists and officials. After graduating in 1847 he studied theory for a few years with Berggreen, then became a private pupil of Hauptmann in Leipzig (1852–3) and published his first collections of songs. In 1854 he became conductor of the Studenter-Sangforening; throughout his life he maintained contact with this academic circle, making friends among the Danish capital's literary figures of all ages. In December 1857 he became music teacher at the academy in Sorø and organist at the church there, but in 1865 he returned to Copenhagen, where a secure financial position (due to his marriage to a wealthy merchant's daughter) allowed him to concentrate on composition and teach only a select group of private pupils. His life in Copenhagen was interrupted only by journeys abroad for holidays and treatments.

Heise's respect for tradition and for the conservative element in the artistic circle which surrounded him during his early musical development lasted throughout his life. He remained under the influence of Gade, though in the last years before his early death there appeared signs of a new development. His best chamber works, such as the Piano Quintet, the String Quartet no.4 in C minor and the Cello Sonata in A minor of 1867, show the influence of Beethoven, Mendelssohn and Schumann. But his chief importance is as a song composer. His ideal lay close to that of the early strophic lied, which he imbued with an individual lyricism probably unsurpassed in Danish art song. In some late settings of English texts and poetry by Aarestrup and Drachmann he began to move away from his Classical point of departure, emphasizing the dramatic and expressive elements in the texts and allowing a freer formal development.

Apart from his lifelong preoccupation with song, Heise was increasingly involved in composition for the stage from the late 1860s. During his last years he wrote, in addition to some incidental and ballet music for the Royal Theatre, the Singspiel *Paschaens datter* ('The Pasha's Daughter') and the tragic opera *Drot og marsk* ('King and Marshal'). The latter work, his masterpiece and the most significant Danish opera of the century, stands at the crossroads between the older national Singspiel and newer trends in music drama, and shows the influence not only of Weber and Marschner but also of Meyerbeer and Verdi.

WORKS

Editions: *P. Heise: Sange med klavier*, i–iv, ed. N.M. Jensen (Copenhagen, 1990) [S]

*All printed works published in Copenhagen*

*MSS, nearly all undated, are in DK-Kk*

STAGE

*all first performed at Copenhagen, Royal Theatre*

Palnatoke (incid music, A. Oehlenschläger), 1867, 1 song (1867), S iv, excerpt (1868), arr. pf 4 hands (1880)

Paschaens datter [The Pasha's Daughter] (Spl, H. Hertz), 1869, excerpts, vs (1869), 5 songs, S iv

Cort Adeler i Venedig (ballet, A. Bournonville), 1870, abridged vs (1871)

Kongs-emnerne [The Pretenders] (incid music, H. Ibsen), 1871, 1 song (1871), S iv

Bertran de Born (incid music, E. von der Recke), 1873, 7 songs (1873), S iv, arr. pf (1873)

Fjeldsøen [The Mountain Lake] (incid music, A. Munch), 1875, vs (1876), 3 songs, S iv

Fata morgana (incid music, J.L. Heiberg), 1875, arr. pf (1896), 1 song (1896)

Drot og marsk [King and Marshal] (tragic op, C. Richardt), 1878, vs (1879), 5 songs, S iv

SONGS

*c300 individual titles of which c200 published*

4 digte af Chr. Winther og Oehlenschläger (1852); Lauras sange af 'R. Fulton' (C. Hauch) (1853); 4 folkeviser (C. Ploug) (1854); 3 sange for en dyb syngestemme (1855); Kjaerlighedssange [Love-Songs] (C. Winther) (1855); Digte af C. Hauch (1856); En sangkreds [A Song Cycle] (Winther) (1857); Havfruens sange [The Mermaid's Songs] (B.S. Ingemann) (1857); 6 sange for en dybere stemme (1859); 4 sange af 'Arne' (B. Bjørnson) (1859); Viser og sange af 'En nat mellem fjeldene' (C. Hostrup) (1860); 6 krigssange [6 War Songs] (1864); Schilflieder (N. Lenau) (1864); Verner og Malin (Winther) (1866); Romancer og sange (S. Blicher) (1866)

Sange af Shakespeare (trans. E. Lembcke) (1868); Bergmanden og Solveigs sange (Ibsen) (1870); 3 sange af Claus Groth (1870); Gudruns sorg (H.G. Møller, after the elder Edda) (1871); Sydlandske sange [Southern Songs] (Ingemann, H.P. Holst) (1874); Finske sange (1874); Digte fra middelalderen ved Thor Lange (1875); Digte fra det engelske (1877); Erotiske digte (E. Aarestrup) (1878); Farlige drømme [Dangerous Dreams] (H. Drachmann) (1878); Dyvekes sange (Drachmann) (1879)

OTHER VOCAL

Ruskantate (C. Richardt), solo vv, male vv, orch, 1854, excerpts, vs (1903)

Psalm xxiii, solo vv, mixed vv, orch, 1858

NIELS MARTIN JENSEN

**Heisig, Wolfgang** (*b* Zwickau, Saxony, 20 June 1952). German composer and pianola player. He studied at the Dresden Musikhochschule (1972–8) with Manfred Weiss, among others. Strongly influenced by the music and aesthetics of Cage, Ives and Nancarrow, he has turned everyday situations, objects, stories and language into predominantly short pieces of music. His primary compositional media are the piano, the singing and speaking voice, the carousel organ and, increasingly from 1989, the pianola. He has turned such 'found objects' as the river Elbe, cancelled tickets for the Dresden tramways, a photograph of Cage, linguistic poetry by Heinz D. Heisl and a sevenfold translation of a passage from Dante into music. In 1990, he began to take a strong interest in mechanically- generated music. This new direction is exemplified by *Ringparabel* (1990), which exists in versions for instrumental ensemble, the pianola and, under the name *Phonolit*, as a mechanical sound sculpture (built by Horst Mohr). He has appeared internationally as a performer on the pianola and written numerous original works and arrangements for that instrument.

WORKS

(*selective list*)

Pianola: Ringparabel, 1990–91, rev. 1998; Etüde kwic und kwoc, 1991; Cage face, 1992; Jacquard, 1994; Castles, pianola, ens, 1996; Tönende Burgen, Klingende Schlösser, Vibrierende Gutshäuser, pianola, ens, 1996, collab. C. Munch; Heislvertonungen, 1997; 30 rotierende Spieldosen-Medaillons, 1998; se io ho ben la tua parola intesa (so fern ich deine Worte recht verstanden), vn, cl, b cl + a cl, pianola, 1998; arrs. of works by Ligeti, Bryars, T. Johnson

Other inst: Jakobs Vorschlag, chbr ens, 1973; Faces, pf, 1974; Sammlung Klavierstücke, pf, 1974–; Smile smile, str qt, 1976; Sorok, orch, 1989; gemeinsames papier, vn + va, 1990; Ringparabel, chbr ens, 1990

GISELA NAUCK

**Heiss, Hermann** (*b* Darmstadt, 29 Dec 1897; *d* Darmstadt, 6 Dec 1966). German composer, teacher and pianist. He studied composition with Sekles in Frankfurt in 1921, and with Hauer in Vienna (1924–6), returning to Darmstadt to study the piano and to compose. From 1928 to 1933 he taught music at the Hermann-Lietz school on the North Sea island of Spiekeroog. He then lived in Berlin (1933–7), where in vain he sought performances for his works. Between 1937 and 1942 he made over 1100 arrangements of folksongs and children's songs. He also composed songs for the Luftwaffe and works for military ensembles. He taught theory at the Heeresmusikschule in Frankfurt (1941–2) and taught at the Musikschule der Stadt Wien (1944–5). Many of Heiss's pre-1944 compositions were lost in a bombing raid on Darmstadt. He taught composition at the Städtische Akademie für Tonkunst in Darmstadt (1948–63). From 1955 he led Darmstadt's Studio for Electronic Composition, which was later named after him. He regularly taught and lectured at the Darmstadt summer courses between 1946 and 1962.

Heiss was the dedicatee of Hauer's manual *Zwölftontechnik* (1925), and later claimed to have collaborated with Hauer on its contents. Heiss actively promoted 12-note music, developing Hauer's techniques in his own manner. While teaching at Spiekeroog, he tried to reconcile 12-note composition with the performing abilities of dilletante musicians. One technique he employed was to divide the note row into slowly permutating six-note sets or 'tropes'. These were not melodic units, but groups of pitches whose ordering was freely chosen by the composer. Following Hauer, Heiss advocated athematic composition, seldom setting the 12-note row as a single melody. Some of his 12-note methods are demonstrated in his *Elemente der musikalischen Komposition*

*(Tonbewegungslehre)* (1950). After World War II Heiss championed Hauer's music and techniques, bringing him often into conflict with disciples of the Schoenberg circle. He introduced 12-note composition to the Darmstadt summer courses in 1946.

His original pedagogical methods were intimately related to his compositional concerns. His dodecaphonic principles were embedded within a more abstract 'Theory of Movement', which explored how various musical parameters of a work change over time. With his students Heiss experimented with collective composition, creating pieces which were assembled and practised over the course of months. Many of his electronic scores, to which he devoted much time after 1955, were performed only in avant-garde and laboratory settings. But some of his electronic music reached a wider public in the form of incidental music for films, theatre and radio. In his later years he nonetheless continued to compose traditional concert music, such as the *Sinfonia atematic* (1950), the *Sinfonia giocosa* (1954) and the song cycle *Expression K* (1953).

GREGORY S. DUBINSKY

**Heisser, Jean-François** (*b* Saint-Etienne, 7 Dec 1950). French pianist. He studied with Perlemuter at the Paris Conservatoire, where he received a *premier prix* in 1973. He won first prize in the 1974 International Competition at Jaén in Spain and has performed throughout Europe as a soloist and with violinists Régis Pasquier and Gérard Poulet. From 1976 to 1985 he was the pianist for the Nouvel Orchestre Philharmonique de Radio-France. He was appointed professor of accompaniment at the Paris Conservatoire in 1986 and professor of piano in 1990. In 1993 he assumed the directorship of the Maurice Ravel Summer Academy in Saint-Jean-de-Luz. His large repertory includes the rarely played sonatas of Dukas and d'Indy as well as much Spanish music, on which he is an authority. His recordings include stylish accounts of all the major works of Albéniz, Granados, Falla, Turina and Mompou. He has also performed and recorded 20th-century music for two pianos (with Georges Pludermacher) and Martinů's Double Concerto (under James Conlon).

CHARLES TIMBRELL

**Heitmann, Fritz** (*b* Ochsenwerder, nr Hamburg, 9 May 1891; *d* Berlin, 7 Sept 1953). German organist. Encouraged by his father, he studied with Karl Straube, who revealed to him the interpretative possibilities of contemporary instruments, with Josef Pembaur (a pupil of Liszt) and with Reger (composition). He became organist of Schleswig Cathedral in 1912. In 1918 he was appointed to the Kaiser-Wilhelm-Gedächtnis-Kirche in Berlin, where he had a Sauer organ with 103 stops, adaptable to music of any stylistic era. At the same time he directed the Berlin Motettenvereinigung. From 1920 he was also organist in the Singakademie, and in 1925 he was elected professor of the Akademie für Kirchen- und Schulmusik in Berlin. He became organist of Berlin Cathedral in 1930, retaining the post after World War II. When the large 113-stop Sauer organ there was destroyed, he played an organ of only 16 stops, newly installed in the crypt. From 1945 Heitmann was professor at the Hochschule für Musik. He exerted a considerable influence in the first half of the century through his many pupils, and by his enthusiasm for neglected music, particularly that of Reger. A brilliant virtuoso, he made numerous recordings, broadcasts and international concert tours.

GERHARD WIENKE

**Heitor, Luiz.** *See* AZEVEDO, LUIZ HEITOR CORRÊA DE.

**Hejnał mariacki** (Pol.: 'St Mary's bugle-call'). A trumpet melody, sounded hourly from the tower of St Mary's Church in Kraków. *See* KRAKÓW, §7.

**Heldentenor** (Ger.: 'heroic tenor'). A dramatic tenor voice of clarion timbre and unusual endurance, closely tied to such Wagnerian tenor roles as Tannhäuser, Tristan, Siegmund and Siegfried. It was an extreme manifestation of the new dramatic tenor that appeared in the 1830s and 40s, especially in such Parisian operas as Meyerbeer's *Robert le diable* (1831) and Berlioz's *Benvenuto Cellini* (1838). Wagner did not use the term *Heldentenor* himself but was adamant in dissociating his tenor parts from the 'so-called dramatic-tenor roles of recent times' ('den sogenannten dramatischen Tenorpartien der neueren Zeit'), especially citing Robert le diable (*Prose Works*; Eng. trans., 1894, iii, 202–3). He blamed 'the positively criminal [Italian] school of singing now in vogue' for devoting its entire attention to 'vocal trickery', thereby making the usual tenor appear 'unmanly, weak and completely lacklustre' ('unmännlich, weichlich und vollständig energielos'). Although recognizing that his tenor parts demanded extraordinary stamina, Wagner was more concerned that the singer be 'thoroughly alive' to the spiritual significance of the role. He praised Ludwig Schnorr von Carolsfeld as the perfect interpreter of his music (*Prose Works*; Eng. trans., 1894, iv, 225ff). Riemann (*Musik-Lexikon*, 1882) identified two main types of tenor, the lyric tenor and *Heldentenor*, describing the latter as having a smaller range (from *c* to *b′*), a powerful middle register and a baritone-like timbre. The

dramatic tenor with a higher register, generally known as a tenore robusto, is associated with the operas of Verdi.

*See also* TENOR.

OWEN JANDER, ELLEN T. HARRIS

**Helder** [Helderus], **Bartholomäus** (*b* Gotha, ?*c*1585; *d* Remstädt, nr Gotha, 28 Oct 1635). German clergyman, schoolmaster, composer and poet. Probably the son of Johann Helder, he was a student, probably of theology, at Leipzig University from the summer term of 1603. From 1607 to 1616 he was Kantor and schoolmaster at Friemar, near Gotha. In 1616 he went as pastor to Remstädt, possibly on his father's recommendation. After nearly 20 years in this position he died of the plague. His hymns for Christmas and New Year (*Cymbalum Genethliacum*) and his collection *Cymbalum Davidicum*, consisting mainly of hymns based on psalm texts, were used in his lifetime beyond his own region of Thuringia. The hymns in the earlier collection are predominantly songlike, while those in the later are more motet-like. The large number of Helder's hymns included in the *Cantionale sacrum* for use in the churches and schools of the dukedom of Gotha bears witness to the popularity of his texts and music. A number of his hymns appeared in various later German songbooks, and *Ich freu mich in dem Herren* has survived in its original form and is still to be found in the German Protestant hymnbook. As both poet and composer, Helder illustrates the urgent striving for a personal mode of expression that characterized this period; the music of his hymns shows this through the changing rhythms of their inventive melodies, their simple harmonies, in which the 3rd is often missing, and their references to traditional church music techniques, which Helder always presented in a thoroughly modern form. The freshness and power of his hymns was later diminished by melodic and rhythmic distortions.

WORKS

Cymbalum Genethliacum, das ist Funffzehen schöne, liebliche und anmutige, Newe Jahrs unnd Weihnacht Gesenge, neben einem Corollario dreyer anderer Melodeyen nach jtziger ahrt componiret, 4–6vv (Erfurt, 1614–15)

KARL-ERNST BERGUNDER

**Heldy, Fanny** [Deceuninck, Marguerite Virginia Emma Clémentine] (*b* Ath, nr Liège, 29 Feb 1888; *d* Paris, 13 Dec 1973). French soprano of Belgian birth. After studies at the Liège Conservatoire she made her début at La Monnaie, Brussels, in October 1910, remaining there until 1912. She appeared at Monte Carlo (1914–18), Warsaw and St Petersburg and made her Paris début in February 1917 as Violetta at the Opéra-Comique, which became her artistic home for more than two decades; her roles there included Rosina, Butterfly, Manon, Olympia, Antonietta and Giulietta, and Tosca. She made her début at the Opéra as Gounod's Juliet in December 1920. In addition to the conventional repertory, to which she invariably brought particular distinction, she created many roles, among them Portia in Hahn's *Le marchand de Venise* (1935, Opéra) and the Duke of Reichstadt in Honegger and Ibert's *L'aiglon* (1937, Monte Carlo). Ravel's Concepción she made her own; Toscanini chose her for Mélisande and Louise at La Scala; her Violetta was unforgettable for both brilliance and pathos. She first appeared at Covent Garden in 1926 as Manon. Despite the metallic quality of her voice, she was the leading singing actress of her day. Her discs include a dimly recorded but important *Manon* (1923) and souvenirs of her Violetta, Marguerite, Thaïs, Louise and Concepción, which catch the individual, Gallic tang of her voice.

**Hèle, George de la.** *See* LA HÈLE, GEORGE DE.

**Helfer, Charles d'** [Delfert, Dhelfer, d'Helfert, d'Helpher] (*d* Soissons, after 1664). French composer. He was at Soissons almost throughout his career. He was already there in 1648 serving as a priest and as a *maître de musique*. In 1653 he was appointed by decree chaplain of one of the 12 chapels in the cathedral. Three years later he described himself as 'simphoneta simphoniarca', that is, music master to the children in the choir school, and in 1664 he became a canon.

Helfer is known to have composed only Latin sacred music, particularly *a cappella* masses, four of which are his only surviving works. He wrote them in sparingly ornamented counterpoint whose melodic lines are remarkable for their fluid elegance. He did not adhere at all strictly to the traditional modal system but made much use of major–minor tonality. His masses were esteemed by connoisseurs and long remained in the repertory of the best choirs; some of them were in print as late as 1729. Moreover, Sébastien de Brossard, reported in his manuscript *Catalogue* of 1724 (*F-Pn*) that the *Missa Deliciae regum* 'still delights people with good taste'. Adding a continuo part, he transcribed the masses *Benedicam Dominum*, *Deliciae regum* and *In aeternum cantabo* towards the end of the 17th century. To the last-named he even added a small orchestra. In particular the *Missa pro defunctis*, published by Ballard in 1656 had a

surprisingly long history. It was sung for the obsequies of Lalande in 1726. The first of several manuscript versions dates from 1729 and includes an extra soprano part and continuo. Another, which is undated, was probably intended for a service at St Denis for the repose of the soul of Louis XV in 1774; the vocal parts were not altered, but a four-part string orchestra with continuo was added. La Borde also printed part of this work in 1780 (*La BordeE*).

WORKS

Missa 'Benedicam Dominum', 4vv (Paris, 1655)
Missa pro defunctis, 4vv (Paris, 1656); edn of Int, Ky, opening of Grad in *La BordeE*; later versions, *F-Pn*; ed. J.-C. Léon [1656 version] (Paris, 1991)
Missa 'Lorsque d'un désir curieux', 4vv, ?1658; lost, mentioned in *FétisB*
Missa 'In aeternum cantabo', 6vv (Paris, 1658)
Missa 'Deliciae regum', 4vv (Paris, 1664)
Missa 'Quid videbis in Sunamitae?', 6vv, ?1674; lost, mentioned in a Ballard catalogue of 1707
Missa 'Laetatus sum' (Paris, 1687)
Missa 'Quid est Deus?'; lost, mentioned in a Ballard catalogue of 1744
Vespres et hymnes de l'année, avec plusieurs motets, 4vv (Paris, 1660); lost, mentioned in *FétisB*

DENISE LAUNAY/JAMES R. ANTHONY

**Helfert, Vladimír** (*b* Plánice, nr Klatovy, 24 March 1886; *d* Prague, 18 May 1945). Czech musicologist. After studying history and geography at Prague University he spent a year (1906–7) in Berlin, where he studied musicology under Wolf, Kretzschmar and Stumpf. On his return he took the doctorate under Hostinský in 1908 with a dissertation on Benda and Rousseau. At first he taught history and geography in Prague but in 1919 he moved to Brno, where, continuing with his schoolteaching, he also began lecturing (1921) at the newly established university. In 1926 he became reader and in 1931 professor of musicology. During World War II he was imprisoned by the Nazis and died of typhus caught in the concentration camp of Terezín.

Helfert's earliest important work dealt with the musical life centred on the Questenberg castle in Jaroměřice, a country town in south-western Moravia, and in particular with its best-known Kapellmeister, František Míča. His Jaroměřice research was able to throw fresh light on two perennial concerns of Czech musicology: the emigration of Czech musicians and the Czech share in the origin of Classical sonata form. He returned to these questions in a later book on Benda (1924). Equally fruitful was Helfert's interest in Janáček. In Prague he had associated with Nejedlý and originally shared both his enthusiasm for Smetana and his hostility towards Dvořák and Janáček. For the latter he made amends handsomely: he aroused interest in Janáček's first opera *Šárka* which led to its belated première in 1925, organized the establishment of the comprehensive Janáček archives in Brno and published in 1939 the first, unhappily the only, volume of his Janáček biography, which still today represents a peak of Janáček scholarship.

Helfert made a deep and lasting impression on Czech musical life. He trained the first generation of Brno musicologists, established the fine Baroque, Classical and Janáček collections of the Moravian Regional Museum, and founded and edited the historical series Musica Antiqua Bohemica, the periodicals *Hudební rozhledy* (1924–8) and *Musikologie*. As a critic and writer he ranged authoritatively from Baroque to contemporary music, from folk music to music in sociology and education. For 19 years he was also the conductor of the Brno amateur orchestra, Orchestrální Sdružení.

JOHN TYRRELL

**Helferting van Wewen, Franz.** *See* HILVERDING VAN WEWEN, FRANZ.

**Helffer, Claude** (*b* Paris, 18 June 1922). French pianist. He had lessons with Casadesus until 1939 and then studied classics at the Ecole Polytechnique, graduating in 1942. After the war he studied harmony, counterpoint and composition with Leibowitz, and in 1948 he made his début in Paris. Since that time he has been particularly active in presenting 20th-century music there, being one of the rare pianists to combine the attributes required by many new works – dexterity in rapid movement and exact definition of colour and rhythm – with traditional skills in phrasing and formal articulation. He began touring in the early 1960s, performing principally 20th-century music, though he plays Beethoven's sonatas with the same fine strength and tenacity that he brings to Boulez. He has recorded the complete solo works of Schoenberg, Debussy and Ravel, Boulez's three sonatas and Barraqué's Sonata.

PAUL GRIFFITHS

**Helgason, Hallgrímur** (*b* Eyrarbakki, 3 Nov 1914; *d* 18 Sept 1994). Icelandic musicologist, composer, teacher and conductor. He attended the Reykjavík College of Music (1931–3) and subsequently studied at the Copenhagen Conservatory (1935), the Leipzig Conservatory (1936–9) and Leipzig University (musicology with Schultz, Husmann and Prufer). He continued his violin and composition studies at the Zürich Conservatory, graduating in 1949. He also took the doctorate in musicology at the University of Zürich in 1954.

His many appointments include roles as secretary of the newly founded Society of Musicians (1940–46) and of the Composers' Society (1945–7). In addition, he was a board member of STEF, the Icelandic performing rights society (1946–8), and was president of the State Cultural Fund's music committee (1962–6). He was assistant head of music at the Icelandic State Broadcasting Service (1959–66), professor at the University of Saskatchewan (1966–74) and a docent of liturgical music at the University of Iceland (1974–84).

Helgason's compositions combine the strong influence of the late-Romantic German school with a nationalist outlook. His five-movement Piano Sonata (1936) is a dense, chromatic work reminiscent of Reger, while his Sonata for solo violin (1971) is more transparent, with echoes of Bach's solo suites. Icelandic folk tunes are used frequently as a melodic source, but integrated within a conservative, contrapuntal musical language. His musicological studies also focussed on the musical heritage of his native country, and included a dissertation on historical and analytical aspects of epic recitation in Iceland.

**Helicon** (Gk. *helikōn*: 'the mountain of the Muses', but apparently confused with *helix*: 'a coil'; Fr. *contre basse ronde*; Ger. *Helikon*; It. *elicon*; Sp. *helicón*). A valved brass instrument made in the same pitches as the tubas in F, E♭ and BB♭ (*B′♭*) but in the circular form of instruments depicted on Trajan's Column (for illustration, *see* CORNU) and imitated in one form of the *tuba curva* used during the French Revolution. The helicon has a small forward-looking bell and the tubing encircles the player's head, passing beneath the right arm and resting on the left

*Helicon in B♭ by Ignaz Stowasser, Vienna, 1850 (Germanisches Nationalmuseum, Nuremberg)*

shoulder. It may thus be comfortably carried for long periods by a player on foot or mounted. The helicon was produced by Ignaz Stowasser, Vienna, in 1845 (Austrian patent 5338 of 1848), following either a suggestion of Wieprecht or a Russian prototype. An early example by Stowasser, in BB♭, is in the Nuremberg Collection (*D-Ngm*). The helicon has since been made throughout Europe and the Americas. Metzler's 'Sonorophone' (London, 1858) is essentially the same instrument, while Sax's Saxotuba was modelled on the Tuba curva, with the addition of valves. The SOUSAPHONE, which is similarly constructed but has a larger bell, is called 'helicon' in southern Europe.

ANTHONY C. BAINES/CLIFFORD BEVAN

**Helisachar** [Elisagarus] (*b* 8th century; *d* after 837). Churchman and liturgist. Born a Goth in Septimania, he is first documented in 808 as chancellor to Louis the Pious, who had been placed on the throne of Aquitania by his father Charlemagne. When Louis became emperor after the death of Charlemagne in 814, he brought Helisachar to Aachen with him to continue in the role of chancellor. He served in that capacity until about 817, remaining in close contact with the court of Louis for the rest of his career except for a period of disfavour from 830 to 833. Though a canon and not a monk, he was named abbot of St Aubin, Angers, and also of Saint Riquier (822–37).

Louis took an active interest in ecclesiastical matters including the liturgy, and Helisachar, along with his better-known associate Benedict of Aniane (*d* 821), served him as adviser in that regard. Helisachar was the author of a preface and supplement to Alcuin's epistolary, and the author of a letter (written probably at Angers between 819 and 822) to Archbishop Nibridius of Narbonne, in which he described his composition of an Office antiphoner. Like AMALARIUS OF METZ after him, Helisachar was scandalized at the differences between the Roman and Frankish Office books (not those of the Mass, it should be noted), and sought to compile an antiphoner that would presumably serve as a model for the Carolingian realm. He was particularly keen to select verses that would correspond properly with the respond of the responsories; much of the difficulty with inappropriate verses was no doubt caused by the Frankish practice of returning after the verse to some midway point in the response rather than to its beginning, as was the custom in Rome. It has not been possible to reconstruct Helisachar's antiphoner as it has in the case of Amalarius.

JAMES W. MCKINNON

**Hell, Theodor.** *See* WINKLER, CARL GOTTFRIED THEODOR.

**Hellawell, Piers** (*b* Chinley, 14 July 1956). English composer. At New College, Oxford (BA 1978), he studied composition with James Wood; private study with Maw followed (1979–81). He became composer-in-residence at Queen's University, Belfast, in 1981 and was appointed to a lectureship there in 1986.

A resistance to complex unmodulated chromaticism and to single-span evolutionary forms led Hellawell to a 'second neo-classicism' in the mid-1980s. The link with Stravinsky so suggested is also evident in his crafting and juxtaposing blocks of sound, as in *Memorial Cairns* (1992). Several works are entitled *Sound Carvings*, reflecting their hard edges and sharply characterized gestures, some with their origins in landscape; these include *Sound Carvings from Rano Raraku* (1988), which comprises 21 distinct textural blocks derived from a Balinese folk melody, the simplicity of folk procedures serving as an antidote to modernist complexity. Hellawell's blocks vary greatly in level and type of activity. Typically they are densely contrapuntal and full of irregular, jazz-like rhythms, with loosely isorhythmic and canonic techniques transforming repeated shapes in a way that owes something to minimalism. Diatonic, modal and blues material form the starting-points for the guiding harmonic progressions, often supported by a solid bass line. Unconventional, sometimes percussive, string techniques are evident, as in *The Still Dancers* where chopsticks and paper clips are employed. Hellawell's concern with commemoration and for Eastern Europe (he has close contacts with the former Soviet Baltic republics) come together in *Quadruple Elegy (in the Time of Freedom)*, a tribute to four people who died in the transformation of Eastern Europe in the late 1980s. Near the end the soloist is instructed to 'light a tall red candle'.

MICHAEL RUSS

**Hellendaal, Pieter** [Pietro, Petrus, Peter] (*b* Rotterdam, bap. 1 April 1721; *d* Cambridge, 19 April 1799). Dutch

*1. Concert at Christ's College, Cambridge, June 1767: engraving by Abraham Hume after Thomas Orde showing (from left to right) P. Hellendaal (violin), V. Noel (violin), J.F. Ranish (oboe), West (violoncello), J. Wynne, a Cambridge music publisher and composer (double bass), G. Noel (pantaleon) and D. Wood (singer, and later organist of Ely Cathedral)*

violinist, composer and organist, active also in England. When he was nine the family moved to Utrecht, where he was appointed organist of the Nicolaikerk on 11 January 1732. In 1737 the family moved to Amsterdam. The music lover Mattheus Lestevenon, Secretary of Amsterdam, enabled Hellendaal to study with Tartini. Before November 1743 he returned from Italy and appeared as a violinist in certain Amsterdam inns. On 14 February 1744 he obtained a privilege for publishing his compositions, and his first two sets of violin sonatas were issued in Amsterdam. He married the daughter of an Amsterdam surgeon in June 1744. From 1749 to 1751 he was at Leiden, where he enrolled at the university and tried to obtain a foothold in academic music-loving circles. He made frequent public appearances there and at The Hague and Delft. Yet he found little opportunity for building up a livelihood in the Netherlands. On 9 October 1751 he gave his last concert in Leiden and left for London. In the ensuing years Hellendaal participated considerably in London's musical life. He appeared in concerts in Hickford's Room and other places, and his fellow performers could be reckoned among 'the best Hands in Town' (*The General Advertiser*, 28 February 1752); on 13 February 1754 he took part in Handel's *Acis and Galatea*, playing violin solos between the acts. While he was in London he published his Six Grand Concertos op.3, for which he was granted a Royal Privilege, dated 23 April 1758. At the end of 1759 he applied for the post of conductor of the Music Room orchestra at Oxford. He directed a concert there on 5 November and played a concerto of his own; but the other candidate, J.B. Malchair, was appointed. In August 1760 Hellendaal gave a concert in King's Lynn Town Hall. On 5 September 1760 he was appointed organist of St Margaret's there in succession to Charles Burney.

In 1762 Hellendaal moved to Cambridge. Here he worked at first as a performer, later as a teacher of the violin and of theory (among his pupils was Charles Hague, who was appointed professor of music in 1799). According to the *Cambridge Chronicle* of 19 November 1762, Hellendaal was then appointed organist of Pembroke Hall Chapel. He took part in many concerts of particular interest in Cambridge and other places, especially in East Anglia. On 25 May 1763 *Messiah* was given under John Randall in the Senate House, 'with a Solo on the Violin by Mr Hellendaal'. On 28 May and 8 June 1767 he appeared with the pantaleon virtuoso Noel in the halls of Trinity College and Christ's College (fig.1). On 6 October 1773, at Bury St Edmunds, we hear for the first time of an appearance, as a violinist, of Hellendaal's son, Peter (*b* ?London, *c*1756), who became a well-known Cambridge clarinettist, music teacher and music seller. A Hellendaal took part in the Handel Commemoration in London in 1784 but it is not known whether it was father or son.

In 1769 Hellendaal's *Glory be to the Father* was awarded the annual prize of the Noblemen and Gentlemen's Catch Club. About this time his six sonatas for violin and continuo, op.4, were published. In April 1777 he was appointed organist of Peterhouse Chapel, in succession to Dr Randall, professor of music at Cambridge. From this time, the amount of information about concerts given by Hellendaal sharply declines. He moved to Trumpington Street, opposite Peterhouse, and on 11 July 1778 invited subscriptions for 'Twelve of his Solos for the Violin'. About 1780 his *Eight Solos for the Violoncello with a Thorough Bass* were published at his own expense and dedicated to the Cambridge flour merchant John Anderson. His last numbered collection, *Three Grand Lessons* op.6, was published in London, and dedicated to Miss Anderson; the piano part was believed lost until discovered by Charles Cudworth in 1971. Another piano work without opus number, printed by Morris Barford at Cambridge as *Hellendaal's Celebrated Rondo*, is in reality a work for violin and continuo. During the last decades of Hellendaal's life a number of vocal works, some with instrumental accompaniment, and a collection of metrical psalms, were published at the composer's house. Hellendaal's son Peter collaborated in the latter, and in 1790 he was also responsible for selecting and arranging various hymns and psalms from his father's *Collection of Psalms and Hymns* for use in parish churches. One of Peter's own compositions was included in the collection. In 1791 and 1797 another six sonatas for harpsichord and violin or flute and a setting of the

2. *Autograph MS, including written-out cadenza, of the Pastorale of an unpublished violin sonata by Hellendaal (GB-Cfm)*

Sermon on the Mount were announced for publication, but no copies are known and the works may never have been published. Hellendaal died in 1799 and was buried at Cambridge at St Mary the Less, next to Peterhouse.

Sainsbury referred to Hellendaal as 'a man of undoubted attainments in musical science'; this is particularly apparent in the concerti grossi, the op.4 sonatas and some of the op.5 solos. Many of his works are in the idiom of the Italian late Baroque: they follow thoroughbass practice and are mainly formed of monothematic movements with asymmetrical binary structure. His violin sonatas generally conform to the three-movement cyclic structure favoured by Tartini (slow, fast, fast). His concertos op.3, like Handel's op.6, combine a number of styles and forms; they are generally fugal and show progressive qualities in the free handling of the viola part and the relatively minor importance of the concertino. Not until the *Three Grand Lessons* op.6 (1790) did he adopt a more modern idiom. Hellendaal's violin writing was characteristically virtuoso, and the written-out cadenzas to his autograph violin sonatas (*GB-Cfm*) are especially valuable to the study of late 18th-century performing practice (fig.2).

Hellendaal's son Peter was last heard of as the soloist in one of his father's concertos, performed at a benefit concert on 17 April 1801 under the direction of Charles Hague, a former pupil of Hellendaal senior.

LEENDERT HAASNOOT

**Heller, Barbara** (*b* Ludwigshafen am Rhein, 6 Nov 1936). German composer and pianist. She studied at the Mannheim Musikhochschule (1954–7), where her teachers included Helmut Vogel (piano) and Hans Vogt (composition). After teaching the piano there from 1958 to 1962, she continued her studies at the Munich Musikhochschule (1962–3) with Eric Ten Berg (piano) and Harald Genzmer (composition), among others; she

also studied at the Darmstadt summer courses with Hermann Heiss (composition) and David Tudor (piano), and at the Accademia Musicale Chigiana, Siena, with A.F. Lavagino (film music). A founding member of the Internationaler Arbeitskreis Frau und Musik (1978), Heller has concentrated as a performer and editor chiefly on the music of women composers. She received her first commission for a musical composition from Moeck Verlag, Celle, in 1984. From 1990 to 1996 she worked intensively with experimental and electronic music and graphic compositions; these were exhibited as a body of work in Weimar in 1996. She regards her piano compositions of the 1980s and 90s as her most important works.

WORKS
(*selective list*)

Pf: 8 kurze Klavierstücke, 1962; Presto, 1966; Andantino, 1977; MMM – Meer Musik als Malerei, 1978; Piano muziek voor Anje, 1980; Johannisbeeren – Currants, 1984; Scharlachrote Buchstaben, 1984; Furore – ein Traum, 1986; Intervalles, 1987; Böhmisches Lied, 1988; Das Quintenbuch, 1989; Un poco, 1991; Roter Klee, 2 pf, 1995; Ton – Zeichen, 1996

Graphic scores: Im Feuer ist mein Leben verbrannt – für Gesine Wagner, ens, 1987; Ton-Zeichen, ob, pf, inst ad lib, 1988–9; Domino, 1 inst, 1993; Kartenspiele, 1–10 insts, 1994; Stationen, ens, 1994

ROSWITHA SPERBER/BETTINA BRAND

**Heller, Joachim** [Hellerus Leucopetraeus] (*b* Weissenfels, *c*1518; *d* Eisleben, *c*1590). German mathematician, astronomer, teacher, printer, composer and poet. He studied at the University of Wittenberg from 1536. In 1543, on Melanchthon's recommendation, he succeeded Wilhelm Breitengraser as Rektor of the St Egidien grammar school, Nuremberg. In 1546 he also became professor of mathematics at the St Egidien Gymnasium. He frequently staged school comedies. From 1551 he ran his own printing works. He was forced to leave Nuremberg in 1563 because of his controversial religious activities. He subsequently worked as astronomer to the electorate of Saxony in central Germany, mainly at Mansfeld and Eisleben. Three bicinia by him are known, a song in praise of music (in RISM 1549[16]) and two settings of hymns by Luther (in 1551[20]; one of the latter in K. Ameln, ed.: *Luthers Kirchenlieder in Tonsätzen seiner Zeit*, Kassel, 1934). Two pieces signed 'J.H.' in Caspar Othmayr's *Bicinia sacra* (1547[18]) which Eitner ascribed to Johannes Heugel are probably not by Heller as Albrecht assumed; they are more likely to be by Johannes Hartung, who was Othmayr's father-in-law.

FRANZ KRAUTWURST

**Heller, Johann Kilian** (*b* Hammelburg, Lower Franconia, ?1633; *d* Würzburg, 10 Oct 1674). German composer, music editor and organist. He may have studied music with his father and with P.F. Buchner. On 19 September 1653 he matriculated as 'physicus' at the University of Würzburg. The next year he became organist and curate at Würzburg Cathedral. In 1658 he was ordained priest but was dismissed in 1668 for offences against canon law. Nevertheless, a year later the Elector and Prince-Bishop of Mainz, who ruled over Würzburg too and was a noted patron of music, sent him, his best-trained musician in liturgical music, to a new post in Mainz, where he commissioned him to publish new editions of liturgical books for use in the Mainz diocese. He returned to Würzburg before his death. His choirbooks, which he edited with scrupulous care, were: *Opus lamentationum et passionum*; *Graduale*; *Processionale*; *Praefationes*; *Officium S. Angeli custodis*; *Officium defunctorum*; *Manuductio ad cantum Gregoriano-Moguntinum*; and *Extractum ex Antiphonario*; they were printed at Mainz between 1671 and 1673. They remained in use for 150 years in the dioceses of Mainz, Würzburg and Worms; handsomely produced editions which appeared at Mainz between 1750 and 1774 were based on them. Heller also published *Sacer Concentus musicus* (Mainz, 1671), which consists of instrumental works and accompanied vocal works: the instruments used are strings and continuo. Item no.72 in the Rost manuscript (*F-Pn* Rés.Vm$^7$.673) is a sonata for two violins and continuo attributed to Heller; it consists of a section in A minor, whose authenticity has been questioned by Moser, followed by one in the major.

FRIEDRICH BASER

**Heller, Karl (Wilhelm)** (*b* Trusen, Thuringia, 10 Dec 1935). German musicologist. He studied musicology at the Musikhochschule in Weimar (1954–5) and at the universities of Jena (1955–6) and Leipzig (1956–9) with Besseler, Eller and H.C. Wolff. He took the doctorate at Rostock University in 1965 with a dissertation on the transmission of Vivaldi's works in Germany, and completed the *Habilitation* in 1983 with a study on the *concerto ripieno* and the symphonies of Vivaldi. He was supernumerary professor at Rostock (1988–92) and subsequently professor. He specializes in 17th- and 18th-century instrumental music, particularly that of J.S. Bach and Vivaldi. He has contributed to the collected edition of Bach and prepared critical editions of Vivaldi's vocal and instrumental works for the Istituto italiano Antonio Vivaldi.

CHRISTIAN KADEN

**Heller, Stanislav** (*b* Brno, 15 Sept 1924; *d* Jihlava, 23 Jan 2000). Czech harpsichordist. After studies at the Prague Conservatory he moved to London in 1947 and eventually became a British citizen. His interest in the harpsichord was initially inspired by Thomas Goff, who sponsored such players as George Malcolm and Thurston Dart. After lessons with Aimée van der Wiele and Ralph Kirkpatrick, Heller established himself in the 1950s as a brilliant harpsichordist who brought to the instrument the standards of a first-rate pianist. He was appointed professor at the RCM and toured extensively in Europe and in South America, where he was the first to introduce the harpsichord as a concert instrument. He has a particular interest in French harpsichord music and in contemporary repertory, and in 1956 persuaded Martinů to revise and eventually publish his harpsichord concerto of 1935, which Heller performed in many European cities with Kubelík. From 1968 to 1989 he was professor of harpsichord and early chamber music at the Staatliche Hochschule in Freiburg, where he was known for his inspired teaching and exacting technical standards.

DAVID LEDBETTER

**Heller, Stephen** [István] (*b* Pest, 15 May 1813; *d* Paris, 14 Jan 1888). French pianist and composer of Hungarian birth. His parents were of Jewish descent and came from the vicinity of Eger (Cheb, Bohemia). He was first taught music by a regimental bandsman stationed near the Hungarian capital, and then by Ferenc Bräuer, a well-known piano teacher in Pest. He took composition lessons from an organist called Cibulka and then went to Vienna to study with Carl Czerny, but his father soon found that he could not afford the celebrated teacher's high fees. Stephen became a pupil of Anton Halm, the teacher of Adolf Henselt and other 19th-century virtuosos. Through Halm, Heller met Schubert and Beethoven. In 1828 he made his début, and his success encouraged his father to arrange a concert tour through Hungary, Transylvania, Poland and Germany. It lasted almost two years and ended in Augsburg, where he collapsed from nervous exhaustion; intending to stay only a few weeks to recover, he remained for eight years. During this time he lived in the home of Frau Caroline Hoeslin von Eichthal, a highly intelligent and artistic woman whose son became one of his first pupils. He also came under the patronage and guidance of the cultivated Count Friedrich Fugger-Kircheim-Hoheneck, a gifted musician who encouraged him to study composition under Hippolyte Chelard, the Kapellmeister in Augsburg.

Heller's first Augsburg compositions were numerous lieder to words by Goethe, Heine and other German poets; these have remained unpublished. (The manuscripts, formerly thought to be in the private library of the Fugger family in Augsburg, are lost.) A few years after his arrival in Augsburg, he submitted some compositions for criticism to Schumann, who reviewed them enthusiastically in the *Neue Zeitschrift für Musik*. He soon became one of Schumann's favourite 'Davidsbündler' and was invited to serve as the Augsburg correspondent of the *Neue Zeitschrift* (under the pseudonym 'Jeanquirit' bestowed by Schumann). Schumann regarded his exchange of letters with Heller as his most interesting correspondence. In 1838 Heller moved to Paris, where he was to remain for the rest of his life, numbering Berlioz among his closest friends. To support himself Heller accepted piano pupils and wrote music criticism for the *Gazette musicale*. (Like Liszt, in his later years he disliked giving piano performances.) In 1883 his sight began to fail, allegedly because of his fondness for black cigars. His loyal friend Charles Hallé learnt of his condition, and with Robert Browning and Lord Leighton formed a trust fund for him. Shortly before his death Heller was made a Chevalier of the Légion d'Honneur.

The first of Heller's more than 160 published piano compositions date from 1829. These pieces vary in difficulty; they include elementary studies in the conventional style of the period, harmonically straightforward and of simple periodic construction within a framework akin to two- or three-part song forms, as well as demanding character-pieces. In his review of two of the early works, the *Introduction, variations et finale* op.6 and the Sonata in D minor op.9, dedicated to his friend the Countess of Brunswick (a former patron of Beethoven), Schumann predicted a successful musical future for their composer. Writing of the op.7 Impromptus he remarked that Heller's forms were 'new, fantastic and free' and that he had 'imagination and the ability to fuse contrasting elements'; while admitting that there were many details that he did not find pleasing, he acknowledged that Heller 'suddenly disarms criticism with a brilliant turn of phrase' (*NZM*, vii, 1837, p.165). Two years later he discerned in Heller's piano pieces a Janus-like face looking towards both his Classical antecedents

and Romanticism. Heller particularly revered Beethoven as an example, and maintained a certain distance in his youthful works from his more progressive contemporaries. Heller was first noticed in Paris as a composer when he published his group of studies *L'art de phraser* (op.16) and when his concert study *La chasse* (op.29) was performed by Liszt and other virtuosos throughout Europe. His reputation as a composer primarily of studies became so entrenched that he had difficulty in gaining recognition for his other music; the accomplished studies of opp.45, 46 and 47 (1844) are still familiar to pianists and, with op.16, are among his few works still in print. His early transcriptions, together with those by Liszt, helped to acquaint the French with Schubert lieder. It was in these works and the operatic fantasias that Heller's originality first showed itself, with chains of dissonances and chromatic shifts. The rhythmic vitality and lyricism of many of these early compositions are reflected in the music of both Bizet and Massenet, great admirers of Heller.

The first work that clearly indicated his position as a transitional figure was the suite of evocative character-pieces *Spaziergänge eines Einsamen* (vol.i, op.78, 1851); its reflective, introspective character suggests future developments in French music. Its subtlety and pastoral qualities are shared by his three sets of pieces *Im Walde* (opp.86, 128 and 136) and the *Blumen-Frucht- und Dornenstücke* (op.82); these and similar works can be described as 'landscape' or 'nature' music. The highly original preludes op.81, as well as the *Blumen-Frucht- und Dornenstücke* and *Ein Heft Walzer* op.145, show interesting ventures in harmony and rhythm that foreshadow the music of Saint-Saëns, Chabrier, Fauré and Debussy. Some of the other late works contain characteristics mirrored in the music of Medtner and Rachmaninoff; among them are the studies op.90, eclogues op.92, preludes op.119, studies op.125, barcarolles op.141, the Sonata in B♭ minor op.143 and preludes op.150. Heller's later works are characterized by their rich harmony, frequently marked by pungent dissonances and mingling of major and minor, angular and wide-ranging melodies, ostinato rhythmic figures and a highly expressive use of appoggiaturas. In them he exploits the full range of the keyboard, showing a sensitive feeling for orchestral colour in his unusual pedal effects, frequent changes of registration and imaginative use of dynamics. The exhilarating effect of his music for the performer owes much to its incisive, vital rhythms and the grateful manner in which the notes lie under the fingers. The frequent use of doublings and parallelism in his last, transparently textured works is another significant indication of Heller's transitional position between late German Romanticism and French Impressionism. His later compositions were remarked on for their rejection of overt Romanticism, but such contemporaries as Hans von Bülow failed to appreciate the singularity of his style, and rejected him as he gradually became more isolated from the mainstream.

## WORKS

*unless otherwise stated, all for piano solo and published in Leipzig*

*detailed list in Müller-Kersten (1986)*

### VARIATIONS

| op. | |
|---|---|
| 1 | Thème de Paganini varié (1829) |
| 4 | Variations brillantes sur une valse de Hubowsky (Pest, 1829) |
| 5 | Variations brillantes sur un thème polonais (Pest, 1829) |
| 6 | Introduction, variations et finale (thèmes favoris de l'opéra Zampa) (1830) |
| 75 | Rondeau-caprice et variations sur La dame de pique de Halévy (1849) |
| 127 | Freischütz-Studien (1871) |
| 130 | 33 Variationen über ein Thema von Beethoven (1871) |
| 133 | Variationen über ein Thema von Beethoven (Berlin, 1872) [21 variations on the Andante, Sonata op.57] |
| 142 | Variationen über 'Warum' von Schumann (1877) |

### STUDIES

| | |
|---|---|
| 16 | L'art de phraser, 24 studies (Berlin, 1840) |
| 29 | La chasse, étude de concert (Berlin, 1844) |
| 45 | 25 études faciles (Berlin, 1844) |
| 46 | 30 études progressives (Berlin, 1844) |
| 47 | 25 études pour former au sentiment du rythme et à l'expression (Berlin, 1844) |
| 90 | 24 nouvelles études (Berlin, ?1858) |
| 96 | Grande étude (1860) |
| 116 | 2 études (Mainz, 1866) |
| 125 | 24 études d'expression et de rythme (1868) |
| 135 | 2 intermèdes de concert (Winterthur, 1873) |
| 139 | 3 Etüden (1874) |
| — | Etude in Ein Studienwerk (Pest, 1874) |
| 151 | 2 Etüden (1879) |
| 154 | 21 technische Studien als Vorbereitung zu den Werken Chopins (1879) |

### CHARACTER-PIECES

| | |
|---|---|
| 2 | Les charmes de Hambourg, rondeau brillant (Hamburg, 1829) |
| 40 | Miscellanées (Berlin, 1844): Rêverie, Eglogue, La petite mendiante |
| 49 | 4 arabesques (Berlin, 1844) |
| 50 | Scènes pastorales (1844) |
| — | Skizze (Berlin, 1844) |
| 54 | Fantaisie (Berlin, 1845) |
| 58 | Rêveries (Berlin, 1845) |
| — | Eglogue (Mainz, 1845) |
| 60 | Canzonetta no.1 (Berlin, 1846) |
| 71 | Aux mânes de F. Chopin: Elégie et Marche funèbre (1849) |
| 73 | 3 Stücke (Bonn, 1849): Jägerlied, Soldaten-Abschied, Wiegenlied |
| 78 | Spaziergänge eines Einsamen, i, 6 pieces (1851) |
| 79 | Traumbilder, 6 pieces (Berlin, 1851) |
| 80 | Wanderstunden, 6 pieces (Offenbach, 1852) |
| 82 | Blumen-Frucht- und Dornenstücke (Berlin, 1853) |
| 83 | 6 feuillets d'album (Berlin, 1853) |
| 86 | Im Walde, i, 7 pieces (1854) |
| 89 | Spaziergänge eines Einsamen, ii, 6 pieces (1856) |
| — | Prière: andante (Winterthur, 1856) |
| 92 | 3 Eklogen (Berlin, 1858) |
| 94 | Genrebild (1860) |
| 95 | Allegro pastorale (Bonn, 1860) |
| 99 | 4 Fantasiestücke (Mainz, 1861) |
| 100 | Canzonetta no.2 (1861) |
| 101 | Rêveries d'un promeneur solitaire (after J.-J. Rousseau) (Bonn, 1861) |
| 102 | Jagdstück (1861) |
| 105 | 3 Lieder ohne Worte (Winterthur, 1862) |
| 106 | 3 Schäferstücklein (Mainz, 1863) |
| 109 | Herbstblätter (Mainz, 1864) |
| 110 | Ein grosses Albumblatt und ein kleines (1864) |
| 114 | 2 cahiers (Mainz, 1866): prélude et scène d'enfants, Presto scherzoso |
| 115 | 3 ballades (Mainz, 1866) |
| 118 | Variétés (Mainz, 1867): Boutade, Feuillet d'album, Air de ballet |
| 120 | 7 Lieder für Pianoforte (1867) |
| 121 | 3 morceaux (1867): Ballade, Conte, Rêverie du gondolier |

— [3] Esquisses posthumes, i (London, 1888)
— [3] Suites, Cahier des esquisses posthumes, iii (London, 1889)

TRANSCRIPTIONS, OPERATIC FANTASIAS ETC.

3 Fantaisie dramatique sur des thèmes des opéras Semiramide et La muette (Hamburg, 1829)
10 3 morceaux brillants sur L'élisire et Norma (Mainz, 1839)
12 Rondoletto sur la Cracovienne du ballet La gipsy (1840)
13 Divertissement brillant sur Ouvrez-moi de l'opéra Les treize de Halévy (1840)
14 Passe-temps (Berlin, 1839) [6 caprices on dances by J. Strauss]
15 Rondino brillant sur la Pauvre couturière dans l'opéra Les treize de Halévy (1839)
17 6 caprices sur Le shérif de Halévy (Mainz, 1840)
18 Improvisata sur la Chanson du pays de Reber (Mainz, 1840)
19 2 caprices sur la Captive de Reber (Mainz, 1846)
20 2 impromptus sur Haï luli de Reber (Berlin, 1844)
21 2 impromptus sur Bergeronette de Reber (Mainz, 1844)
22 4 rondos très faciles sur La favorite de Donizetti (Berlin, 1841)
23 4 rondos brillants sur Le guitarrero de Halévy (Berlin, 1841)
25–6 [2] Paraphrase[s] sur Richard Coeur de Lion [Grétry] (Vienna, 1842)
31 Fantaisie sur La Juive de Halévy (Berlin, 1843)
32 Bolero sur La Juive de Halévy (Berlin, 1843)
33–6 Mélodies de Schubert (Berlin, 1844): Die Forelle, Erlkönig, Die Post, Lob der Tränen
37 Fantaisie sur En respect mon amour se change de Charles VI de Halévy (1844)
38 Caprice brillant sur Avec la douce chansonette de Charles VI de Halévy (1844)
41 Caprice sur un motif du Déserteur de Monsigny (Hanover, 1844)
48 [2 pieces from Halévy's Charles VI] (Berlin, 1844): Chant national, Silvana (pastorale)
51 Caprice brillant sur la Marche de la caravane et la Rêverie du Désert de David (Berlin, 1844)
55 Lieder von Schubert (Berlin, 1845): Wohin?, Liebesbotschaft, Die Nebensonnen, Der Müller und der Bach, Die liebe Farbe
— Bagatelle sur une romance de Monpou (Mainz, 1845)
66 Caprice brillant sur Le val d'Andorre de Halévy (Berlin, 1846)
67 Improvisata: Auf Flügeln des Gesanges von Mendelssohn (Berlin, 1846)
— 15 mélodies de Schubert (Paris, 1846)
— 30 Lieder von Schubert, übertragen (Cologne, 1846)
68 Horch, horch, die Lerch', Ständchen von Schubert (Berlin, 1847)
69 Es ist bestimmt in Gottes Rat von Mendelssohn: Fantaisie in Form einer Sonate (Berlin, 1847)
70 Caprice brillant sur Le prophète de Meyerbeer (1847)
72 Capricen, Impromptus und Improvisationen über Lieder von Mendelssohn (Bonn, 1849): Volkslied, Minnelied, Sonntagslied
74 Fantaisie et valse sur L'enfant prodigue d'Auber (Berlin, 1849)
76 Capriccio über Die Heimkehr aus der Fremde von Mendelssohn (1849)
77 Saltarello über ein Thema der 4. Symphonie von Mendelssohn (1851)
98 Improvisata über Flutenreicher Ebro von Schumann [from the Spanische Liebeslieder] (Winterthur, 1861)
144 2 Capricen über Themen von Mendelssohn (1877): Fingalshöhle, Elfenmarsch

SONATAS AND SONATINAS

Sonatas: no.1, d, op.9 (1829); no.2, b, op.65 (1844); no.3, C, op.88 (1856); no.4, b♭, op.143 (1878)
Sonatinas: op.146 (1878); op.147 (1878); op.149 (1879)

SMALLER FORMS AND DANCE PIECES

3 Ouvertüren [for a drama, a comedy and a comic op], op.126 (1870)
Scherzos: Rondo scherzo, op.8 (1831); op.24 (Vienna, 1844); Scherzo fantastique, op.57 (Berlin, 1845); Humoreske, op.64 (1846); op.108 (Mainz, 1863)
Capriccios: Caprice brillant, op.27 (1844); Caprice brillant, op.28 (Vienna, 1844); op.63 (1846); Caprice humoristique, op.112 (Mainz, 1865); Fantaisie-Caprice, op.113 (Mainz, 1865); Capricietto, op.156 (Paris, 1879)
Impromptus: 3 as op.7 (1831); 1 as op.84 (Berlin, 1854); 2 as op.129 (1871)
Nocturnes: Sérénade, op.56 (Berlin, 1849); Sérénade (Berlin, 1856); 3 as op.91 (1858); 1 as op.103 (Berlin, 1861); 3 Ständchen, op.131 (1872)
Préludes: 24 as op.81 (1853); 3 as op.117 (Mainz, 1867); 32 'à Mlle Lili', op.119 (1867); 20 as op.150 (1879); 6 in Cahier des esquisses posthumes, ii (London, 1889)
Waltzes: Rondo valse, op.11 (Mainz, 1840); Valse élégante, op.42 (Berlin, 1844); Valse sentimentale, op.43 (Berlin, 1844); Valse villageoise, op.44 (Berlin, 1844); Valse brillante, op.59 (Berlin, 1845); 2 as op.62 (Berlin, 1846); 2 as op.93 (Winterthur, 1859); 12 Ländler und Walzer, op.97 (1860); 4 Ländler, op.107 (Mainz, 1863); Valses-Rêveries, op.122 (1867); 6 in Ein Heft Walzer, op.145 (1878), also arr. pf 4 hands, op.152 (1879)
Tarantellas: no.1, op.53 (Berlin, 1845); no.2, op.61 (Berlin, 1846); nos.3–4, op.85 (1854); no.5 (Scènes italiennes), op.87 (1855); nos.6–7, op.137 (1873)
Mazurkas: 4 as op.148 (1879); 1 as op.158 (1879)
Polonaises: 1 as op.104 (1861); 2 as op.132 (Bonn, 1872)
Other dance pieces: La Kermesse, danse néerlandaise, op.39 (Berlin, 1844); Vénitienne, op.52 (Berlin, 1844); Morceaux de ballet, op.111 (Mainz, 1865): Pas noble, Intermède, Pantomime, Couplets dansés; 4 Barkarolen, op.141 (1875)

VIOLIN AND PIANO

Grand duo sur le Dom Sébastien de Donizetti, op.21 (Vienna, 1844), collab. H.W. Ernst
Pensées fugitives (Vienna, 1844), collab. H.W. Ernst, arr. Heller for pf, op.30 (1844)

RONALD EARL BOOTH/MATTHIAS THIEMEL

**Hellermann, William (David)** (*b* Milwaukee, 15 July 1939). American composer and guitarist. He studied composition at Columbia University (MA 1965, DMA 1969), where his teachers included Stefan Wolpe, Chou Wen-chung, Otto Luening and Vladimir Ussachevsky. He taught at Columbia from 1965 to 1972 and was general manager of the Composers' Forum from 1968 to 1980; he has also served as editor of the *Calendar for New Music*, New York (1978–), co-director of the DownTown ensemble (1982–) and president of the SoundArt Foundation. Among his awards are the Prix de Rome (1972–4), a Rockefeller grant (1975) and grand prize at the 15th Festival Internacional de Teatro, Barcelona (1982).

Hellermann made his New York début as a classical guitarist and composer in 1972. He has since performed as a member of Composers' Group for International Performance (later the Composers'/Performers' Group), RSVP Ensemble, and Sounds Out of Silent Spaces. Many of his works cross the boundaries between visual and aural art; his visually orientated works, which he calls 'Eyescores' (see illustration), have been displayed in several gallery exhibitions. His compositions from the mid-1970s can be considered performance art, although they retain a distinctly musical orientation and sensibility.

WORKS

Orch: Time and Again, 1969; On Another Level, 21 mallet insts, 1974; But, the moon, gui, 13 insts, 1975; Anyway, 1977; Can of Sourdines, str, 1979

Variable ens: Stop/Start, 1973; Long Island Sound, 1974; Experimental Music, 1975; Frozen Music is not Melted Architecture, 1975; One-A-Day Music Pills, 1975; To Get a Peep Out Of, 1976; To Prevent Decay, hp, variable ens, 1976; Clash/Clash/Clash/Clash, 1977; Florida Sym., 1977; Evening the Score, 1979; For John Cage, 1992

4–6 insts/pfmrs: Resonata, brass qnt, 1967; Circle Music I, 4 insts, 1971; Circle Music III, 6 pfmrs, 1971; To the Last Drop, 6 vib, 1974; To Brush Up On, 6 vc, 1976; Sextet, 6 pfmrs, 1977; Hit Tune, 5 perc, 1983; Squeeze me Loose I Get Hot so Easy, 5 accdn, 1983; Tweet Suite, 5 tuba, 1983; Vowel Movt, soloist, qt, 1983; Wind-Up Sym., qnt, surprise guest artists, 1983; Juicy Music, B♭ cl, vn, vc, mar, pf, 1990; On the Vanishing Point, 4 insts, 1990; Post/Pone, B♭ cl, trbn, va, pf, 1990; Hoist by your Own Ritard, B♭ cl, mar, accdn, pf, 1993; several other works

1–3 insts/pfmrs: Round and About, 2 or more insts, 1970; Circle Music II, 2 or more insts, 1971; For the Third Time, 3 ww, 1973; On the Edge of a Node, gui, vn, vc, 1974; Italian Sym. no.1, soloist, 1975; Hidden Drives II, vn, vc, 1976; Meaty Music, soloist, 1977; Squeek, chair, 1977; 3 Weeks in Cincinnati in Dec, fl, 1979; Tremble II, db, 1981; The Violin between Us, vn, 1981; The Bartered Bird, duet, 1983; French Ov., soloist, 1983; Ancient Virtues, 3 insts, 1987; more than 10 other works

Gui: 4 Pieces, 1968; Exchanges, 1969; Distances/Embraces, 1972; Still and All, 1975; Tremble, 1978

Pf: Inter-polations, 1966; On the Vanishing Point, pf, tape delay, 1973; Row Music (Tip of the Iceberg), 1973; For Otto (A Line in Return), 1974; At Sea, 1976; Hidden Drives I, 1976; Chops, toy pf, 1989

Vocal: Poem, S, 4 insts, 1967; Countertenormusic, Ct, variable ens, 1972; Entrances, chorus, 1976; Local Exits, S, chbr ens, 1976; Nests (textless), solo v, chorus, 1976; 3 Sisters who are not Sisters, 5 actors/musicians, 1984; Blood on the Dining Room Floor (G. Stein), 1991

Tape, sculpture: City Games (Hellermann), with 3 vn, 1978; Musical Drawers, 1979; Wind Music, 1979; Morning Music (Staff of Life), 1981; Battery Park, 1982; Chin Music, 1982; Homage to Chubby Checker – Doin' the Twist, 1982; Juicy Music, 1982; Music Plane and Fancy, 1982; Progress in Music Demands Daily Drill, 1982; Smoke Gets in your Ears, 1982; After Dinner Music, with acc., 1983; I Brake for Music, with ens, 1983; many other pieces

Tape: Ariel, 1967; Ek-stasis I, 1968; Mai'68, 1969; Ek-stasis II, with timp, pf, 1970; Passages 13 – The Fire (R. Duncan), with tpt, 1971; Parted . . ., with 3 pfmrs, 1972; One into Another (Ariel), with eng hn, 1972

Other mixed-media works, incid music

Principal publishers: ACA, Presser, Soundings

Principal recording companies: CRI, Turnabout (Vox), Nonesuch

JOAN LA BARBARA

*William Hellermann: Visible Musics, 1976: 'To the Last Drop'*

**Hellerus Leucopetraeus.** *See* HELLER, JOACHIM.

**Hellinck, Lupus** [Wulfaert] (*b* ?Axel, *c*1494; *d* Bruges, *c*14 Jan 1541). Netherlandish composer. A son of Johannes Hellinck from the diocese of Utrecht, he became a choirboy at St Donatian, Bruges, on 24 March 1506. When his voice broke in 1511 he was sent away to school, returning as a verger on 16 November 1513. At the end of 1515 he left to study for the priesthood, for which he supplicated in Rome in April 1518 while in papal service; later that month he was granted an indult since he was leaving Rome (Sherr, pp.xi–xii). From the supplication document we learn that he was 24 years old and held a perpetual chaplaincy of the altar of St Nicholas in St John's Hospital, Bruges. Hellinck may be identifiable with the 'Lupo francese/fiammengo cantore' documented in the service of Sigismondo d'Este in Ferrara from June 1518 to the end of April 1519 (Lockwood, 1979, pp.198–9); whether he is the author of motets signed 'Lupus' in sources of that time is doubtful on stylistic grounds (*see* LUPUS). On 19 October 1519 Hellinck was readmitted to St Donatian as an installed cleric, where his duties included singing in the polyphonic choir. Two years later he became succentor of the church of Our Lady, Bruges, returning to St Donatian to take up the same position on 17 June 1523. The account rendered by his executors a year after his death establishes the correct Flemish spelling

of his first name, Wulfaert, and that he had a son called Wulfuekin. He is called 'Lupus' in the church records only after he became succentor, in accordance with the custom to latinize names on reaching a certain station. Hellinck's music was published in Italy, France, Germany and the Netherlands and is found in manuscripts as far apart as Portugal and Poland. Many sources give only the name Lupus; conflicting attributions with Johannes Lupi are rare.

Hellinck was a master craftsman. He was particularly interested in thematic unification and used a number of techniques to achieve it. The considerable variety of his melodic and rhythmic lines is balanced by a fairly smooth dissonance technique and a fine feeling for form. The two *partes* of his motets usually contain about the same number of bars, and points of imitation are normally of the same length; occasionally a short theme group is balanced by a longer one. He did not use cantus firmus or canon, rarely paraphrased a chant melody, and avoided sequences and chordal sections, preferring an evenly flowing polyphony achieved through the use of pervading imitation.

Hellinck's main contribution is to the mass; he wrote 13 parody masses, all in a surprisingly uniform technique. His parody procedure does not involve quoting substantial vertical passages from the model, except in the *Missa 'In te Domine speravi'*, based on his own motet. He preferred to develop new contrapuntal combinations based on themes from the model. He unified his masses by drawing repeatedly on the same themes and by reiterating passages from earlier sections of the mass to a different text. Extensive use of such self-borrowing occurs especially in the Agnus Dei sections, which serve as thoughtful codas to his masses; only the *Missa 'In te Domine speravi'* has a newly-composed Agnus Dei. Self-borrowing is particularly evident in *Missa 'Veni sponsa Christi'*, which has at least 25 repeated passages, ranging from four to 19 bars. Hellinck followed traditional procedures in using themes from the first part of the model in consecutive order in the Kyrie, the first sections of the Gloria and Credo, the Sanctus proper and the first Agnus Dei. Themes from the second part of the model are used consecutively in the 'Qui tollis' section of the Gloria, the final section of the Credo, the 'Osanna' and the last Agnus Dei. The 'Domine Deus' section of the Gloria and the Benedictus are usually freely composed. With two exceptions, the 'Et incarnatus' is set in threefold repetition in slow chords, interspersed with brief imitative passages.

Hellinck's earlier works tend towards tonal and formal clarity; the psalm motets *Beati omnes*, *In te Domine speravi* and *Qui confidunt in Domino*, and the well-known *Panis quem ego dabo* are good examples. These works clearly show the influence of Josquin, although they do not have the airiness of texture of Josquin's psalm motets. Hellinck's later compositions, particularly the motets *O veneranda martyrum*, *Joannes Jesu Christo* and the motet in honour of St Donatian, *Cursu festa dies*, seem to reflect Gombert's influence. Short imitations develop into long melismatic lines in which the text takes a subordinate position. Cadences are avoided by extensive overlapping in a uniformly dense texture, which does not have paired imitation and other contrasts in vocal scoring. Self-borrowing also occurs in the motets.

Hellinck's 11 German chorales, published posthumously by Georg Rhau in 1544 and perhaps commissioned by him, are written in motet style, with the chorale tune in the tenor, sometimes in breves but often rhythmically similar to the other three voices. They indicate that Hellinck, although a Catholic priest, was sympathetic to the Reformation, a thesis reinforced by his participation, at the competition of Chambers of Rhetoric in Ghent in 1539, in a play that was later placed on the Index.

WORKS

*only principal sources given*

Edition: *Newe deudsche geistliche Gesenge, 1544*, ed. J. Wolf, DDT, xxxiv (1908/*R*) [W]

MASSES

Missa 'Christus resurgens', 4vv, 1544[1] (on Richafort's motet); Ky ed. A. Smijers, *Van Ockeghem tot Sweelinck*, vii (Amsterdam, 1956), 223

Missa 'Confitemini Domino', 4vv, *F-CA* 5 (anon. in source but attributable to Hellinck on stylistic grounds; on Mouton's motet)

Missa 'Ego sum qui sum', 5vv, *E-MO* 776 (on Richafort's motet); Cr ed. in Mw, xxii (1962; Eng. trans., 1964), no.46

Missa 'Jam non dicam vos servos', 4vv, 1532[3] (on Richafort's motet)

Missa 'In te Domine speravi', 4vv, 1568[1] (on his own motet)

Missa 'Intemerata virgo', 4vv, 1545[1] (on Josquin's motet: 3p. and 4p. of Vultum tuum deprecabuntur)

Missa 'Mater Patris', 4vv, *MO* 776 (on Brumel's motet), ed. in Exemple musica Neerlandica, x (Utrecht, 1975)

Missa 'Panis quem ego dabo', 4vv, 1532[5] (on his own motet)

Missa 'Peccata mea', 4vv, 1544[1] (on Richafort's motet)

Missa 'Surge propera amica', 4vv, *MO* 776 (on Lupi's motet)

Missa 'Surrexit pastor bonus', 5vv, 1543[1] (on A. de Silva's motet); attrib. Lupus Italus in *GB-Cp* 471–4

Missa 'Veni sponsa Christi', 5vv, 1543[1] (on Richafort's motet; attrib. Hesdin in *I-Rvat* C.S.17)

Missa 'Virgo mater salvatoris', 4vv, 1545[1] (on anon. motet in *F-CA* 124)

MOTETS

Beati omnes qui timent Dominum, 4vv, 1532[10]; Cursu festa dies sydereo, 5vv, 1545[3]; Ego sum panis vitae, 4vv, 1539[10]; Hodiernae lux diei, 4vv, 1532[10]; In te Domine speravi, 5vv, 1532[9], ed. A. Smijers and A.T. Merritt, *Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535*, ix (Monaco, 1962), 55; Joannes Jesu Christo, 4vv, 1553[9]; Laetetur omne saeculum, 4vv, 1532[11]

Mane surgens Jacob, 4vv, 1545[2]; Ne projicias me, 5vv, 1545[3]; O veneranda martyrum, 5vv, 1546[7]; Panis quem ego dabo, 4vv, 1532[10], ed. in Rhau, Musikdrucke, iii (1959), no.35; Pater noster, 5vv, 1540[6]; Primo die Sabbatorum, 4vv, 1554[10]; Qui confidunt in Domino, 5vv, 1542[6]; Usquequo Domine oblivisceris me, 4vv, 1535[1], ed. A. Smijers and A.T. Merritt, *Treize livres*, ix (Monaco, 1962), 93

CHORALES

Ach, Vater unser, der du bist, 4vv, W 70; An Wasserflüssen Babylon, 4vv, W 162; Aus tiefer Not schrei ich zu dir, 4vv, W 105; Capitan Herre Gott, 4vv, W 168; Christ lag in Todesbanden, 4vv, W 17; Durch Adams Fall ist ganz verderbt, 4vv, W 145; Ein feste Burg ist unser Gott, W 95; Frölich wollen wir Halleluia singen, 4vv, W 158; Mensch, wilt du leben seliglich, 4vv, W 51; Mit Fried und Freud ich fahr dahin, 4vv, W 10; Wohl dem, der in Gottes Furchte steht, 4vv, W 101

CHANSONS

Honneur sans plus, 4vv, ed. in Cw, xv (1931), 18 (attrib. 'Jo. James' in 1543[14]); Nouvel amour le mien cueur, 4vv, ed. in Cw, xv (1931), 10; O Attropoz viens bien tost, 4vv, ed. in Cw, xv (1931), 20; Quand l'amitié, 4vv, 1557[11]; Vostre beaulté plaisant et lyé, 4vv, Chansons musicales à quatre parties (Paris, 1533) (attrib. Gombert in A and T of 1544[20], Hellinck in Sup and B), ed. in PÄMw, ii (1875), 216 (attrib. Gombert)

FLEMISH SONGS

Aenhoert al myn geclach, 4vv, *c*1535[14] (anon. in 1535[14], attrib. 'Lupus' in *P-Cug* 48 with text 'Au fort quand Dieu plaira'); Compt alle wt by twe by drye, 4vv, ed. in RRMR, cviii (1997), 125; Ianne moye al claer, 4vv, 1551[18], ed. in RRMR, cviii (1997), 27; Nieuwe almanack ende pronosticatie, 4vv, 1551[18], ed. in RRMR, cviii (1997), 64

DOUBTFUL WORKS

Missa 'Quem dicunt homines', 4vv, attrib. Hellinck in *F-CA* 3, attrib. Pierkin de Raedt in *CA* 124 (on Richafort's motet)
Jerusalem luge, 5vv, attrib. Hellinck in 1534[10], ed. A. Smijers and A.T. Merritt, *Treize livres*, viii (Monaco, 1962), 118; attrib. Richafort in 1532[9] and 8 other sources; attrib. Caen in 1559[1] and 3 other sources
Laudate pueri Dominum, 5vv, attrib. Hellinck in 1544[20], ed. in PÄMw, iii (1876), 291; attrib. Vinders in 1557[3]
Pontificum sublime decus, 5vv, attrib. Hellinck in 1546[7], attrib. Johannes Lupi in 1538[2], 1539[6]; ed. in CMM, lxxxiv/2 (1986), 98
Je suis desheritée, 4vv, attrib. 'Lupus' in 1534[13], 1537[4], attrib. Cadéac in 1540[11] and 6 other sources; ed. in Cw, xv (1931/*R*), 6

BONNIE J. BLACKBURN

**Hellmann, Maximilian Joseph** (*b* ?Vienna, *c*1702; *d* Vienna, 20 March 1763). Austrian composer. The earliest known reference to him is a recommendation by J.J. Fux, dated 4 January 1724; according to Fux's testimony, he had been sent by Charles VI to Dresden to study the cimbalom (or pantaleon) with Pantaleon Hebenstreit (1667–1750) for about five years, returning to Vienna in 1723. Fux stated that Hellmann's virtuosity on this instrument equalled if not surpassed that of his teacher, suggesting his appointment as court cimbalist at a salary of 1000 florins. The request was granted by the emperor, and from 1 April 1723 until his death Hellmann served in that position. From 1746 he was also listed as court timpanist, which probably indicates the waning popularity of the cimbalom.

All five of Hellmann's known dramatic works were written for specific occasions at court. The four secular works are scored for two solo voices, strings and continuo, consist of one structural part only, and use the typical late Baroque alternation of recitatives and da capo arias; the *azione sacra*, for the same instrumental forces, is of greater interest on account of a more flexible style and the use of solo ensembles and chorus.

Hellmann should not be confused with two other Viennese court timpanists, Jacob Leopold Hellmann (*d* 22 March 1742) and Maximilian Hellmann (*b* Moravia, *c*1681; *d* 10 Feb 1722), probably the father of both Maximilian Joseph and Jacob Leopold.

RUDOLF SCHNITZLER/HERBERT SEIFERT

**Hellmesberger.** Austrian family of musicians.

**(1) Georg Hellmesberger (i)** (*b* Vienna, 24 April 1800; *d* Vienna, 16 Aug 1873). Violinist and conductor. He was given his first instruction in music and the violin by his father, a schoolmaster and civil servant, and at the age of five he played for the emperor. As a chorister of the Hofkapelle he was Schubert's schoolmate and his successor as soprano soloist. He left the choir school and continued his studies at the Gymnasium of the Cistercian Heiligenkreuz Abbey, near Vienna; originally intended for an ecclesiastical career, he soon turned to music. At the home of Sonnleithner in 1817 he was introduced to Viennese musical circles. He became a pupil of Joseph Boehm (violin) and E.A. Förster (composition) at the Vienna Conservatory. On 9 December 1819 he made his concert début. He became Boehm's assistant in 1821; in 1826 he was made a titular professor and in 1833 active professor at the conservatory, a post he held until his retirement in 1867.

Hellmesberger's rise to fame as a virtuoso, and his eventual displacement of Boehm and Mayseder as the most popular Austrian violinist of the day, came at first through his concerts in the provincial capitals and gradually also in Vienna. After Schuppanzigh's death in 1830 he became Konzertmeister at the Hofoper and shortly thereafter a member of the Hofkapelle. He was a founder and conductor of the Philharmonic concerts in 1842, and also attracted regular audiences to chamber concerts at his home. He helped to establish the Viennese school of violin playing; among his pupils were Joachim, Hauser, Auer and Ernst, as well as his sons Joseph and Georg, with whom his concert tours included one to London in 1847. His activity as a composer was comparatively unimportant, but he published a string quartet, two violin concertos, and several sets of variations and other pieces for violin with piano, string quartet or orchestra.

(2) **Joseph Hellmesberger (i)** (*b* Vienna, 3 Nov 1828; *d* Vienna, 24 Oct 1893). Violinist and conductor, son of (1) Georg Hellmesberger (i). He studied the violin with his father at the Vienna Conservatory, and at 17 was a soloist in the Hofoper orchestra. From 1851 to 1859 he was the artistic director and conductor of the Gesellschaft der Musikfreunde concerts, transforming the amateur orchestra into one of professionals and giving the programmes the classical shape that became traditional. He was also violin professor and director of the conservatory, from 1860 Konzertmeister at the Hofoper, and temporarily in 1879 he assumed the direction of the Singverein of the Gesellschaft der Musikfreunde, the most important Viennese choir. After Herbeck's death in 1877 he was made Hofkapellmeister, while also remaining at the head of the conservatory until his retirement in 1893.

In 1849 Hellmesberger founded and led the string quartet that bore his name and with whom he played until 1891; the other original members were Durst, Heissler and Schlesinger. Virtually from its first appearance (4 November 1849) the ensemble was regarded as the leading Viennese string quartet. Classical works were the core of the repertory in its annual series of concerts (the late quartets of Beethoven featured prominently), but newer music was also promoted. Regular performances of Schubert, including many premières, led to the publication of the G major Quartet (1852), the C major Quintet (1853) and the Octet (1854). Brahms gave his first Vienna concert with the quartet on 16 November 1862, playing in his G minor Piano Quartet (the A minor String Quartet was also on the programme). For the first performance of his String Quintet (1875), Bruckner was asked by Hellmesberger to substitute a new movement for the Scherzo ('too difficult'). The quartet sometimes played abridged versions, or with passages interpolated from other pieces.

Hellmesberger's popularity owed much to his reputation as a witty man-about-town; in later life he was unmistakable because of his old-fashioned, slightly grotesque appearance, and according to Hanslick a similar arch graciousness characterized his playing. Hanslick praised the refinement and variety of his technique and referred to his assertiveness in quartet playing. In an early review, he commended Hellmesberger's quartet for its ability to imbue tender and elegiac passages in Romantic works with a poetic sweetness, but he deplored in its performances the long pauses and tuning up between movements. The quartet's subjective, emotional style he considered specially appealing to the young, romantics and women.

Hellmesberger was also distinguished as an orchestral leader and as the teacher of many famous violinists, among them Auer, Brodsky, Grädener, Nikisch, Rappoldi and the Schrammel brothers. His compositions are of no real significance, although his *Ballszene* (after a violin study by Mayseder) is a popular constituent of continental light music programmes. He made a number of transcriptions for the violin and edited Beethoven's fragmentary C major Violin Concerto (published in Vienna, 1879).

(3) **Georg Hellmesberger (ii)** (*b* Vienna, 27 Jan 1830; *d* Hanover, 12 Nov 1852). Violinist and composer, son of (1) Georg Hellmesberger (i). He was taught the violin and music theory by his father, with whom he and his elder brother Joseph made a concert tour to London in 1847. In 1850 he was appointed Hofkonzertmeister in Hanover, with the responsibility of directing vaudeville and ballet music at the court theatre. His compositions (largely unpublished) include symphonies, chamber music, violin pieces and songs, as well as nine operas, most unperformed: *Die Bürgschaft* (in three acts to a libretto by K. von Biedenfeld, after Schiller) was written in 1848 and produced at Hanover in about 1851; the comic opera *Les deux reines* (*Die beiden Königinnen*; in two acts to a libretto by J.G. Seidl, after Soulié and Arnould) was also produced at Hanover in 1851.

(4) **Joseph** [Pepi] **Hellmesberger (ii)** (*b* Vienna, 9 April 1855; *d* Vienna, 26 April 1907). Violinist, conductor and composer, son of (2) Joseph Hellmesberger (i). His father taught him the violin: at the age of eight he was a soloist in a conservatory concert. During Carnival 1867 he led his father's ensemble (all in Rococo costumes and powdered wigs) in Mozart's *Ein musikalischer Spass*, and utterly eclipsed the first performance of Strauss's waltz *An der schönen blauen Donau*, heard earlier in the concert. At the age of 15 he played second violin in his father's quartet, and by 18 he was 'Crown Prince Pepi', a great favourite in Vienna. His father tried unsuccessfully to persuade the emperor to exempt him from military service: he was assigned to the orchestra of the city regiment, 'Hoch- und Deutschmeister', whose garden promenade concerts and music at balls were an important part of Viennese musical life. His earliest compositions were dance pieces dating from his three years of service.

By 1878 Hellmesberger was a solo violinist of the Hofkapelle and Hofoper, and that November he was made violin professor at the conservatory. He began to compose more actively; in 1880 two operettas, *Capitän Ahlström* (in two acts to a libretto by Albert Hoffmann) and *Der Graf von Gleichen und seine Frauen* (in three acts to a libretto by A. Just), were performed successfully at a café theatre in the Prater. But his first engagement as a theatre conductor, at Jauner's new Ring-Theater in 1881, ended abruptly on 8 December with a fire that destroyed the theatre, took hundreds of lives and from which he and his father (who was in the audience) barely escaped.

His fortunes having suddenly declined, in autumn 1882 Hellmesberger accepted the post of Kapellmeister at the impoverished Carltheater, while continuing to compose operettas and concentrating on his career as a violinist. He was appointed Konzertmeister and ballet music director of the Hofoper in 1884. Several of his ballet scores found a permanent place in the Hofoper repertory (e.g. *Die verwandelte Katze*, *Harlekin als Elektriker* and *Die Perle von Iberien*), and tunes from them were for a time widely popular. He became a permanent member of the Hellmesberger Quartet and assumed its leadership after his father's retirement (1891). In 1889 he was made Vizehofkapellmeister, and the following year he succeeded Richter as Hofkapellmeister. He first conducted a Philharmonic concert in 1900; critics ill-disposed towards his rival Mahler compared him to Richter, saying that the 'solidity and classicism' of his Beethoven performances compensated for a 'lack of individuality'. When Mahler decided not to renew his candidacy for the Philharmonic conductorship (1901), Hellmesberger, 'a man from their midst', was elected by the players. He was re-elected in 1902 and 1903, but Mahler gradually limited his conducting at the opera.

The discovery of his affair with a married Hofoper dancer (it was reported directly to the emperor) led Hellmesberger to resign from the Philharmonic. With no support in his plight from Mahler, he later also resigned as Hofkapellmeister and from the Hofkapelle. He was saved from ruin by the great success of his operetta *Das Veilchenmädel* (in two acts to a libretto by L. Krenn and C. Lindau), produced at the Carltheater on 27 February 1904 and soon afterwards all over Europe. The success was repeated in November that year with *Wien bei Nacht* (a *Posse* with songs; libretto by Lindau and G. Wilhelm). He was Hofkapellmeister in Stuttgart in 1904–5 but returned to Vienna where he composed further operettas and accepted jobs conducting mediocre orchestras. In addition to writing songs, dance music and the many stage works, he revised and rescored Wolf's symphonic poem *Penthesilea* for its first publication (1903).

(5) **Ferdinand Hellmesberger** (*b* Vienna, 24 Jan 1863; *d* Vienna, 15 March 1940). Cellist and conductor, son of (2) Joseph Hellmesberger (i). He studied at the Vienna Conservatory, where from 1884 he was a cello teacher. In 1879 he became a member of the Hofkapelle, in 1883 joined the Hellmesberger Quartet and three years later was engaged as solo cello in the Hofoper orchestra. He gave up his conservatory and opera positions in 1902 and became Kapellmeister of the recently founded Volksoper. From 1905 he was a ballet conductor at the Königliche Oper in Berlin, and from 1910 he conducted spa orchestras in Baden bei Wien, Marienbad, Carlsbad and Abbazia.

RICHARD EVIDON

**Hellmesberger Quartet.** Austrian string quartet. It was founded in 1849 by Joseph Hellmesberger (i). *See* HELLMESBERGER family.

**Hellwig, Karl (Friedrich) Ludwig** (*b* Kunersdorf, nr Wriezen, 23 July 1773; *d* Berlin, 24 Nov 1838). German organist and composer. He studied the piano and violin at Wriezen, and taught himself the piano, organ and numerous other instruments while at school in Berlin (1786–9). From 1789 to 1812 he was a partner in the Steiner paint factory at Berlin, but continued his musical studies with J.A. Gürrlich and G.A. Schneider. In 1793 he joined the Sing-Akademie, which he conducted with K.F. Rungenhagen from 1803 in Zelter's absences; from 1815 to 1833 he was joint deputy conductor. He was one of the first members in 1809 of Zelter's Liedertafel, for which he wrote 25 partsongs, and on 20 August 1813 he was appointed organist of Berlin Cathedral and singing master at the Joachimsthal School. He became director of music at the cathedral in 1815.

Hellwig wrote two operas, one of which, *Die Bergknappen*, was produced by his close friend Weber at Dresden (27 April 1820); the other, *Don Sylvio di Rosalba*, was never performed. His church music includes a mass, several requiems, many psalm settings, chorale settings and motets. Among his secular vocal compositions are numerous partsongs (mostly for male chorus), canons, duets with piano accompaniment, and many solo songs, including six *Kriegslieder* (Berlin, 1806) and several freemasons' songs. He also arranged vocal scores of Bach's *St John Passion* and works by Handel, Hasse and Gluck. There is an autobiographical sketch, written for Weber's introduction to *Die Bergknappen* in 1820 (in *D-Bsb*, Slg. Weberiana Cl.II.A.i, no.5).

PHILIP ROBINSON/MICHAEL HEINEMANN

**Helm, E(rnest) Eugene** (*b* New Orleans, 23 Jan 1928). American musicologist. He received the BME from Southeastern Louisiana College (1950), the MME from Louisiana State University (1955), and the PhD from North Texas State University (1958), with a dissertation on the musical patronage of Frederick the Great. From 1953 to 1955 he was an instructor at Louisiana College; he later taught at Wayne State College, Nebraska, in 1958 and 1959 and at the University of Iowa from 1960 to 1968. In 1968 he joined the faculty of the University of Maryland, becoming professor of music in 1969. He was chair of the musicology division from 1971 to 1987. He retired in 1994.

Helm's principal interest is the music of 18th-century Germany, particularly that of C.P.E. Bach, of whose works he has prepared a thematic catalogue. He is also coordinating editor of the C.P.E. Bach Edition (Oxford, 1989–).

PAULA MORGAN

**Helm, Everett (Burton)** (*b* Minneapolis, 17 July 1913; *d* Berlin, 25 June 1999). American composer and writer on music. He was educated at Harvard University (MA 1936, PhD 1939); in Europe (1936–9) he studied composition with Malipiero and Vaughan Williams and musicology with Einstein. He held several teaching positions in the USA including that of head of the music department of Western College, Oxford, Ohio (1944–6). In 1948 he moved to Europe, where he remained except for a period in New York as editor of *Musical America* (1961–3). He contributed reviews and articles to newspapers and journals in the USA, Britain and West Germany; his books include popular biographies (1971) and sociological studies (1970, 1981). He composed the opera, *The Siege of Tottenburg* (1956), commissioned by the Süddeutscher Rundfunk and broadcast in November 1956. Simple folk-like melodies form the basis of this work, accompanied by some imaginative atonal orchestral writing. Other works include two piano concertos (1951, 1956), a *Sinfonia da camera* (1961), a concerto for strings and five solo instruments, chamber music and songs. Several of his orchestral works have been performed by the New York PO under Mitropoulos, the Berlin PO under Keilberth and the BBC SO under Dorati. His music manuscripts are housed at the American Music Center in New York.

PATRICK J. SMITH

**Helm, Rupert** [Franz] (*b* Reyersdorf, Lower Austria, 27 Oct 1748; *d* Leesdorf, nr Baden, 10 Sept 1826). Austrian music director, botanist, violinist and organist. He was a choirboy in Nikolsburg (now Mikulov, Czech Republic) before entering Melk Abbey as a novice in 1766. He was ordained in 1772 and was the abbey's musical director from July 1778 until August 1787. Not very active as a composer, Helm was preoccupied with collecting, copying and cataloguing works by his contemporaries. At Melk he left only two compositions and a singing method of his own authorship, but left hundreds of copies of works by other composers, notably instrumental works by Haydn, and several valuable thematic catalogues. Compositions that survive with his name outside Melk invariably turn out to be copies in his hand of works by other composers. An anonymous portrait in oils is in the Rollettmuseum, Baden.

ROBERT N. FREEMAN

**Helm, Theodor Otto** (*b* Vienna, 9 April 1843; *d* Vienna, 23 Dec 1920). Austrian writer on music. He studied law at the Schotten Gymnasium in Vienna, passing his civil service examinations in 1865. Two years later he began working as a music critic, writing for the Vienna *Neues Fremdenblatt*, for which he became official music critic in 1869 after the death of Carl Müller. From 1868 he was active as freelance contributor to the Leipzig periodical *Die Tonhalle*, and from 1870 to 1905 he wrote for the *Musikalisches Wochenblatt*, continuing to do so after it was taken over by the *Neue Zeitschrift für Musik*. He received a doctorate in 1870 and taught music history and aesthetics at Horak's Conservatory from 1874. He edited the *Kalendar für die musikalische Welt* (1875–1901) and the *Illustrierte Musik-, Theater- und Literatur-Journal* (1876–8); he was also a freelance contributor to *Pestor Lloyd* and the Viennese *Salonblatt* and was music critic for the *Deutsche Zeitung* from 1884 to 1901. He was named professor in 1900.

Helm played an important role in the musical life of Vienna. An admirer of the works of Bruckner (he wrote a biographical sketch of the composer and studies of his symphonies), he found himself in conflict with the conservative anti-Wagnerian Viennese critics such as Hanslick. Admittedly, Helm lacked Hanslick's flair for caustic commentary and his stylistic eloquence; yet he was ready to acknowledge the talent of young composers regardless of their school or influences. His reminiscences as a Viennese music critic (published in *Der Merker* in 1916 and reprinted in 1977) provide commentary on the musical life of his time.

GAYNOR G. JONES

**Helman(-Bednarczyk), Zofia** (*b* Radom, 8 March 1937). Polish musicologist. She studied at the University of Warsaw with Zofia Lissa (MA 1964); she took the doctorate there in 1967 with a dissertation on sonority in the music of Szymanowski, and completed the *Habilitation* in 1980 with a dissertation on Polish neo-classicism in the 20th century. She has taught at the Institute of Musicology at the University of Warsaw since 1959, becoming assistant professor in 1967, reader in 1980, professor in 1990 and full professor in 1991. She was director of the Institute from 1991 to 1996.

Helman's research centres on the music of the 20th century, with a special emphasis on Polish composers such as Szymanowski, Palester and Baird, and composers active outside Poland. She has also addressed issues of European neo-classicism, musical analysis, and the theory and history of 19th- and 20th-century music. She is involved in the edition of the works of Szymanowski.

ZYGMUNT M. SZWEYKOWSKI

**Helmbold, Ludwig** (*b* Mühlhausen, 13 Jan 1532; *d* Mühlhausen, 8 April 1598). German hymn writer. He attended the municipal school at Mühlhausen and then studied at Leipzig from 1547 until 1549 and at Erfurt. In 1550, having obtained the bachelor's degree, he became a headmaster at Mühlhausen, but in 1552 he resumed his studies at Erfurt; he gained the master's degree there in 1554 and lectured on poetry. In 1559 he married the daughter of an Erfurt senator and in 1562 he became deputy headmaster of the newly founded Pädagogium at Erfurt. An epidemic forced him to leave there in 1563, but he returned after the reopening of the university in 1565 and was appointed dean of the philosophy faculty. In 1566 Emperor Maximilian II honoured him with the poet's laurel wreath. Because of his Protestant faith Helmbold was dismissed from his university post in 1570 and he returned to Mühlhausen, where at first he reverted to schoolteaching; but in 1571 he obtained the post of deacon and in 1586 he was appointed superintendent of the town.

Helmbold belonged to the group of Protestant poet-theologians of the post-Reformation period who did not experience directly the struggle for a new form of ecclesiastical life, but strove to consolidate and defend what had already been achieved. Wackernagel listed 104 of Helmbold's hymn texts; two hymns that Bach used six times in his cantatas are still found in Protestant hymnbooks. In many texts, notably in those directed against 'crypto-Calvinists, Papists', a certain intolerance is evident (the Mühlhausen town council once rebuked Helmbold for his harsh and uncompromising preaching). But he also wrote poems referring to daily life that were intended for family devotions. In their personal and intimate devotion these are forerunners of the Pietistic devotional hymns. In *Übers Gebirg' Maria geht*, set by Eccard, Helmbold captured the 'tone of a folklike legend' (Mose). His Latin and German spiritual odes are related to secular classical odes; here he was concerned with instilling more firmly in his pupils, through verse and melody, biblical texts or articles of faith, and at the same time acquainting them with metres, which, however, are not always strictly followed in the melodies. From a musical standpoint Helmbold is among the most important religious poets of his generation; he won over to his aims several distinguished musicians, including Joachim a Burck, with whom he formed a lasting friendship, Johannes Eccard, Leonhard Schroeter and Johann Steuerlein. Birtner maintained that it was Helmbold's influence that caused Burck to abandon the polyphonic motet style in the 1570s and compose only simple harmonic pieces; in his settings of Helmbold's verse the tone of the text and music are perfectly matched.

MARTIN RUHNKE

**Helmer, Axel (Erik)** (*b* Stockholm, 18 Sept 1925). Swedish musicologist. He studied musicology with Moberg and Bengtsson at the University of Uppsala and took the doctorate there in 1973 with a dissertation on late 19th-century solo song in Sweden. From 1965 to 1991 he was director of the Svenskt Musikhistoriskt Arkiv, in whose bulletin he has published several valuable articles dealing with problems of documentation, dating and cataloguing. His chief topic of research has been 19th- and 20th-century Swedish music.

JOHN BERGSAGEL/HENRIK KARLSSON

**Helmholtz, Hermann (Ludwig Ferdinand) von** (*b* Potsdam, 31 Aug 1821; *d* Berlin, 8 Sept 1894). German scientist. He studied medicine at the Friedrich-Wilhelm Institut, Berlin, obtaining the doctorate in 1842. He also studied mathematics, physics and philosophy, and attended lectures at Berlin University. After service as an army surgeon, in 1848 he obtained a post in physiology and pathology at Königsberg University. Later he held a number of professorships: of anatomy and physiology at Bonn University (1855), of physiology at Heidelberg (1858), and of physics at Berlin (1871); in 1887 he became the founding director of the first institute of pure scientific research, the Physikalisch-Technische Reichsanstalt, Berlin. Helmholtz was an intellectual giant. His research covered such diverse topics as nerve impulses, colour blindness, vortex motion in the theory of fluids, and various aspects of electricity; he invented the ophthalmoscope; he created physiological optics and was a dominant figure in the area of acoustics.

Helmholtz accepted classical acoustics as it came down to him from the works of Euler, Cauchy and Poisson. Using it, he turned his attention to the ear, which 18th-century science had largely neglected. Besides his studies of the anatomy of the ear, he founded the study of the physiology of hearing. He illuminated many areas of acoustical study, of which possibly the most important was his classic analysis of the role of harmonics; he explained the role of harmonics in timbre, using Fourier analysis and his own specially devised resonators (for illustration *see* PHYSICS OF MUSIC, fig.7). He explained the nature of combination tones, and discovered the higher combination tones or 'summation tones', which provided evidence for his theory of the non-linearity of the ear. His work on the ear led to the foundation of the resonance theory of hearing. He worked, additionally, on phase (using collections of tuning-forks); he invented a microscope to study wave patterns; he discussed the nature of beats, and their role in consonance and dissonance; and he discussed systems of temperaments, expressing the view that equal temperaments represented merely a way out of a particular difficulty and recommending that instruments be tuned to 'pure' systems. Among the devices he used for his acoustical studies, besides the famous resonators, were harmoniums designed for testing combinations of tones and temperament systems, and improved versions of the Cagniard de Latour siren and Scheibler tonometer. Most of Helmholtz's important work on acoustics is in his book *Die Lehre von den Tonempfindungen als physiologische Grundlage für die Theorie der Musik* (Brunswick, 1863; Eng. trans. by A.J. Ellis, 1875/*R* as *On the Sensations of Tone*). (*See* PHYSICS OF MUSIC, fig.6 for a photograph of Helmholtz.)

*See also* PSYCHOLOGY OF MUSIC, §§I, 2 and II, 1(i); PHYSICS OF MUSIC, §§4–6.

JAMES F. BELL/CLIVE GREATED

**Helmholtz resonator.** An enclosed volume communicating with the atmosphere through a relatively small aperture or neck. Such a cavity has the property of resonating over a narrow range of frequencies; the frequency of maximum response was derived by the 19th-century acoustician Hermann von Helmholtz, and is known as the Helmholtz resonance frequency.

An everyday example of a Helmholtz resonator is provided by an empty bottle. An increase in the air pressure outside the bottle tends to push the air in the neck further into the bottle. This compresses the air in the main volume of the bottle, resulting in a force tending to push the air back out of the neck. The plug of air in the neck bounces on the main volume, like a weight bouncing on a spring. The natural bouncing frequency is the Helmholtz resonance frequency; a note of the corresponding pitch can be sounded by blowing across the open end of the bottle.

For a cavity of volume *V*, with a neck of effective length *L* and cross-sectional area *S*, the Helmholtz resonance frequency *F* is approximately given by the formula where *C* is the speed of sound in air:

$$F = (C / 2\pi)\sqrt{(S / LV)}$$

The effective length of the neck is slightly longer than the physical length (*see* END CORRECTION). Mathematical techniques are available for calculating the Helmholtz resonance frequencies of more complicated cavities, such as the interior volume of the body of a violin or guitar.

Helmholtz used resonators of different sizes as frequency-selective ear trumpets. In modern architectural acoustics Helmholtz resonators are used to modify the reverberant properties of rooms (*see* ACOUSTICS, §I).

MURRAY CAMPBELL

**Helmont, Adrien Joseph van.** *See* VAN HELMONT, ADRIEN JOSEPH.

**Helmont, Charles Joseph van.** *See* VAN HELMONT, CHARLES JOSEPH.

**Helmore, Thomas** (*b* Kidderminster, 7 May 1811; *d* London, 6 July 1890). English teacher and choir trainer. He was the son of a Congregationalist minister, and as a youth trained his father's choir and taught in his day school at Stratford-upon-Avon before taking the BA at Oxford in 1840. In the same year he was ordained and made curate of St Michael's, Lichfield, and priest-vicar in the cathedral. In 1842 he was appointed vice-principal and precentor of St Mark's College, Chelsea, a new institution for training teachers in church schools, where he was to coach the students to sing daily choral services in the college chapel. At a time when Anglican choral services were hardly known outside the cathedrals, the aim was to equip newly appointed teachers to assist the clergy in the reform of parochial music. Helmore's zeal soon made St Mark's famous for its unique unaccompanied musical services. Psalms and responses were chanted by the entire student body led by a male choir of trebles, altos, tenors and basses which sang anthems and services mainly by 16th- and 17th-century composers. The remarkable success of his work at Chelsea led to Helmore's appointment as Master of the Children of the Chapel Royal in 1846; but he continued to hold the post of precentor at St Mark's College until 1877.

Helmore believed that plainchant was the ideal medium for congregational singing. During his early years at St Mark's he thus pointed the English Psalter for use with the psalm tones, following the rules published in William Dyce's *Order of Daily Service* (London, 1843). The result was the *Psalter Noted* (London, 1849) and the *Manual of Plainsong* (London, 1850). Helmore's *Hymnal Noted* (London, 1851–4) likewise comprised a collection of plainchant melodies with translations of the original texts by J.M. Neale (with whom Helmore also produced two collections of carols).

His plainchant publications, together with his activities as a speaker, made Helmore the acknowledged authority on the subject in Anglican circles. His *Primer of Plainsong* (London, 1877) became the standard English text, and the phrase 'to sing your Helmore' was common during his lifetime. Later scholars, however, were to usurp that authority; Helmore's lasting contribution is now seen to have been towards establishing a choral tradition in parish churches throughout the country. In that respect he was assisted by his youngest brother, Frederick Helmore (1820–1903), who spent his life as a travelling choirmaster, earning the title of the 'Musical Missionary' for his work in training surpliced choirs in many parts of England and Scotland. Earlier claims that Thomas Helmore composed the tune 'Veni Emmanuel' have now been disproved.

BERNARR RAINBOW

**Helms, Hans G(ünter)** (*b* Teterow, 8 June 1932). German music journalist and composer. He studied privately comparative linguistics (with Roman Jacobson), philosophy and sociology (with Adorno, Max Horkheimer and Siegfried Kracauer), Marxist methodology, history, economics and urban planning. After working in several European countries and the USA he settled in 1957 in Cologne, where he met Gottfried Michael Koenig and Heinz-Klaus Metzger at the WDR electronic studios. Between 1957 and 1970 he attended the Darmstadt summer courses, where he also lectured. During the 1960s and 70s he wrote as a critic and a journalist on 20th-century music, focussing particularly on sociological issues. He was awarded an honorary doctorate from the University of Bremen in 1974 and was visiting lecturer at the University of Illinois, 1976–8. He moved to New York in 1978 and returned to Cologne in 1988.

Helms's writings reflect his commitment to the ideas of the Frankfurt School and concentrate on the sociological context within which musical events take place. His compositions have been described as 'Sprachmusik', or the attempt to cross the boundary between literary and musical ideas. He draws on different aspects of language – morphemes, phonemes, grammar, phonetics – to create new word units by using quasi-serial techniques (*Fa:m' Ahnewgwow*, 1959). His *Text for Bruno Maderna* (1959) consists only of phonemes and was used by Maderna in his stagework *Hyperion* (1964). Other works by Helms (*Polemik für neun Vokalsolisten*, 1962; *Konstruktionen über das Kommunistische Manifest*, 16vv, 1968) intensify the effects created by transforming linguistic structures into musical ones. During the late 1960s Helms also wrote and produced a number of television films on 20th-century composers (Ives, Boulez, Stockhausen) and in 1972 he worked with John Cage to create a cinematic version of Cage's composition *Bird Cage*. In 1992 Helms began working on his 'Münchhausen Project', whose first part, *Hieronymus-John von Muenchhausen: Fabulierer,*

*Adventurer, Erfinder neuer Klangwelten*, seeks to explain Cage's creative output.

STEFAN FRICKE

**Helps, Robert (Eugene)** (*b* Passaic, NJ, 23 Sept 1928). American composer and pianist. He attended Columbia University (1947–9) and the University of California, Berkeley (1949–51); he also studied the piano with Abby Whiteside and composition with Roger Sessions (1943–56). He has taught the piano at the San Francisco Conservatory (1968–70), Stanford University (1968–9), the University of California, Berkeley (1969–70), the New England Conservatory (1970–72), the Manhattan School of Music and Princeton University (both 1972–7); he was appointed professor of music at the University of South Florida, Tampa, in 1980. His honours include a Naumburg Foundation award for his Symphony no.1 (1957), a Guggenheim Fellowship (1966), awards from the Fromm Foundation (1957, 1971) and the American Academy and Institute of Arts and Letters (1976), and commissions from the Thorne Music Fund and the Ford Foundation (1975, for the Piano Concerto no.2). A noted interpreter of 20th-century piano music, Helps has performed widely as a soloist and in partnership with Bethany Beardslee and Isidore Cohen. His many recordings include important works by Schoenberg, Babbitt, Mel Powell, Perle and Sessions.

In his early music Helps generated pitch centres from a prevailing chromatic context. *Gossamer Noons* (1977), a setting for soprano and orchestra of four poems by James Purdy, features instrumental contexts and vocal contours that sensitively reflect and enlarge upon the verbal sonorities and rhythms of the text. Helps's later music does not conform to any doctrinaire harmonic or organizational principles.

RICHARD SWIFT/STEVE METCALF

**Helsingfors** (Swed.). *See* HELSINKI.

**Helsinki** (Swed. Helsingfors). Capital of Finland. Founded in 1550 as a trading station by the King of Sweden, Helsinki was destroyed by the Russians during the Great Nordic War in 1713. It begun to recover only at the end of the 18th century owing to the construction of the Suomenlinna fortress on the islands near the town. The fortress, however, fell into the hands of the Russians in 1808 and the same year Helsinki was badly damaged in a fire. By the Treaty of Hamina (1809) Finland was ceded to Russia as an autonomous Grand Duchy and the capital moved from Turku (Åbo) to Helsinki in 1812. In 1828 the only university in the country was transferred to the new capital. The population of Helsinki grew from about 4000 in 1810 to 100,000 in the 1890s and about 550,000 in 1999. In 2000 Helsinki was one of the seven cultural capitals of Europe.

1. Orchestras. 2. Chamber music and recitals. 3. Opera. 4. Choral societies. 5. Concert halls. 6. Festivals and competitions. 7. Education.

1. ORCHESTRAS. Musical life in the Helsinki area began in Sveaborg, site of a military band and later (1815–24) of an orchestra. From the late 1820s academic musical societies were founded, developed by the efforts of Fredrik Pacius (1809–91), a German-born violinist and composer, who became music teacher at the University in 1835. A professional orchestra of 16 players was set up by Filip von Schantz in 1860 to serve the Nya Teatern (New Theatre, from 1887 known as the Svenska Teatern); augmented by amateur players it also gave symphony concerts. A new era began in 1882, as Robert Kajanus (1856–1933) founded the Helsingfors Orkesterförening/Helsingin Orkesteriyhdistys (Helsinki Orchestral Association), renamed the Filharmoniska Sällskapet/Filharmoninen Seura (Philharmonic Society) in 1895. Initially, Kajanus's orchestra had 36 players, growing to 45 in 1895. Each year it performed about eight symphony concerts in addition to many popular concerts. In 1900 it undertook its first tour via Scandinavia to the World Exhibition in Paris. In 1912 an 'orchestral war' broke out as Georg Schnéevoigt (1872–1947) founded the Helsingfors Symfoniorkester/Helsingin Sinfoniaorkesteri. In 1914 the rival orchestras merged to form the Helsingin Kaupunginorkesteri/Helsingfors Stadsorkester (Helsinki City Orchestra), which today also uses the traditional name Helsinki Filharmonia (Helsinki PO). Kajanus was its musical director until 1932, and was succeeded by

Schnéevoigt. His successors have included Armas Järnefelt (1942–3), Martti Similä (1945–51), Tauno Hannikainen (1951–63), Jorma Panula (1965–72), Paavo Berglund (1975–9), Okko Kamu (1981–8), Segiu Comissiona (1990–95) and Leif Segerstam (1995–2001).

Suomen Yleisradio (the Finnish Broadcasting Corporation) established a radio orchestra in 1927. Originally a small studio ensemble, it grew during the following decades and developed in the 1960s into a full-size symphony orchestra. The Finnish RSO regularly plays in Helsinki and carries out a comprehensive recording programme of Finnish orchestral music. Since 1963, the year of its first foreign tour, it has given about 180 concerts in 25 countries. The subsequent principal conductors have been Ernst Linko (1927–9), Toivo Haapanen (1929–50), Nils-Eric Fougstedt (1950–61), Paavo Berglund (1962–71), Okko Kamu (1971–7), Leif Segerstam (1977–87) and Jukka-Pekka Saraste (1987–2001). Since the pioneering Helsingin Kamariorkesteri (Helsinki Chamber Orchestra), established by Paavo Berglund in 1953, Helsinki has supported several outstanding chamber orchestras. Avanti!, founded by Saraste and Esa-Pekka Salonen in 1983, has an international reputation in contemporary music, while the Suomalainen Kamariorkesteri (Finnish Chamber Orchestra) and the 6. Kerroksen Orkesteri (Orchestra of the 6th Floor), both established in the 1990s, concentrate on Classical and Baroque music, respectively.

2. CHAMBER MUSIC AND RECITALS. In the 19th century and the early 20th, many famous artists gave recitals in Helsinki en route from Stockholm to St Petersburg. The role of visiting artists has diminished as Finnish musicians have become a greater part of the city's musical life. During the 1990s Helsinki offered recitals and chamber music on a daily basis. Concerts are promoted by such institutions and societies as the Finnish Broadcasting Company, the Sibelius Academy and the Suomen Solistiyhdistys (Finnish Soloists' Association). Some of the most prominent ensembles in the 1980s and 90s were the Baroque ensemble Battalia, the Jean Sibelius Quartet, the Sibelius Academy Quartet, the Avanti! Quartet, the New Helsinki Quartet, the Breath Percussion Ensemble and the Toimii! Ensemble.

3. OPERA. In the early 19th century opera was performed in Helsinki by touring German companies. The first domestic performances took place at the end of the 1840s, and the first Finnish opera staged in Helsinki was Pacius's *Kung Karls jakt* in 1852. In 1860 the Nya Teatern began to stage opera in Swedish, while the Finnish-speaking audiences were given regular performances of opera in their native language from 1873 at the Suomalainen Teatteri (Finnish Theatre), established a year earlier. During six years of activity, Suomalainen Ooppera (Finnish Opera), as the opera department was soon called, gave around 450 performances of 26 different works. Later the Suomen Kansallisteatteri (Finnish National Theatre) started performing opera in its new building (1902).

In 1911, Kotimainen Ooppera (Domestic Opera) was established by Aïno Ackté (1876–1944) and Edvard Fazer (1861–1943). In 1919 this troupe, renamed Suomalainen Ooppera (Finnish Opera) in 1914, moved to the Alexander Theatre, built for the Russian Garrison in 1876. In 1922 a ballet company with a ballet school was established. These companies were renamed Suomen Kansallisooppera (Finnish National Opera) and Suomen Kansallisbaletti (Finnish National Ballet) in 1956. After 50 years of collaboration with the Helsinki PO, the Finnish National Opera formed its own orchestra in 1963. It moved to a new building in 1993. Situated in the southern Central Park of Helsinki, this opera house offers the company a suitable working environment for the first time in its history. In the 20th century the Finnish National Opera commissioned and gave first performances of many new operas by Finnish composers, and since the 1950s it has given guest performances in several European countries and in the USA. The directors of the Finnish National Opera and its predecessor include Edvard Fazer (1912–38), Oiva Soini (1939–52), Alfons Almi (1960–71), Juhani Raiskinen (1974–84 and 1996–2001), Ilkka Kuusisto (1984–92), Walton Grönroos (1992–6) and Erkki Korhonen (from 2001). Conductors of the opera orchestra were Jussi Jalas (1958–73), Ulf Söderblom (1973–93), Miguel Gómez-Martínez (1993–6) and Okko Kamu (1996–2000).

4. CHORAL SOCIETIES. The tradition of choral singing in Helsinki reaches back to the early 19th century. The male-voice student choirs Akademiska Sångföreningen (Academic Choral Society, founded 1838) and Ylioppilaskunnan Laulajat (the Helsinki University Chorus, founded 1883) played an important role in the nationalistic movement during the tsarist regime. Other male-voice choirs with long traditions are the Sällskapet M.M. (founded 1878) and Laulu-Miehet (founded 1914). The birth of mixed choirs reflects the change that took place in woman's position in the society. Suomen Laulu (Song of Finland) was founded as a male-voice choir in 1900, but included women from 1907. Kansallis-Kuoro (National Choir, founded 1908) and others followed suit. Choral singing is now the most widespread form of amateur music in Helsinki, performed by hundreds of choirs. The chorus of the National Opera is the only professional choir in Helsinki. Chamber choirs such as the the semi-professional Radion Kamarikuoro (Radio Chamber Choir, founded 1962), Grex Musicus, Jubilate and Kampin Laulu as well as smaller vocal ensembles such as Köyhät Ritarit (Poor Knights), Cetus Noster and Lumen Valo (Light of Snow), cover a wide range of choral repertory from medieval plainchant to contemporary music. Among children's choirs, Cantores Minores, attached to the Lutheran Cathedral of Helsinki, is an institution with fine traditions.

5. CONCERT HALLS. For 139 years the main venue for orchestral concerts in Helsinki was the Great Hall of the university, situated at the Great Square. The Helsinki PO played there until the inauguration of the Finlandia Hall (cap. 1750) in 1971. In 1965 the Finnish RSO moved to the House of Culture (1958, cap. 1400). In 1972 the Finlandia Hall became its main venue. None of these three halls is acoustically satisfactory. A new concert hall is expected to be ready by 2005. Orchestral concerts are also given in churches such as the Kallion Kirkko, Johanneksen Kirkko (St John's) and the Temppeliaukion Kirkko (Church of the Temple Square). These churches, along with the Tuomiokirkko (Cathedral) and Saksalainen Kirkko (German Church), are also the main venues for church music. Chamber music and recitals are given in the concert hall (cap. 650) of the Sibelius Academy, in

Ritarihuone (House of the Nobility) and the Temppeliaukion Kirkko. Although the Finlandia Hall includes a chamber music hall (cap. 380), it is seldom used for concerts.

6. FESTIVALS AND COMPETITIONS. The first music festival in Helsinki was the Sibelius-Viikko (Sibelius Week, 1951–65). It was replaced in 1968 by the Helsingin Juhlaviikot (Helsinki Festival), held annually in August and September. While the former was dedicated to the music of Sibelius, the latter, under Seppo Nummi (1969–77) and Veijo Varpio (1980–94), also covered fine arts, theatre, dance and cinema. Under the direction of Esa-Pekka Salonen (1995–6) it developed into a genuine city festival that spread from concert halls and art galleries into streets, pubs and a festival tent. Classical music continues to be in the spotlight under the direction of Risto Nieminen (since 1997). Helsinki Biennale, a festival of contemporary music, was founded in 1981 to succeed Nykymusiikin Päivät (Contemporary Music Days), organized by the Finnish Broadcasting Company since the 1960s. In 1998 it was replaced by the annual Musica Nova Helsinki. Since 1950 Helsinki has regularly hosted the Pohjoismaiset Musiikkipäivät/Nordiska Musikdagar (Nordic Music Days), an annual festival held in turn in the capitals of the five Nordic countries (Finland, Denmark, Iceland, Norway and Sweden), as is an associated festival of young composers, Ung Nordisk Musik (Young Nordic Music). In 1978 Helsinki hosted the World Music Days of the ISCM. Music competitions in Helsinki are essentially a postwar phenomenon. The national Maj Lind Piano Competition, founded 1945, became international in 2000. Other established international competitions include the Sibelius Violin Competition (founded 1965), the Mirjam Helin Singing Competition (founded 1981), the Paulo Cello Competition (founded 1991) and the Sibelius Conductors' Competition (founded 1995).

7. EDUCATION. Helsinki is the site of the Sibelius Academy (Sibelius-Akatemia), founded by Martin Wegelius as the Helsingfors Musikinstitut/Helsingin Musiikkiopisto (Helsinki Music Institute) in 1882. In 1924–39 it was known as the Helsingin Konservatorio (Helsinki Conservatory). The Sibelius Academy was a private college until it gained university status in 1980. Its subsequent directors have been Armas Järnefelt (1906–7), Karl Ekman (1907–11), Erkki Melartin (1911–36), Ernst Linko (1936–59), Taneli Kuusisto (1959–71), Veikko Helasvuo (1971–81), Ellen Urho (1981–7), Tuomas Haapanen (1987–90), Erkki Rautio (1990–93), Lassi Rajamaa (1993–9) and Pekka Vapaavuori (from 1999). The Sibelius Academy offers undergraduate and postgraduate degree courses and also incorporates a junior academy, a centre of continuing education and one of the largest music libraries in Finland. Other music schools in Helsinki include the Helsinki Conservatory and several children's music schools. Musicology was represented at Helsinki University from 1900 and at the Sibelius Academy from the 1980s. A large number of music unions and associations are active in Helsinki. The Finnish Music Information Centre provides an important service for musicologists and professional musicians.

ILKKA ORAMO

**Heltay, László (István)** (*b* Budapest, 5 Jan 1930). British conductor of Hungarian birth. He studied at the Ferenc Liszt Academy of Music in Budapest, where his teachers included Kodály and Lajos Bárdos. From 1952 to 1956 he served on the music staff of Budapest radio, but after the 1956 political uprising left for England where he took the BLitt in musicology at Merton College, Oxford. He founded the Kodály Choir (with Kodály as honorary president) at Oxford in 1957, and the Collegium Musicum Oxoniense (later named Schola Cantorum, Oxford) in 1960. He acquired British nationality in 1962, and was appointed director of music at Merton College (1962–4), where in 1964 he conducted an *Ode* composed by Kodály and dedicated to the college. In 1964–6 Heltay was in New Zealand as associate conductor of the NZBC SO; he also conducted opera (including the first performance in New Zealand of Britten's *Albert Herring*). Returning to Britain, he conducted for Phoenix Opera, and was director of music at the Gardner Centre of the University of Sussex from 1968 to 1978. In 1968 he founded the Brighton Festival Chorus, which quickly became established as one of Britain's finest amateur choirs; with them he gave the première, in 1974, of Brian's *Psalm xxiii* (composed in 1901), and also recorded the work. He directed the London Collegium Musicum from 1970 to 1989 and became director of the Royal Choral Society in 1985. As director of the choir of the Academy of St Martin-in-the-Fields he has been associated with several outstanding choral recordings conducted by Sir Neville Marriner. With the London Chamber Choir Heltay has recorded Haydn's *Salve regina* and *Stabat mater* and works by Respighi and Rossini.

ARTHUR JACOBS/NOËL GOODWIN

**He Luting** [He Anqing] (*b* Shaoyangong, Hunan, 20 July 1903). Chinese composer. He began studying composition with Huang Zi in Shanghai in 1931. His elegant salon piano piece in the Chinese style, *Mutong duandi* ('The Cowherd's Flute', 1934), earned him national fame. During the anti-Japanese and civil wars of the 1940s he was active as a conductor and composer in the Communist mass song movement. He taught composition in Shanghai and from 1949 to 1984 directed the Conservatory, with an interruption during the Cultural Revolution; he earned a reputation in China as a fervent promoter of Western classical music, seeing it as a means of modernizing

Chinese music. A prominent Communist Party member, he was known for his numerous patriotic film scores and politically inspired songs and choral works, though he also produced operas and orchestral works. Much of his music consists of Western Romantic harmonizations of Chinese folk and folk-inspired melodies. His views brought him into serious conflict with anti-Western populists and provoked violent attacks on him and his family during the Cultural Revolution.

FRANK KOUWENHOVEN

**Helwerding van Wewen, Franz.** *See* HILVERDING VAN WEWEN, FRANZ.

**Hely, Benjamin** (*fl* 1680–90). English composer. In *The Compleat Violist*, a bass viol primer published in 1699 for distribution by the London instrument makers John Hare and Barak Norman, he was described as 'the late famous Master'. This book concludes (evidently for the benefit of the more advanced 'young Practitioner') with two suites of 'Lessons, viz. Almans, Sarabands, Courants, Jiggs' by Hely. His most notable contribution to the English repertory is a set of six trio sonatas in italianate idiom 'for 2 Bass Violls With a Thorow Bass for the Harpsicord or Bass Violl', in which he uses Italian tempo terms ranging from *adagissimo* to *presto*.

WORKS

CHRISTOPHER D.S. FIELD

**Hely, Cuthbert** (*fl* 1620–40). English lutenist and composer. He may have been related to Benjamin Hely or Henry Hele ('Heale') and was possibly in the service of Edward, Lord Herbert of Cherbury, since he copied his own pieces into Lord Herbert's collection of lute music (*GB-Cfm*) in the late 1630s or early 1640s. Apart from these eight solo lute pieces (four fantasias, three preludes and a saraband, *Eight Pieces by Cuthbert Hely for 10-Course Lute*, ed. M. Spring, London, 1993), his only other known piece is a four-part ayre (*GB-Lbl* Add.18940).

Hely's solo lute pieces are among the best surviving from this period in England. His four fantasias are monothematic and contrapuntal to a degree unmatched by those of any other composer except Dowland. The opening themes are angular, with unusual melodies and frequent accidentals. As in the fantasias by Robert Johnson (ii) and Daniel Bacheler, there is a marked preference for the lower and middle registers, and the top string is used sparingly. Apart from the saraband, the works eschew any French influence and show Hely's familiarity with the compositional style of the English viol fantasia-suite.

MATTHEW SPRING

**Hely-Hutchinson, (Christian) Victor (Noel Hope)** (*b* Cape Town, 26 Dec 1901; *d* London, 11 March 1947). English administrator, composer and pianist. He was the youngest son of Sir Walter Hely-Hutchinson, the last Governor of Cape Colony. He was educated at Eton, Balliol College, Oxford, and the RCM. In 1922 he was appointed lecturer in music at the South African College of Music, which later became incorporated into the University of Cape Town. He returned to England in 1926 to join the staff of the BBC, first in London and then, from 1933, in Birmingham as Midland Regional Director of Music. In the following year he succeeded Bantock as professor of music at Birmingham University. In 1940 he was given special dispensation to take the degree of DMus at Oxford without first taking a BA; the favourable circumstance of his first appointment had prompted him to leave the university without completing the music course. He returned to London in 1944 to become director of music at the BBC, in which post he remained until his death. His compositions include a string quartet, a piano quintet, a piano sonata, a viola sonata, a highly successful *Carol Symphony*, and the orchestral *Variations, Intermezzo, Scherzo and Finale*, published in 1927 as part of the Carnegie Collection of British Music. He was perhaps best known for his adroit and amusing settings of nonsense verse by Edward Lear and Lewis Carroll. His talent was essentially that of a sophisticated administrator, and his music, apart from the *Carol Symphony*, is now seldom performed.

MICHAEL HURD

**Hemart** [Heniart], **Jean** (*d* Cambrai, 1493). Franco-Flemish composer. He was a singer at Cambrai Cathedral, presumably from 1465, since he was rewarded for 25 years' service on 6 August 1490 (see Pirro); he was master of the choirboys from 1469 to July 1484, when he was dismissed for concubinage with a nun and replaced by Obrecht. In 1475–6 there was a payment for copying his 'lamentations', alongside those of Ockeghem and Busnoys; and he is named among the musicians in Compère's motet *Omnium bonorum plena*, evidently composed for performance at Cambrai (*c*1470). The song *Pour mieulx valoir* is ascribed 'Hemart' (*I-Fn* B.R.229; ed. in MRM, vii, 1983); sadly it lacks any more text but seems to be in rondeau form and from the years around 1470. Hemart may have been related to Jacques Hemart, a chaplain in the household of Louis, Duke of Guyenne, in 1414–16 (see Perkins). He is to be distinguished from MARTIN HANART.

DAVID FALLOWS

**Hemberg, (Bengt Sven) Eskil** (*b* Stockholm, 19 Jan 1938). Swedish composer and choral conductor. He studied conducting with Blomstedt at the Stockholm Royal College of Music (1957–64), where he passed examinations in music teaching, choir training and organ playing. After a period as producer of choral music for Swedish radio (1964–70), he became planning manager and director of foreign relations at the Institute for National Concerts (1970–83). He was general manager and artistic director of the Stora Teater, Göteborg (1984–7) and of the Swedish Royal Opera, Stockholm (1987–96). He conducted the Academic Choir (the chorus of Stockholm University) between 1959 and 1983. A member of the Swedish Royal Academy of Music from 1974, he has held many other notable administrative positions, including chairman of the Society of Swedish Composers (1971–83), vice-president of the Swedish Performing Rights Society, board member of the Royal Opera, the University Colleges of Opera in Göteborg and Stockholm and the Association of Swedish Theatres and Orchestras. Most recently he was president of the International Music Council (1992–4). As an administrator he has been of great service to Swedish music and as a composer his rich body of choral works has been enriched by his knowledge of the choir and of music theatre.

WORKS
(*selective list*)

Ops: Love, Love, Love (2, M.L. Ramnefalk, after R. Graves), op.19, 1969–70, Stockholm, 1973; Djuphavspirater [The Pirates of the Deep Green Sea] (children's op, 2, J. Söderman, after E. Linklater), op.43, 1977; Sankt Eriks krona [St Erik's Crown] (church op, O. Hartman), perf. Helsinki, 1979; Canticles I–III (E. Bagrjana, B. Dimitrova, N. Zidarov), op.56 nos.1–3, perf. Swedish Radio, 1982; Herr Apfelstädt wird Künstler (chbr op, G. Schönfelder), op.68, 1989

Choral (SATB unacc. unless otherwise stated): En gång i bredd med mig (trad.), Bar, male vv, wind insts, 1961–75; Zoo (S. Silverstein), op.7, 1965; 18 Movts (nursery rhymes), op.12, 1967; Signposts (D. Hammarskjöld), op.15, 1968; Messa d'oggi, op.23, solo vv, chorus, 1968–70; The Gallery (E.A. Robinson), op.20, male vv, 1969; Cantica (Bible), op.27, solo vv, chorus, orch, 1972, rev. 1977; Markuspassion (Ramnefalk), op.25, solo vv, chorus, orch, 1972–84; Sörmländsk sommar (B. Julén), op.33, 4 solo vv, chorus, 1973; Österbottnisk visbok (L. Huldén), op.39, male vv, hn, cl, db, perc, 1975; Med Gud och hans vänskap (Hartman), op.41, priest, congregation, SATB, tpt, org, 1976; 3 Ohio Gospels (Bible), op.21, 1976; Swedish Emigrant Ballads (trad.), chorus, pf, 1976; Kvinder (scenic cant., various authors), op.46, S, Bar, female chorus, orch, 1978–9; 3 sånger i juli (H. Martinson), op.47, male chorus/SATB, 1978, rev. 1982; Concerning my Negotiations with Myself and with God (Hammarskjöld), op.51, S, A, T, B, 2 SATB, org, 1980; Andliga övningar (H. Gullberg), op.53, male chorus, 1981; Mozartvariationer (G. Sonnevi), op.57, 1981; Lützener TeD, op.59, 2 SATB, 3 trbn, 1982; Magnificat primi toni (Bible: *Luke* i.46–55), op.61, solo v, 2 SATB, 1982; Bless the Lord O my Soul (Ps ciii), op.65, SATB, handbells, 1983; 3 körer ur Gräsen i Thule (Martinson), op.66, 1984; Ps cl, op.69, SATB, va d'amore, vc, 1985; Requiem aeternam, op.73, 1987; San Francisco Peace Cant. (various authors), op.75, S, A, T, B, SATB, tpt, crotales, 1989; Ps xcvi, op.77, 1992; Thou who are over us (Hammarskjöld), op.78 no.1, 1992; Requiem aeternam, op.78 nos.2–3, SATB, two versions, 1992; Requiem, op.82, 1994; 3 citat (U. Isaksson), op.85, 1995; 3 kärlesdikter (P. Lagerkvist), op.90, Bar, male chorus, 1997; Ps xxiii, op.87 no.2, 1998; 3 Songs at Ease, Please (E. Browning, C. Rosetti, E. Dowson), op.94, 1998

Other vocal: Et erit in novissimis diebus (Bible: *Acts* ii.17–21), op.17, B, org, 1969; En gammal saga (cant., P. Lindblom), op.30, S, hp, hpd, 1973; 6 sånger om barn (B. Setterlind, Lindblom, M. Ekström), op.31, 1v, pf, 1973; Mellanhändelser [Between Happenings], op.37, S, A, T, B, 4 perc, 1974; Pietà (Hammarskjöld), op.35, A/B, org, 1974; Svit 1 ur Tuvor (Martinson), op.36, 1v, pf, 1974; 2 Pss (Hammarskjöld), op.40, S, org, 1975; 5 Love Songs (G. Eliot, Graves, E. Dickinson, Robinson), op.38, Bar, pf, 1975–93, arr. ballet music, op.38b, Bar, str, bn obbl, 1980, rev. 1993; Canti di luce e di stelle (Lagerkvist), op.45, S, pf, 1978–82, arr. S, ob, cl, vib, va, vc, cb, pf, 1982, rev. 1991; For the Lord shall comfort Zion (*Isaiah* li.3–5), op.49, T, org, 1978; Sorgsen vals [Sad Waltz] (S. Weöres), op.52, S, live elecs, 5 perc, 1980; 6 dikter om dina ögon [6 Poems about your Eyes] (Huldén), op.55, Bar, pf, 1981; [6] Lyriska landskap (K.R. Gierow), op.83, Bar, pf, 1983–92; 3 sånger (A. Österling), 1v, pf, 1985; In the Earth, 7 Songs (O.E. Rölvaag), op.74, Mez, pf, 1988; 5 dikter om havet och sommaren [5 Poems about the Sea and the Summer], op.76, S, pf, 1990; Svit (Lindblom), 3 songs, S, wind qnt, str qt, 1992; 3 Selected Poems (E.B. ROLF HAGLUND

**Hemel, Oscar van** (*b* Antwerp, 3 Aug 1892; *d* Hilversum, 9 July 1981). Dutch composer of Belgian birth. He studied composition with de Boeck and Mortelmans. From 1916 to 1917 he worked as a violinist in the orchestra of the Dutch Opera of Gerard Hendrik Koopman in Amsterdam. Through the concerts at the Concertgebouw, van Hemel became acquainted with the music of Richard Strauss, Debussy and Ravel. From 1918 to 1949 van Hemel taught violin, piano and music theory at the music school in Bergen-op-Zoom. His earliest compositions date from the years just after World War I. Through Eduard Flipse, conductor of the Rotterdam PO, van Hemel came into contact with Willem Pijper, with whom he studied composition (1931–3). The study period with Pijper was decisive for van Hemel's compositional career.

After the publication of the First Violin Sonata in 1936, a work which was generally well received, van Hemel's compositional activities steadily increased. His orchestral works were regularly performed by the Rotterdam PO conducted by Flipse. One of van Hemel's pieces performed

during World War II was *Resurrectio* (1941) in which he depicted the resurrection of Rotterdam, and more especially that of the Rotterdam PO, after the catastrophic bombardment of 14 May 1940. In late 1949 van Hemel settled in Hilversum, where he composed many works commissioned by the Dutch broadcasting stations NOS and KRO, the government and the city councils of Hilversum and Amsterdam. Van Hemel won 12 prizes, including the music prize of the city of Amsterdam for his First Violin Concerto and the Dutch government prize for the Ballade, both in 1948.

Van Hemel's oeuvre is extensive, many-sided and well crafted. He was a moderately progressive composer who used modern harmonies and melodies within the framework of classical forms such as sonata, lied and rondo. He employed cellular motivic technique, bitonality, 12-note technique and serialism, but continually strove to remain understandable for a wide public. Van Hemel was one of the most performed Dutch composers in the years between 1940 and 1970.

**Hemidemisemiquaver** (Fr. *quadruple croche*; Ger. *Vierundsechzigstel-Note*; It. *semibiscroma*; Lat. *fusellala*; Sp. *semifusa*). In Western notation the note that is half the value of a demisemiquaver, hence its name. In American usage it is called a 64th-note. It is first found in late 17th-century music. Except for rare uses of a semihemidemisemiquaver (128th-note) it is the shortest note found in music. The hemidemisemiquaver and its rest are shown in ex.1*a* and *b*. Five- and even six-flagged notes can be

found in early 18th-century music (e.g. François Couperin's harpsichord works), but their context (as part of a larger ornamental formation) usually suggests that their precise value was a matter of individual taste.

JOHN MOREHEN

**Hemiola** [hemiolia] (from Gk. *hemilios*: 'the whole and a half'; Lat. *sesquialtera*; It.: *emiolia*). The ratio 3:2. The term was first applied to music in connection with the theory of pitch: when the string of the monochord was divided in this ratio the two lengths sounded the interval of a 5th. From the 15th century, it was used to signify the substitution of three imperfect notes for two perfect ones in *tempus perfectum* (mensuration with three semibreves to the breve) or *prolatio maior* (three minims to the semibreve). Such substitutions, which were usually notated using coloration, were widely used in 15th-century music. They were particularly prevalent in the English carol repertory, which was described by Bukofzer as 'hemiola music pure and simple' (ex.1).

By extension, 'hemiola' in the modern metrical system denotes the articulation of two units of triple metre as if they were notated as three units of duple metre: in ex.2, from Act 4 of Lully's *Le bourgeois gentilhomme* (1670), the first bar contains two triple units, and the second has three duple units. This is a common feature of Baroque music, especially of the French courante, and is used for giving rhythmic variety to dances and helping to effect an *allargando* at the end of a longer movement; Handel made much use of it. In the 19th century it was used by Schumann and often by Brahms, and was an important feature of the Viennese waltz. Hemiola is a distinguishing

feature of such folkdances as the Andalusian *polo* and the Central American *huapango*, rhythmic characteristics of which were incorporated by Bernstein into 'America' from *West Side Story* (ex.3).

**Hemitonic.** A term, meaning 'with semitones', sometimes used in conjunction with PENTATONIC.

**Hemitonium** (Lat.). *See* SEMITONE.

**Hemke, Frederick (LeRoy)** (*b* Milwaukee, 11 July 1935). American saxophonist and teacher. He studied at the University of Wisconsin (1953–5) and then under Marcel Mule at the Paris Conservatoire, where in 1956 he became the first American to win a *premier prix* for saxophone. He returned to the USA in that year and continued his studies at the Eastman School, where his teachers were Joseph Mariano and Robert Sprenkle. Hemke was a member of the Chicago SO from 1962 to 1982 and made his début as soloist at Town Hall, New York, in 1965. In 1964 he became chairman of the department of wind and percussion instruments of Northwestern University's School of Music, having joined the faculty in 1962. He received the DMA from the University of Wisconsin in 1975.

A virtuoso saxophonist, Hemke has performed much rarely heard music for the instrument and has given the premières of several works, including Warren Benson's *Dream Net* for alto saxophone and string quartet (1976) and Allan Pettersson's Symphony no.16, a work he commissioned, with the Stockholm PO under Yuri Ahronovich (1984). He has composed for the saxophone and written extensively about the instrument and its music: he is the author of *The Early History of the Saxophone* (1975), an expansion of his doctoral dissertation, and *The Teacher's Guide to the Saxophone* (1977) among other publications, and has contributed many articles to music education journals.

SORAB MODI

**Hemmel** [Hemel, Haemel], **Sigmund** (*d* ? Tübingen, end of 1564). German composer and singer. He is first encountered in 1544 as a tenor in the Stuttgart Hofkapelle of Duke Ulrich VI of Württemberg at a salary of 30 florins. His successor Duke Christoph appointed him Hofkapellmeister. From the autumn of 1551 until 24 April 1553 the court resided at Tübingen. Though his salary did not vary, Hemmel is sometimes described in court records as alternatively Kapellmeister or singer. In 1554–5 he resigned the post of Kapellmeister to allow himself more time for composition, but he remained a singer in the Hofkapelle; he is normally recorded as a tenor but in 1559–60 is described as an alto. Because of the plague the court again moved from Stuttgart to Tübingen in autumn 1564, apparently returning in April 1565. As his widow received a payment on 8 January 1565 for a polished stone slab from his work-table, Hemmel must have died towards the end of 1564, probably in Tübingen of the plague. His completed *Psalter Davids* was prepared for publication by members of the Hofkapelle.

Hemmel was the first important post-Reformation musician at the Stuttgart court: in Marquardt's words, 'as the most important Protestant composer in Württemberg he pointed the way for decades to come'. The few works in the choirbooks of the Stuttgart Hofkapelle that can definitely be ascribed to him show that he was at home in all genres of sacred music and was master of the various techniques in use up to the middle of the century. He

favoured cantus firmus elaboration of varying strictness: in two motets (*Veni, Sancte Spiritus* and *Da pacem, Domine*) the accompanying voices remain independent of the plainchant cantus firmus, while in *Dies est laetitae*, the cantus firmus is imitated in three voices at the fifth alongside four free parts. Although he generally favoured imitation – *Beati omnes* has five voices in strict imitation – Hemmel also wrote counterpoint with melodically independent parts, as in *Pater noster*. In his mass on the melody *Ker wider Glück mit Freuden*, he combines techniques typical of mid-16th-century pseudo-polyphony: melodically related voices, restricted use of imitation and a seemingly harmonic conception.

Hemmel is most important for his *Psalter Davids*, published posthumously in 1569; he probably worked on it chiefly during 1561–4 and can only have completed it shortly before his death. Even before its publication it entered the regular repertory of the Stuttgart Hofkapelle, and it was in daily use in 1569. It was also used at the courts of Hesse and Saxony and even at Catholic courts such as that at Baden-Baden. Together with Johannes Heugel's settings for Burkhard Waldis's *Psalter* from the same period, it is the first complete polyphonic German psalter. Typically, Hemmel wrote his collection to aid the congregation's understanding of the liturgy. He generally chose psalm texts published in the Bonn hymnbook of 1561 (one of the earliest collections of Protestant hymns), preferring the texts of the Augsburg Baptists. His volume includes 98 Baptist psalms as well as others by Wolfgang Dachstein, Waldis and Matthias Greiter. Hemmel was careful to match the melody with the psalm text as in the original source; where no melodies existed, he chose a Protestant hymn (usually from Konstanz or Strasbourg) which suited the structure and content of the text. Despite the many chordal sections in his settings, the hymns are contrapuntally, not harmonically, conceived and belong to the tradition of the chorale arrangement exemplified in Johann Walter (i)'s compositions.

WILFRIED BRENNECKE/R

**Hemmerlein.** German family of musicians. Two branches of the family, headed respectively by (1) Johann Nikolaus Hemmerlein and Johann Hemmerlein, were linked in 1762 by the marriage of the former's daughter Eva Ursula with the latter's son (3) Anton Hemmerlein.

**(1) Johann Nikolaus Hemmerlein** (*fl* 1741–63). Organist and schoolmaster. In 1741 or earlier he was employed at Wiesentheid, the residence of the 'Musikgraf' Rudolf Franz Erwein of Schönborn. From 1742 to 1763 he taught at the seminary in Bamberg and was in the service of the Bamberg court. In 1748 he published there a volume of masses by Caldara, *Chorus musarum*, including also a mass of his own (no.3 in C) in the same style. He also wrote a concerto with cello obbligato, which remains in manuscript (*D-WD*).

Three of Hemmerlein's children were also musicians active in Bamberg: Franz Anton (*b* ?*c*1730; *d* Bamberg, 1811), who in 1780 was cellist, trumpeter and timpanist at court; Georg Ludwig, a tenor and actuary at court; and Eva Ursula, for 50 years an admired Bamberg court soprano who at a relatively advanced age married her cousin (3) Anton Hemmerlein. Hemmerlein's grandson (through Georg Ludwig), Thomas Hemmerlein (*b* Bamberg, *c*1767), was a cellist who despite a successful début in 1784 was ignored by the reigning prince-bishop, and left Bamberg for Salzburg in 1789.

**(2) Joseph Hemmerlein** (*b* Bamberg; *d* Paris, 1799). Pianist and composer. He was the son of Johann Hemmerlein, schoolmaster and organist at Bischberg near Bamberg. He left the Bamberg court in 1766 and by about 1780 had become a piano teacher in Frankfurt. In 1781 he was court organist in Coblenz and in 1786 in the service of Countess Vorbach. As a composer he specialized in piano music, and published several piano concertos, elegantly written pieces for chamber combinations including piano, and works for piano solo and duet in the *galant* manner.

**(3) Anton Hemmerlein** (*b* Bamberg, 1730; *d* 1811). Cellist and composer, brother of (2) Joseph Hemmerlein. He entered the Academia Ottoniana in Bamberg in 1744. He was an excellent cellist, a pupil of Joseph Riepel in Regensburg and later of Franz Woschitka in Munich (1766), and was also a timpanist, a pupil of Michael Schlegel in Würzburg (1781); he served the Bamberg court in both capacities. He composed dance music for the court and a sonata for harpsichord and violin (incomplete manuscript in *D-Bsb*). In 1762 he married his cousin Eva Ursula Hemmerlein. Their son, Johann

Wolfgang, was a trumpeter who joined the French army after failing to obtain a permanent appointment in Bamberg, and is last heard of as a military trumpeter in Vienna in 1795.

(4) **Marquard (Johann) Joseph Hemmerlein** (*b* Bamberg, 1766; *d* Bamberg, 1838). Violinist and tenor, grandson (through Georg Ludwig) of (1) Johann Nikolaus Hemmerlein. He was ordained in 1793 but the same year embarked on unauthorized freelance travels as a violinist and tenor which were to last for 25 years. The assumed name under which he travelled is still unknown. From 1821 to his death he was a minor canon of Bamberg Cathedral. He was also an artist and a notable collector of paintings.

(5) **Ignaz Carl Hemmerlein** (*b* Bamberg, 1773; *d* Bamberg, 24 Feb 1840). Cellist and composer, son of (3) Anton Hemmerlein. He was a pupil of J.A. Uhlmann in Bamberg for composition and of J.K. Schlick in Gotha for the cello. He was court director of music at Fulda, and after the court's secularization directed the Bamberg theatre orchestra. He composed two sets of *Türkische Musik* for wind ensemble (in *D-F*), and a cello concerto by him (op.1) was published in Augsburg in 1801.

HANNS DENNERLEIN

**Hemony.** Dutch family of bronze casters. The family originated in Lorraine and they were outstanding makers of carillons. The brothers François Hemony (*b* Levécourt, *c*1609; *d* Amsterdam, May 1667) and Pieter Hemony (*b* Levécourt, Jan 1619; *d* Amsterdam, 17 Feb 1680) may have been the sons of the church bell caster Peter Hemony from Lorraine or of his brother Blaise Hemony. In 1634 François and Pieter left their home because of disturbances caused by war. In 1636 François, in collaboration with Josephus Michelin, cast a church bell for Repelen (Rhineland); in 1638 François cast another for the same place. In 1640 he and his brother delivered several bells for Wankum and in 1641 a set of three for Goor. Shortly before, François had married Marie Michelin.

In 1643 the Hemony brothers were commissioned by the town of Zutphen to build and deliver a carillon which, produced after several years' detailed study, was of a beauty and purity previously unknown. This immediately brought the Hemonys to the fore among carillon makers in the Netherlands. Later the brothers settled in Zutphen until 1657. Between 1657 and 1664 François was the inspector of bells and guns in Amsterdam, while Pieter had his own workshop in Ghent. From 1664 to 1667 the brothers once more worked together in Amsterdam, where Pieter managed the workshop alone from 1667 to 1680 after François' death. The craft of the Hemonys was maintained in the work of their best pupil, Claes Noorden (1633–1716).

The number of church bells produced by the Hemonys was probably between 300 and 400, and about 100 are extant, most of them in the Netherlands. They also produced cannon, mortars and statues, for instance those made by François (to designs by Quellinus) for the Amsterdam Town Hall. Of the 51 carillons produced by the Hemonys (catalogued in Lehr, 1959, pp.102–16), about 30 have survived, most of them in part. Among the most beautiful are those in Antwerp Cathedral (1655–8); Nieuwe Kerk, Delft (1659–60); the belfry, Ghent (1659–60); Onze Lieve Vrouwekerk, Amersfoort (1659–63); Utrecht Cathedral (1663–4); Gasthuistoren, Zaltbommel (1654); St Hippolyt, Middelstum (1661–2); and Dromedaris, Enkhuizen (1671).

The lighter Hemony carillons usually had 23 or 28 bells, the heavier ones 32, 35 or 37. The largest bells of the lighter instruments might weigh 570 kgs (*g*♯'), 345 kgs (*b*') or 250 kgs (*c*♯''); in heavier instruments the largest bells might weigh 4600 kgs (*g*♯), 2750 kgs (*b*) or 1900 kgs (*c*♯'). The largest Hemony bell is the bourdon of the belfry in Ghent (now cracked), weighing 5600 kgs (*g*); the smallest by François was about 8·5 kgs (*c*♯''''), that by Pieter about 7 kgs (*f*♯''''). The keyboards of the heavy instruments usually reached from *c* to *a*'', *c*''' or *d*'''. The keyboards of the light instruments usually had a compass from *c* to *c*'' or *f*''. In both cases, there were occasionally a few additional notes in the bass register. The keys for *C*♯ and *E*♭ in the first octave are generally lacking; otherwise the succession is generally chromatic. The Hemonys used a mean-tone temperament of the scale, with the semitones tuned to C♯, E♭, F♯, G♯ and B♭.

The minimum requirement of 18% tin for good bell metal was always exceeded by the Hemonys. Pieter Hemony declared that he added 28 to 30 units of tin to 100 units of copper according to its quality.

The so-called 'rib' section of Hemony bells is fairly constant: the octave below each note has twice the diameter and eight times the weight, except among the highest bells, where the difference is less. Thus, for example, their bell in Gouda (1675) sounding *c*♯'''' has a diameter of 221 mm (instead of 185 mm, as one would expect from the size of the lower bells) and a weight of about 7·8 kgs (instead of 3·9). (A similar procedure was then in use for the measuring of organ pipes.) In its absolute strength the Hemony rib oscillates slightly between the light and the normal strength of a middle-weight rib from a modern bell foundry. This fluctuation may have been intentional, as an analogous practice can be discerned in organ pipe measurements of the same era.

Of particular significance is the way in which the Hemonys tuned a bell after it was cast. To achieve the proper relation among the main partial tones within the bell timbre and also among melodic intervals between bells, each bell is tuned by removing part of its mass from the inside (*see* BELL (i)). Previous makers had done this by chipping off appropriate amounts, an inherently inaccurate process resulting in a lack of symmetry in the shape of the bell which consequently impaired the tone. The Hemonys ground the bell on a lathe, thus achieving both a symmetrical structure and a previously unattainable degree of accuracy to about $\frac{1}{20}$ of a semitone. They compared the pitches obtained with those of a metallophone (perhaps from Indonesia) made up of a series of metal rods. Each time a partial tone of the bell was tuned to the right pitch, the corresponding rod vibrated sympathetically. This vibration could be observed by the movement of grains of sand spread out on the rod's surface. The Hemonys tuned the lowest five partial tones on their bells: the fundamental, the nominal, the minor

3rd, the 5th and the octave. They made the rib for the casting thicker than necessary, so that they could take an adequate amount from the mass when tuning. In their tuning and in the casting itself they were extremely careful, and would often redo the casting, sometimes more than once.

To a significant extent the superiority of the Hemonys' art was due to the pioneering investigations of Jonkheer Jacob van Eyck, municipal carillonneur of Utrecht and the leading campanologist of the day. After he established the best pattern of partial tones and ascertained from which parts of the bell these partials were produced, the Hemonys appropriated his findings and developed a corresponding method of tuning. Thus they learnt to produce musically euphonious bells whereas their predecessors (and most of their successors) produced bells more or less impure in tone. The Hemonys were also the first to make chromatic carillons and to extend the compass to three or more octaves. They thereby developed the carillon into a musically viable instrument.

During the first half of the 20th century many Hemony bells were corroded as a result of air pollution, so that retuning them became necessary. In the 1960s most restorations of Hemony carillons involved replacing the treble bells and retuning the rest. In more recent years restoration projects carried out in the Netherlands have attempted to reconstruct the original condition of the Hemony carillon, including the dimensions of the keyboard, the action between the keyboard and the bells, and the original number of bells (e.g. Zuiderkerk, Amsterdam, 1993; Amersfoort, 1996; and Middelstum, 1997).

HANS KLOTZ/LUC ROMBOUTS

**Hempel, Charles William** (*b* Chelsea, 28 Aug 1777; *d* London, 14 March 1855). English organist. He was the eldest child of the Chelsea potters and crucible manufacturers Carl Friedrich Hempel and Johanna Hempel (née Ruel). Charles William credited his entire knowledge of musical composition to the works of his uncle, A.F.C. Kollmann, with whom he studied as a boy and who let him perform at the Royal German Chapel in St James's Palace when he was only eight. Hempel attended boarding school in Surrey and travelled in 1793–4 to Leipzig and Dresden. In May 1804 he was elected organist of St Mary's, Truro, where he directed the choir. Besides sacred music and a poem, he published *Introduction to the Pianoforte … with a Series of Select Practical Lessons* (1822). His autobiographical letter of 2 February 1824 to the 'Proprietors of the "New Biographical Dictionary of Musicians"' is in the Euing Collection of Glasgow University.

His son, Charles Frederick Hempel (*b* Truro, 7 Sept 1811; *d* Perth, 25 April 1867), succeeded him as organist of St Mary's, Truro, in 1844. He became organist of St John's Episcopal Church, Perth, in 1857; in 1862 he received a doctorate from Oxford for which his exercise was an oratorio, *The Seventh Seal*. He conducted the Perth Choral Union and published numerous vocal and piano compositions.

MICHAEL KASSLER

**Hempel, Frieda** (*b* Leipzig, 26 June 1885; *d* Berlin, 7 Oct 1955). German soprano, later naturalized American. She studied in Leipzig and Berlin, after which her early career was centred at the Berlin Königliche Oper (début on 22 August 1905 as Mrs Ford in *Die lustigen Weiber von Windsor*). She was first heard at Covent Garden in 1907 in a double bill as Mozart's Bastienne and Humperdinck's Gretel, then as Eva and Mrs Ford. Her fine schooling and purity of tone immediately marked her out, but her big London success came during Beecham's Drury Lane season of 1914, when she sang the Queen of Night (perhaps her most famous part) and the Marschallin, a role she had introduced to Berlin in 1911 and to New York in 1913. Her Metropolitan début in 1912, as Marguerite de Valois in a brilliantly cast *Les Huguenots*, began a period of seven years with that company, during which she settled in New York where she became a naturalized American. She sang Eva and Euryanthe there under Toscanini, besides many of the lighter Verdi, Rossini and Donizetti parts, in which she was regarded as the natural successor of Sembrich. After a farewell Metropolitan appearance, in *Crispino e la comare*, on 10 February 1919, she devoted herself mainly to a concert career. Her refined, exhilarating style is worthily represented on her many recordings.

DESMOND SHAWE-TAYLOR/R

**Hempson, Celeste.** *See* GISMONDI, CELESTE.

**Hempson** [Hampson, O'Hampsey], **Denis** (*b* Craigmore, nr Garvagh, Co. Derry, 1695; *d* Magilligan, Co. Derry, 1807). Irish traditional harper. Blinded by smallpox at the age of three, he took up music as a career, this being one of the few occupations open to a blind man at that time. He began to study the harp with Bridget O'Cahan when he was 12, and other teachers were John Garragher, Loughlin Fanning and Patrick Connor. At 18 he began his career as an itinerant harper, and spent many years travelling through Ireland and Scotland. He was noted as a fine performer and for his ability to intersperse his playing with stories and humorous anecdotes. While in

Edinburgh in 1745, he played and sang for Prince Charles Edward Stuart, the Young Pretender.

When too old for constant travel, he settled in Magilligan, where he spent the rest of his long life. He still travelled on occasion, and went to Belfast to play at the harpers' festival of 1792. By then he had become a musical anachronism: he was the only harper at the festival still using the playing technique that was a unique feature of the traditional Irish harp up to about 1600, before it had entered on its long decline. Hempson still pulled his strings with long, crooked fingernails. He astonished listeners with the agility and delicacy of his playing, and could execute all kinds of grace notes, trills, etc. with ease and clarity. He was particularly noted for his ability to play rapid passages clearly, by damping the sound of one string while playing the next. As well as clinging firmly to traditional techniques he played Irish music almost exclusively, unlike his contemporaries. Extremely conservative in his tastes, he even disliked the music of Turlough Carolan (1670–1738) on the grounds that it was too modern, although in fact he played many pieces by Carolan. He had in his repertory some pieces of harp music such as the *Lamentation* of John Scott, *Tá mé 'mo chodladh* (anon.) and *Burns March* (anon.), quite different from anything else being played at the time. Possibly these pieces date from the harping period before 1600, about which almost nothing is known. From a study of the music played by Hempson, one can gain valuable clues as to the nature of one of the oldest musical traditions in Europe.

GRÁINNE YEATS

**Hemsch, Henri** [Jean-Henri; Johannes Heinrich Hembsch] (*b* Castenholtz, nr Cologne, bap. 21 Feb 1700; *d* Paris, Sept 1769). French harpsichord maker. His six-year apprenticeship with the German-born harpsichord maker Antoine Vater (*fl* Paris, 1715–59) began at the advanced age of 28, suggesting that Hemsch had already learned instrument making or a related trade, perhaps in his native Germany. The earliest extant Hemsch harpsichord (Museum of Fine Arts, Boston) dates from 1736 (or possibly 1746), and is very similar in detail to the work of Vater. All of Hemsch's instruments, like Vater's, are thoroughly French in style, having two manuals with compass *F'–e'''* (or *f'''* in an instrument of 1761 at the Musée de la Musique, Paris) and the standard three-register disposition with shove coupler. Hemsch, who served as *juré* of the instrument makers' guild in 1746 and whose extant instruments approach in number and equal in quality those of the Blanchet/Taskin family, should be considered one of the most important Parisian makers. He was succeeded by his nephew Jean-Henri Moers (*b* Castenholtz, bap. Aug 1734; *fl* Paris, 1754–93). Hemsch's brother, Guillaume (*b* Castenholtz, bap. 5 Dec 1709; *fl* Paris, 1748–74), was also a harpsichord maker.

JOHN KOSTER

**Hemsi (Chicurel), Alberto** (*b* Turgutlu, Turkey, 23 Dec 1896; *d* Aubervilliers, nr Paris, 7 Oct 1975). Italian composer, ethnomusicologist and music publisher. After education at the Alliance Israélite Universelle in Turgutlu, from 1907 he attended the school of the Société Musicale Israélite in Izmir, studying composition with Shemtov Shikayar and cantorial music with Isaac Algazi. He won a scholarship to Milan Conservatory, where he was a pupil of Zavaldi and Pozzoli (theory and solfège), Gatti (orchestration), Zampieri (history), Bossi (composition) and Andreoli (piano) (1914–15, 1917–19). His studies were interrupted by war service and Hemsi was severely wounded. He returned to Izmir to teach, then on to Rhodes (1923–7) and finally Alexandria. From 1920 he became intensely interested in the traditional music of Sephardi Jewry, collecting material around the eastern Mediterranean, in Alexandria, Jerusalem, Rhodes, Turgutlu, Manisa, Izmir and Thessaloniki. Most of the material in *Coplas sefardíes*, the work which established his reputation, was furnished by the Sephardi communities of Alexandria, Istanbul and Sofia; his well-suited piano accompaniments brought these songs into the salons and concert halls. In Alexandria he founded the Edition Orientale de Musique, the first Egyptian house to publish the work of composers familiar with Middle Eastern culture. In his own music he sought a compromise between Western technique and oriental tradition, believing that harmonic, equal-tempered music would replace microtonal heterophony. He founded a conservatory to propagate these ideas; he also established and conducted the Alexandria PO (1928–40) and was music director of the Grand Elihu Ha-navi Synagogue (1927–57). In 1957 he left for Paris to become professor of music at the Jewish Seminary; in the following year he was made music director of the Berith Shalom synagogue. He studied ethnomusicology under Marcel-Dubois at the Sorbonne (1961–5) and was active in French radio thereafter.

ISRAEL J. KATZ

**Hemsley, Thomas** (*b* Coalville, Leics., 12 April 1927). English baritone. He studied privately and made his début in 1951 as Purcell's Aeneas at the Mermaid Theatre, London, playing opposite Flagstad. In 1953 he sang Hercules (Gluck's *Alceste*) at Glyndebourne, returning as Masetto, the Music-Master (*Ariadne auf Naxos*), Don Fernando and Dr Reischmann in the British première of Henze's *Elegy for Young Lovers* (1961). Engaged at Aachen (1953–6), the Deutsche Oper am Rhein (1957–63) and Zürich (1963–7), he sang more than 100 roles, including Guglielmo, the Speaker, Germont and Marcello. He created Demetrius (*A Midsummer Night's Dream*) with the English Opera Group at Aldeburgh (1960), subsequently recording the role under the composer. He sang Beckmesser at Bayreuth (1968–70) and made his Covent Garden début in 1970 creating Mangus in *The Knot Garden*. For Scottish Opera he sang Dr Malatesta and Balstrode and created Caesar in Hamilton's *The Catiline Conspiracy* (1974). His roles for the WNO (1977–85) included Rossini's Dr Bartolo, Dr Kolenatý (*The Makropulos Affair*) and Don Alfonso, while for Kent Opera he sang Falstaff (1980). After retirement he became increasingly active as a teacher, adjudicator and director.

Hemsley was also an intelligent lieder singer; his *Winterreise* (which he recorded) was greatly admired, and he several times performed the complete *Italienisches Liederbuch* and *Spanisches Liederbuch* of Wolf with Irmgard Seefried. He was a noted interpreter of Jesus in Bach's Passions and of the baritone solos in *Belshazzar's Feast* and the *War Requiem*, parts which well displayed his flexible, if slightly dry, baritone, incisive enunciation and keen dramatic sense.

ALAN BLYTH

**Hen, Ferdinand Joseph de.** *See* DE HEN, FERDINAND JOSEPH.

**Henck, Herbert** (*b* Treysa, Hesse, 28 July 1948). German pianist, editor and author. He studied in Mannheim, at the Hochschule für Musik in Stuttgart and finally at the Hochschule für Musik in Cologne, where his teachers were Aloys Kontarsky and Wilhelm Hecker. Since the start of his career he has concentrated almost exclusively on 20th-century works, about which he has written and published extensively. From 1980 to 1985 he edited and published the five-volume series of yearbooks *Neuland, Ansätze zur Musik der Gegenwart*. Henck has given frequent courses at Darmstadt and elsewhere and has made over 40 recordings, including the three sonatas by Boulez, Cage's *Music of Changes*, *Cheap Imitation* and *Music for Piano 1–84*, three piano cycles by Gurdjieff/de Hartmann, Koechlin's *Les heures persanes*, Stockhausen's *Klavierstücke I–IX* and works by Schoenberg, Ives, Mompou, McGuire and Medek. Since 1984 he has recorded several discs of keyboard improvisations. He has also published many articles and books, including *Experimentelle Pianistik: Improvisation, Interpretation, Komposition: Schriften zur Klaviermusik* (Mainz, 1994).

JEREMY SIEPMANN

**Hencke** [Henke], **Johann** (bap. Geseke, 3 Dec 1697; *d* Vienna, 24 Sept 1766). Austrian organ builder. He was of Westphalian descent and training; after his years of travel as a journeyman, he settled in Vienna where he became a freeman in 1725 and founded his own business. Extant examples of his work include the organs at the pilgrimage church at Maria Kirchbüchl, near Neunkirchen, and the Annakirche, Vienna; the choir organs at Bruck/Leitha and Herzogenburg; and the organ cases at Herzogenburg and Maria Taferl. An organ signed 'Johann Hencke' was built in Timisoara Cathedral in 1757. Hencke, who was closely associated with Andreas Silbermann among others, is regarded as the most outstanding Viennese organ builder of his day. In conformity with the style in south-east central Europe of that time, his instruments contained finely articulated, richly assorted diapason choruses and a wealth of foundation flue stops, but only a few flute and wide-scale mutation stops, in that respect resembling the organs of his contemporaries Michael Engler (ii) and T.J. Schwarz. His business was carried on after his death by his son-in-law.

HANS KLOTZ

**Henderson, Fletcher (Hamilton jr)** [Smack] (*b* Cuthbert, GA, 18 Dec 1897; *d* New York, 29 Dec 1952). American jazz and dance-band leader, arranger and pianist.

1. Early years. 2. 1925–52.

1. EARLY YEARS. Henderson was born into a middle-class black family, and studied European art music with his mother, a piano teacher. He later took a degree in chemistry and mathematics at Atlanta University. In 1920 he moved to New York, where he picked up work as a

song demonstrator with the Pace-Handy Music Company, an early black publishing firm. When Harry Pace founded Black Swan, the first black recording company, Henderson joined it as musical factotum. He began to put together groups to back the company's singers, and in this way drifted into a career as a bandleader. Probably in January 1924 he began to perform in Club Alabam on Broadway. The same year he was offered a position at the Roseland Ballroom, later to become the best-known dance hall in New York. (These clubs were restricted to white customers.) Henderson's band remained there for a decade, using the Roseland Ballroom as a springboard to national fame.

At the outset Henderson's group was an ordinary dance band, not a jazz band, though its music was inflected with the 'raggy' rhythms that had been popular for some time. As such, it was no different from the thousands of dance bands that were springing up across the USA in response to the vogue for social dancing. But musicians everywhere were drawn to the new jazz music, and in 1924 Henderson brought in Louis Armstrong, whom he had heard briefly in New Orleans three years earlier, as a jazz specialist. Armstrong's style was rapidly maturing, and his playing, with its propulsive swing and melodic invention, entranced not only Henderson's men but other New York musicians. Although Armstrong was not the only jazz influence on New York players, he was the most important one, and Henderson's band members began to emulate his solo style.

At about the same time the band's music director, Don Redman, was working out what was to become the basic pattern of big-band arrangements for decades: the interplay of brass and reed sections, sometimes in call-and-response fashion, at other times with one section playing supporting riffs behind the other. Many solos were interspersed between the arranged passages. Redman and Henderson were not alone in developing this formula: the Paul Whiteman Orchestra was employing the technique in rudimentary form in 1920, but Redman and Henderson developed it fully. However, in 1924 and 1925 the band was still learning to play with a jazz feeling, and the recordings made then are notable mainly for solos by Armstrong; among these are *Copenhagen* (1924, Voc.), *Go 'long mule* (1924, Col.), *Shanghai Shuffle* (1924, Pathé) and *Sugar Foot Stomp* (1925, Col.), a reworking of King Oliver's *Dippermouth Blues*. The last piece became the band's first hit.

2. 1925–52. Armstrong left Henderson's band in the autumn of 1925; but the seed sown by him and others took root, and by 1926 the band was playing excellent jazz, with first-rate soloists and an ability to make the arranged passages swing. From this time until the mid-1930s the Fletcher Henderson Orchestra was one of the principal models for big jazz bands.

Until 1927 Redman wrote virtually all of the band's arrangements, and it is difficult to estimate Henderson's particular contribution to the development of the big-band format. However, in 1927 Redman left Henderson to become music director of McKinney's Cotton Pickers. For the next few years Henderson depended mainly on freelance arrangers. Then, in 1931, he began providing his own arrangments, possibly as a result of the economic constraints imposed by the Depression. He proved to have a remarkable talent for it: his arrangements were spare, clean and delicate, with an easy and natural manner that made them comfortable for his musicians to play and generate an infectious swing. Among his best works from this period are *Down South Camp Meeting* and *Wrappin' it up* (both 1934, Decca) and *King Porter Stomp* (recorded by Benny Goodman, 1935, Vic.).

Henderson also had a remarkable gift for discovering new talent; in steady succession he engaged virtually all of the major black jazz players of the time, many of whom, like Armstrong and Lester Young, he raised from obscurity. As a consequence few bands ever matched his in the quality of their soloists. Unfortunately Henderson lacked the traits that make a successful leader: he had little understanding of salesmanship and promotion and could not control his frequently unruly players, who were often lured away by other bandleaders; several times his bands broke up owing to his poor management. In 1934 financial problems forced him to sell some of his best arrangements to Goodman, who was then in the process of starting his own band. Although the widely-held belief that Goodman's success was entirely due to the Henderson arrangements is untrue, they were undoubtedly an important element in Goodman's rapid rise to popularity, which in turn triggered the enormous success of swing bands from 1935 to 1945. Henderson led bands until 1939, when he joined Goodman as a full-time staff arranger. From 1941 he returned to bandleading and writing arrangements for a living, left behind by the swing-band boom which he had played so large a part in bringing about. He suffered a severe stroke in December 1950 and was partially paralysed until his death.

Despite his lack of personal force, Henderson's musical intelligence and taste were important factors in creating the character of big-band jazz. Although he was not alone in shaping the big-band style, his group was the principal model for this music, and its influence at second hand, through the bands of Goodman and others, was profound. His personal papers are in the holdings of the Amistad Research Center at Tulane University in New Orleans.

WORKS
(*selective list*)

*arrangments almost certainly by Henderson; dates those earliest known performance, orchestra in parenthesis*

Honeysuckle, 5 Dec 1932 (Henderson); King Porter Stomp, 9 Dec 1932 (Henderson); Down South Camp Meeting, 12 Sept 1934 (Henderson); Wrappin' It Up, 12 Sept 1934 (Henderson); Shanghai Shuffle, 17 Sept 1934 (Henderson); Sometimes I'm Happy, 6 June 1935 (Goodman); I'll Always be in Love with You, 9 April 1938 (Henderson); You Turned the Tables on Me, 13 August 1938 (Goodman); Stampede, 22 March 1937 (Henderson); Henderson Stomp, 13 Nov 1940 (Goodman)

JAMES LINCOLN COLLIER

**Henderson, Joe** [Joseph A.] (*b* Lima, OH, 24 April 1937). American jazz tenor saxophonist. He briefly played the C-melody saxophone before taking up the tenor instrument. After studying music at Kentucky State College and Wayne University (1956–60) and serving in an army band (1960–62), he worked with the organist Brother Jack McDuff and led a group with Kenny Dorham. He became

a prominent soloist as a sideman with Horace Silver (1964–6, notably on the title track of the album *Song for my Father*, 1964, BN) and Herbie Hancock (1969–70); in the interim Henderson spent a brief period with Miles Davis (1967) and established a rehearsal big band (1967–72), initially with Dorham as its co-leader. While based in New York and, from 1972, San Francisco, Henderson toured internationally as a freelance soloist and bandleader, working more often in Europe and Japan than in the USA. After recording *Lush Life: the Music of Billy Strayhorn* (1991, Verve), Henderson became the most prominent veteran participant in the on-going bop revival. He works mainly in small groups, but concurrently from 1990 in San Francisco and 1992 in New York he has led two versions of the rehearsal big band that he had begun with Dorham.

One of the most original soloists of the modern jazz era, Henderson avoids the sense of melodic perpetual motion that characterizes the playing of so many contemporary tenor saxophonists and instead proceeds in enigmatic fits and starts. The bop tradition and John Coltrane's so-called modal playing are central to his improvisational style, but he also draws from wild elements of free jazz and from the instrumental preaching style of soul and gospel music. Henderson is the composer of the jazz standard *Recordame* (1963).

BARRY KERNFELD

**Henderson, Moya** (*b* Quirindi, NSW, 2 Aug 1941). Australian composer. She studied composition with Colin Brumby at the University of Queensland. In 1973 she was appointed resident composer with the Australian Opera and in 1974 she was awarded an overseas scholarship. Henderson studied with Kagel and Stockhausen in Germany, winning a composition prize with *Clearing the Air* (1974). In 1976 she settled in Sydney. She has received major commissions from the Australian Opera, the ABC, Sydney SO, Musica Viva, WDR and the Australian Youth Orchestra, and Perihelion. Her awards include a Composer Fellowship (1989) and the Don Banks Fellowship (1993). She was awarded the Order of Australia (1996).

Henderson is particularly interested in acoustic sound and has developed the 'alemba', a keyboard percussion instrument of tuned triangles, and the 'noose', which produces natural harmonics on stringed instruments. An affinity with Aboriginal spirituality is a profound source of inspiration and is reflected in such works as *Sacred Site* (1983), *The Dreaming* (1985) and *Kudikynah Cave* (1987). Reflecting her political concerns about the environment, women's issues and indigenous culture, her diverse compositional output displays a strong dramatic flair.

WORKS
(*selective list*)

RUTH LEE MARTIN

**Henderson, Ray** [Brost, Raymond] (*b* Buffalo, NY, 1 Dec 1896; *d* Greenwich, CT, 31 Dec 1970). American composer. He studied at the Chicago Conservatory of Music, then taught the piano, served as organist, and played in dance bands in his home town before moving to New York. He worked initially as a song-plugger for Leo Feist and started to compose his own tunes, then in 1922 met lyricist Lew Brown; one of their earliest songs, 'Georgette' (for the *Greenwich Village Follies* of that year), became a hit. Buddy DeSylva joined the team in 1925, and they subsequently collaborated on many popular revues and musicals. Their first success, *George White's Scandals of 1926*, included 'The Birth of the Blues', 'Black Bottom' and 'Lucky Day'; this was followed by the quintessential Broadway musical of the 1920s, *Good News* (1927). They also wrote songs for early sound films: 'Sonny Boy' was performed by Al Jolson in *The Singing Fool* (1928) and 'If I had a talking picture of you' by Janet Gaynor in *Sunny Side Up* (1929). Henderson's music was filled with the lively 'lowdown' rhythms and basic harmonies of the period; his love songs were made piquant by the lyrics of DeSylva and Brown. From 1940 DeSylva remained in Hollywood, but Henderson continued to work with Brown, producing the Broadway shows *George White's Scandals of 1931*, *Hot-Cha* (1932) and *Strike me Pink* (1933). His ability to create melodies of wide popular appeal seemed to wane, however, and his last theatre score (for *Ziegfeld Follies of 1943*) owed its success to the nostalgia it inspired for an earlier era. A film of the careers of DeSylva, Brown, and Henderson, *The Best Things in Life are Free*, appeared in 1956.

WORKS
(*selective list*)

*unless otherwise stated, lyrics are by B.G. DeSylva and L. Brown*

STAGE

*book musicals unless otherwise stated; dates are those of first New York performance*

George White's Scandals of 1925 (revue), 22 June 1925; George White's Scandals of 1926 (revue), 14 June 1926 [incl. The Birth of the Blues, Black Bottom, Lucky Day]; Good News, 6 Sept 1927 [incl. The best things in life are free, Just imagine, Lucky in Love, Varsity Drag, Good News], films, 1930, 1947; Manhattan Mary, 26 Sept 1927; George White's Scandals of 1928 (revue), 2 July 1928; Hold Everything, 10 Oct 1928 [incl. You're the cream in my coffee]; Follow Thru, 9 Jan 1929 [incl. Button up your overcoat], film, 1930

Flying High, 5 March 1930 [incl. Thank your father]; George White's Scandals of 1931 (revue, Brown), 14 Sept 1931 [incl. Life is just a bowl of cherries, The thrill is gone]; Hot-Cha (Brown), 8

March 1932; Strike me Pink (Brown), 4 March 1933; Say When (T. Koehler), 8 Nov 1931; George White's Scandals of 1936 (revue, J. Yellen), 25 Dec 1935; Ziegfeld Follies of 1943 (revue, Yellen), 1 April 1943

FILMS

The Singing Fool, 1928 [incl. Sonny Boy]; Say it with Songs, 1929; Sunny Side Up, 1929 [incl. If I had a talking picture of you, I'm a dreamer, aren't we all?, Sunny Side Up]; Just Imagine, 1930; Indiscreet, 1931; George White's Scandals (Yellen and I. Caesar), 1934; Curly Top (Caesar and Koehler), 1935

OTHER SONGS

Georgette (Brown), in Greenwich Village Follies of 1922, 1922; That Old Gang of Mine (B. Rose and M. Dixon), 1923; Follow the swallow (Rose and Dixon), 1924; Alabamy Bound (B. Green and DeSylva), 1925; Five Foot Two, Eyes of Blue (S. Lewis and J. Young), 1925; I'm sittin' on top of the world (Lewis and Young), 1925; Bye, bye, blackbird (Dixon), 1926

GERALD BORDMAN

**Henderson, Roy (Galbraith)** (*b* Edinbugh, 4 July 1899; *d* Bromley, Kent, 16 March 2000). Scottish baritone. He studied at the RAM (1920–25). He made his début at the Queen's Hall in 1925 in Delius's *A Mass of Life*, and made such a favourable impression that he sang in all further performances until 1946. He made his Covent Garden début in 1928 as Donner, later singing Kothner and the Herald (*Lohengrin*). In 1934 he sang Count Almaviva in the Glyndebourne Festival's opening performance, *Le nozze di Figaro*, returning there until 1939 as Papageno, Masetto and Guglielmo. He also appeared with the company in London and on tour as Peachum in *The Beggar's Opera* (1939–40). He was an eloquent interpreter of Elijah, Jesus in Bach's *St Matthew Passion*, and the baritone solos in Vaughan Williams's *Sea Symphony* and Delius's *Sea Drift* (which he recorded). He sang in the first performances of Vaughan Williams's *Dona nobis pacem* and *Tudor Portraits*, Delius's *Idyll* and Dyson's *The Canterbury Pilgrims*. Although Henderson's voice was not intrinsically beautiful, he used it with intelligence and charm. A gifted teacher, he numbered Ferrier among his pupils. He took part in the Glyndebourne Mozart recordings as Count Almaviva and Masetto, and made many discerning recordings of English songs.

ALAN BLYTH

**Henderson, William James** (*b* Newark, NJ, 4 Dec 1855; *d* New York, 5 June 1937). American music critic. He was the son of a theatrical manager and was educated at Princeton (BA 1876, MA 1886, honorary LittD 1922). His musical training included piano lessons with Carl Langlotz (1868–73) and singing lessons with Angelo Torriano (1876–7); in music theory he was largely self-taught. He wrote for newspapers from the age of 15, and after leaving college served as a reporter on the *New York Tribune*, and as music critic for the *New York Times* (1887–1902) and the *New York Sun* (1902–37). He also lectured on music history at the New York College of Music (1889–95) and on the development of vocal art at the Institute of Musical Art (from 1904). A versatile writer, he provided the libretto for Walter Damrosch's opera *Cyrano de Bergerac* (Metropolitan Opera, 1913), and also wrote a novel, poems and sea stories; his *Elements of Navigation* was an official textbook in naval training schools during World War I.

Henderson's main interest was singing and singers, but he was a thoughtful and serious commentator on many aspects of music and musical life. His writing is clear and direct, informed, witty and intelligent. His comments on aesthetic matters reveal him as a child of his time (e.g. in *What is Good Music?*, 1898), but his article 'The Function of Musical Criticism' (1915) remains nearly undated, with perceptive observations on the relationship between musical style and intellectual trends. He took up the cause of Wagner with considerable understanding, and acknowledged the musical validity of the harmonies of Schoenberg and Debussy, although he himself preferred the idiom of Brahms and Verdi.

RAMONA H. MATTHEWS

**Hendl, Walter** (*b* West New York, NJ, 12 Jan 1917). American conductor and teacher. After studying with Fritz Reiner at the Curtis Institute, he taught at Sarah Lawrence College, New York, from 1939 to 1941. In 1941–2 he was a pianist and conductor at the Berkshire Music Center under Koussevitzky. In 1945 he became associate conductor of the New York PO, in 1949 he was appointed conductor of the Dallas SO and from 1958 to 1964 he was associate conductor of the Chicago SO. He was also active with the Symphony of the Air, and conducted its 1955 tour of East Asia. From 1964 to 1972 Hendl served as director of the Eastman School of Music at Rochester, New York, and was also musical adviser to the Rochester PO and its part-time conductor. In 1976 he was appointed music director of the Erie (Pennsylvania) PO, and in 1990 he became professor of conducting at Mercyhurst College in Erie. An advocate of contemporary music, he conducted the premières of Peter Mennin's Symphony no.3 (with the New York PO, 1947), Martinů's Piano Concerto no.3 (with Firkušný and the Dallas SO, 1949) and Villa-Lobos's Cello Concerto no.2 (with Parisot and the New York PO, 1954), as well as the American première of Kabalevsky's Requiem (with students of the Eastman School, 1965). He composed incidental music for various stage productions and made several orchestral transcriptions.

GEORGE GELLES/JACOB HOSLER

**Hendricks, Barbara** (*b* Stephens, AR, 20 Nov 1948). American-Swedish soprano. She studied at the Juilliard School and with Jennie Tourel and first established herself as an accomplished concert singer. In 1973 she recorded the role of Clara in *Porgy and Bess* with Maazel, and the following year made her début in San Francisco as Erisbe in Cavalli's *Ormindo*, subsequently singing the title role of *Calisto* at Glyndebourne and Jeanne in Egk's *Die Verlobung in San Domingo* at the St Paul Opera Summer Festival. In 1975 she sang the title role in *The Cunning Little Vixen* at Santa Fe and Nannetta (*Falstaff*) at Boston, and in 1976 took part in the world première of Del Tredici's *Final Alice* under Solti. That year she also made her Salzburg Festival début, in Mahler's Second Symphony, returning to Salzburg as Pamina in 1981. Hendricks made her Paris Opéra début as Gounod's Juliet in 1982 and the same year sang Nannetta in Los Angeles and at Covent Garden. In 1985 she sang Liù at Bonn, and in 1987 she made her Metropolitan début as Strauss's Sophie. Her light, bright-toned voice is well suited to both soubrette and lyric roles, and her repertory includes Susanna, her début role at La Scala in 1987, Ilia, Antonia, Norina and Mimì, all of which she has recorded. Hendricks is also a charming recitalist, at her best in *mélodies* and the lighter songs of Schubert and Richard Strauss. She became a Swedish citizen after her marriage.

ELIZABETH FORBES

**Hendrik** [Heinrich, Heynrijck] **van Veldeke** [Veldeken, von Veldeke] (*b* Veldeke, nr Maastricht, 1140–50; *d c*1190). German Minnesinger of Netherlandish origin. He was of ministerial rank. He received a religious education, went to the court of Hermann of Thuringia, and was presumably present at the court festivities of Emperor Frederick Barbarossa in Mainz in 1184. He then completed his principal work, the *Eneit*, a free rendering of Virgil's *Aeneid* in his native Lower Rhenish tongue, based on French models. Hendrik was one of the great representatives of the courtly epic and early MINNESANG. Some 61 strophes survive with ascriptions to him, of which about 15 were previously considered unauthentic; but have more recently been counted among the authentic works. None survives with music, but their form shows French–Provençal influence, so it is thought that Hendrik probably sometimes used melodies of his Romance precursors, such as Gace Brule and Pierre de Molins. As the first to use 'pure rhyme' consistently in German verse, he may have had an influence on lyric poetry (FRIEDRICH VON HÛSEN, RUDOLF VON FENIS-NEUENBURG, and so on) and upon the epic verse of his day.

BURKHARD KIPPENBERG

**Hendrix, Jimi** [Johnny Allen; James Marshall] (*b* Seattle, 27 Nov 1942; *d* London, England, 18 Sept 1970). American rock guitarist, singer and songwriter. He taught himself the guitar while growing up in Seattle. As he was left-handed he learnt to play the instrument upside down and continued to do so throughout his life; his unorthodox technique included the use of the right thumb to form unusual fingering patterns for some chords. From 1958 to 1960 he played in a high-school band, the Rocking Kings, and was strongly influenced by the electric guitar solos of Charlie Christian. He joined the US Army paratroopers and, while stationed in Fort Campbell, Kentucky, visited Nashville, where he listened to country-blues performers. On his discharge (1961), he went to Nashville and joined the band, the Imperials, then moved to Vancouver (1962) and joined Billy Taylor and the Vancouvers.

In 1963 Hendrix was engaged as a backing guitarist by Little Richard, and in the course of a tour of the South he met the blues guitarist Albert King, who taught him the technique of 'bending' notes; in Los Angeles he played on his first recording, Rosa Parks's *My Diary*, and later toured with Solomon Burke, Chuck Jackson, the Supremes, Ike and Tina Turner, Jackie Wilson and B.B. King. In Chicago he visited the Chess recording studios, where he observed Muddy Waters and other blues musicians. In 1964 he moved to New York and was hired by the Isley Brothers, who encouraged his taste for flamboyant costumes and his exhibitionist performing routine, which included playing the guitar with his teeth, with one hand, behind his back or between his legs. Late in 1964 he joined Curtis Knight's band and played on some of its recordings; he toured with Joey Dee and the Starlighters in the following year, then played in King Curtis's band with the guitarist Cornell Dupree and the bass guitarist Chuck Rainey.

In late 1965 Hendrix moved to Greenwich Village, where he associated with a number of white folk-rock musicians. He formed a group, Jimmy James and the Blue Flames, with the guitarist Randy Wolfe (*b* Los Angeles, 20 Feb 1951), playing blues, rock and roll and songs by Dylan; Hendrix also began experimenting with feedback, fuzz, distortion of sound through high volume levels and other electronic effects. He won the admiration of Dylan's

guitarist Michael Bloomfield, John Hammond jr (who engaged him to play lead guitar in his group), members of the Rolling Stones and Bryan 'Chas' Chandler, a former member of the Animals. Chandler became Hendrix's manager and took him to England in 1966 where, with the bass guitarist Noel Redding (*b* Folkestone, England, 25 Dec 1945) and the drummer Mitch Mitchell (*b* London, 9 July 1946), he formed the Jimi Hendrix Experience. The group released its first single, which consisted of *Hey Joe* and *Stone Free*, in December 1966, and became the opening act for the English rock trio Cream, whose guitarist Eric Clapton had been impressed by Hendrix's playing. Hendrix's outrageous showmanship (his handling of his guitar was overtly sexual and he sometimes brought his act to an end by setting fire to the instrument) and the unusual racial constitution of the group – a black American guitarist and singer leading a white rhythm section – gained much attention, and his innovative guitar techniques strongly affected other musicians.

Hendrix's first album, *Are you Experienced?* (Track, 1967), was notable for a number of unusual sound effects, which he had devised with his recording engineer, Eddie Kramer, and which they continued to explore; these included the building up of multiple tracks on four-track equipment, the manipulation of tape speeds, the mixing down of some material played backwards, the use of controlled feedback, phase shifting, Fuzz Face and Cry Baby sound-effects pedals, and special effects achieved through the manipulation of the tremolo arm and the toggle switch controlling the selection and combination of the pickups. The range of Hendrix's distinctive guitar sound is most strikingly represented in the songs *Purple Haze* and *I don't live today*.

In the summer of 1967 Hendrix and his group made their first US appearance at the Monterey (California) Pop Festival, where his performance was the highlight of the event. He then began a tour of the USA with the pop group the Monkees, during which his controversial performances gained him enough publicity to advance considerably his rise to international success. His second album, *Axis: Bold as Love* (Track, 1968), is characterized by more self-consciously imagistic lyrics, more refined song structures and complex, skilful arrangements that create soulful rhythm and melody from the multi-tracking of guitar parts. He continued to search for new equipment and effects, until his group and management became impatient with his costly, time-consuming experimentation. He also began to use hallucinogenic drugs. The double album *Electric Ladyland* (Track, 1968) contains some of his most highly developed psychedelic music, including a version of Dylan's *All Along the Watchtower* as well as some of his more extravagant soundscapes.

In early 1969 Hendrix and his group began a tour of the USA, but Hendrix continually changed his programmes in the attempt to find a more sophisticated, black 'electric church music'. He was by this time involved in group improvisation with jazz musicians in New York and expressed an interest in playing with Miles Davis, whose fusion of jazz and rock music showed evidence of the influence of Hendrix's funky rhythms and colourful textures. In May 1969 he was arrested in Toronto for possession of heroin. During this period he supervised construction of his own recording studio, Electric Lady, in Greenwich Village. In the summer of 1969 he played at Woodstock with the bass guitarist Billy Cox and the drummer Buddy Miles; the group remained together for some time after the festival and recorded an album, *The Band of Gypsys* (Track, 1970). The original Jimi Hendrix Experience was then re-formed, but Cox soon replaced Redding as bass guitarist. The group began to record at the completed Electric Lady studios in the summer of 1970; some of the material, in a new style influenced by soul music, was included on *The Cry of Love* (Track, 1971) and *Rainbow Bridge* (Rep., 1971), and some was completed by studio musicians and released later on *Crash Landing* (Pol., 1975) and *Midnight Lightning* (Pol., 1976). After Hendrix's death (from asphyxiation in his sleep when he had taken sleeping pills) Alan Douglas, who was left in custody of the substantial body of Hendrix's unreleased recordings, produced two albums: a collection of group improvisations called *Nine to the Universe* (Pol., 1980), and a double album of numbers recorded at concert performances.

The sound that Hendrix created was unmistakable: typically it was loud, sustained, and full-textured, with much use of expressive timbral nuances, and though it had a basic toughness, his music generally avoided a rigid rock beat. Hendrix was not gifted with a naturally fine singing voice, but compensated for his shortcomings by developing an idiosyncratic and compelling vocal style, a form of heightened speech that had its roots in blues and soul. His revolutionary guitar technique and his innovative use of the recording studio as a compositional environment have had a greater impact on rock music than the work of any other musician. His songs and instrumental numbers are not easily separated from his individual style of performing them, and for that reason have been recorded by other musicians only occasionally.

JOHN PICCARELLA

**Heneker, David** (*b* Southsea, 31 March 1906). English composer, lyricist and librettist. The son of General Sir William Heneker, he was educated at Wellington College and the Royal Military College, Sandhurst, and from 1925 was an army officer. He also wrote songs, *There Goes My Dream* becoming a hit in 1940, and later left the army (1948) to follow a career in music. He collaborated on *Expresso Bongo* (1958), one of the earliest musicals to introduce pop styles to the West End, but is now best known for *Half a Sixpence* (1963), a success both in the West End and on Broadway and a star vehicle for Tommy Steele. Heneker next collaborated on the music and lyrics for *Charlie Girl* (1965), whose popularity led to a five-year run in the West End, but his later work has never achieved the same level of success. The recipient of two Ivor Novello awards, he has been

both the chairman of the Songwriters Guild of Great Britain and its president, and was awarded the MBE.

Primarily known as a collaborative writer, the first show for which he provided the complete score and lyrics was *Half a Sixpence*, whose musical pacing and orchestration provided one of the strongest contemporary West End links with a Broadway sound. Although his music is usually informed by the period of the drama and consequently lacks a defining individuality, he can nevertheless use stylistic contrasts to effect, shown for example through the numbers 'Gentle Fade', 'Diggin' gold dust' and the title song from his intimate late musical *The Biograph Girl* (1980).

JOHN SNELSON

**Henestrosa, Luis Venegas de.** *See* VENEGAS DE HENESTROSA, LUIS.

**Henke, Johann.** *See* HENCKE, JOHANN.

**Henkel.** German family of musicians.

**(1) (Johann) Michael Henkel** (*b* Fulda, 18 June 1780; *d* Fulda, 4 March 1851). Composer and organist. After early lessons in the violin, cello and music theory in Fulda, he studied thoroughbass and the organ with J.G. Vierling in Schmalkalden. He was episcopal court violinist in Fulda from 1800 until the secularization of the court in 1803. In 1804 he became Kantor at Fulda Cathedral, and in 1804 at the town parish church. From 1805 he held teaching positions in Fulda, and was singing master at the Gymnasium between 1816 and 1848. His compositions, numbering more than 200, include chamber music, organ pieces and songs; the most important of these are his chorale book for the Fulda diocese, published in 1804, and several volumes of songs for schools.

**(2) Georg Andreas Henkel** (*b* Fulda, 4 Feb 1805; *d* Fulda, 5 April 1871). Teacher and composer, son of (1) Michael Henkel. He first studied music with his father. In 1837 he became music teacher at the teachers' training college in Fulda. His compositions, mostly lost except for a handful published in Fulda, include sacred music, orchestral and instrumental works and songs.

**(3) Heinrich Henkel** (*b* Fulda, 17 Feb 1822; *d* Frankfurt, 10 April 1899). Pianist and teacher, son of (1) Michael Henkel. He received his earliest music instruction from his father. From 1839 he studied the piano in Frankfurt with Aloys Schmitt, meanwhile taking lessons in theory and composition from Ferdinand Kessler and in Offenbach from J.A. André, whose collection of Mozart autographs he catalogued. He settled in Frankfurt as a teacher and pianist in 1849; until 1862 he was also active as a choral and orchestral conductor. In 1860 he was co-founder of the first Frankfurt music school.

ROBERT PESSENLEHNER, GOTTFRIED REHM

**Henkemans, Hans** (*b* The Hague, 23 Dec 1913; *d* Nieuwegein, 29 Dec 1995). Dutch composer and pianist. While still at school he had piano and composition lessons from Sigtenhorst Meyer. Later he studied medicine at Utrecht University, at the same time continuing piano studies with van Renesse and composition with Pijper (1933–8). His first recognition as a pianist and composer came during these university years, when he memorized and performed all of Debussy's solo piano music and gave the première of his own Concerto for piano and strings (1932). At the end of World War II his talents were noticed by van Beinum; beginning in December 1945 he played his Passacaglia and Gigue for piano and orchestra over 60 times, at home and on European tours, with the Concertgebouw Orchestra. He went on to become a leading piano soloist of the 1950s and 60s. Though his tastes were catholic, he was known especially for his interpretations of Debussy, Ravel and Mozart, and appeared seven times at the Salzburg Festival.

The four concertos which Henkemans wrote in the decade after 1945 displayed not only a soloist's familiarity with instruments but an ability to write music exhibiting both show and substance. The prizewinning Violin Concerto (1950) ensured him a prominent place among Dutch composers. For a time he taught composition and orchestration at the Amsterdam Musieklyceum and Groningen Conservatory, and was also a psychiatric consultant for an Amsterdam hospital. When in 1969 health forced his retirement from concert life (in 1940 he had lost one lung to tuberculosis), he continued composing and set up a psychiatric practice for musical and other artists. In 1981 he was named Doctor in de Medische Wetenschappen ('Doctor of Medicine').

A recurring feature in his instrumental music (Passacaglia and Gigue, *Barcarola fantastica*, Flute Concerto, Partita for orchestra) is a hybrid use of inherited forms and dance-types, often quite complex. While his earliest compositions, influenced by Pijper, display germ cells, octatonicism and polymetre, only the polymetre persists in his mature work. He developed a varied harmonic palette, based on the late work of Debussy, leading to a sometimes strikingly atonal musical language of his own. (His identity with Debussy is also demonstrated in idiomatic orchestrations of the latter's Préludes for piano.)

The Viola Concerto (1954) and Harp Concerto (1955) are distinctive additions to the repertory. The former

allots contrasting material to the soloist and orchestra, while in the latter, amid beautiful orchestral colouration reminiscent of Debussy's *Ibéria*, the harp alternates between bravura display and an accompanying role. The strongly contrapuntal Piano Sonata (1958) is one of the major Dutch keyboard compositions of the 1950s. There is an unmistakable pathos or 'morbid beauty' (van Baaren) in these works, unique for Dutch music of this time, which affirms Henkemans's conviction that a musical composition must reflect its creator's emotional life.

With his definitive turn to psychiatry at the end of the 1960s came a heightened interest in vocal music. The cantata *Bericht aan de levenden* (1965) made him nationally renowned. Based on H.M. van Randwijk's verses from the walls of the war memorial at Bloemendaal, honouring the resistance fighters of World War II, it was played repeatedly during the national memorial day celebrations on 4 May. Texts from the distant past (e.g. in *Villonnerie*, *Tre aspetti d'amore*, *Canzoni amorose*) also inspired stunning settings in a symphonic context. In these years, reflecting his experiences as a psychiatrist, he wrote forcefully against most forms of experimental music, thus enraging the Dutch musical avant garde; yet certain of his own compositions, such as the *Tre aspetti d'amore*, were among the most advanced Dutch works of their day. His only opera, *Winter Cruise* (1977), was performed a dozen times by the Nederlandse Opera, but its musical virtues were undermined by a rather uneventful plot.

In the final years Henkemans seemed to follow divergent paths. Works such as the abstract *Riflessioni* for strings (1986–7) and *Chamber Music*, to texts by Joyce (1991), proved challenging to performers and listeners alike. At the same time, after a break of 25 years, he returned to the solo concerto. Encouraged by younger performers, he wrote works between 1981 and 1992 for the horn, cello and piano respectively. The Third Piano Concerto, given its première by Ohlsson in The Hague in 1994, was his last composition. Beyond its virtuosic brilliance, it is music of singular playfulness and warmth.

HARRISON RYKER

**Henle.** German firm of music publishers. It was founded in Munich in 1948 by the Rhenish industrialist, politician, amateur musician and collector Günter Henle (*b* Würzburg, 3 Feb 1899; *d* Duisburg, 13 April 1979). His firm, later also in Duisburg, aimed to publish 'for practical use the musical works of the Classical and Romantic eras in reliable editions based solely on the sources and free from all deliberate editorial additions'. The firm's rigorous adherence to the principle of Urtext editions has influenced the editorial practices for classical music worldwide. Around 600 volumes of Urtext editions of the standard piano and chamber music repertory of the 18th, 19th and early 20th centuries have been published, notable for their clear engraving and printing. The firm, directed by Martin Bente since 1979, publishes, in collaboration with the Beethoven-Haus in Bonn, the Haydn Institute in Cologne and the Johannes Brahms Gesamtausgabe in Kiel, the new complete editions of these composers and associated material, including the Kinsky-Halm Beethoven catalogue, the Brahms Thematic Catalogue, the *Veröffentlichungen des Beethovenhauses in Bonn* and the *Haydn-Studien*. Henle is also involved in the publication

of other academic volumes, notably *Das Erbe Deutscher Musik*, the full score series *Die Oper*, catalogues of important music collections, congress reports and series B of RISM. Since 1980 Henle has been represented in North America by its own distribution centre in St Louis.

THEODOR WOHNHAAS

**Henneberg, Johann Baptist** (*b* Vienna, 5 Dec 1768; *d* Vienna, 26 Nov 1822). Austrian composer, conductor and organist. He succeeded his father as organist at the Schottenstift in Vienna, and by 1790 had joined Schikaneder's company at the Freihaus-Theater (later the Theater an der Wien) as Kapellmeister and composer. He supervised rehearsals of *Die Zauberflöte* during Mozart's absence in Prague and conducted the opera from the third performance. From 1797 he had an able co-director in Seyfried. Apart from his own works, he arranged the piano scores of the Süssmayr-Schikaneder *Der Spiegel von Arkadien* (1794), the Winter and Mederitsch-Schikaneder *Babylons Pyramiden* (1797) and the Winter-Schikaneder *Das Labyrinth* (1798). In 1804, owing to his wife's illness, he left Vienna and settled near the Hungarian border; he became organist to the Esterházys at Eisenstadt and in 1811 succeeded Hummel as Kapellmeister. Following his wife's death in 1814 he returned to Vienna and became choirmaster at the Kirche Am Hof and, from 24 August 1818, court organist. His most successful score was his setting of Schikaneder's *Die Waldmänner*, a comic opera given nearly a hundred times in the Freihaus-Theater auf der Wieden after its première on 14 October 1793. For the Theater an der Wien he wrote no new operas and resigned as Kapellmeister in 1802. He had the reputation of being a fine organist and a good, careful conductor (he also directed the *Akademien* for Schikaneder). His death was brought about by a neglected thigh wound incurred while checking a repair to the court organ. Apart from his several stage works (chiefly Singspiele) he also wrote sacred and secular vocal compositions (a set of *Notturni* was published in 1802), dance music, other orchestral pieces and wind music.

The rediscovery in Hamburg in the mid-1990s of a manuscript score of *Der Stein der Weisen* (Buch, 1997), with most of the numbers identified with the name of the composer, has led to significant new musical attributions, and to a fine recording of the work (following on from the first performance in modern times, undertaken by Boston Baroque at the IMS Conference in 1998). Henneberg is the principal contributor to the score.

PETER BRANSCOMBE

**Henneman, Ig** (*b* Haarlem, 21 Dec 1945). Dutch composer. She studied the viola and violin at the conservatories of Amsterdam and Tilburg and began her career as an orchestral musician. In 1978 she co-founded the all-female rock band F.C. Gerania, writing her first music for this group. She also played with Several Singers and a Horn, and Nedly Elstak's Paradise Regained Orchestra. In 1985 she founded the Ig Henneman Quintet, for which she composed all written material. In the early 1990s she studied composition with Robert Heppener. Since 1982 she has received numerous commissions for film scores, television and theatre productions, and concert music. In 1983 she composed a score for the Russian silent film *Babï Ryazanskiye*, directed by Olga Preobrazhenskaya.

Henneman is increasingly involved in developing a genre which lies somewhere between classical music and improvisation. She writes for both the Henneman String Quartet (violin, viola, cello and double-bass) and the Henneman Tentet (soprano and nine instruments), using a theme as the basis of each new project. In one project for the tentet she set seven poems by Emily Dickinson to music, these compositions forming the basis for improvisations. In another project she set various poems about birds (such as *Ibis* by Guillaume Apollinaire) in six languages. She favours transparency and contrasting moods, often using only a few members of the tentet. In her recent project, *Westwerk*, her quartet improvises on medieval ballatas by Francesco Landini. Although these compositions have not been published, the projects have been recorded.

HELEN METZELAAR

**Hennio, Aegidio** [Hennius, Aegidius]. *See* HAYNE, GILLES.

**Henri III,** Duke of Brabant (*b* 1231; *d* 10 Feb 1261). French trouvère and patron of the arts. During his brief but flourishing reign (1248–61) he aided the romancer Adenet le Roi. Gillebert de Berneville, whom Henri engaged in a jeu-parti, lived for a while at Henri's court at Leuven; the judges of the jeu-parti were the trouvères Raoul de Soissons and the Count Charles of Anjou. Perrin d'Angicourt and Carasaus each dedicated a poem to Henri, who was mentioned by Thibaut II, Comte de Bar, in the political poem *De nous seigneur, que vous est il avis* (R.1522). While the four surviving works by Henri are not distinguished by their originality, they are technically fluent. All are in bar form and three of the four use some sort of G mode. The textual relationship between *Se chascuns* and the work based on it is unusual in that the latter begins with the entire second strophe of Henri's poem before proceeding with new material. Small variants in the melodies for the caudas of the two works serve to point up different sets of internal resemblances. None of Henri's melodies survives in mensural notation.

THEODORE KARP

**Henrici, Christian Friedrich** [Picander] (*b* Stolpen, nr Dresden, 14 Jan 1700; *d* Leipzig, 10 May 1764). German poet and cantata librettist. After studies in his home town he matriculated in the faculty of law at Wittenberg University in 1719; a year later he moved to Leipzig, where he continued his studies and found employment as a private tutor. Henrici began his literary career in 1721 (using the pseudonym 'Picander') producing occasional verse, often on erotic subjects, and a number of satires that won him the enmity of their targets. Having justified his resulting rejection on poetic grounds, from December 1724 to December 1725 he brought out a series of devotional poems for the Sundays and feasts of the church year entitled *Sammlung erbaulicher Gedancken*. Shortly after the first instalments appeared he began working as a librettist for J.S. Bach. Bach and Henrici may have met through a common acquaintance with the Bohemian Count Franz Anton Sporck, the dedicatee of the *Erbauliche Gedancken*. Their professional relationship, which lasted close to two decades, evidently developed into a personal one as well: Henrici's first wife, whom he married in 1736 (he married again after her death), served as a godmother to Bach's daughter Johanna Carolina in 1737.

In 1726 Henrici published a volume of three plays, all of which had appeared separately during the previous year. In spring 1727 he brought out the first volume of his *Ernst-schertzhaffte und satyrische Gedichte*, which gathered together most of his shorter poetry. Later that year he took an administrative position in the postal system. In 1728 he published his second and last collection of sacred verse, a cycle of *Cantaten auf die Sonn- und Fest-Tage* evidently intended for Bach's use – 'I flatter myself', Henrici wrote in his foreword, 'that the lack of poetic charm may be compensated by the loveliness [of the music] of our incomparable Kapellmeister Bach'. Further volumes of *Ernst-schertzhaffte und satyrische Gedichte* came out in 1729 and 1732; the latter year brought Henrici promotion at the post office, and he became commissioner two years later. With his rise in the civic bureaucracy, his literary output diminished: the fourth volume of *Gedichte* did not come out until 1737, and 14 more years elapsed until the appearance of the fifth, which consisted mostly of material reprinted from earlier volumes. His works remained popular, however, often going through several editions. In 1740 Henrici received the post of Assessment and Liquor Tax Collector, Wine Inspector and Vizier, which he held for the rest of his life.

Although not a poet of notable depth or originality, Henrici made an ideal literary partner for Bach. Widely read, technically skilful and well versed in music (which had formed part of his studies as a young man), he could express ideas with the concrete imagery, clear syntax and rhythmic variety necessary to a composer's purpose. He had considerable virtuosity at writing verses to metric schemes dictated by older poems; this ability must have appealed particularly to Bach, who so often used a single piece of music in multiple textual guises.

During the period of their collaboration Henrici's contributions to Bach's occasional works and larger sacred compositions far exceeded those of any other librettist. He wrote the texts of the *St Matthew Passion* BWV244 (1727 or 1729) and the *St Mark Passion* BWV247 (1731), and may also have written those of the *Easter Oratorio* BWV249 (1725), the *Ascension Oratorio* BWV11 (1735) and, at least in part, the *Christmas Oratorio* BWV248 (1734–5). Among the occasional works – music for court celebrations, state visits, church jubilees, funerals and the like – Henrici furnished librettos for the cantatas BWV249*a* (1725), 205 (1725), 36*a* (1725 or 1726), 249*b* (1726), 157 (1727), 193*a* (1727), Anh.4 (?1727), 216 (1728), 244*a* (1729), 201 (?1729), 190*a* (1730), 120*b* (1730), Anh.4*a* (1730), Anh.3 (1730), Anh.10 (1731), Anh.11 (1732), Anh.12 (1733), 213 (1733), 30*a* (1737), 212 (1742) and possibly 205*a* (1743); the 'Coffee' Cantata BWV211 (?1734–5) also uses a text of Picander's, although one perhaps not originally written for Bach.

Henrici occupies a less prominent position in Bach's production of church cantatas for regular Sundays and feasts, although very possibly not so small a one as a strict accounting of the known evidence would indicate. Bach wrote at least nine works on texts from the *Cantaten auf die Sonn- und Fest-Tage* – BWV149, 188, 197*a*, 171, 156, 159, *Ich bin ein Pilgrim auf der Welt* (without BWV number), 145 and 174, probably all composed during the liturgical year 1728–9 or shortly thereafter – and he no

doubt wrote more that have not survived. Whether or not he set virtually the entire series of poems, however, as some observers contend, remains an open question. Other church cantatas of Bach's might also have librettos by Henrici. Stylistic considerations and circumstantial evidence point most strongly to BWV19, 27, 169, 56, 49 and 55, all from late 1726; BWV58, 82 and 84, from early 1727; two later cantatas, BWV140 (1731) and 30 (?1738); and three undatable works, BWV146, 148 and 158. The absence of these texts from Picander's collections does not necessarily argue against his authorship, since poets of his day appear to have regarded smaller liturgical verse as unsuitable for publication except in cycles.

JOSHUA RIFKIN/KONRAD KÜSTER

**Henrician Partbooks** (*GB-Cp* 471–4). *See* SOURCES, MS, §IX, 19.

**Henricus.** A name that appears as an ascription in two early 15th-century manuscripts. It is probably associated with three composers.

(1) 'Henricus' is the ascription of three works in *F-Sm* 222 (nos. 13*bis*, 207, 208) which are probably attributable to the composer HEINRICH LAUFENBERG, or possibly to HENRICUS HESSMAN DE ARGENTORATO.

(2) 'Henricus' is the ascription of a ballata in *F-Pn* n.a.fr. 6771 (no.49) which is ascribed in *F-Pn* it.568 (no.138) to ARRIGO.

(3) 'Magister Heinricus' appears together with EGIDIUS DE PUSIEX in Coussemaker's copy of *F-Sm* 222 (no. 122/123) in connection with the motet *Portio nature/Ida capillorum*. This motet appears also in *F-CH* 564 and *I-IV*. The name occurs in the text of the motetus part: it seems likely that, in this instance, he was the poet but did not compose the music for the motet.

KURT VON FISCHER/R

**Henricus** [Heinrich], **Nikolaus** (*b* Oberursell, *c*1575; *d* Munich, 1654). German printer. The son of a printer, he served his apprenticeship under ADAM BERG in Munich. In 1597 he married his employer's daughter, Susanna, apparently against the wishes of both families, and became a citizen of Munich. He became a Catholic and was granted permission to found his own printing house by Duke Maximilian I on 3 November 1597. Thanks to the patronage of the powerful Jesuit congregation, Henricus was soon appointed court printer and had by the turn of the century usurped the lead in publishing from Adam Berg. After his death his daughter, Jakobe, continued the business for a short time, selling it to Jakob Jäcklin in 1656.

All publishing in Bavaria was subjected to strict censorship and the dukes reserved to themselves the privilege normally exercised by city governments of granting permission to prospective publishers. Thus Henricus was the only printer, besides Berg and his descendants, who was allowed to practise his trade in Munich, until well into the 17th century. His publications were devoted almost exclusively to collections of sacred Latin music by Orlande de Lassus and by composers such as Jacob Reiner, Aichinger, Klingenstein and Holzner, who worked in Munich or Augsburg in the early 17th century. He also printed most of the works by Sebastian Ertl, including those vocal works with an added organ part or continuo. His chief contribution was the publication of the important posthumous collections of Lassus's works edited by his sons Rudolph and Ferdinand. These include otherwise unpublished masses and *Magnificat* settings and particularly the 1604 edition of motets, *Magnum opus musicum*, which was used in modern times as the basis of the edition of his complete works.

MARIE LOUISE GÖLLNER

**Henricus de Zeelandia** (*fl* 14th century). South Netherlandish theorist. Nothing is known of him except that he was the author of a short treatise, *Tractatus de cantu perfecto et imperfecto* (*CoussemakerS*, iii, pp.113–15). The treatise acts as an introduction to Johannes de Muris's famous *Libellus cantus mensurabilis* (*c*1340). It begins with a short exposé of the intervals and their classification into concords and discords, the diatessaron being named, notably, as a discord and the major and minor 3rds as imperfect concords. There follows, in much condensed form, a 'new compilation about plainchant, according to the moderns'; this includes solmization, mutation and the modes. Some remarks on discant close the treatise, setting out the customary rules on how to begin and end, choice of intervals, the necessity for contrary motion, the prohibition of *mi contra fa*, and so on. There is little explanation of any of the remarks made. Only Boethius

is referred to by name, but there is evident reliance on other authorities, particularly on Guido of Arezzo. Henricus's treatise is not important for the information it gives – for most of it is far from new or different – but it does have some value in showing what was considered essential musical knowledge for a beginner in music. It aims to introduce the student to the rules, for they, not practice, are the foundation of art.

ALBERT SEAY

**Henricus Helene** [Helayne] (*fl* 1335). French theorist. His name appears in the text of the 14th-century motet *Apollinis eclipsatur/Zodiacum signis lustrantibus/In omnem terram* (PMFC, v, 50), listed third (after Johannes de Muris and Philippe de Vitry) among the 12 most illustrious musicians of the time. He held a canonicate at Sens in 1335, but one that did not require his presence.

Henricus is the author of a short treatise, *Summula musice*, preserved in a 15th-century copy as *I-Vnm* lat.Cl.VIII,24(3434), ff.10–44. It contains an introduction and five chapters, all primarily devoted to the elements of plainchant with some speculative overtones. The principal authorities cited are Guido of Arezzo, Odo of Cluny and Berno of Reichenau, with reliance, as is to be expected, upon Aristotelian doctrine. Of particular interest is Henricus's classification of music, for he did not use the Boethian divisions of *mundana*, *humana* and *instrumentalis*, but instead presented his own tripartite scheme: *supercelestis*, *celestis* and *subcelestis*. This last category includes the two Boethian divisions *humana* and *instrumentalis*, with a secondary subdivision into *vocalis* and *instrumentalis*. The treatise is concerned solely with the former. It emphasizes the proposition that art consists of rules, since this makes the task of the artist easier.

It has been suggested that he may be identifiable with the 'Henricus' who wrote the text of the motet *Portio nature/Ida capillorum/Ante thronum* (*see* EGIDIUS DE PUSIEX).

ALBERT SEAY/R

**Henricus of** [Heinrich von] **Augsburg** (*b* *c*1000–02; *d* Füssen am Lech, Bavaria, 1083). Writer on music. He was probably born in Bavaria, and later became a canon of Augsburg Cathedral; by the middle of the 11th century he was acting as *scholasticus* in the cathedral choir school there. In 1083, as the result of a conspiracy, Henricus was expelled from Augsburg at the same time as his bishop, Wigold. He sought refuge in the monastery of St Mang in Füssen, where he died and was buried. There is insufficient evidence to confirm his identification with Honorius Augustodunensis (see Flint).

Henricus's teachings on music are assembled in a treatise entitled *De musica*. This survives only in a south German manuscript (*A-Wn* cpv 51), which has a lacuna at the end of the treatise. The work is set out in the form of a dialogue between pupil and teacher, a very popular literary technique used two centuries earlier by the author of the *Scolia enchiriadis*. The treatise consists of a summary of the *De institutione musica* of Boethius, whose five books are condensed into a few pages. He makes no use of examples from the repertory of Gregorian monody (*cantilena, melodiae*), which no doubt explains why his treatise was not very successful and survives in only one copy. Nevertheless, it is interesting that Henricus bore witness to the recent introduction of the Greek letter Γ at the beginning of the alphabetical notation.

Henricus composed the quatrain *Primus ut exurge* to aid the memorization of the rules of psalmody for mass antiphons.

MICHEL HUGLO

**Henrion, Paul** [Henri Charlemagne] (*b* Paris, 20 July 1819; *d* Paris, 24 Oct 1901). French composer. After growing up in the popular theatre, he studied the piano with Henri Karr and harmony with P.F. Moncouteau. From 1840 he won some success as a songwriter, notably with the early *Un jour*. By 1878 he had written about 1200 songs; the titles of the most popular were listed by Fétis. He also wrote quadrilles, polkas etc. for the piano. His first stage piece, *Une rencontre dans le Danube* (1854, Théâtre Lyrique) was not a great success, but he subsequently wrote a series of operettas and sketches for café-concerts, including *L'étudiant de Heidelberg* (1869), *A la bonne franquette* (1877) and *Le moulin de Javel* (1894). He became president of the Société des Auteurs et Compositeurs, which he helped to found.

DAVID CHARLTON

**Henriot-Schweitzer, Nicole** (*b* Paris, 25 Nov 1923). French pianist. She studied with Marguerite Long at the Paris Conservatoire, where she received a *premier prix* in 1938. In the same year she made her Paris début with the Pasdeloup Orchestra. In 1939 she won the Concours Fauré in Luxembourg, and after 1945 established an international career, performing throughout Europe and North and South America; she was one of the first French pianists to perform in England after the war. She taught for many years in Belgium, first at the Liège Conservatoire (1970–73) and subsequently at the Brussels Conservatory. She gave the first performance of Milhaud's *Suite concertante* and of works by Honegger, Martin and Mihalovici. She performed often with Charles Münch, who conducted her American début in 1948 with the New York PO as well as her recordings of Ravel's Concerto in G, d'Indy's *Symphonie sur un chant montagnard* and Prokofiev's Second Concerto.

CHARLES TIMBRELL

**Henriques, (Valdemar) Fini** (*b* Copenhagen, 20 Dec 1867; *d* Frederiksberg, 27 Oct 1940). Danish composer and violinist. After piano instruction from his mother and from Friedrich Hess he became a violin pupil of Valdemar Tofte and studied composition with Svendsen. Between 1888 and 1891 he attended the Hochschule für Musik in

Berlin, studying with Joachim (violin) and Bargiel (theory). On his return he was awarded the Ancker Scholarship which enabled him to undertake a trip to Germany and Austria. During the period 1892–6 he was a member of the Kongelige Kapel, after which he pursued the career of a freelance artist, chiefly as a fêted violinist. He formed his own string quartet and in 1911 founded the chamber music association Musiksamfundet, which he chaired until 1931.

He composed in a highly melodic late Romantic style; influences, for example, of Schumann's *Album für die Jugend* can be traced in Henriques' piano work *Billedbogen* ('The Picture Book', 1899), in which a number of situations from the world of children are characterized in a concise form. In the larger-scale works, such as the music for the melodrama *Vølund smed* ('Wayland the Smith', 1896) and the ballet music *Den lille havfrue* ('The Little Mermaid', 1909), influences of Wagner and Tchaikovsky are often perceptible in music of otherwise Nordic colouring, with hints of Grieg and Svendsen.

WORKS
(*selective list*)

Stage: Vølund smed [Wayland the Smith] (incid music, Drachmann), 1896; Canta (incid music, C. Ewald), 1900; Prinsessen og det halve kongerige [The Princess and Half the Kingdom] (incid music, Drachmann), 1905; Den lille havfrue [The Little Mermaid) (ballet, after H.C. Andersen), 1909; Spejlet [The Mirror] (op, T. Barford), 1923; Staerstikkeren [The Cataract Surgeon] (op, Norman-Hansen), 1926; Vølund smed [Wayland the Smith] (op, after Drachmann), 1939–40

Orch: Børne-Symfoni [Children's Sym.], 1881; Paryk-Symfoni [Wig Sym.], 1888; Romance, G, op.12, vn, str, 1893; Suite, F, op.13, ob, str, 1894; Sym., C, 1896; Kong Volmer [King Volmer], legend, 1898; H.C. Andersen Fest-Ouverture, 1905; Andante and Fugue, str, 1910; Nordisk koncertouverture, 1939

Chbr: Str Qt, E♭, 1889; Sonata, g, op.10, vn, pf, 1893; Kleine bunte Reihe, op.20, vn, pf, 1899; Børnetrio [Children's Trio], op.31, pf trio, 1904; Str Qt, a, 1910; Chbr Duets, op.50a, 2 vn, pf, 1912; Chbr Qt, fl, vn, vc, pf, 1937

Pf: Aphorisms, op.6a, 1876; 6 Pf Pieces, op.1, 1888; Thème original avec variations, op.7, 1892; Lyrik: 5 klaverstykker, op.11, 1893; Erotik: 5 klaverstykker, op.15, 1896; Suite I–II, op.19, 1898; Billedbogen [The Picture Book], 1899; Miniature-Aquareller, op.21, 1900; Karakterstykker, op.28, 1905; Børne-Lyrik [Children's Lyrics], op.30, 1908; Lyrisk Suite, op.34, 1909; Melodiske profiler, op.38, 1911; Melodisk Album, op.50, *c*1912

Songs (1v, pf): 3 Songs, op.2, 1889; Ved vuggen [At the Cradle], 4 songs, op.3, 1889; 4 Songs, op.6b, 1890; 5 Songs, op.8, 1892; 4 Songs, op.9, 1892; Digte af Aage Matthison-Hansen, 1894; Det døende barn [The Dying Child], 1899; 4 Songs, op.23, 1900; Børnesange [Children's Songs], op.29, 1907; Stille Sange [Silent Songs], op.33, 1909; Romantiske Sange, op.37, 1912; To maa man vaere, om livet skal lykkes [There have to be two if life is to be successful], 1920

CLAUS RØLLUM-LARSEN

**Héritte, Louise.** French singer and composer, daughter of PAULINE VIARDOT.

**Henry VIII,** King of England (*b* Greenwich, 28 June 1491; ruled 1509–47; *d* Windsor, 28 Jan 1547). English ruler and patron of music. The younger son of Henry VII, he was originally intended for the Church, and his education included instruction in music. His interest and ability in the art are amply confirmed by contemporary accounts, and when he ascended the throne in 1509 (his elder brother Arthur having died in 1502) music occupied a prominent place in life at court. It played a part in ceremonies of all kinds: meetings of heads of state, processions, banquets, tournaments and so on. Thus, at his coronation banquet 'there was a stage on which there were some boys, some of whom sang, and others played the flute, rebeck and harpsichord' (Nicolò Sagudino).

During the first half of Henry's reign the leading court musician was William Cornysh, Master of the Children of the Chapel Royal. Cornysh was in charge of the music and elaborate pageantry at the Field of the Cloth of Gold in 1520, and he devised many plays, disguisings, interludes and similar 'revels' (the generic name for such court entertainments), which combined speech, song, dancing and scenic effects.

The importance of music in court life is also reflected in the vast increase in the number of musicians employed. Edward IV had only five permanent instrumentalists; by 1547 Henry had gathered together about 58 musicians. The names of many of these, and their instruments, are known from court records: eight viols, including Hans Hosenet, Fraunces de Venice, Marke Anthony Galyardo and Ambrose Lupo; seven sackbuts, including Robert May and Mark Anthony Petalo; seven flutes, including Thomas Pagington and Piero Guye; two lutes, Peter and Philip Van Wilder; John Heywood the virginalist; John de Severnacke, a rebec player; four or five musicians of the Bassano family, and so on. The names of these and many others occur in the accounts printed in Lafontaine and Rimbault. The large number of foreign, and in many instances Jewish, musicians employed is significant. Philip Van Wilder was also keeper of the instruments to Henry VIII. An inventory of Henry's huge collection of instruments, compiled in 1547 after his death, survives in *GB-Lbl* Harl.1419.

There are many contemporary accounts of Henry's enjoyment of music-making (see illustration). In July 1517 he listened for four hours on end to the organ playing of Dionisio Memo, organist of S Marco, Venice.

*Henry VIII with a harp, portrayed as King David, with his fool Will Sommers: miniature from a Latin psalter copied for the king by John Mallard (GB-Lbl Roy.2.A.XVI, f.63v); the miniature precedes Psalm xiv, 'The fool hath said in his heart, there is no God'*

In May of the same year he made the court listen 'to a lad who played upon the lute, better than ever was heard, to the amazement of his Majesty, who never wearies of him' (Sagudino). Henry himself is known to have played the organ, lute and virginals. On one occasion in 1513 he 'sang and played on the gitteron-pipe [flauto de cythara], and the lute-pipe [lira de' flauti] and on the "cornet" [corno], and he danced' (*Calendar of State Papers and Manuscripts relating to English Affairs*, ed. R. Brown, ii, London, 1864/*R*, no.328). *The Life of Sir Peter Carew* (in *Archeologica*, xxviii, 1840, p.113) mentions that the king was 'much delighted to sing' and that he often sang with Carew 'certain songs they called *fremen* songs, as namely "By the bank as I lay" and "As I walked the wood so wild" &c.'.

According to Edward Halle, in 1510 Henry set two masses in five parts, 'whiche were song oftentimes in hys chapel, and afterwardes in diverse other places'. These are lost, and the only surviving sacred piece is the three-part motet *Quam pulchra es*, in the Baldwin manuscript (*Lbl* Roy.24.d.2). Nearly all the other extant pieces by him are in the 'Henry VIII Manuscript' (*Lbl* Add.31922), compiled in about 1518. The name does not signify that the manuscript actually belonged to Henry but merely refers to the presence in it of many pieces by him, all headed 'the Kynge H. viij'. There are also works by Cornysh, Cowper, Farthing, Lloyd, Fayrfax and others, as well as some by continental composers (e.g. Isaac, Hayne van Ghizeghem, Barbireau, Compère).

Several of Henry's pieces have connections with continental music, but the extent to which he borrowed from continental composers has been exaggerated. The only demonstrable case of borrowing is *Gentil prince de renom*, where three of the parts are from Petrucci's *Harmonice musices Odhecaton A* (1501), Henry's only contribution being the extremely weak contratenor part. The discantus of *Helas madam* is based on a continental melody, and *En vray amoure* uses a melody found in Compère and elsewhere, but in both cases the other parts appear to be by Henry, and reveal the characteristics and limitations of his technique. *Adew madam* exists in a slightly improved version as *Time to pas*. Apart from faults such as consecutives and ill-considered doubling of the 3rd (especially in the contratenor), a notable feature of Henry's style is his reliance on passages in parallel 6ths. The four-part pieces with French texts probably date from when he was as young as ten (see Fallows). Their survival is no doubt due more to the celebrity of the composer than to their musical merits. However, the same cannot be said for some of the English pieces, such as *Pastyme with good companye* (the melody of which is found in Richafort's *De mon triste et desplaisir* and could have been borrowed by Richafort rather than the other way round), *Alac alac what shall I do* and *Grene growith the holy*. These songs, robust or plaintive as the case may be, have a memorable beauty all their own.

The same manuscript contains 13 untexted pieces by Henry, in three or four parts; all but one are short and untitled. The exception is the fine *Taunder naken*, which uses a popular continental melody in its middle part and is his longest secular composition.

WORKS
*in GB-Lbl*

Editions: *Songs, Ballads and Instrumental Pieces Composed by King Henry the Eighth*, ed. Lady Mary Trefusis (Oxford, 1912) [contains all vocal music]

*Music at the Court of Henry VIII*, ed. J. Stevens, MB, xviii (London, 1962) [contains all secular vocal and untexted ensemble music]

TEXTED

Quam pulchra es, 3vv

Adew madam et ma mastres, 4vv; Alac alac what shall I do, 3vv; Alas what shall I do for love, 4vv; De mon triste [deplaisir] [= Pastyme with good companye]; Departure is my chef payne, 4vv; En vray amoure, 4vv; Gentil prince de renom, 4vv; Grene growith the holy, 3vv; Helas madam, 4vv; If love now reynyd, 3vv; It is to me a ryght gret joy, 3vv

Lusti yough shuld us ensue, 4vv; O my hart and O my hart, 3vv; Pastyme with good companye, 3vv; The tyme of youthe is to be spent, 3vv; Though sum saith that yough rulyth me, 3vv; Thow that men do call it dotage, 3vv; Time to pas, 3vv (version of Adew madam et ma mastres); Wherto shuld I expresse, 3vv; Whoso that wyll all feattes optayne, 3vv; Whoso that wyll for grace sew, 3vv; Withowt dyscord and bothe accorde, 3vv

DAVID GREER

**Henry, Didier** (*b* Paris, 24 May 1953). French baritone. He studied at the Paris Conservatoire and the School of the Grand Opéra, and won competitions in Paris in 1978 and Athens in 1981. He subsequently joined the company at Lyons, where he sang Marcello in *La bohème*. At the Massenet festivals in St Etienne he has sung in revivals of *Amadis* (1988), *Cléopâtre* and *Grisélidis*. In 1990 he sang the title role in Thomas's *Hamlet* at Metz, then sang Pelléas in the first performance in Russia of Debussy's *Pelléas et Mélisande* in Moscow, conducted by Manuel Rosenthal. Henry's repertory also includes Orestes in *Yevgeny Onegin*, *Iphigénie en Tauride* (which he sang at La Scala in 1991), Blondel in Grétry's *Richard Coeur-de-lion*, Albert in *Werther*, Lescaut in *Manon Lescaut*, Valentin in *Faust* and three roles in *The Love for Three Oranges*, which he has recorded under Kent Nagano. Among his other operatic recordings are *Pelléas et Mélisande* and *L'enfant et les sortilèges*, both with Dutoit, *Amadis* and Mascagni's *Il piccolo Marat*. He is also an admired recitalist, and has recorded *mélodies* by Poulenc.

PATRICK O'CONNOR

**Henry, Jehan** [le jeune] (*b* Paris, 26 Aug 1560; *d* Paris, 6 Jan 1635). French instrumentalist and composer. The son of Jehan Henry *l'aîné*, 'maître joueur d'instruments', he served as a 'violon de la chambre du roi' and as an 'hautbois de la petite écurie' during the reigns of Henri IV

and Louis XIII. Eight of his instrumental works were printed by Mersenne in his *Harmonie universelle* (Paris, 1636–7). His brother Michel Henry (1554–1635), also a 'violon de la chambre du roi', is chiefly known for a manuscript description he prepared of ballets performed at court between 1580 and 1620.

ALBERT COHEN

**Henry, Joseph** (*b* Mirecourt, 10 Dec 1823; *d* Paris, 19 July 1870). French bowmaker. He is believed to have gone to Paris at an early age and to have been first employed by Chanot. He was in partnership with the great bowmaker Pierre Simon for a few years. They were located at 179 rue St Honoré when they won a silver medal in 1851 at the Great Exhibition in London. By 1857 Henry was on his own at 8 rue des Vieux Augustins; he moved to 14 rue Jussienne in 1867, where he remained until his death at the age of 46. His branded bows may have, curiously, one of at least five brand-stamps of HENRY A PARIS, found on the handle or, rarely, under the lapping. He also made bows for the firm of Gand Frères.

Henry's bows enjoy a justly deserved reputation for their fine playing qualities. His selections of pernambuco, though mostly plain, were consistently well chosen. He seems to have made a good number of bows with premium mountings – frogs of tortoiseshell and silver or gold, or frogs of ebony and gold. Henry is believed to have had some professional contact with Dominique Peccatte and indeed his most esteemed bows resemble those of that celebrated maker.

PAUL CHILDS

**Henry, Michel.** French musician, brother of JEHAN HENRY.

**Henry, Pierre** (*b* Paris, 9 Dec 1927). French composer. He studied at the Paris Conservatoire (1938–48) with Nadia Boulanger (piano), Félix Passerone (percussion) and Messiaen, among others. From the age of 15 he experimented with sounds made with diverse objects – he has described these investigations as 'true concerts of noises' – and was fascinated by the possibilities of integrating noise into music. In 1949 he joined the RTF *musique concrète* studio, which had been founded by Schaeffer in 1943. The first formally educated musician to involve himself deeply with electronic techniques, he was to devote all of his energy to the medium. He headed the Groupe de Recherche de Musique Concrète from 1950 to 1958.

Henry's collaboration with Schaeffer resulted in the composition of the *Symphonie pour un homme seul* (1950). With this 12-movement work, a symphony in the etymological sense of 'sounding together', they aimed to create a composition using only the sounds of the human body. Henry went on to compose some of the first major works of *musique concrète*. The breadth and sophistication of his technique is evident in *Le microphone bien tempéré* (1950–52), the ten sections of which range from surrealist effects to more systematic treatments. Here his source materials were various percussion instruments and a prepared piano; the same techniques were used in *Musique sans titre* (1951), *Concerto des ambiguités* (1951) and *Orphée 53* (1953), the first *musique concrète* composed for the stage (Donaueschingen Festival, 1953) from which the dramatic cantata *Le voile d'Orphée* (1953) was extracted.

A collaboration between Henry and choreographer Maurice Béjart began in 1954 with the *Concerto des ambiguités* and continued most notably with *Haut-Voltage* (1956), *Le voyage* (1962), *La reine verte* (1963), *Variations pour une porte et un soupir* (1963), *Messe pour le temps présent* (1967) and *Nijinsky, clown de Dieu* (1971). In addition to these ballets, Henry provided music for more than 30 films and for numerous plays, including works by Arthur Adamov, Peter Ustinov and Georges Michel.

In 1958 Henry left the RTF studios; two years later, together with Jean Baronnet, he founded the Apsone-Cabasse Studio, the first private electronic workshop in France. It was at this time that he began to combine the techniques of the Paris *musique concrète* group with the purely synthetic electronic techniques that had been developed in Cologne and elsewhere. The first results of this synthesis were *Coexistence* (1958) and *Investigations* (1959). *La noire à soixante* (1961), in which purely electronic and *concrets* elements intrude into 1415 strokes of a metronome running at 60 to the minute (hence the title), was later combined with a contemporary piece to form a totally new work, *La noire à soixante + Granulométrie* (1967).

A certain consciousness of a world beyond, of an existence after death, led Henry's work in a meditative and spiritual direction. In *L'apocalypse de Jean* (1968), he recorded biblical text read by a single narrator, and then used superimposition to create an enormous polyphonic density sustained by a rich variety of harmonic links, provided principally by synthesized material. Despite its layering of text, the work preserves the intelligibility of the words. In contrast to this vast fresco, *Mouvement, rythme, étude* (1970) is sober and functional in style; *Mise en musique du corticalart* (1971), an experiment in Roger Lafosse's 'corticalart' (cortext art), aimed to transform brainwaves into sound and light projections. *Futuristie* (1975), written as a tribute to Russolo and above all to *musique concrète*, was followed by: *Parcours-Cosmogonie* (1976), a retrospective of his own works since 1950; *Dieu* (1977), a gigantic one-man show based on Victor Hugo's unfinished work; *Noces chymiques* (1980), a large-scale dramatic work; and *Pierres réfléchies* (1982), after the poet Roger Caillois. Later, in *Le livre des morts égyptien* (1987–90), he treated piano sound with 4X IRCAM software.

In 1982 Henry opened his new Son/Ré studio. Many of the works composed here were *Hörspiele* commissioned by the Cologne Radio studios of Westdeutscher Rundfunk. For Radio-France he devised the radio series *Maldoror/Feuilleton* (1993) from the famous work by Lautréamont, and *Notations sur La Fontaine* (1995). He also wrote music for Dziga Vertov's silent film *L'homme à la camera* (1993). *Intérier/extérieur* (1996) took the form of a ritual to be celebrated at Henry's home, where the public could become familiar with his artistic environment and his sources of inspiration. His large-scale fresco *Une histoire naturelle ou Les roues de la terre* (1997) was followed by a 'remix' of his *Dixième symphonie de*

*Beethoven* (1979–88), which he described as a new and radical discourse in sound introducing the composer to contemporary society. *Les sept péchés capitaux* (1998) was given its première at the Futura festival in Crest (France). In addition he composed some 15 ballet scores, most of them for Béjart but also for George Balanchine, Merce Cunningham and others, and collaborated with plastic artists including Yves Klein, Jean Degottex, Georges Mathieu, Nicolas Schöffer and Thierry Vincens.

Michel Chion has compared Henry's huge catalogue (over 150 works) to the torrential output of Victor Hugo, from whom Henry borrowed several thousand lines of verse of *Dieu* and to whom he dedicated his *Hugosymphonie* (1985). According to Chion, Henry's outstanding qualites are 'fecundity, forcefulness and a wide-ranging palette, an impeccable and sumptuous technique and a taste for excess and the bold mingling of the grotesque and the sublime'. The length of his works at first seems forbidding, they need time and space to unfold and reveal their secrets; he has written few short or medium-length pieces. Profusion and rough-hewn excess combined with energy, staying power and imagination place his works among the strongest and most authentic in the electro-acoustic repertory.

FRANCIS DHOMONT

**Henschel,** Sir **(Isidor) George** [Georg] (*b* Breslau [now Wrocław, Poland], 18 Feb 1850; *d* Aviemore, Scotland, 10 Sept 1934). English conductor, baritone and composer of German birth. In 1862 he made his début as a pianist in Berlin and in 1866 as a bass in Hirschberg. His teachers at the Leipzig Conservatory (1867–70) included Moscheles (piano), Reinecke and Richter (theory) and Franz Götze (singing). While in Leipzig he sang Hans Sachs in a concert performance of *Die Meistersinger*. After further composition and vocal studies in Berlin, in 1875 he sang in a *St Matthew Passion* under Brahms, with whom he became closely acquainted. Two years later he moved to England, where he met his future wife, the American soprano Lillian Bailey. While in Boston before their wedding, they performed several recitals and appeared as Mephistopheles and Gretchen in B.J. Lang's performance of Berlioz's *La damnation de Faust* (1880). In March 1881, Henschel conducted the Harvard Musical Association orchestra in an overture of his own composition, and his conducting attracted considerable attention. Henry Lee Higginson, who wished to establish a permanent symphony orchestra for Boston and was looking for a conductor, engaged Henschel immediately. There was some criticism of the selection at first, partly because Henschel's appointment was deemed a slight to local conductors and partly because his multiple talents aroused suspicion as to his competence in any one area, but he came to be regarded as a fine musician, if not a stern drillmaster; he also established the orchestra's score library. At Higginson's suggestion, his first season included all the Beethoven symphonies played in chronological order; the Ninth was performed at the last concert of the season with a volunteer chorus of subscribers and others. Henschel worked hard to promote the music of his friend Brahms, who was regarded by the Boston public and critics as a difficult and unrewarding composer. He also supported local composers, and conducted the first performance of Chadwick's *Thalia* and the scherzo of his then unfinished Second Symphony.

After three seasons in Boston, Henschel moved to England, though he returned to Boston as a singer and conductor on several occasions. These included a performance by the Boston Cecilia Society of his *Missa pro defunctis*, composed in memory of his wife, in which he and his daughter Helen took the leading vocal parts, and a concert in 1930 by the Boston SO, which, for the opening of the orchestra's 50th season, re-created Henschel's first programme.

Henschel composed three works for the stage. Nothing seems to have come of his first opera, *Friedrich der Schöne*; in May and June 1884 he composed a comic opera, *The Sea-Change, or Love's Stowaway*, conceived in the style of Gilbert and Sullivan, although this work had to wait until 1929 for a broadcast performance. Henschel's serious three-act opera, *Nubia*, was composed in 1898–9 to a libretto by Max Kalbeck, based on a novel by Richard Voss. Most of the critics described it as 'aristocratic music' that remained uninvolved with the drama; there were also complaints of thinness and lack of variety in the scoring. Henschel's other compositions include a number of sacred choral works, about 20 piano pieces, and many songs and duets. Besides his book of memoirs, he published *Personal Recollections of Johannes Brahms* (1907) and *Articulation in Singing* (1926).

STEVEN LEDBETTER

**Henschel, Jane** (*b* Wisconsin, 2 March 1952). American mezzo-soprano. She studied with Ruth Michaelis and Nina Hinson at the University of South California, and started her career in concert and oratorio. In 1978 she joined the opera company at Aachen, moving to Wuppertal in 1981 and Dortmund in 1983. In these years she built up a large repertory, including the major mezzo roles in Verdi and Wagner. Her international career gained momentum in 1992 when she made an impressive début at Covent Garden as the Nurse in *Die Frau ohne Schatten*: the review in *Opera* reported that she was 'the controlling presence whenever she was on stage'. In the following years she reappeared as Waltraute and as Fricka, a role she sang also in the *Ring* at La Scala. Henschel has been closely associated with 20th-century operas such as *Erwartung* (which she has sung in New Zealand), *The Rake's Progress* (Glyndebourne and Boston) and *Punch and Judy* (Amsterdam). One of the most adaptable of singers, with an extensive repertory outside opera, she has been in steady demand throughout Europe and the USA and more recently in Japan. Her recordings include Mahler's Eighth Symphony and a vibrant, richly characterized portrayal of Baba the Turk in *The Rake's Progress* conducted by Ozawa.

J.B. STEANE

**Hensel, Fanny.** *See* MENDELSSOHN, FANNY.

**Hensel, Heinrich** (*b* Neustadt, 29 Oct 1874; *d* Hamburg, 23 Feb 1935). German tenor. He studied in Vienna and Frankfurt and made his début at Freiburg in 1897, remaining a member of the ensemble there until 1900. After engagements at Frankfurt, where he created the Prince in Humperdinck's *Dornröschen* (1902), and Wiesbaden, he became the leading Heldentenor at the Hamburg Opera (1912–29). He was chosen by Siegfried Wagner to create the tenor lead in *Banadietrich* (1910, Karlsruhe) and to sing Parsifal at Bayreuth, where he also sang Loge (1911–12). During the 1911–12 season he visited the USA, singing Siegmund, Siegfried and Lohengrin at the Metropolitan and Siegmund in Chicago. He appeared at Covent Garden from 1911 to 1914 in the Wagner repertory and sang Parsifal in the first staged London production in 1914. His lyrical style is preserved in a number of acoustic recordings of Wagner.

HAROLD ROSENTHAL/ALAN BLYTH

**Henselt, (Georg Martin) Adolf (von)** (*b* Schwabach, Bavaria, 9 May 1814; *d* Bad Warmbrunn, Silesia [now Cieplice Śląskie-Zdrój, Poland], 10 Oct 1889). German composer and pianist. His father was a cotton manufacturer in Schwabach; the family (with six children) moved to Munich in 1817. Henselt and an elder sister began musical studies at an early age, the boy in the first instance with the violin, then the piano, on which he progressed rapidly. From the first, he was attracted to the music of Weber.

In 1826, Henselt undertook advanced tuition with Frau Geheimratin von Fladt, who like Weber and Meyerbeer had been a pupil of Abbé Vogler. Von Fladt helped Henselt secure support from King Ludwig I which enabled him to study with J.N. Hummel in Weimar, where he spent over six months in 1832. On 29 November of that year, he made his official public début in Munich, which won enthusiastic praise. He then studied with Simon Schechter in Vienna until 1834, followed by two years' seclusion in that city, during which period he developed his art and his unique contribution to piano technique. The intensity of his regime brought about severe overstrain and in May 1836 he went to Carlsbad (now Karlovy Våry) to recuperate. According to La Mara, he met Chopin there, although there is no evidence that he heard him play. Henselt revisited Hummel later that year, staying in Weimar for some months, where he became enamoured of Rosalie Vogel (née Mangen), wife of a physician to Duke Carl August and friend of Goethe. She was divorced (her husband taking custody of the four children) and Henselt married her on 24 October 1837, at Bad Salzbrunn, Silesia (now Szczawno-Zdrój, Poland). Adolf and Rosalie Henselt had one son, Alexander (1839–78).

The fruits of Henselt's labours, allied to the euphoria occasioned by domestic bliss, are the 24 Studies op.2 and 5, dating from 1837–8. Each of the op.2 set is prefaced by a short epithet in French; all except two of the op.5 set have German titles. Expressively beautiful and charged with passion, they show at times an apparent debt to Chopin's studies written a few years earlier, which many approach in quality of content. But the sentiment is essentially German, with thematic and rhythmic patterns related to folksong, offset by striking closes on degrees of the scale remote from the tonic. The studies display Henselt's extraordinary ability to stretch his hands. According to La Mara, Henselt, with short fingers and a small hand, could play the chord C-E-G-C-F, unarpeggiated, in the left hand, mirrored in the right by B-E-A-C-E, indicating spans of an 11th (possibly this was on earlier 19th-century pianos with slightly narrower keys than later models). The inspiration for this particular skill was probably Weber who, with long fingers, could reach a 10th. This opened to Henselt a range of piano effects, which first appear in the Chopinesque *Variations de Concert* on a melody from Donizetti's *L'elisir d'amore* op.1 and become fully developed in the ensuing studies. To appreciate this advance in coverage of the keyboard, for example with regard to arpeggios, a comparison may be made between the central sections of Chopin's Study in E minor op.25 no.5 and Henselt's Study in F minor op.5 no.10, where the wider arpeggios extend for a 10th from the thumb to the fifth finger, the sonority enriched by a variety of added notes which demand absolute equality of strength of the weaker fingers. The process, also found in the fine duo for horn or viola and piano op.14 (1842), reaches its ultimate stage near the end of the slow movement of Henselt's Piano Concerto op.16.

Henselt's output of original music, the studies apart, was small and nearly all confined to the piano. The first published work, the juvenile *Six thêmes avec variations de Nic. Paganini*, appeared in 1830 and is of little interest. It was followed by the *Rondoletto* of 1832 (not published

until 1865) and the *Chant du printemps* of 1833 (published in 1883), both of which show a distinct individuality of melodic shape from which many of Henselt's characteristic themes were to spring. Most of Henselt's subsequent works are identified by opus numbers. Starting with the Donizetti Variations op.1, their chronology follows the years until op.40, reached in 1868. At least 30 publishing houses, including five in Russia, issued his works over a period of more than half a century. When Gutheil began publishing, the firm introduced its own numbering system for some works already published by other firms. Its own first publications covered from op.41 to op.52, mostly transcriptions of other composers' music. A number of Henselt's late works lack opus numbers, and dating can raise problems since his style changed little and he often sent incipits, handwritten and dated, to friends of works written years earlier. From this sporadically created body of works, mostly small-scale salon pieces, many of much charm, interspersed with transcriptions from Weber operas and Russian romances, certain miniatures stand out as of special interest. For example, the two nocturnes op.6 (1839) are perfect specimens of Henselt's art at his best; no.1, *Schmerz im Glück*, is full of interesting partwriting, and no.2, *La fontaine*, is of such charm that it was shamelessly plundered by the Russian publisher F.T. Stellovsky and issued as a song by A. Gurilov (1803–55) to words by Pushkin; later, Gutheil reissued it after acquiring Stellovsky's business (Asaf'yev, presumably ignorant of its true provenance, used it in a ballet suggested by Pushkin's poem, acknowledging a debt only to Gurilov). It is through the studies that Henselt took Germany by storm in those hectic years, surpassing in the view of critics the achievements of Thalberg and even (in Schumann's opinion) Liszt. Henselt's friendship with Schumann and Clara Wieck developed before their marriage and is the first of several he established across Europe and Russia when the latter country was heavily dependent on the West for furthering its musical life. One may regret that the early effusion of Studies in Germany was not continued in Russia, due to Henselt's preoccupation with teaching. The only large scale works were the Piano Concerto op.16 (published in 1847), the Variations for piano and orchestra on a melody from Meyerbeer's *Robert le diable* op.11 (1840), the very worthy Piano Trio op.24 (1851) and, in 1854, Henselt's large-scale work for piano solo, the *Ballade* op.31, which appeared in three versions. Its difficulties are comparable to those of the studies but are of a different nature. The work is notable for the grace and beauty of its melodies and deserves to be well known through concert performances.

Early in 1838, Henselt arrived in St Petersburg, playing at Count Mikhail Vielgorsky's house on 16 March, and earning boundless praise from the critic Prince V.F. Odoevsky. His first public concert was on 21 March; it was clear that the time of Hummelian pianism was past and that a new era of Romanticism was at hand.

The impression created by Henselt's playing, of a brilliance and artistry new to Russia (Liszt had not yet arrived) led swiftly to an appointment at the School of Jurisprudence, which Henselt held until 1848. One of his first pupils was Vladimir Stasov, with whom he established a warm friendship. In 1841, Henselt was also asked to teach at the new institute of Teresa Oldenburg, wife of the Prince, some of whose compositions were edited by Henselt and published. By this time he was firmly entrenched in pedagogical activities and coming to know increasing numbers of musicians, in Russia and abroad. The first of consequence was Glinka, two of whose songs Henselt arranged for piano soon after their publication. In 1842, Liszt first visited St Petersburg followed by a second visit in 1843; he and Henselt developed a warm and enduring friendship, through meetings and correspondence. In February 1844, Henselt renewed contact with Robert and Clara Schumann, who were visiting St Petersburg for the first time. Clara Schumann's diaries show that he was pre-occupied with teaching to the exclusion of composition of major works, other than the massive Piano Concerto op.16, on which he had long been working.

In the early 1850s, Henselt, a reluctant recitalist because of his nervous temperament, embarked on a concert tour of France and Germany, also (in 1852) going to England for a charity performance in Torquay, combined with a visit to London to see the 82-year-old J.B. Cramer, a composer he had venerated (and to 50 of whose 84 studies he had added second piano parts). He was to revisit England in 1864. On his return to Russia, Henselt played in Kiev, Odessa and Kharkov early in 1853; thereafter he appeared in public very infrequently. This further withdrawal from recital work may have been prompted by the emergence of Leschetizky and Anton Rubinstein in St Petersburg as pianists of high calibre. Another factor was his growing involvement with teaching establishments. In May 1858, by royal command, he was appointed official observer for the teaching of young ladies of noble birth at the Pavlovsky Institute; he also had a longstanding engagement with the Smolny Institute.

From this appointment arose, as an aid to teaching, the editing by Henselt of numerous works by at least 40 composers, mostly from West Europe. Sometimes, as with certain Chopin works, the original was embellished with additional ornamentation. Second piano parts were added to a number of works by Beethoven, Chopin, Clementi, Hummel, Weber and others, and there were preparatory exercises and the editing of other composers' piano methods. The labour in this editorial work was great and helps explain the paucity of original compositions. Much of Henselt's time in this work was given gratuitously, and this was recognized in March 1861 when he was ennobled and awarded the Order of St Vladimir, 4th class, granted Russian citizenship and given a patronymic (Lvovich). Also, from February 1861 his duties were extended to cover a number of teaching establishments in Moscow. The St Petersburg Conservatory opened in 1862; Henselt, along with Prince Oldenburg, Stasov and others, were among those hostile to the creation of an institution that they feared would encourage mediocrity. Not until 25 years later, in 1887, did Henselt teach there, when the Conservatory found itself in financial difficulties.

In 1872–4, Henselt served as editor of the musical periodical *Nuvellist*, in which he published his arrangement for piano of a song by Tchaikovsky (op.38 no.2); Tchaikovsky did not hold Henselt in high esteem but was nevertheless indebted to him, as we know from his letters. In 1879, Henselt assisted in securing a position in a Moscow music institute for Tchaikovsky's wife; another traced contact between Tchaikovsky and Henselt was in 1888, when Tchaikovsky wrote a letter of recommendation to Henselt on behalf of a pupil, Alexandra Levenson

(whose recollections of Henselt were published in the Russkaya Musïkal'naya Gazet, 27 August 1914).

Henselt occupied himself with pedagogical activities almost to the end of his life, venerated by all. The 50th anniversary of the start of his career in Russia was marked, on 21 March 1888, by a celebration at the St Petersburg Conservatory, with tributes from Anton Rubinstein and Vladimir Stasov, with further plaudits from the teaching staff of the Moscow Conservatory; the Nationalist composers were apparently not represented. Henselt had, however, met Balakirev in 1879, and a sympathetic relationship developed. Henselt's influence on Russian piano writing from Balakirev onwards was considerable. According to Glyantseva-Zenzerova, Balakirev was early on attracted to Henselt's op.2 studies and features of the study in D♭, can be seen in the writing for the left hand in Balakirev's *Grande Fantaisie sur airs nationales Russes* (1852) and in the chromatic alterations. Another clear influence was the slow movement of Henselt's F minor Piano Concerto (also in D♭), with its left-hand arpeggios and descending double-note runs in the right hand: Balakirev paid tribute to it in his *Au Jardin*, subtitled 'Idylle-Etude' (1888), dedicated to Henselt on the 50th anniversary of Henselt's arrival in St Petersburg. The piece is also indebted to Henselt's *La gondola* (1841), written for the *Méthod des Méthodes des Pianistes* of Moscheles and Fétis (Paris, 1840?). The four-staff writing in the central section of Henselt's slow movement is a clear forerunner of the C♯ minor Prelude op.3. no.2 of Rachmaninoff, who inherited the idea through his teacher, Sverev, himself a pupil of Henselt. Mention should also be made of the flavour of Russian folksong, sometimes to be found in Henselt's compositions after his arrival in Russia, for example in Impromptu no.3 in B♭ minor op.34 (1854–5), which is close to a folksong noted by Dargomïzhsky at much the same time and later used by Balakirev in the last movement of his Piano Sonata (1905). Balakirev wrote to Stasov, on 1/13 June 1887, two years before Henselt's death in Silesia: 'I will be terribly sad when [Henselt] ceases to be. He will go to the grave as the last representative of that noble Pleiades to which Chopin, Liszt and Schumann belonged'.

WORKS

*some opus numbers used more than once*

VOCAL

Der Dombau, unacc. vv (Leipzig, 1840)
Das Ferne Land, 1v, pf (London, 1843/7)
Morgenständchen, unacc. vv, op.39 (Leipzig, 1866/7)

ORCHESTRAL AND CHAMBER

Variations on 'Quand je quittai la Normandie' from Meyerbeer's Robert le Diable, pf, orch, op.11 (London and Leipzig, 1840)
Duo, (vc, pf)/(vn, hn), op.14 (Vienna, 1842)
Piano Concerto, f, op.16 (Leipzig, 1847)
Piano Trio, a, op.24 (Hamburg, 1851)

RICHARD BEATTIE DAVIS

**Henstridge, Daniel** (*b c*1650; *d* Canterbury, 1 June 1736). English cathedral musician, copyist and composer. First recorded as a chorister at New College, Oxford, under William King, 1662–6, he was appointed organist at the cathedrals of Gloucester (1666), Rochester (1674) and Canterbury (1698). Alongside John and William Gostling, he was instrumental in the founding of Canterbury's earliest music society and concert series; parts to Purcell's 1683 and 1692 St Cecilia's Day odes in Henstridge's writing from the 1700s are preserved in *GB-Lbl* Add.33240 and *Ob* Tenbury 1309. Apparently in response to failing eyesight, in 1718 he relinquished the duties of Master of the Choristers at Canterbury to his assistant, William Raylton, and remained organist in title only until his death in 1736. He married in 1669 and had four children. His son James (*c*1675–1745) was educated in Rochester's Choir and School and, after briefly being organist at Dulwich College, became a minor canon at Canterbury.

During his years at Rochester Henstridge was deeply involved with London musical life and musicians. His copying and composition of secular songs during this time, the evidence that he was music teacher to the Filmer family of East Sutton, Kent, and to that of Sir Vere Vane of Meresworth, and his possession of autographs by Purcell, Blow and others, suggest that he was accepted in spheres beyond the cathedral. He was an important collector, copyist and preserver of music; *GB-Lbl* Add.30931–3, 31403 and numerous other scores passed from him to William Raylton, and thence to William Flackton. Other important manuscripts include the Gloucester Cathedral choirbooks, the Rochester fragment in the Filmer Collection (*US-NH*) and the 'Finney Manuscript' (*US-LAuc*). Henstridge's role in taking the repertories of Gloucester and London to Rochester (his are the only copies of the Purcell setting of *The Lord is King*, ZN69), and then all of these to Canterbury can be demonstrated from the surviving sources.

His own early anthems at Gloucester, or in the manuscript addition to the Hereford copies of John Barnard's *The First Book of Selected Church Musick* (*GB-Och*) (reconstructed in Cheverton), show an up-to-date verse style for the 1660s not yet dependent on the new French or Italian models, but rather on the secular declamatory styles of the preceding decade. The *Te deum* and *Jubilate* of his Service in D minor, replete with canons and counterpoint, probably date from the early Rochester years, with the other portions of the service following some time later. The majority of the remaining anthems were written in the 25 years at Rochester and show various degrees of embracing the 'Chapel Royal' style of his London acquaintances. The solo setting of *O come hither and hearken* is a good example of Henstridge's evocation of more modern trends. The full anthems from the Rochester and Canterbury periods, including the much-revised version of the earlier *Behold how good and joyful*, are satisfying. His two sacred songs include the three-movement setting of Bishop John Croft's *Thou God the Father*, previously set by Henry Lawes.

ROBERT FORD

**Hentoff, Nat(han Irving)** (*b* Boston, 10 June 1925). American writer on jazz. He studied at Northeastern University (BA 1945) and Harvard University (1946) while working for radio station WMEX in Boston (1944–53). He wrote biographical profiles and social commentaries for *Down Beat* in the 1950s and for his book *The Jazz Life* (1961). During his years as associate editor of *Down Beat* (1953–7), he drew attention to the black American musicians who created jazz and, with Nat Shapiro, published *Hear me Talkin' to ya* (1955), the first history of jazz to be related by the musicians themselves. He was co-editor of the *Jazz Review* (1958–61) and the anthology *Jazz* (1959). From 1960 he has concentrated on writing about general social and political issues, especially civil liberties, but he continues to contribute articles on music to several periodicals.

BARRY KERNFELD

**Henze, Hans Werner** (*b* Gütersloh, 1 July 1926). German composer. His formidably numerous operas, ballets, symphonies and concertos have gained an established

place in the international repertory. His personal and compositional development has been documented in numerous interviews, articles, autobiographical essays and books. Striving for a communicative, 'impure' music concerned with feelings, ideas, history, people and politics, he has drawn inspiration for his vocal and instrumental works from a broad spectrum of renowned poets, writers and librettists.

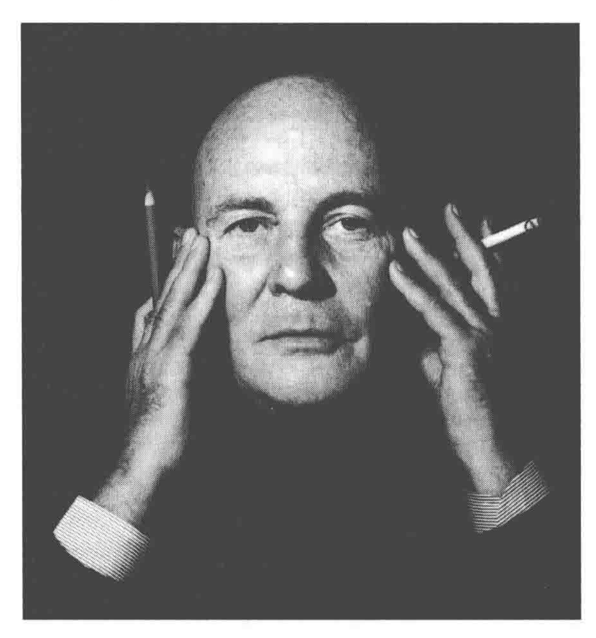
1. Youth and education, 1926–49. Henze was the eldest of six children born to the schoolteacher Franz Henze and his wife, Margarete (née Geldmacher). Due to financial considerations, Margarete and the children remained in Gütersloh until 1930, when Franz brought the growing family to live with him in Bielefeld. Budget cuts forced him to accept another position at the 'collective' school. A proficient amateur musician, he directed a workers' chorus and brass ensemble and played the viola in a local chamber orchestra. As befitting the eldest child of a teacher, Hans Werner received his first piano lessons soon after beginning primary school. In 1935, by order of the Nazi regime, the socialist-orientated collective school was dissolved. Franz Henze was sent to the small village of Dünne, near Bünde, where, in the framework of village life, he could hardly escape the political and social pressure exerted by the Nazis. Henze recalls in his memoirs, *Reiselieder mit böhmischen Quinten*, how fascist, anti-communist and anti-Semitic literature gradually filled his father's bookshelves, replacing banned books by Jewish and Christian authors. With all the fervour of an uneasy convert to the Nazi party, Franz Henze imposed the new order and philosophy conscientiously. Religious instruction ceased and the older boys donned the brown uniform of the Hitler Youth. Radio propaganda and news programmes became obligatory fare for the entire family.

But the radio also nourished Henze's musical appetite; through surreptitious enjoyment of the classical music programmes he became acquainted with a great deal of Mozart. And despite the onset of war, he remembers many pleasures. A puppet theatre opened the children's imaginations to the world of drama. A gift of the Anna Magdalena notebook introduced him to the music of J.S. Bach. He formed an ensemble with some other schoolchildren and occasionally attempted a composition. In addition to his weekly piano and theory lessons with a local teacher, he was allowed to accompany his teacher to a chamber music circle in a partly Jewish household. Until his father discovered their secret, Henze, together with a boyhood friend who had obtained access to the library's room for proscribed books, steeped himself in the literature of authors such as Trakl, Wedekind, Werfel, Hofmannsthal, Mann, Zweig and Brecht.

By 1942 Henze's father had finally become reconciled to the boy's vocation as a musician. Having narrowly escaped being sent to a military music school, Henze won a stipend to attend the Brunswick State Music School for orchestral musicians, where he studied the piano, percussion and music theory. He improved his piano technique under Ernst Schacht and studied Thuillian harmonic theory with Rudolf Harting. Although he was able to obtain a brief glimpse into contemporary music outside Germany through a performance of Frank Martin's *Le vin herbé*, the music of Hindemith, Bartók, Stravinsky, Schoenberg, Webern and Berg remained a rumour. Meanwhile he utilized his freedom from the constraints of his family to hear and make as much music as possible, hardly missing a concert, opera or theatre piece. Mozart's operas, especially *Figaro*, became synonymous with classical beauty, humour and drama. He earned some pocket money and gained more practical experience by accompanying fellow musicians and singing in the cathedral choir.

As timpanist in the school orchestra, he learned to appreciate much of the traditional orchestral literature from its acoustical depths. This perspective permeates many works, beginning with the neo-classical First Symphony (1947) in which the timpani, low woodwinds and low strings form the rhythmic and melodic foundation. The slow Notturno, which Henze left almost untouched in his 1963 revision of the symphony, evokes his father's favourite instrument with an extended viola solo.

Henze's father volunteered for re-entry into the army in 1943; he was later sent to the Eastern front, from which he never returned. The difficult relationship with his father fuelled Henze's growing hatred of fascism, the Nazi regime and war in general. Following several months of forced labour at the beginning of 1944, most of the 17-year-olds were conscripted. Commanded to an armoured tank division stationed in Magdeburg, Henze learned the duties of a radio officer. In his free time he practised the art of composing and hearing scores without a piano. He escaped more active duty through his good fortune in being chosen for a military training-film team, but his film idyll in Prague was cut short by the Russian offensive. As the allied armies closed in, Henze's troupe made their way via Berlin towards Denmark. During his brief internment in a British prisoner of war camp, Henze used every opportunity to improve his English and find out about life outside the cultural prison of the Third Reich. He listened hungrily to works by foreign and exiled composers broadcast by the BBC. 40 years later he could still say: 'Everything that the fascists persecute and hate is beautiful to me'.



For his first major commission, Henze composed out some of his feelings about the war with a choral and orchestral lament drawn from the second part of Goethe's *Faust*, the *Chor gefangener Trojer* (1948). His sensitivity to public and personal shame long continued to motivate musical statements: in his Ninth Symphony he emulated Beethoven with a seven-movement choral symphony, setting poems by Hans-Ulrich Treichel based on Anna Seghers's *Das siebte Kreuz*, a novel about the trials and martyrdom of young antifascists.

After returning to his family's new quarters near Bielefeld, Henze assumed the responsibilities of an eldest son, contributing to the support of his mother and siblings through jobs as a transport worker. Despite postwar rubble, hunger, poverty and cold, a seemingly insatiable appetite for new sounds and music fed his compositional urges. He gained helpful experience and connections through volunteer work as a répétiteur for the Bielefeld Stadttheater. Friends convinced him that, in order to study composition, he would have to leave Bielefeld. Through a series of fortunate circumstances, he landed in Heidelberg, where he met Wolfgang Fortner. Fortner accepted him as a composition student, enabled his

enrolment in the Heidelberg Evangelisches Kirchenmusikalisches Institut, and placed him with a family as live-in tutor. Under Fortner's disciplined instruction, he gained a solid foundation in Fuxian counterpoint, score reading, instrumentation and music history. 'At the same time', he recalled, 'Fortner gave me a comprehensive introduction to the realm of modern music and the aesthetic problems connected with contemporary composition'. His student attempts reflect this rapid study of modern works, beginning with those of Hindemith, Bartók and Stravinsky. In the summer of 1946, he attended the first Darmstadt summer courses for new music, for which he composed the short *Kammerkonzert* (1946), a neo-baroque concerto grosso for piano, flute and strings dedicated to his teacher. Although in many respects still an apprentice piece, this at its first performance nevertheless won him a contract from the influential publisher Willy Strecker, the auspicious beginning of an enduring association with the firm Schott.

A year later, following his first hearings of Bartók's and Berg's violin concertos, he gradually distanced himself from the confines of post-Hindemithian neo-classicism, exploring the possibilities of 12-note composition. The first movement of his First Violin Concerto contrasts a folk-like melody in A Lydian with a 12-note melodic theme, while the repetitive bitonal opening theme of the third movement betrays his growing fascination with Stravinsky's melodic and harmonic idiom. More than 30 years later, in his published notebook *Die Englische Katze*, he confessed that 'even today, in my new works, one notices the influence of Stravinskian harmony'. Under the occasional tutelage of Josef Rufer in Munich and René Leibowitz in Darmstadt and Paris, Henze became the first of the younger German composers to embrace the 12-note method as an answer to his aesthetic and technical difficulties. His gradual mastery of the principles can be observed in such works as *Whispers from Heavenly Death* (1948), a cantata for high voice and eight solo instruments, and the *Kammersonate* for piano trio (1948, rev. 1963). Henze came to regard the chamber concerto for harpsichord and eight solo instruments *Apollo et Hyazinthus* (1948–9), as one of his first mature works, uniting the abstract 12-note method and the formal ideal of the concerto-sonata with an extra-musical story culminating in a poem. Following a contrapuntal scherzo and the expected harpsichord cadenza, an alto stands and, to a lyric melody outlining successively three permutations of the row, sings Trakl's autumn lament *Im Park*. This textually orientated tangle of associations, styles, means and themes became characteristic of Henze's mature idiom. As the Darmstadt 'school' of 12-note composition closed ranks, Henze became the first to question the reign of serialism, preferring an undogmatic, tonally flexible approach to dodecaphonic composition. The use of 12-note rows as vital material during the conceptual stages can be observed in the sketches even of works from the 1990s.

2. Composing for the stage, 1946–52. Whereas at the beginning of his 20s Henze was still struggling for a living, within a few years he was in the enviable position of having more commissions than he could handle. His student years in Göttingen were followed by brief periods in Konstanz, Berlin, Wiesbaden and Munich: it was a frenetic time of beginnings, first successes and scandals. He made his way in a life-sized theatre, juggling roles, masks, costumes, scenery, relationships, puzzles and games of identity. In search of the right sounds for the given dramatic moment, he assimilated many musical styles, unifying diverse elements within his lyrical, tonally orientated 12-note idiom. He became adept at stylistic quotation and parody. Still distrusting the bourgeois milieu of opera, he used actors for his first experiment with 'imaginary' musical theatre, *Das Wundertheater* (1948, revised in 1964 for singers and orchestra), based on an intermezzo by Cervantes. Meanwhile his sympathies were being drawn increasingly to dance. His first choreographic poem, *Ballett-Variationen* (1949, rev. 1992 and 1998), was inspired by a performance of the Sadler's Wells Ballet in Hamburg. In the summer of 1949 he was appointed musical adviser to the short-lived German Theatre in Konstanz. His next ballet, *Jack Pudding*, was compiled from music composed for performances of Molière's *Georges Dandin*. (Henze recomposed the ballet in 1992–5 under the new name *Le disperazioni del Signor Pulcinella*, adding some song numbers based on Neapolitan texts.)

1. *Hans Werner Henze, 1990*

Dance metaphors also mould Henze's First Piano Concerto (1950). The scenario moves from a lively dialogue between orchestra and piano in the first movement, 'Entrée', through the intimate 'Pas de deux' to a toccata-like 'Coda'. Following the disappointing Berlin première of *Wundertheater*, Henze won the patronage of the chief choreographer of the Berlin Städtische Oper, Tatjana Gsovsky. While angling for a ballet commission, he composed his Third Symphony (1949–50) with the suggestive subtitles 'Invocation of Apollo', 'Dithyramb' and 'Evocation Dance'. The East German composer Paul Dessau befriended him, beginning a fatherly dialogue that anticipated Henze's later politicization. But it proved too difficult at this time for the young provincial composer to make his way in postwar Berlin. Henze wove many impressions from this failure-ridden winter into a ballet piece, *Das Vokaltuch der Kammersängerin Rosa Silber* (1950). This 'exercise with Stravinsky on a picture of Paul Klee', which he revised in 1990, combines classical

ballet exercises, variations on a French folksong and compositional touches recalling Stravinsky and Blacher, to whom the piece was dedicated.

In 1950–53 Henze received commissions for dramatic music of various kinds, beginning with an operatic modernization of the Manon Lescaut material, *Boulevard Solitude* (1950) and ending with Wolfgang Hildesheimer's 'loveless legend' *Das Ende einer Welt* (radio opera, 1953). A picture of Henze's increasingly stressed lifestyle can be drawn from the statistics: five ballet pieces, a monodrama, a wind quintet, a piano sonata, his second string quartet and four sets of incidental stage music were composed and produced between the aforementioned operas. Many of these works were occasioned by Henze's new position in Wiesbaden as artistic director and conductor of the Hessisches Staatstheater ballet. Later he judged the mixed quality of these pieces severely. Three were withdrawn completely from his 1964 list of works. Many underwent thorough revisions. Four decades later some of the rejected ballet sketches inspired new compositions.

3. Italian intermezzo, 1953–65. With the help of friends' advances, a small stipend and meagre savings, Henze fled from mounting personal and social pressures to Italy. He chose a seaside house in Forio on the island of Ischia for his hermitage, devoting his days to studying the local language and culture, composing, writing, and the critical evaluation of his compositional methods and goals. His initial task was the completion of the cello concerto *Ode an den Westwind* (1953), the first piece in which he attempted a closer interaction between instrumental music and text, a kind of 'poetry for the instruments'. The five sonnets of Shelley's ode inspire not only the form and mood of the concerto, but are 'sung' by the cello 'voice'.

Henze's primary attention was then given to the realization of Heinz von Cramer's libretto for *König Hirsch*, a retelling of Gozzi's fairytale about magical transformation, metamorphosis and liberation. The composition process lasted three years, becoming a compositional diary in which Henze worked through his impressions of Italian musical life, both 'high' and 'low'. Whereas at the beginning he was still employing 12-note methods, over time his style grew more vocally and tonally orientated. He explored simpler elements of song which could touch the listener at the primal, sensual level. As he recalled:

> the discovery of melody brought about an enrichment of my expressive means. The difficult process of simplifying my musical language was accelerated by the discovery of the remarkable vigour and immediacy of street cries and canzonetti resting on simple intervallic relationships. In place of serial melody, which outwardly guaranteed a certain 'contemporaneity', came the most simple sequence of notes – the basic intervals that were naturally related to song were to contain everything that was to be said.

For his modern rendition of a Baroque *Märchenoper*, Henze strung together scenes based on closed, historical forms: arias, duets, cabalettas, canzoni, ensembles, passacaglias and hunt music. Bridge passages joined the broad scenes, lending the whole a through-composed continuity, the finale of the second act, a seasonal 'forest' symphony, became the Symphony no.4 (1955). But even before its première in September 1956, the opulently scored opera in three acts was doomed. Convinced of the impossibility of this long and, in his view, unfashionable opera, Hermann Scherchen, the conductor, undertook radical cuts. The mutilated opera earned justifiably mixed reviews. Henze and Cramer's compromised version, retitled *Il re cervo, oder Die Irrfahrten der Wahrheit* (1963), compensated for discarded scenes with some new recitatives and a narrative speaking role, the magician Cigolotti. The original score was not performed in its entirety until 1985.

The Austrian poet Ingeborg Bachmann joined Henze at his island retreat in the summer of 1953, strengthening a friendship that yielded six collaborations. Their probing dialogue about literature, history, music and philosophy laid the foundation for Henze's understanding of the reciprocal relationship of text, music and signs. In a 1959 lecture about the message of music, he wrote:

> Language and music are two parallel spheres that are often connected; more than half of all existing music consists of settings of words. This relationship has diverse forms; sometimes music seizes violently upon language, and crushes it in its embrace, or sometimes language wants to seize upon music; they both can degrade but also can elevate one another.

At Henze's request, Bachmann worked on a new concept and text for his ballet-pantomime *Der Idiot* (scenario by Gsovsky based on Dostoyevsky's novel), which had received its Berlin première in 1952. Bachmann replaced Gsovsky's pastiche of quotes with a dramatic 'Monologue of Prince Mishkin'. Her superior text, however, disrupted the delicate balance of pantomime, dance, poetry and music, necessitating a revision of the music (completed in 1990). While finishing *König Hirsch*, Henze composed an orchestral counterpoint to Bachmann's radio play, *Die Zikaden*. With *Quattro poemi* (1955), commissioned by the city of Darmstadt for the tenth of the international summer courses for new music, Henze declared his independence from the Darmstadt avant garde. For his next two ballets he ventured into hitherto alien territory, exploring jazz in Luchino Visconti's social critique *Maratona* (1956) and 19th-century Romanticism for Frederick Ashton's evocative vehicle for Margot Fonteyn, *Undine* (1956–7). Impressions of Henze's new residence in Naples coloured orchestral songs such as the *Fünf neapolitanische Lieder* (1956, composed for Dietrich Fischer-Dieskau and dedicated to Bachmann) and *Nachtstücke und Arien* (1957), three orchestral movements framing two Bachmann poems for lyric soprano and orchestra.

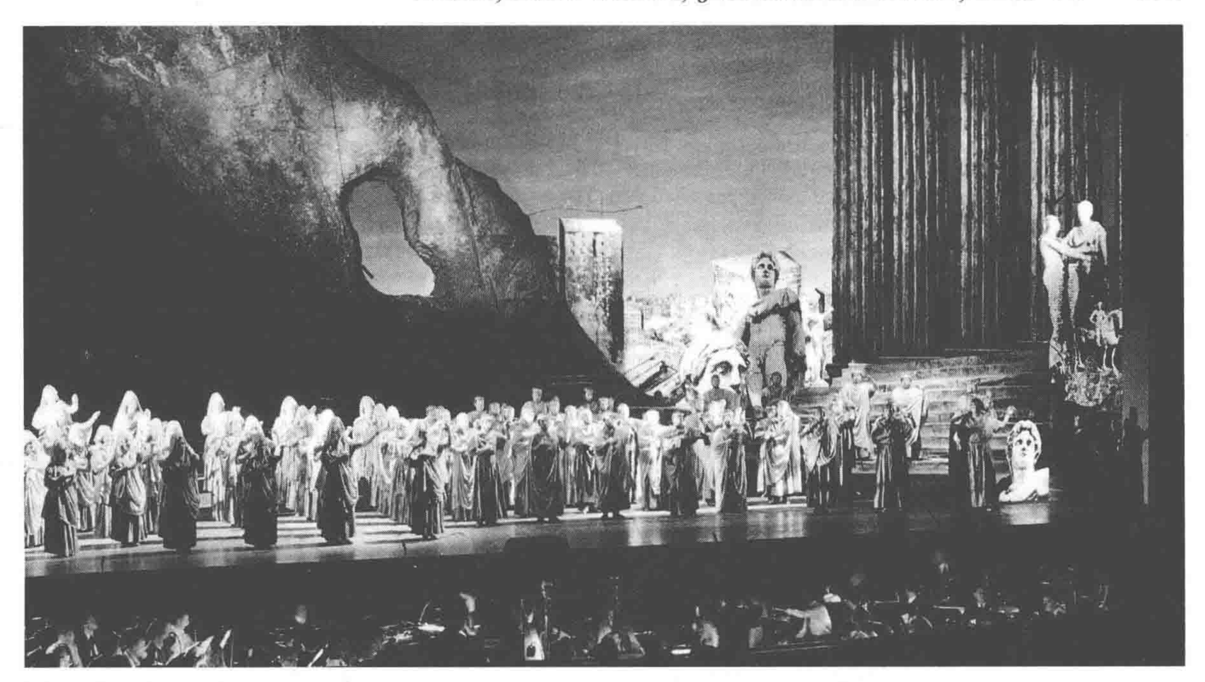
Henze's bittersweet honeymoon with classical Greece and Italy reverberated in *Kammermusik 1958*, a setting of a Hölderlin ode on classical themes. The original 12 movements, balancing three songs for tenor and guitar and three 'tentos' for solo guitar with three octet movements and three movements for the full ensemble, attain melodic and harmonic unity through intervallic relationships introduced in the first movement. A final Adagio for the octet was added in 1963, in honour of Josef Rufer's 70th birthday. Notwithstanding the choice of title, *Kammermusik 1958* is the antithesis of abstract music. The recurring themes and semantic chains of the poem are associated with musical elements and signs, thus facilitating an audible relationship between words and music. In his search for means to 'express the inexpressible' within the intimate confines of chamber music, Henze drew upon models as diverse as Dowland, Milán, Monteverdi, Britten (to whom the work is dedicated), Schoenberg and Webern. As with most of his concertos and chamber works, *Kammermusik 1958* was composed for specific musicians, in this case enhancing

and challenging the artistry of the tenor Peter Pears and the guitarist Julian Bream.

The musical and textual themes of *Kammermusik 1958* unfolded in his next opera, *Der Prinz von Homburg* (1958), which he dedicated to Stravinsky. Bachmann's perceptive adaptation of Heinrich von Kleist's play focusses on the opposition of reality and dreams, freedom and force, choice and compulsion, Olympian classicism and German Romanticism. The resulting conflicts are echoed in the carefully balanced musical tension between vocal and instrumental idioms, contrapuntal polyphony and homophonic lyricism, structural serialism and free tonality.

Emboldened by the success of *Homburg*, Henze asked W.H. Auden and Chester Kallmann for a psychological drama suitable for a chamber opera on the scale of Mozart's *Così*. They responded with *Elegy for Young Lovers*, a tragicomic opera of mutually exploitative relationships revolving around a Romantic genius-hero, the poet Mittenhofer. The passage of time amid the snow-covered Austrian Alps of the scenario suggested the cold sound of percussive instruments, including the celesta, tubular bells, marimba, vibraphone, timpani, drums, crotales and metal blocks. Each of the six singers received a personal musical idiom and an instrumental consort suited to their character and vocal range. Henze refined this technique in later operas. For this one he also took on the additional role of stage director, in order to be able to realize the drama he had envisioned while composing. Due to the short time between commencement and the May 1961 première at the Schwetzingen Festspiele he worked with several assistants in Berlin in order to facilitate the composition, translation, score production and stage direction for what turned out to be one of his most successful operas.

Needing to live closer to Rome and an international airport, yet longing for a quiet country residence, Henze found his heart's home in the Castelli Romani, settling at first in Castel Gandolfo. He also accepted a composition masterclass at the Salzburg Mozarteum (1962–6) and worked on his Fifth Symphony (1962). The opening notes of a song from *Elegy* pervade this work, again illustrating Henze's premise that 'Everything moves towards theatre, and thence returns again'. In May 1963 he flew for the first time to New York for the première of his Fifth Symphony under Bernstein. The grim contrast of Harlem and Fifth Avenue spurred his quest for Mozartian beauty, culminating in three vocal works: *Ariosi* (settings of five Tasso poems for soprano, violin and orchestra), the choral *Cantata della fiaba estrema* and *Being Beauteous*, a cantata for coloratura soprano, harp and cello quartet. His setting of the enigmatic Rimbaud poem evokes an image of beauty on the verge of being, elusive, beyond reach. Within a sonata-like structure, *Being Beauteous* balances severe counterpoint with vocal coloratura. Surreal waltzes surround an ethereal *pas de deux* between the harp and soprano. The four atonal, disguised canons contrast with homophonic passages employing tonal devices such as prolonged pedal points, tense stacks of fully-diminished seventh chords and unresolved cadences.



Now Henze was finally able to enjoy the pleasure of conquering Berlin. On 9 and 12 April 1964 all five of his symphonies were performed under Karajan by the Berlin PO, together with the première of *Being Beauteous*, sung by Ingeborg Hallstein. And the Deutsche Oper Berlin commissioned a new opera, for which Henze turned to Bachmann. Bachmann suggested Wilhelm Hauff's parable *Der Affe als Mensch*. Her elegantly satirical libretto foils the eccentric whims of an outsider, a rich English Lord, against the *Gemütlichkeit* of a small German city's populace. Taking *buffo* operas of Rossini and Mozart for his models, Henze limited himself to a Classical orchestra with few modern trimmings. The escalating confusion of the ensemble numbers framing the lovers' duets provided ample opportunity for humorous parody spiced with quotations, contrasting established conventions with contemporary techniques:

> In my works for the theatre I have therefore never completely left tonality, not even in the earliest ones. My music is nourished by just this state of tension: the abandonment of traditional tonality and the return to it. Rather like tensing a bow, it is here a kind of 'tensing the ear'.

Proceeds from the widely performed opera *Der junge Lord* financed the completion of Henze's countryside villa, La Leprara, in nearby Marino. While composing the score he expressed his gratitude to his 'sister' with a *Chorfantasie, Lieder von einer Insel* (1964), setting poetic impressions from Bachmann's first days with Henze in Ischia. Intimately contrapuntal dialogues between two cellos connect the choruses. In keeping with the thoughtfully festive nature of the poems, the chamber choruses are accompanied by low melodic instruments.

The subject for Henze's next opera, *The Bassarids* (1964–5), was proposed by Auden in 1961. When Henze requested a new libretto for the Salzburg Festival in August 1966, Auden assented to the task, provided Henze take a corrective dose of Wagner's *Götterdämmerung*. Auden and Kallmann's *opera seria*, a psychoanalytical reinterpretation of Euripides' play, links major characters to similar manifestations from antiquity to the *belle époque*. Immediately after the première of *Der junge Lord* Henze went to work at a feverish pace in order to be ready for the Salzburg production by the Berlin *Elegy* and *Lord* team (the Deutsche Oper of Berlin with Rudolf Sellner as director, Christoph von Dohnányi conductor and Filippo Sanjust designer; fig.2). Despite Auden's prescription, Wagner's dramas left few traces in Henze's music at this time; rather he invoked Mahler and mocked Strauss. Brief Bachian quotations underline pivotal developments. Cast in the form of a symphony in four movements, with Auden's farcical intermezzo interrupting the long adagio scene between Pentheus and Dionysus, *The Bassarids* condensed all that Henze had learnt since emigrating to Italy.

4. Musical activism, 1966–76. The travails of travelling, teaching, conducting engagements, commissions, revisions of earlier works and composing two so very different operas withing the space of one and a half years led to a personal and compositional crisis. This time Henze's compulsive questioning of himself and the world around him led in new directions. Bachmann and friends among the left-wing intelligentsia had already prodded him out of his musical isolation, directing his attention towards antifascist literature and current events. This had resulted in musical statements such as the collective oratorio *Jüdische Chronik* (1960, compositions by Blacher, Dessau, Hartmann, Henze and Wagner-Régeny to texts by Jens Gerlach) and *In memoriam: Die Weiße Rose* (1965), a double fugue for 12 instruments dedicated to the young antifascist martyrs Hans and Sophie Scholl.

*2. Scene from Henze's 'The Bassarids', Grosses Festspielhaus, Salzburg, 1966, designed by Filippo Sanjust*

Henze's operatic loner figures (such as the leading male roles of *König Hirsch, Elegy, Der junge Lord* and *The Bassarids*) now gave way to a new concern for the analogous conflicts between individuals and society inherent in the concerto form. In *Musen Siziliens* (1966), a concerto for mixed choir, two pianos, wind instruments and timpani on fragments from the Eclogues of Virgil, he highlighted the concertante piano duo and melodic instruments, relegating a declamatory, almost accompanimental role to the amateur chorus. With the Double Bass Concerto (1966), composed for Gary Karr, his search for 'friendship, fellowship, understanding' yielded a more 'social', discursive relationship between the protagonists. The virtuoso doubles of the Double Concerto (1966) for oboe, harp and strings were composed for Heinz and Ursula Holliger, whose pioneering expertise encouraged Henze to experiment with new techniques for the soloists, such as percussive effects, harmonics, double trills and microtones. The nocturnal opening of his one-movement Piano Concerto no.2 (1967, composed for Christoph Eschenbach and the Bielefeld PO) gives way to a rhythmically aggressive battle between the piano and orchestra, with the pianist pitted against the percussion battery. Henze's tormented self-examination concludes with saturnine music inspired by the Shakespeare sonnet 'The expense of spirit in a waste of shame'.

Triggered by a teaching stint in Dartmouth, New Hampshire (summer 1967), and the student protests in Berlin (1967–8), Henze's internal unrest exploded into action. He met with leaders of the socialist student groups, participated in peace demonstrations and co-initiated the Vietnam Congress. The socialist poet Hans Magnus Enzensberger introduced him to Gastón Salvatore, a Chilean student who contributed the outraged poems for his first experiment with avant-garde vocal techniques in *Versuch über Schweine* (composed in 1968 for the unique vocal range and talents of Roy Hart). But his revolt first became public on 9 December 1968, when scandal wrecked the première of his oratorio 'volgare e militare' *Das Floss der 'Medusa'*, for soprano, baritone, mixed chorus, boys' voices and large orchestra. Encouraged by the work's dedication to Ernesto Che Guevara (occasioned by the guerrilla hero's assassination in October 1967), students hung a red flag from Henze's conducting podium, provoking a spontaneous boycott by the NDR SO and the RIAS Chamber Choir which escalated into a full-blown battle. Henze fell uncomfortably between stools. The promoters held him responsible for the fiasco; critics, patrons and the concert-going public were outraged by his 'betrayal'; and Marxist agitators accused him of armchair communism.

Many of his vocal compositions of the late 1960s and early 70s can be regarded as period pieces, barely separable from the events that produced them. His 'recital for four' *El Cimarrón* (1969–70), however, transcended its Cuban impetus (stimulated by the première of his Sixth Symphony in Havana) to become one of his most frequently performed chamber works. He wrote it for the black American baritone William Pearson, Karlheinz Zöller on a wide selection of flutes, the Japanese percussionist Stomu Yamash'ta and the Cuban composer and guitarist Leo Brouwer. The four performers co-create a dramatic portrayal of the runaway slave Estaban Montejo (adapted freely by Hans Magnus Enzensberger from Miguel Barnet's documentary novel); Caribbean colours and expressive contemporary techniques enrich Henze's unconventionally notated score. The emotionally charged vocal part expands on song, recitative and Sprechgesang with special effects such as falsetto, whistling, scat, screams, chanting and laughing.

This series of experiments with political vocal works culminated in *Voices* (1973), a collection of songs for mezzo-soprano and tenor. The 22 German, English, Italian and Spanish songs (a personal selection of protest, resistance, socialist and communist poems concluding with an Enzensberger 'happy-end' duet) are dedicated

to a symbolic list of comrades and friends. Henze's deliberately eclectic palette blends 'exotic' folksong elements, protest songs, touches of Weill and Dessau, standard dances, marches, light opera, cabaret and popular traits of 'classical' music with contemporary features such as 12-note writing, extended instrumental techniques, aleatory passages and controlled improvisation. Calling for over 80 individual instruments, the work was tailored to the capabilities of the 15 core players of the London Sinfonietta.

Henze's doubts, concerns and socialist dreams were also echoed in his instrumental works. *Compases para preguntas ensimismadas* (1969–70, for viola and 22 instrumentalists) carries musical individualism to its logical extreme: every player is a soloist. The viola's opening 'short notes about passing moods' develop toward a seemingly anarchical climax out of which the viola ascends, leading the way towards agreement. Electronically processed tape elements pervaded works such as Henze's monodrama *Der langwierige Weg in die Wohnung der Natascha Ungeheuer* (1971), the Second Violin Concerto (1971) and *Tristan* (1972–3). The concerto, a theatrical commentary on Enzensberger's *Hommage à Gödel*, includes a bass-baritone part and a tape. *Tristan*, subtitled 'preludes for piano, electronic sounds and orchestra' is an elegiac homage to the Wagner opera and its legendary beings. 'Tristan's folly' expressed Henze's grief over the recent deaths of Bachmann, Auden, the choreographer John Cranko, Neruda and Salvador Allende.

5. Reflection and synthesis, 1976 and after. Beginning with his leadership of the Cantiere Internazionale d'Arte in Montepulciano, Henze began to devote more time to his musical past and posterity. In the mid-1980s he donated his manuscripts to the Paul Sacher Foundation and later, while writing his memoirs and putting his works in order for an up-to-date annotated catalogue, undertook revisions of works that failed to meet his current compositional standards. Hardly a year passed without new honours, workshops and professorships, including a composition class at the Staatliche Hochschule für Musik in Cologne (1980–91), the Bach Prize of Hamburg (1983), a chair at the RAM in London (1987), artistic direction of the Munich Biennale festival for new music theatre (beginning in 1988), the Grosses Verdienstkreuz der Bundesrepublik Deutschland (1991), the Accademico Onorario of the Accademia di S Cecilia, Rome, and an honorary doctorate from the University of Osnabrück (1996).

During the first years of the socio-cultural experiment in Montepulciano, Henze contributed many new compositions. Performances of his versions of the Paisiello operas *Don Chisciotte* (1976) and *Il re Teodoro in Venezia* (1991–2), involved local talent as much as possible. His first sonata for solo guitar, *Royal Winter Music* (1975–6), more than repaid Julian Bream for teaching masterclasses during the first Cantiere. Portraying Shakespearean characters, the six movements probe the dramatic, musical and technical range of the instrument. A second Shakespearean sonata for guitar followed in 1979. The operatic fairy tale *Pollicino* (1980) strove towards an educationally useful and musically rewarding integration of children and professional musicians. Many assistants were rewarded with chamber pieces. For instance, the mixed quintet *Amicizia!* (1976) was written for the composer's loyal Hamburg comrades from 'Hinz und Kunst', a politically active group of composers and instrumentalists who were also featured in his 'imaginary theatre for a singer and a small instrumental ensemble' *El rey de Harlem* (1979). For his through-composed setting of García Lorca's ode, he experimented with a system of textual-musical signal motives. Using a chromatic scale linked to the alphabet, Henze wove key words into the densely contrapuntal texture. Surface signs such as street noises, Spanish ornamentation and 'jungle' effects help the listener imagine the action.

A Sonata for solo violin (1976–7, rev. 1992) became the first of a constellation of works prompted by Monteverdi's *Orfeo*. Still mourning the death of his mother, Henze asked Edward Bond for a ballet treatment of the myth. In *Orpheus* (1978) instruments replace voices, 'singing' a drama that the dancers enact. The central five poems were later set for *a cappella* chorus in *Orpheus behind the Wire* (1981–3). *Barcarola* for large orchestra (1979) was dedicated to the memory of Dessau; the viola introduces a variation theme that Henze identified with the river Styx. His preoccupation with the themes of life and death, fear, war and love later found poignant expression in the wordless *Requiem* for solo piano, concertante trumpet and large chamber orchestra (1990–92), created as a memorial to Michael Vyner. The nine 'sacred concertos' are based musically on the withdrawn *Concerto per il Marigny* for piano and seven instruments (1956), motifs from the requiem mass and two 12-note rows.

As with Bachmann and Auden, Henze's collaborations with Edward Bond yielded two very different operas. Their violent 'actions for music' *We Come to the River* (1974–6), relate a politically motivated morality tale performed on three stages, each with its own orchestra. For the controversial Covent Garden première, Henze again directed the staging. Following *Orpheus*, he asked Bond for a comic animal opera based on Balzac's *Peines de coeur d'une chatte*. Behind a deliberately cliché-ridden, pseudo-Victorian mask, satirical strokes underline comparisons with contemporary hypocrisies. As in *Elegy*, the lovers are sacrificed unjustly to the 'higher good'. Henze delineates the main characters with signature instruments and individual melodic-harmonic styles. Lord Puff dithers with an English Renaissance air, Tom swaggers with bravura, while Minette warbles elaborate coloratura arias. For the benefit of his composition students in Cologne, Henze kept a detailed autobiographical diary of the work's progress, *Die Englische Katze*, which was published in time for the opera's première at the Schwetzingen Festival on 2 June 1983, once again with Henze as stage director.

15 years after his Cuban Sixth Symphony for two orchestras (1969, revised in 1994), Henze responded to a commission from the Berlin PO with a retrospective, four-movement treatment of the standard form. His Seventh Symphony (1983–4) begins with an allemande, after which a slow lied and a scherzo in perpetual motion are followed by a calm, cheerless finale expressing the essence of Hölderlin's poem 'Hälfte des Lebens'. In contrast with the sombre Germanic nature of this work, the lighter Eighth Symphony (1992–3) reaffirmed his affection for England and Italy. Three scenes from *A Midsummer Night's Dream* provided the impetus for this piece of imaginary theatre. Voicing Oberon's command to Puck,

the airy first movement suggests Mendelssohn's music for the same play. In the second movement, groups of instruments become the actors for a danced dialogue between the love-sick Titania and the ludicrous Bottom (to be compared with the treatment of Bottom's dream in the second *Royal Winter Music* sonata). The adagio finale, based loosely on images from Puck's epilogue, unveils the 12-note theme of the variations heard in the preceding movements.

Desirous of composing German operas again, Henze now found it necessary to train a young poet in the art of writing words for his music. He chose Hans-Ulrich Treichel for his next pair of operas, *Das verratene Meer* (1986–9) and *Venus und Adonis* (1993–5). In both a tragic love triangle forms the dramatic core. In Henze and Treichel's two-act adaptation of Yukio Mishima's novel *The Sailor who Fell from Grace with the Sea*, the conflicts inherent in a mother-son, mother-lover complex are intensified by the gap between teenage ideals and adult compromises. The through-composed score identifies with the characters and their drama within a dispassionate structure representing universal symbols such as seasons, colours and the betrayed sea.

Henze's youthful passion for drama, ballet, mythology and classic themes of love come full circle with *Venus und Adonis* (1993–5). In their one-act reinterpretation of Ovid and Shakespeare, Henze and Treichel extended the triangle symbolism to all formal aspects. The tragic development of a backstage affair involving a prima donna, a heroic actor and a young tenor are shadowed by dancers enacting Venus, Adonis and Mars. Three orchestras support the mythic prototypes. A brief pantomime by masked dancers represents the animalistic level of mare, stallion and boar. Often to the detriment of the dramatic development, the orchestral and vocal music express Henze's ongoing search for 'wild, free beauty' and Mozartian perfection of form. As in *The English Cat*, he reserves his most moving counterpoint for choral interludes, here sung by six pastoral madrigalists fulfilling the role of a Greek chorus.

> Lonely was I when torn by the boar.
> Now I am a star among stars.
> Lonely was I when my feet touched the ground.
> Lonely was I when a heart beat within me.

Adonis's epilogue speaks on behalf of an aging composer who still wishes only to understand and to be understood.

## WORKS

### OPERAS AND MUSIC-THEATRE

Das Wundertheater (op for actors, 1, after M. de Cervantes, trans. A. Graf von Schack), 1948, Heidelberg, Stadttheater, 7 May 1949; rev. for singers, 1964, Frankfurt, Staatstheater, 30 Nov 1965

Boulevard Solitude (lyric drama, 7 scenes, G. Weil, scenario by W. Jockisch), 1951, Hanover, Oper, 17 Feb 1952

Ein Landarzt (radio op, after F. Kafka), 1951, Hamburg, 19 Nov 1951, broadcast 29 Nov 1951; rev. 1994; stage version 1964, Frankfurt, Staatstheater, 30 Nov 1965

Das Ende einer Welt (radio op, prol, 2, epilogue, W. Hildesheimer), 1953, Hamburg, 4 Dec 1953; rev. 1993; stage version, 1964; Frankfurt, Staatstheater, 30 Nov 1965

König Hirsch (3, H. von Cramer), after C. Gozzi), 1952–5, Berlin, Städtische Oper, 23 Sept 1956; rev. 1962 as Il re cervo, oder Die Irrfahrten der Wahrheit, Kassel, Staatstheater, 10 March 1963

Der Prinz von Homburg (3, I. Bachmann, after H. von Kleist), 1958, Hamburg, Staatsoper, 22 May 1960; reorchd 1991, Munich, Bayerische Staatsoper, 24 July 1992

Elegy for Young Lovers (3, W.H. Auden and C. Kallman), 1959–61, Schwetzingen, Schwetzinger Schloss, 20 May 1961; rev. 1987, Venice, La Fenice, 28 Oct 1988

The Bassarids (os with intermezzo, 1, Auden and Kallman, after Euripides: *The Bacchae*), 1964–5, Salzburg, 6 Aug 1966

Der junge Lord (comic op, 2, Bachmann, after W. Hauff), 1964, Berlin, Deutsche Oper, 7 April 1965

Moralities (3 morality plays, Auden, after Aesop), 1967, Cincinnati, 18 May 1968; rev. version, Saarbrücken, Kongresshalle, 1 April 1970

Der langwierige Weg in die Wohnung der Natascha Ungeheuer (show, G. Salvatore), 1971, Rome, RAI, 17 May 1971

La Cubana, oder Ein Leben für die Kunst (vaudeville for TV, 5 scenes, H.M. Enzensberger, after M. Barnet), 1973, New York, WNET Opera Theater, 4 March 1974; Munich, Staatstheater am Gärtnerplatz, 28 May 1975; chbr version La piccola Cubana, 1990–91

We Come to the River (actions for music, E. Bond), 1974–6, London, CG, 12 July 1976

Pollicino (musical fairy tale, G. Di Leva, after Collodi, J.L. and W.C. Grimm and C. Perrault), 1979–80, Montepulciano, 2 Aug 1980

The English Cat (story for singers and instrumentalists, 2, Bond, after H. de Balzac), 1980–83, Stuttgart, Staatsoper, 2 June 1983; rev. 1990, Montepulciano, 9 Aug 1990

Ödipus der Tyrann (musical play, H. Hollmüller), 1983, collab. H.-J. von Böse, S. Holt, D. Lang, Kindberg, 30 Oct 1983; withdrawn

Das verratene Meer (music drama, 2, Treichel, after Y. Mishima: *Gogo No Eiko* [The Sailor who Fell from Grace with the Sea]), 1986–9, Berlin, Deutsche Oper, 5 May 1990

VIRGINIA PALMER-FÜCHSEL

**Hepokoski, James A(rnold)** (*b* Duluth, MN, 20 Dec 1946). American musicologist. He studied with David G. Hughes, John M. Ward, Oliver Strunk and Christoph Wolff at Harvard, where he took the AM in 1974 and the doctorate in 1979, with a dissertation on the compositional history of Verdi's *Falstaff*. He began teaching at Oberlin College Conservatory in 1978, becoming professor in 1985. He joined the faculty of the University of Minnesota in 1988, and was named Distinguished McKnight Professor of Musicology in 1997. He moved to the music department of Yale University in 1999. He became co-editor of the journal *19th-Century Music* in 1992. Hepokoski's areas of interest are Italian opera, especially Verdi, and the concept and practice of musical modernism between 1880 and 1920. He has also studied the theory of musical genres and recent literary-critical/historical approaches to music. A central issue in his research has been to devise ways to understand musical process as human thought, an ongoing concern with music of the past as recoverable communication. Since 1990, in collaboration with Warren Darcy, he has focused on devising a genre-based theory of sonata structure and 'deformations' ('sonata theory'), which seeks to suggest productive ways to understand and interpret compositional choices within instrumental sonatas from the mid-18th century to the early 20th.

PAULA MORGAN

**Heppener, Robert** (*b* Amsterdam, 9 Aug 1925). Dutch composer. He studied the piano at the Amsterdam Conservatory and took composition lessons with Van Lier. In 1956 he began to teach music theory at the Rotterdam Conservatories and the Amsterdam Muzieklyceum and composition at the conservatory of Amsterdam and Maastricht. The first of his works to attract public notice was the splendid *Cantico delle creature di S Francesco d'Assisi* (1952; rev.1955). Shortly thereafter his Symphony was performed by the Concertgebouw Orchestra under Haitink, and Heppener became known as one of the most promising young Dutch composers. His earlier music is for the most part tightly constructed and displays a strong sense of purpose and a fine control of dramatic tension and relaxation. A magnificent example of this is *Eglogues* (1963), a four-movement work inscribed with the opening lines of St John Perse's *Chronique*. The poet's nature imagery is reflected in the music, and there is a stifling atmosphere of defeat and future uncertainty. With its novel vocal techniques, the *Canti carnascialeschi* (1966), a five-part choral cycle on Florentine carnival poems and *Del iubilo del core* (1974), proved Heppener's continuing interest in contemporary developments without giving up his personal musical language and clarity of expression. While these works are

predominantly atonal, in the 1980s Heppener strove for a new tonality as in *Memento* (1984) and *Hymn to Harmony* (1987). Open sonorities have remained a constant feature of his music as well as the sense that the structures of his compositions result from his tireless search for existential truth.

WORKS
(*selective list*)

Op: Een ziel van hout (Heppener and J. Lind), 1996

Orch: Sym., 1951–2; Dirivazioni, str, 1958, rev. 1980; Eglogues, 1963, rev. 1980; Scherzi, str, 1965; Hymns and Conversations, 28 hp, 1969; Air et sonneries, 1969; Muziek voor straten en pleinen, 1970; Boog, 1988

JOS WOUTERS/LEO SAMAMA

**Heppner, Ben** (*b* Murrayville, BC, 14 Jan 1956). Canadian tenor. He studied at the University of British Columbia and during the mid-1980s sang lyrical roles with the Toronto-based Canadian Opera Company Ensemble. In 1986 he sang Sandy in Maxwell Davies's *The Lighthouse* at the Guelph Spring Festival, then decided to re-study as a dramatic tenor with William Neill. He won the Birgit Nilsson prize (1988) in New York, then sang Bacchus (*Ariadne auf Naxos*) in Melbourne and the Prince (*Rusalka*) in Philadelphia. He went on to sing Lohengrin in Stockholm and San Francisco (1989), Walther von Stolzing at Seattle, La Scala and Covent Garden (1990), Bacchus at Santa Fe and Frankfurt, and Florestan at Cologne and Vienna. In 1991 Heppner performed as Laca (*Jenůfa*) in Brussels, Erik (*Der fliegende Holländer*) in Geneva and Idomeneo in Amsterdam; the following year he sang Dvořák's Dimitrij in Munich and Mozart's Titus at Salzburg, created the title role of William Bolcom's *McTeague* at Chicago and made his Metropolitan début as Laca. He returned to Covent Garden as a memorable Peter Grimes (1995) and to Toronto as Canio (1996). He has made notable recordings of Walther von Stolzing, Lohengrin, Grimes, Erik, Florestan, Huon (*Oberon*), Jean (*Hérodiade*), Chénier and Calaf, all of which display his powerfully dramatic voice, with its solid middle register and ringing top notes, and his vivid sense of character.

ELIZABETH FORBES

**Heptachord** (from Gk. *hepta*: 'seven', *chordē*: 'lyre string'). A seven-note SCALE, such as the major or minor scale, or that of any of the church modes.

**Heptatonic.** A term applied to any music, MODE or SCALE based on seven pitches to the octave.

**Heptinstall, John** (*b* ?London, *c*1657; *d* London, bur. 18 Nov 1732). English printer and manufacturer of printing ink. He set up as a Master about 1683, and was active until about 1715. With Thomas Moore and Francis Clark he printed *Vinculum societatis* (1687), the first musical work with the 'new tied note' (i.e. quavers and semiquavers united in groups). Before then, except in engraved music, such notes were printed separately because of the difficulty of connecting, in movable types, notes of different pitch. The 'new tied note' was improved (as the 'new London character') by William Pearson, who was in business from 1699 to 1735, and who was the best known of Heptinstall's 12 apprentices. A feature of both new types was the printing of round-headed notes instead of the former lozenge shape (for illustration *see* PRINTING AND PUBLISHING OF MUSIC, fig.10). He issued a number of works by Purcell, including *Amphitryon* (1690), *The Prophetess, or The History of Dioclesian* (1691) and *The Double Dealer* (1694), as well as a number of psalm books and publications by Henry Playford, including the 1703 edition of *The Dancing Master*.

FRANK KIDSON, WILLIAM C. SMITH/D. ROSS HARVEY

**Heracles** (Gk.; Lat. Hercules). Legendary hero of Greek mythology, born the mortal son of Zeus and Alcmēnē. Renowned for his preternatural strength and his 12 labours in the service of Eurystheus, he was later granted immortality. Heracles is usually depicted as a hero, with courage equal to his strength, but his temperament and various appetites eventually led to his portrayal as a tragic figure, a bully or even a buffoon (e.g. Sophocles, *Trachiniae*; Aristophanes, *Frogs*).

In literary sources Heracles is rarely associated with music. Apollodorus (ii.4.9) and Diodorus Siculus (iii.67.2) record the tale of the young hero as the student of Linus, son of Apollo and master of the lyre. Enraged by the chastisement of Linus, Heracles used his lyre as a weapon and murdered his teacher. Elsewhere (e.g. Euripides, *Alcestis*, 756–60) his musical performances serve only to display his ineptitude.

From about 530 to 480 BCE Heracles appeared as a musician on Athenian vases. Typical of these depictions is Heracles mounting a platform, preparing to play a kithara or lyre. In one scene he is tuning the kithara; in another Athena also mounts the platform while playing the pipes. Sometimes the performance is less formal, with Heracles seated and playing the barbitos. A consistent feature of these scenes is the presence of Athena. Boardman has argued that the association of Athena, Heracles and musical performance is an example of the political imagery employed by the tyrant Pisistratus and his sons in late 6th-century Athens, perhaps alluding to

the introduction of Homeric recital into the celebration of the Panathenaea. On other vases from approximately the same period Heracles is depicted playing the lyre or pipes, often in a procession and accompanied by Dionysus and satyrs. Such scenes, associating Heracles with drunken revelry, are common throughout antiquity.

In the Hellenistic and Roman periods Heracles occasionally appears in the company of the Muses. In 187 BCE M. Fulvius Nobilior built the Temple of Hercules of the Muses (*Herculis Musarum Aedes*) in Rome. The temple contained statues of the nine Muses and one of Heracles, perhaps the model for the playing Heracles found on the coins of Q. Pomponius Musa dating to 66 BCE and inscribed 'Hercules Musarum'. Ancient sources report that Fulvius, when in Greece, learnt about a cult of Heracles Musagētēs ('leader of the Muses'). Plutarch offers a different explanation that links the association of Heracles and the Muses to Rome: he wrote that Heracles taught the art of writing to Evander, the legendary founder of a settlement on the Palantine Hill (*Quaestiones Romanae*, lix).

MICHAEL W. LUNDELL

**Herbage, Julian (Livingston-)** (*b* Woking, 4 Sept 1904; *d* London, 15 Jan 1976). English musicologist. After attending the Royal Naval Colleges, Osborne and Dartmouth, he went to Cambridge, studying harmony and counterpoint with Charles Wood. In 1924 he began a brief theatrical career as conductor, composer, actor and producer in London and Liverpool. He joined the music staff of the BBC in 1927, and soon proved an invaluable editor and investigator of source material; his work on the Foundling Hospital score of *Messiah* in 1935 brought about the work's first broadcast in its original form. He took a leading part in programme planning for BBC concerts and for the annual Henry Wood Promenade Concerts. Herbage became assistant director of music at the BBC in 1940 but resigned in 1946 to work freelance, continuing to help plan and produce the Promenade Concerts until 1961. He served on the Royal Philharmonic Society's honorary management committee, 1940–71.

In 1944, while at the BBC, he instituted the first radio 'Music Magazine' in association with Anna Instone, whom he married that year and who later became BBC head of gramophone programmes. They remained joint editors of a programme broadcast every Sunday morning (except during the summer) for 29 years; from 1952 Herbage also introduced the programme. Their own range of musical interests, together with their ability to train and encourage some hundreds of broadcast contributors covering an extensive variety of subject matter, made the programme an outstanding success in stimulating wider tastes. Herbage had a special interest in 17th- and 18th-century music, and prepared several editions, including one of Arne's music for Milton's *Comus* (MB, iii, 1951); his compositions include an orchestral suite, *The Humours of Bath*.

NOËL GOODWIN

**Herbain** [first name unknown], Chevalier d' (*b* Paris, *c*1730 or *c*1734; *d* Paris, 1769). French composer. A sketch of his later life published in the *Mercure de France* (May 1753) states that in his youth he had been captain of a cavalry regiment stationed for a time in Italy. There he had composed three operas: an intermezzo *Il geloso* (performed at Rome in 1751 and later at Florence and at Bastia in Corsica), *Il trionfo del Giglio* and *La Lavinia* (performed at Bastia in 1751 and *c*1753 respectively). The only extant pieces from this Italian sojourn (contained in a volume of extracts from *Lavinia* published soon after his return to Paris) are five bravura arias and a duo, supported by fairly substantial orchestral accompaniments, which suggest that *Lavinia* was a typical *opera seria* of the time. For Paris Herbain composed *Iphis et Célime*, which was performed at the Opéra in 1756. More immediately appealing, because of its unpretentious lyricism, is his *opéra comique Nanette et Lucas* (1764) which had followed another work in the same genre, *Les deux talents* (1763). Some of Herbain's airs became very popular and appeared in nearly a dozen anthologies published in Paris and Liège during the second half of the century. Between 1755 and 1760 several of his works were performed at the Concert Spirituel, including the motet *Exultate Deo* (sung by Mlle Fels on 4 April 1755) and a 'new' symphony (8 December 1756). He also wrote numerous ariettes (not all extant), two cantatas and five *cantatilles*, some of which reflect the influence of the emerging Classical style. This influence is more strongly felt in his six sonatas for harpsichord with accompaniment, in which the harpsichord, using Alberti basses and other formulae of the period, establishes a relationship with the soloist typical of the early Classical school.

DAVID TUNLEY

**Herbart, Johann Friedrich** (*b* Oldenburg, 4 May 1776; *d* Göttingen, 14 Aug 1841). German philosopher, psychologist, educational theorist, aesthetician and musician. By the age of eight, Herbart had begun to study the piano, violin, cello and harp. His first appearances as pianist and cellist in private concerts date from 1787, by which time he had composed a number of short vocal works under the supervision of Karl Meineke, the organist at St Lamberti, Oldenburg. In 1794 he entered the University of Jena as a philosophy student of J.G. Fichte, but soon rejected many of his teacher's views. During his three-year stay in Jena he set Schiller's *Würde der Frauen* to music and composed a series of keyboard sonatas (now lost). After working as a tutor at Interlaken in Switzerland (1797–1800), where Pestalozzi had a profound effect on his own later theories of education, Herbart settled in Göttingen, receiving his doctorate at the university there in 1802. While resident in Göttingen he made the acquaintance of Forkel, who stimulated his interest in J.S. Bach and early music, and he completed a set of piano sonatas, only one of which (published by Kühnel in Leipzig, 1808) survives. Monographs on education and metaphysics date from the same period. In 1808 Herbart assumed Kant's chair at the University of Königsberg, and throughout the following two decades published extensively on metaphysics and psychology. In the course of his tenure in Königsberg he may have helped found an institute for church music designed for the local theology students. Two keyboard fugues composed during these years survive in manuscript. Troubled by the political situation in Königsberg, and unsuccessful in his application for Hegel's chair in Berlin, Herbart resettled in Göttingen in 1833 and remained there for the rest of his life.

In his writings Herbart proceeds from the assumption that philosophy must be grounded in practical experience. Viewing his task as a search for the underlying unity of the diverse phenomena of existence, he believed that philosophy, music and mathematics could ultimately be explained by the same law of harmony. As a psychologist, Herbart argued that everything in the mind arises from 'presentations', such as colours and sounds, which may either complement or oppose one another, and he located the chief purpose of education in the introduction of these presentations to students. He addressed aesthetics, defined as the branch of philosophy that seeks to explain intuitive judgments of approval or disapproval, in *Schriften zur Einleitung in die Philosophie* (1813) and *Kurze Encyclopädie der Philosophie aus praktischen Gesichtspunkten* (1831). For Herbart, aesthetic judgment focusses on the internal relationships between the elements peculiar to the various arts: colours for painting, outlines for sculpture, thoughts for poetry and sounds for music. As an early exponent of the stance later known as formalism, he felt that access to the power of an artwork could only be guaranteed through analysis, which aimed 'to reveal separately each and every fibre of art' and 'to throw light on all of the often very different relationships wherein beauty dwells'. Thus we come to understand musical beauty by analysing 'successive and simultaneous tonal relations', that is, melody and harmony. The observer's reaction to the artwork, which Herbart calls 'apperception', is beside the point; so too are questions of meaning, affective character and historical content. Herbart's formalism sometimes led him to extremes, as in his description of an opera libretto as an extrinsic addition, or his view of the actual sound of a score as an inessential property. Nonetheless, his aesthetics exercised a decisive impact on later thinkers. The philosophy of his pupil Robert Zimmermann was one of the sources for the classic exposition of musical formalism in Eduard Hanslick's *Vom Musikalisch-Schönen* (1854).

JOHN DAVERIO

**Herbeck, Johann** Ritter von (*b* Vienna, 25 Dec 1831; *d* Vienna, 28 Oct 1877). Austrian conductor and composer. At the age of 12 he became a choirboy in the Cistercian monastery in Heiligenkreuz, where he studied the piano with Ferdinand Borschitzky. During the summers of 1845 and 1846 he went to Vienna for instruction in composition with Ludwig Rotter. He then took up philosophy and law at the University of Vienna (1847) but did not complete these studies. He earned a living as a private tutor in Münchendorf, Lower Austria, in 1848–9 and began his musical career in 1852 as choirmaster at the Piaristenkirche in Vienna. From 1856 to 1866 he was choirmaster of the Männergesangverein in Vienna, and from 1858 he also taught at the conservatory and directed the choral society of the Gesellschaft der Musikfreunde. He conducted the concerts of the Gesellschaft der Musikfreunde from 1859 to 1870 and again (as Brahms's successor) from 1875 to 1877. In 1863 he became a member of Emperor Franz Joseph's Hofkapelle as a vice-Kapellmeister and succeeded to the position of Kapellmeister in 1866. He became co-director of the Vienna Hofoper in 1869 and was director from 1870 to 1875; he declined an invitation in 1877 to become a conductor at the Hofoper in Dresden.

Although largely self-taught in music, and with little instruction in composition, Herbeck mastered all the stylistic techniques of his time and was well acquainted with the classical polyphonic style of the late Baroque period. His choral music is particularly significant in that he overcame the triviality of contemporary writing for male voices; both his more elaborate compositions and folksong arrangements were influential for some considerable time after his death. His works owed much to the

Romantic world of Schumann, but as a conductor he was always interested in new or little-performed works. It was Herbeck who, on being shown by Anselm Hüttenbrenner the manuscript of Schubert's 'Unfinished' Symphony, realized its worth and succeeded in arranging for its first performance in 1865. As an opera conductor he did much for Wagner, performing both *Rienzi* and *Die Meistersinger*. He also recognized Bruckner's talent and was responsible for his appointment as professor of counterpoint at the Vienna Conservatory in 1868. He played a significant role in Viennese musical life during the third quarter of the 19th century.

WORKS

Sacred choral: 7 masses, 7 offs, 3 pss, 7 hymns, grad, all, 8 other smaller works; orat, inc.
Secular vocal: incid music to Faust (J.W. von Goethe), Wallensteins Lager (F. von Schiller), Corfiz Uhlfeld (M. Greif), Libussa (F. Grillparzer); 101 works, male vv (71 unacc.); 49 works, mixed chorus (42 unacc.); 53 solo songs
Orch: 4 syms: no.1, B♭, 1853; no.2, C, 1857; no.3, C, 1861 [with hp solo]; no.4, d, op.20 (Vienna, 1877) [with org solo]; Tanzmomente, op.14 (Vienna, 1868); Sym. Variations (Vienna, 1875); Künstlerfahrt, 1876
Chbr and pf: 3 str qts; Qt, 2 vn, va, b; 2 marches, pf 4 hands

OTHMAR WESSELY

**Herberigs, Robert** (*b* Ghent, 19 June 1886; *d* Oudenaarde, 20 Sept 1974). Belgian composer. He studied at the Royal Ghent Conservatory. When 23 years old he won the Prix de Rome for his *Légende de Saint-Hubert*. Later he achieved success in Belgium and abroad with works such as the symphonic poem *Cyrano de Bergerac* for horn and orchestra and the musical comedy *Le mariage de Rosine*. He was also a gifted painter and a popular novelist. It was not until 1947 that *Le chant d'Hiawatha* (written in 1922) was performed for the first time, on the initiative of Belgian Radio. This explains why in the period 1920–45 he wrote mostly piano music, songs and chamber music. After that he resumed writing for orchestra. His works are fundamentally traditional, although musical developments at the beginning of the 20th century left their imprint. (*CeBeDeM directory*)

WORKS
(*selective list*)

Theatre and spectacle: Le mariage de Rosine (musical comedy), 1925; Music for a Pageant, St Baaf Cathedral, Ghent, 1949; Music for Son et Lumière in the Gravensteen, Ghent, 1960; De nachtelijke wapenschouw [The Night Review], 1961
Orch: Cyrano de Bergerac, hn, orch, 1912; Le chant d'Hiawatha (after H.W. Longfellow), 1922; De vrolijke vrouwtjes van Windsor, 1950; Oden aan de Muzen, 1955; De vier jaargetijden (after etchings by P. Breughel), 1956; Vier oden aan Botticelli, 1956; Romeo en Julia, sym. poem, 1965
Vocal: La légende de Saint-Hubert (cant.), S, T, B, male chorus TB, mixed chorus, orch, 1909; Agnus Dei (orat), 1947–8; many masses and choral works
Song cycles: La chanson d'Eve, 1924; Chants évangéliques, 1930–32; Gezelle liederen, 1942–3
Pf: Poèmes élégiaques, 1921; Ariane, 1924
Pf works, 1941–4: La fontaine bellerie, Concert galant, Suite rustique; 21 sonatas and sonatinas; ballades, rhapsodies, caprices, preludes

CORNEEL MERTENS/DIANA VON VOLBORTH-DANYS

**Herbert, Edward,** Lord of Cherbury and Castle Island (*b* Eyton-on-Severn, 3 March 1582; *d* London, 20 Aug 1648). English courtier, author, amateur lutenist and composer. He was the brother of George Herbert, the poet. He visited Paris in 1608–9 and in 1619 he was sent as ambassador to the court of Louis XIII. He was dismissed in 1624 over a difference of opinion on policy and returned home deeply in debt. He was created Lord Herbert of Cherbury on 7 May 1629. Herbert's main contribution to music is the collection of lute music he made, probably upon his return from France in 1624 (*GB-Cfm* Mus 689).

His own music, in manuscript, amounts to four preludes, four pavans and a courante. Even in his latest compositions, Herbert appears to have retained a preference for the earlier contrapuntal style. His music shows little sign of influence by the French school to which so many of the pieces in his collection belong.

DIANA POULTON/ROBERT SPENCER

**Herbert** [Harbert], **George** (*b* Montgomery, 3 April 1593; *d* Bemerton, Wilts., 1 March 1633). English poet of Welsh birth. He studied classics and divinity at Trinity College, Cambridge (BA 1612, MA 1616), where he became university praelector in rhetoric (1618) and university orator (1620). This last position, and his family links to the powerful Pembroke nexus at court, promised high office there or in government. But after a period of retirement he took orders (1626) and eventually (1629) accepted the obscure and impoverished living of Bemerton, near Salisbury. Herbert's most important spiritual links were with the Little Gidding religious community of Nicholas Ferrar, to whom he bequeathed the poems posthumously published as *The Temple* (1633). Herbert's pastoral resolutions were also published posthumously, as *A Priest to the Temple, or, The Countrey Parson* (1652). They confirm, and early biographies by Barnabas Oley (1651), Izaak Walton (1670) and John Aubrey enlarge, the portrait of Herbert as saintly poet of Christian affliction. *The Temple* remained popular even during periods when other 17th-century poets (including other priest-poets such as John Donne, Robert Herrick, and bishops Henry King and Jeremy Taylor) were neglected. Herbert's learning, renunciation, evident piety and short life all made him an early subject of Anglican hagiography, and since 1986 his death has been commemorated in the Church of England calendar.

According to Walton, Herbert's 'chiefest recreation was Musick, in which heavenly Art he was a most excellent Master'; he played the lute and viol and sang. In

his last years he took part regularly in 'an appointed private Musick-meeting' and attended services at Salisbury Cathedral twice a week. In his poems there are many references to music, which is both discussed (e.g. in *Church-Musick*) and deployed in images. These range from bells, rounds and country airs to angels' harmony; the most important are of the heart or soul as an instrument to be tuned by God through the vicissitudes of spiritual life and so made fit for his service, and of music as heavenly order. For Herbert and many of his contemporaries, such images go beyond mere analogy. This helps to explain their frequency in 17th-century religious verse, but they are commoner in Herbert's than elsewhere and confirm his considerable technical knowledge of music and deep love of it. Like Richard Hooker and the poets listed above, Herbert defended sacred music, including its regular liturgical use, in the controversies which surrounded it in his day. *Church-Musick* praises its subject as 'Sweetest of sweets'.

The titles which Herbert gave to several poems, such as *Antiphon I*, *Antiphon II* and *A Dialogue-Antheme*, suggest musical setting, but it is unsafe to infer that he intended them to be set. Some poems (including the popular *Easter*) introduce inset hymns or songs. According to Aubrey he 'sett his own lyricks or sacred poems', and Walton stated that Herbert 'did compose many *divine Hymns and Anthems*, which he set and sung to his *Lute* or *Viol*', but Walton specifically referred only to two stanzas, and none of the settings has survived. There are several 17th-century settings of poems by Herbert, five of them printed by Patrides. Anthem settings include six by John Jenkins and one each by John Wilson (ed. J. Jacquot, *Poèmes de Donne, Herbert et Crashaw, mis en musique par leurs contemporains*, Paris, 1961) and George Jeffreys. Solo settings survive by Henry Lawes, Blow and Purcell. In his *Psalms and Hymns in Solemn Musick* (1671) John Playford provided settings of *The Altar* and of seven psalms in metrical versions that he attributed, with some hesitation, to Herbert. In the 18th century Herbert's poems were adapted as hymns by the Moravians and Methodists; between 1737 and 1744 John Wesley published 49 adaptations in hymnbooks and collections of sacred verse. Several 20th-century composers, including Walford Davies, Rubbra, Vaughan Williams and Britten, have produced settings; the best-known are those in Vaughan Williams's *Five Mystical Songs*.

The fullest edition is still *The Works of George Herbert*, ed. F.E. Hutchinson (Oxford, 1941, 2/1945).

RUTH SMITH, MICHAEL SMITH, JEREMY MAULE

**Herbert, Victor (August)** (*b* Dublin, 1 Feb 1859; *d* New York, 26 May 1924). American composer, conductor and cellist of Irish birth. He was the most talented and successful American operetta composer and important also as an advocate of copyright and performance-rights protection for composers.

1. Life. 2. Stage works. 3. Instrumental music.

1. Life. Herbert's father died when the boy was an infant, and he grew up in London with his maternal grandfather, the celebrated Irish novelist, poet and composer Samuel Lover (1798–1868). In 1866 Fanny Lover Herbert married a German physician; the family settled in Stuttgart, where Victor received musical training as well as a strong liberal education. He retained a lasting pride in his Irish (Protestant) heritage, reflected in many of his operettas.

He turned to music when financial difficulties prevented him from pursuing medicine, studied the cello with Bernhard Cossmann (1874–6), then entered the Stuttgart Conservatory, where he studied with Max Seifritz. He spent a year in the orchestra of the wealthy Russian Baron Paul von Derwies and another year in Vienna as soloist with the orchestra of Eduard Strauss, who had succeeded his brother Johann. In the light of his operetta work, the time in Vienna must be regarded as a significant formative experience. In 1881 he joined the court orchestra in Stuttgart, where he met his future wife, Therese Foerster (1861–1927), a soprano in the court opera. During five years there, he appeared as soloist in his first two large-scale works, the Suite for cello and orchestra op.3, and the Cello Concerto no.1 op.8. Soon after their marriage, on 14 August 1886, the Herberts sailed for the USA. Therese had been engaged by the Metropolitan Opera to sing (in German) the title role in the American première of *Aida*; Victor was to be principal cellist in the orchestra.

Herbert immediately began to play an active role in New York' musical life as a cello soloist, a member of the New York String Quartet and assistant conductor to Anton Seidl during summer concerts at Brighton Beach. He went on to conduct at summer concerts and festivals, where his programming of lighter works along with more serious repertory created the model for the later Victor Herbert Orchestra. He joined the faculty of the National Conservatory of Music, probably in autumn 1889. His compositions at this time were concert works, culminating in the Second Cello Concerto op.30 (1894). In 1893 he became director of the 22nd Regiment Band founded by Patrick S. Gilmore; with this ensemble he toured widely for seven years, performing original band compositions and transcriptions from the orchestral repertory. He composed his first operetta, *Prince Ananias*, in 1894 for a popular troupe, the Bostonians. From then on he occasionally drew upon material from his operettas for a number of fine band marches.

By the turn of the century Herbert had achieved considerable success as an operetta composer (*The Serenade*, 1897, and *The Fortune Teller*, 1898), but he withdrew from the theatre to concentrate on his position as conductor of the Pittsburgh SO (1898–1904). He developed the orchestra to the point where it was compared favourably with the Boston SO and the New York PO. A disagreement with the management led to his resignation, whereupon he founded the Victor Herbert Orchestra, which he conducted on tours and at summer resorts for most of the rest of his life in programmes of light orchestral music.

Before resigning his Pittsburgh position, Herbert had returned to the theatre with *Babes in Toyland* (1903), the first of a series of hits that made him one of the best-known figures in American music. It was followed by *Mlle Modiste* (1905) and *The Red Mill* (1906), both signal successes. In 1908 he was elected to the National Institute of Arts and Letters. After an extended search for a serious opera libretto, he composed *Natoma*, which was produced in Philadelphia by the Philadelphia-Chicago Opera Company on 25 February 1911, and remained in its repertory for three years. *Madeleine*, a lighter work in one act, was produced at the Metropolitan Opera on 24 January 1914 but proved too slight to retain a hold in the repertory.

Even while composing two operas, Herbert was working on more operettas, including two of the finest, *Naughty Marietta* (1910) and *Sweethearts* (1913). His longstanding wish to compose an Irish operetta was finally gratified with the production of *Eileen* (1917; originally entitled *Hearts of Erin*), which boasts a solid libretto concerning the Irish rebellion of 1798 and a rich score, but marks the end of his greatest theatre pieces. He had also composed one of the first original orchestral scores for a full-length film, *The Fall of a Nation* (1916). Long thought to be lost, the score was rediscovered in the film-music collection of the Library of Congress and recorded in 1987.

*Victor Herbert*

Herbert was an active fighter for the legal rights of composers. His testimony before Congress had great impact on the American copyright law of 1909 which, among other provisions, secured composers' royalties on the sales of sound recordings. In 1914 he was one of the founders of ASCAP, of which he remained a vice-president and director until his death, and in 1917 he won a landmark suit carried to the Supreme Court giving composers the right to collect performance fees (through ASCAP) for public performance of their work.

By the end of World War I, musical styles in the popular theatre were greatly changed. Herbert changed with them to a degree, writing several 'musical comedies' with simpler songs and less elaborate ensembles, but his heart remained with the European-style operetta created for highly trained singers. In the last decade of his career, he was often called upon to provide the ballet music for elaborate production numbers in revues or shows by such composers as Irving Berlin or Jerome Kern.

2. STAGE WORKS.

*(i) Operettas.* Herbert was a prolific composer for the theatre, occasionally composing as many as four shows simultaneously. He wrote well over 50 full scores for the stage, in addition to numbers for the Ziegfeld Follies and elaborate private skits for entertainments of the Lambs, a theatrical club. Although he had as thorough a grounding in composition as any American composer of his day, he never lost the popular touch or the desire to reach large audiences with his music.

During the early part of Herbert's career, activity in the musical theatre was widely dispersed through travelling companies that commissioned shows and produced them in their home base, though usually with a New York run as well. A long run on Broadway was not then necessary for success on the road, although acclaim in New York naturally publicized the show and helped receipts elsewhere. Gradually, as Broadway became the focus of American theatrical life, shows were crafted specifically to meet New York tastes. Besides those for the operettas mentioned above, other strong scores are those for *The Serenade* (1897), *The Fortune Teller* (1898), *Cyrano de Bergerac* (1899), *The Singing Girl* (1899), *The Enchantress* (1911), *The Madcap Duchess* (1913), *The Only Girl* (1914) and *Eileen* (1917). In musical quality they compare favourably with the works of the principal European operetta composers.

During the 1890s American musical theatre productions were likely to be imitations either of Gilbert and Sullivan or of Viennese operetta. Several Millöcker works and Suppé's *Boccaccio* were exceptionally popular in America (the latter always bowdlerized). Herbert's German education and his experience in the Strauss orchestra assured his thorough understanding of the Viennese style (the Viennese lilt is evident in his own recordings of waltz tunes from his operettas). Although Herbert had never heard the work of Gilbert and Sullivan before his arrival in America in 1886 he learnt their style, since American theatrical companies like the Bostonians had been founded to perform *HMS Pinafore*, and newer

works written to suit the talents of the members inevitably bore at least a family resemblance to the Savoy operas.

Herbert' preferred to compose for trained singers rather than for comedians who sang or for trained singers, and the operettas he wrote for stars like Alice Nielson (*The Fortune Teller*), Fritzi Scheff (*Mlle Modiste*) or Emma Trentini (*Naughty Marietta*) placed great demands on the chorus and orchestra as well as the principals. These operettas tended to reflect the Viennese tradition, though Herbert was perfectly capable of writing in the Gilbert and Sullivan tradition when required, as for example in the quintet 'Cleopatra's Wedding Day' from *The Wizard of the Nile*. Harry B. Smith's libretto for *The Serenade*, Herbert's first major success, consists largely of situations stolen from *The Pirates of Penzance* and *The Gondoliers*, reassembled into an effective comic plot. Smith's habit of re-using Gilbertian ideas continued to draw forth Sullivanesque music from Herbert. In *The Singing Girl*, an Austrian minister of police named Aufpassen enforces a dreaded law against kissing without a licence in obvious imitation of *The Mikado*.

Vienna was a stronger and continuing influence in Herbert's operettas, even those with librettos by Smith. The most characteristic Herbert song was the waltz. Many achieved remarkable popularity, despite the fact that they were beyond the technique of most amateurs. Another speciality was the variation song, with a series of refrains in different styles (e.g. 'Serenades of All Nations' from *The Fortune Teller*, in which a ballerina demonstrates serenades by admirers from Ireland, Spain, China, Italy, France and Haiti) or actual variations of the same tune ('The Song of the Poet' from *Babes in Toyland*, which turned the familiar lullaby 'Rock-a-bye baby' into a brassy march, a Neapolitan song or a ragtime song).

Herbert also excelled in imitations of traditional music in operettas with exotic settings. These include evocations of Spanish music (*The Serenade*), Italian (*Naughty Marietta*), Austrian (*The Singing Girl*) and Eastern (*The Wizard of the Nile*, *The Idol's Eye*, *The Tattooed Man* and other works with settings from Egypt to India). In *The Fortune Teller* he even managed to match Strauss for a vigorous csardas. Except for *Eileen*, which is Irish throughout, the frequent Irish songs in his operettas are incidental to the plot.

Herbert's career in the theatre lasted from 1894 to 1924, a period of great changes in the style of popular musical shows. In his last decade he wrote in the musically simpler style coming into favour and imitated popular new song-types including ragtime, the tango and the foxtrot. He collaborated with Irving Berlin in *The Century Girl* (1916). Although these later shows contain memorable numbers, the real Herbert personality remained evident in the more elaborate operettas of the older style, and by far the biggest hit among his songs of the last years was the waltz song 'A Kiss in the Dark' (*Orange Blossoms*). Nonetheless, with *The Red Mill* (1906) he was already approaching the fast-moving directness of the later musical comedy with considerable success.

Herbert used a slightly larger orchestra than Sullivan, often employing a harp and more varied percussion instruments to colourful effect. Except when short of time he always wrote his own orchestrations, and his handling of the theatre orchestra consistently attracted the highest praise from critics and fellow composers. Almost without exception, later revivals used updated orchestrations, heavy with saxophones and far from his own string-dominated sonorities. To date, his only theatre composition recorded with its original orchestration is *Naughty Marietta*.

Many of Herbert's stage works were criticized in his own day for poor librettos and conventional lyrics. These weaknesses have prevented large-scale rediscovery of his operettas, though a few revivals with heavily rewritten librettos took place in the 1980s, possibly the harbinger of a more general reconsideration of his art.

*(ii) Operas.* With his thorough musical training and extensive theatrical experience, Herbert naturally wished to compose a serious opera. Because of his popularity, the mere announcement that he had signed a contract with Oscar Hammerstein I to produce a grand opera and that the impresario had offered $1000 for a libretto (*Musical America*, 13 April 1907) triggered nationwide speculation and enthusiasm. The choice of libretto and the progress of the composition and production were followed eagerly by the press, raising expectations that could hardly be filled with even the most glorious of successes. Although *Natoma* was produced with great care and with a cast featuring John McCormack and Mary Garden, the première in 1911 enjoyed only a succès d'estime, mainly because of the weakness of Joseph Redding's book and the use of French, Irish and Italian singers in what was proclaimed as an American opera (it is set on the Californian coast in the 1820s and concerns the love of an American naval officer for an Amerindian princess. Herbert, an ardent admirer of Wagner, wrote a score that effectively mingled leitmotif construction in a continuing orchestral counterpoint with colourful and melodious set pieces.

Herbert's only other opera was *Madeleine*, a one-act comedy based on a French play about an operatic prima donna. At the première in 1914 it was paired with *Pagliacci*, with Caruso in the principal part. Not surprisingly, *Madeleine* functioned as little more than a curtain-raiser. Its style is 'conversational' throughout, with continuing motivic commentary from the orchestra. The one real set piece, ('A Perfect Day') was added at the last moment at the insistence of Frances Alda, who refused to sing the title role otherwise.

*Madeleine* was dropped from the repertory of the Metropolitan Opera after half a dozen performances, though G. Schirmer published the work in full score, an unprecedented distinction for an American opera.

3. INSTRUMENTAL MUSIC. Herbert's instrumental music fell out of favour after his own time, though it has begun to reappear in concert and recordings. The one substantial exception was the Second Cello Concerto, in E minor, first performed by the composer with the New York PO under Anton Seidl' in 1894. The work is Lisztian in its thorough-going employment of thematic transformation in all three movements. Not only did it enjoy an immediate success with the audience, but it also inspired Dvořák, who knew Herbert well as a colleague at the National Conservatory, to composer his own Concerto in B minor. Two earlier compositions for cello and orchestra have begun to return to the repertory. The Suite for Cello and Orchestra (1884), which, despite being identified as op.3 on the published score, is actually Herbert's earliest known composition, already foreshadows the successful composer of light music (especially in the fourth movement, which was arranged for many instruments and

combinations), athough the finale, filled with virtuoso runs in octaves, gives some indication of the composer's technical abilities. Herbert gave the first performance of the Cello Concerto no.1 in Stuttgart shortly before leaving for the USA. The work remained in manuscript, evidently unperformed, although a 1986 recording reveals an attractive composition that effectively balances the requirements of lyrical expression and virtuosity.

Herbert composed his most important purely orchestral work, the tone poem *Hero and Leander* (1901), for the Pittsburgh SO during his conductorship there. The work reflects his admiration for Liszt and Wagner in its programmatic outline, its thematic transformations, and the Tristanesque climax of the 'storm' music that brings about Leander's death. Also dating from Pittsburgh years is a four-movement programmatic suite, *Columbus* op.35; the first and last movements had been composed to accompany a theatrical spectacle at the 1893 Colombian Exposition in Chicago, but the project was never completed. Herbert added two middle movements in 1902 and gave the first performance himself in 1903. It was his last score of a symphonic nature.

In addition to these large-scale compositions, Herbert regularly composed smaller works – miniatures either for his own performance as a cellist or for the Victor Herbert Orchestra. Orchestral composition in his last years concentrated on overtures commissioned for feature films (for which, with the exception of *The Fall of a Nation*, he did not write the rest of the score). His last appearance as composer of a new work was in the famous Aeolian Hall concert of 12 February 1924, the 'Experiment in Modern Music' produced by Paul Whiteman and best known for being the occasion of the première of Gershwin's *Rhapsody in Blue*. Herbert's work for this occasion, *A Suite of Serenades*, was a set of exotic character-pieces not notably 'modern' in spirit, but he also made suggestions regarding Gershwin's piece (which he admired greatly) to its composer. Evidently a healthy man at 65, Herbert died suddenly of a heart attack three months later, shortly after his final show, *The Dream Girl*, began its pre-Broadway run in New Haven, Connecticut.

WORKS

*printed works published in New York unless otherwise stated; most MSS in US-Wc*

STAGE

*unless otherwise stated, dates are of first performance*

Prince Ananias (2, F. Neilson), 1894 (1895); The Wizard of the Nile (3, H.B. Smith), 1895; The Gold Bug (musical blend, 2, G. MacDonough), 1896, excerpts (1895); The Serenade (3, Smith), 1897; The Idol's Eye (3, Smith), 1897; The Fortune Teller 1898; Cyrano de Bergerac (3, Smith; S. Reed, after E. Rostand), 1899; The Singing Girl (3, Smith; S. Strange), 1899; The Ameer (extravaganza, 3, K. La Shelle; F. Ranken), 1899; The Viceroy (3, Smith), 1900; Babes in Toyland (extravaganza, 3, MacDonough), 1903; Babette (romantic comic op, 3, Smith) 1903; It Happened in Nordland (musical extravaganza, 2, MacDonough) 1904 (1905); Miss Dolly Dollars (musical comedy, 2, Smith), 1905; Wonderland [Alice and the Eight Princesses] (musical extravaganza, 3, MacDonough), 1905; Mlle Modiste (2, H. Blossom), 1905; The Red Mill (musical comedy, 2, Blossom), 1906; Dream City (2, E. Smith), 1906 (1907); The Magic Knight [Night] (operatic burlesque, 1, E. Smith), 1906 (1907); The Tattooed Man (2, H.B. Smith and A.N.C. Fowler; lyrics H.B. Smith), 1907; Miss Camille (musical skit, G.V. Hobart), 1907, excerpts (1907); The Song Birds (musical skit, Hobart), 1907, excerpts (1907); Algeria (musical play, MacDonough), 1909; Little Nemo (?musical play, 3, H.B. Smith, after comic strip by Winsor McKay), 1908; The Prima Donna (3, Blossom), 1908; Old Dutch (musical farce, 2, Hobart; E. Smith), 1909; Naughty Marietta (2, R.J. Young), 1910; When Sweet Sixteen (song play, 2, Hobart), 1910; Natoma (op, 3, J.D. Redding), 1911 (1913); Mlle Rosita [The Duchess] (3, H.B. Smith; J. Herbert), 1911; The Enchantress (2, H.B. Smith; F. de Gresac), 1911; The Lady of the Slipper (musical comedy, 3, J. O'Dea; A. Caldwell and L. McCarty), 1912; Sweethearts (2, R.B. Smith; H.B. Smith and De Gresac), 1913; The Madcap Duchess (2, D. Stevens, after J.H. McCarthy), 1913; Madeleine (lyric op, 1, G. Stewart, after A. Decourcelle and L. Thibaut: *Je dîne chez ma mère*), composed 1913, perf. 1914 (1913); The Debutante (musical comedy, 2, H.B. Smith and R.B. Smith), 1914; The Only Girl (musical farcical comedy, 3, Blossom, after L. Fulda), 1914; The Princess Pat (3, Blossom), 1915; Hearts of Erin [Eileen] (3, Blossom), 1917; Her Regiment (?musical play, 3, W. Le Baron), 1917; The Velvet Lady (musical comedy, 3, Blossom); 1919; Angel Face (musical play, 3, R.B. Smith; H.B. Smith), 1919 (1920); My Golden Girl (?musical comedy, 2, F.A. Kummer), 1919, excerpts (1920); Oui Madame (musical play, 2, R.B. Smith; G.M. Wright), 1920, excerpts (1920); The Girl in the Spotlight (?musical play, 2, R. Bruce), 1920, excerpts (1920); Orange Blossoms (?comedy with music, 3, B.G. de Sylva; De Gresac), 1922; The Dream Girl (musical play, 3, H. Atteridge; Young), 1924, excerpts (1924);

Other music for revues, incl.: The Century Girl, New York, 1916, collab. I. Berlin, excerpts (1916); scores for stage works (Seven Little Widows, The House that Jack Built, The Lavender Lady, Hula-Lula, The Garden of Eden and unidentified material) in *US-Wc*

VOCAL

Choral: Aus 'Liedern eines fahrenden Gesellen', male vv, op.20/2 (Berlin, 1890); Der Gefangene (dramatic cant., R. von Baumbach), solo vv, chorus, orch, 1891 (Berlin, 1891), Eng. trans. as The Captive, op.25 (1915); Christ is risen, anthem, solo vv, chorus, orch/org, 1904 (1908); The Cruiskeen Lawn (trad. Irish), male vv (1913); Widow Machree (S. Lover), male vv (1915); The Call to Freedom (patriotic ode, Herbert), S, chorus, pf (Boston, 1918); Lora Lee (J.I.C. Clarke), male vv (1922)

*c*80 songs, 1v, pf, incl. Frühlingslied, op.14 no.1 (Berlin, 1889); If love were what the rose is (A.C. Swinburne) (1907); I want to be a good lamb (G.V. Hobart), 1909 (1940); Farewell (E. Locke) (1919); Molly (R.J. Young) (1919); The Equity Star (G. Stewart) (1921)

INSTRUMENTAL

Orch: Suite, vc, orch, op.3, 1884; Vc Conc. no.1, op.8, 1884; Royal Sec, champagne galop, before 1885; Serenade, str orch, op.12, 1889; Fantasie on 'The Desire' of Schubert, vc, orch, 1891; Irish Rhapsody, 1892; Fantasia on Mascagni's Cavalleria rusticana, vn, orch, ?1983; The Vision of Columbus, 1893; Légende, vc, orch, before 1894; Vc Conc. no.2, e, op.30, 1894; America Fantasia, 1898; Suite romantique, op.31, 1901; Pan-Americana, morceau caractéristique, 1901; Hero and Leander, sym. poem, op.43, 1901; Woodland Fancies, suite for orch, op.34, 1901; Columbus, suite, op.35, 1903; L'Encore, fl, cl, orch, *c*1904; Western Ov., ?1906; A Suite of Serenades, 1924

Marches (for band unless otherwise stated; also pubd in versions for pf): Eldorado, 1894; The Belle of Pittsburgh, 1895; The American Girl, band/orch, 1896; Baltimore Centennial, 1896; The Veiled Prophet, 1896; McKinley Inauguration March, 1897; March of the 22nd Regiment, band/orch, 1898; The President's March, band/orch, 1898; Auditorium Festival March, orch, 1901 [pubd as Festival March]; Aschenbrödel March, orch, 1910; The Lamb's March, orch, 1914; The World's Progress, pf, 1916; Defendam March, 1919; The Marion Davies March, pf, 1923 [for the film When Knighthood was in Flower]; Cosmopolitan March, orch, ?1923; Salute to America, orch, n.d.

Light orch scores, many pubd or orig. composed for pf, incl. Badinage (1895); Yesterthoughts (1900); Under the Elms: souvenir de Saratoga (1903); Spanish Rhapsody (?1905); The Jester's Serenade (1908); 3 Compositions, str orch: Air de ballet, Sunset, Forget-me-not (1912); Danse baroque (1913); Whispering Willows (1915); Indian Summer (1919); Indian Lullaby (1922) [later entitled Dream On]

*c*22 chbr works, incl. Einsamkeit and Humoresque, 3 fl, 2 ob, 4 cl, s sax, a sax, b cl, cb cl, 2 bn, *c*1898, lost; Petite valse, vc/vn, pf (Milan, 1905); Duo, 2 vn, pf (1923); many short works for vc, pf

Film scores: The Fall of a Nation, complete film score, 1916, excerpts (1925–6); Under the Red Robe, ov., 1923, as Dramatic Ov. (1938); The Great White Way, ov., 1923, as Golden Days Ov.

STEVEN LEDBETTER

**Herbig, Günther** (*b* Ústí nad Labem, Czechoslovakia [now Czech Republic], 30 Nov 1931). German conductor. At nine he began to study the cello, the piano and the flute, followed by conducting lessons with Hermann Abendroth at the Musikhochschule in Weimar (1951–6) and finally with Hermann Scherchen, Arvids Jansons and Karajan. He made his début in 1957 at the opera house in Erfurt, and was soon appointed as conductor to the Deutsches Nationaltheater in Weimar (1957–62), where he also taught at the conservatory. In Potsdam he became the director for the Hans-Otto-Theater (1962–6) until he was finally called to the (East) Berlin SO (1966–72), where he was conductor until 1972, when he received the title of Generalmusikdirektor. Herbig moved to the Dresden PO (1972–7) as Generalmusikdirektor, but returned to the Berlin SO (1977–83) and began to increase his exposure in the West by taking principal guest conductorships with the Dallas SO (1979–81) and the BBC Northern SO in Manchester (1981–4). He finally moved west as music director of the Detroit SO (1984–90) and then of the Toronto SO (1988–94); but he continued to conduct in the eastern part of Germany, where he had won the national arts prize in 1973. He has recorded with his orchestras in Berlin, Dresden, Manchester and Toronto, and also with the RPO and the Philharmonia. While conducting mostly traditional Austro-German repertory, Herbig has also given the premières of many works by composers from the former East Germany, including Eisler, Matthus, Thiele, Manfred Schubert and Zechlin.

JOSÉ BOWEN

**Herbing, August Bernhard Valentin** (*b* Halberstadt, 9 March 1735; *d* Magdeburg, 26 Feb 1766). German organist and composer. The son of the Halberstadt Kantor Johann Georg Herbing (1698–1783), who was his first teacher, he was enrolled in the Magdeburg Cathedral choir school at the age of ten. In 1755 he was appointed vicar and assitant organist of the cathedral. When the cathedral organist Georg Tegetmeyer died in 1764 Herbing was named principal organist, but he died only 17 months later.

Herbing's two collections of 70 humorous lieder, the *Musicalische Belustigungen*, i (1758, rev. 2/1765) and ii (1767), reveal a gifted lied composer with a flair for comedy and drama. His only other collection, the *Musikalischer Versuch* (1759; ed. in Kretzschmar, 1910), comprised tales and fables of Gellert set as cantata-like scenas; their recitatives, arioso melodies and keyboard interludes created a form which was a significant predecessor of the German ballade. Many of his songs are written on three staves to accommodate the increased importance of the keyboard accompaniment. Herbing also published a keyboard march (*Musikalisches Allerley*, i, 1761) and may have composed a few songs (manuscript in *B-Br*) attributed to a 'Herbing'.

RAYMOND A. BARR

**Herbst** [Autumnus], **Johann Andreas** (*b* Nuremberg, bap. 9 June 1588; *d* Frankfurt, 24 Jan 1666). German theorist and composer. His achievements are in many respects similar to those of Michael Praetorius. As Kapellmeister both introduced the new concerto style to various German cities; many of their compositions include careful instructions for performance in the concertato style. Herbst's *Musica practica*, a guide to singing in the Italian manner, is a reorganization of material from the third volume of Praetorius's *Syntagma musicum*, and Praetorius's proposed, but never published, fourth volume of *Syntagma musicum*, which would have dealt with composition, was realized by Herbst's *Musica poetica*.

1. Life. Herbst's well-written theoretical studies indicate that he had a good education, probably at a Lateinschule in Nuremberg. It is not known who taught him music, but the foremost composer in the area in his early years was Hassler, who was in and out of Nuremberg until 1608, and whether or not Herbst actually studied with him he was no doubt influenced by familiarity with his music. Recommended as an experienced composer and performer, particularly on the violin, Herbst left Nuremberg in 1614 to become Kapellmeister at the court of Landgrave Philipp V at Butzbach. In 1619 he entered the service of Philipp's brother, Ludwig V, at the somewhat larger Hessian court at Darmstadt. Four years later he was appointed Kapellmeister at Frankfurt, a position created for him by the city council (see illustration). It was there that he made his greatest contribution to practical music, giving impulse and direction to what had previously been only a modest musical life. His best-known pupil was P.F. Buchner.

In 1636 Herbst left Frankfurt to become Kapellmeister at Nuremberg. (Contrary to what has been written about this move he applied for the position – he was not summoned by the city council.) His chief responsibility was to conduct the traditional Sunday afternoon performances at the Frauenkirche, the only major Nuremberg church that did not have its own Lateinschule. Organists from other churches, the instrumentalists and singers employed by the city, young musicians being trained for

*Johann Andreas Herbst: engraving by Sebastian Furck, 1635*

future employment, and the best singers from the choirs of the church schools all came together for these concerts. There is no indication that Herbst added anything to Nuremberg's already active musical life, and he antagonized his colleagues by keeping for himself the 100 gulden that the city had formerly distributed among the performers at the Frauenkirche concerts. When he left in 1644 to return to Frankfurt he complained: 'I was able to prosper in nothing in my home city'. He cannot have been referring to salaries, for he received 280 gulden in Nuremberg and only 200 at the time he had left Frankfurt. Furthermore, during his stay in Nuremberg he was able to publish his two most important books, *Musica practica* (1642) and *Musica poetica* (1643).

Herbst's second Frankfurt period, from 1644 until his death, is marked by the culmination of his work as a church musician about 1650, followed by a gradual decline as the city council steadily withdrew its support. His health began to fail after 1650, and the council was already looking for a successor before his death.

2. Works. Herbst's theoretical works are more significant than his music. His *Musica practica* presents the art of singing, especially the use of ornamentation. While his chief source was chapter 9 of Praetorius's *Syntagma musicum*, iii, his purpose was different: *Syntagma musicum* is largely a handbook, whereas Herbst's work emphasizes practical singing exercises to be used in schools and as such is the first independent instruction book of its kind. It was a model for many later works and was acknowledged as late as 1780 by J.A. Hiller in his *Anweisung zum musikalisch-zierlichen Gesange*. Herbst's *Musica poetica*, a valuable source for the practice of musical-rhetorical figures, is the first instruction book in German on the art of composition (the earlier works of Burmeister, Nucius and Thuringus are in Latin). Subtitled 'a short introduction to how one should compose a vocal work', the book, like all treatises on *musica poetica*, can be divided into two parts: practical rules of counterpoint and instructions for setting a text to music. It was apparently widely used during the 17th century, according to later acknowledgments, and was not superseded until after 1700, when the art of composition as described by Herbst was made obsolete by the method of composing over a thoroughbass. Herbst's third theoretical work, *Compendium musices*, of which no copies are known to exist today, presented the rudiments of music that boys learnt during singing lessons at church schools. It was probably similar to S.T. Staden's *Rudimentum musicum* (Nuremberg, 3/1648). *Arte prattica & poëtica* is a German translation of Latin works by G.B. Chiodino on counterpoint and Wolfgang Ebner on the basso continuo.

Herbst's music, like that of Praetorius and Schütz, exemplifies the transition in Germany from Renaissance to Baroque styles. Neither the *Theatrum amoris* (1613), 'in the style of the Italian madrigal', nor the *Meletemata sacra* (1619), a collection of motets, has a continuo part, unlike the 1622 motets dedicated to Philipp V. He used another trait of Baroque music, the concertato style, in a masterly manner in several of his polychoral works, which with their division into movements and use of chorale texts and melodies anticipate the cantatas of the late 17th century. As far as is known, Herbst, like Praetorius and Schütz, wrote no independent instrumental music. Neither did he write solo vocal concertos, an italianate form imitated by most 17th-century German composers, including Praetorius, Schütz and Herbst's contemporary in Nuremberg, Johann Staden. Furthermore, he did not experiment with recitative, and his music does not feature a sensitive setting of the text, which of course is largely precluded in massive polychoral concertos; in these respects his music is like Praetorius's but unlike Schütz's. Thus, Herbst was one of the leaders in introducing the basso continuo and concertato style to Germany but was neither as daring nor as original and poetic as Schütz.

HAROLD E. SAMUEL

**Herbst, Johannes** (*b* Kempten, Swabia, 23 July 1735; *d* Salem, NC, 15 Jan 1812). Moravian composer. He was educated at the Moravian school at Herrnhut, Saxony, and he served the Moravian congregations of Neusalz, Gnadenfrey, Gnadenberg, and Kleinwelke (in Germany) and Fulneck (in England) in non-ministerial capacities before his ordination in 1774. He was then superintendent for the communities at Neudietendorf and Gnadenfrey.

In 1786 he and his wife sailed for America, leaving behind their three children, Johann Ludwig (1769–1824, also a musician and composer), Samuel and Sophie. In America he first served the congregation at Lancaster, Pennsylvania, as minister, and in 1791 he became pastor of the Lititz community and principal of the girls' boarding school (now called Linden Hall). In 1811, upon his election as bishop, Herbst was sent to Salem as pastor of that Moravian community, but died after serving less than eight months in his new pastorate.

Herbst brought with him from Europe a large library of sacred choral music, most of it in his own hand, to which he continued to add new pieces as he came across them. This collection (now at the Moravian Music Foundation in Winston-Salem) is the most important single collection for the study of Moravian music in America, containing over 1000 anthems and solo songs and about 50 oratorios.

Herbst's own compositions, which date from 1765 until shortly before his death, consist of about 180 anthems for mixed chorus and instrumental accompaniment and 145 songs for solo voice with keyboard. He is not known to have written instrumental music, although it is suspected that six short sonatas in a manuscript keyboard book which he compiled might be his work.

Herbst was a gifted melodist who was never at a loss for smooth-flowing yet dramatically appropriate melodies to enhance his texts. His harmonic language, while rooted in the Classical style, is somewhat more chromatic than that of most Moravian composers. His rhythms are strong and simple, and strings of dotted quaver and semiquaver groups are a favourite device. Herbst wrote most effectively for voices, and the instrumental parts to his songs and anthems are little more than mildly decorated versions of the vocal lines. The Moravian composers Christian Gregor and Johann Christian Geisler seem to have been strong influences on Herbst, as were C.P.E. Bach and a group of contemporary German song composers.

KARL KROEGER/NOLA REED KNOUSE

**Hercenstein, Matteo.** *See* GLIŃSKI, MATEUSZ.

**Herchet, Jörg (Willi)** (*b* Dresden, 20 Sept 1943). German composer. He studied composition at the Dresden and East Berlin conservatories (1962–9), but his final dissertations were not accepted because of their avant-garde position on Boulez, Stockhausen and the music of the Second Viennese School. Paul Dessau, however, tolerated both Herchet's controversial views and his profound

religiosity, supporting him in his postgraduate studies at the Berlin Academy (1970–74). Until the 1980 première of his untitled work for baritone, trombone and orchestra in Donaueschingen, however, Herchet lived a very reclusive life. Thereafter, he was appointed to a teaching post at the Dresden Conservatory, where he was promoted to professor of composition in 1992.

Herchet has regarded not only his cantata cycle *Das geistliche Jahr* (1978) and his opulent organ cycles *Seligpreisungen* (1974–85) and *Namen Gottes* (1990–97) as religious, but also his symphonic compositions, chamber music and operas. Extremely varied tone structures, such as the polarity of single notes and clusters, the use of four-note all-interval chords and the concentrated use of variable three-note complexes, are set against cadential harmonic linking passages in his works. Formal processes often develop as transitions from unconscious to conscious counterpoint, so that what at first seems a heterogeneous structure is subsequently revealed as corresponding polyphonic layers. In *Nachtwache* this procedure gives rise to a momentum that finally unites dramatically contrasting sounds. In *Abraum* (1995–6) various genres of music and musical theatre are introduced consecutively, enabling the audience to experience a journey from the secular to the sacred.

CHRISTOPH SRAMEK

**Hercigonja, Nikola** (*b* Vinkovci, 19 Feb 1911). Croatian composer. He studied until 1935 at the Zagreb Academy with Bersa and Odak (composition), Lhotka (harmony) and Dugan (counterpoint). After some years' teaching, in 1942 he became chorus director of the National Liberation Theatre and in 1945–6 he was adviser to the Education Ministry in Zagreb. He then taught at Belgrade University until his appointment in 1950 as professor at the Belgrade Academy of Music. He has also been active as a writer on music.

The roots of Hercigonja's music are in folksong. As a choirmaster he became familiar with folk music, developing this further by writing numerous partisan songs during and after World War II. With his strong sense of nationalism, he set patriotic historic texts, notably in his major works, those for the stage. The burlesque *Vječni Žid u Zagrebu* ('The Eternal Jew in Zagreb') typifies his dramatic realism and tonal musical language, with its merciless satire characterized by deliberate triviality. This vivid idiom is also found in the comedy *Stav'te pamet na komediju* ('Let's do a Comedy') and the powerful dramatic oratorio *Gorski vijenac* ('The Mountain Wreath', adapted from his cantata of the same title). A new departure in Hercigonja's musical language was marked by the introduction of an extended tonality, note clusters and atmospheric glissandos in the 'musico-dramatic vision' *Planetarijum*.

WORKS
*(selective list)*

DRAMATIC

Kronanje v Zagrebu [Coronation in Zagreb] (A. Aškerc), solo vv, speaking chorus, chorus, brass, bells, film, 1938

Vječni Žid u Zagrebu [The Eternal Jew in Zagreb] (burlesque, 3, after A. Šenoa), 1940–42, unperf.

Rodjendan infantin [The Infanta's Birthday] (ballet), 1942–5

Mali Hans [Little Hans] (children's radio op, 2, after O. Wilde: *The Faithful Friend*), 1942–59, unperf.

Gorski vijenac [The Mountain Wreath] (dramatic orat, P.P. Njegoš), 1952–6

Planetarijom [Planetarium] (stage musical vision, 8 pts, after M. Krleža: *Balade Petrice Kerempuha*), 1958–60; Radio Belgrade, 28 July 1965

Stav'te pamet na komediju [Let's do a Comedy] (op-ballet, 3 after M. Držić: *Dundo Maroje*, and Dalmation poetry), 1962–4; Radio Belgrade, 1967, rev. for Belgrade TV, 1974

Hlapec Jernej in njegova pravica [Hlapec Jernej and his Justice] (scenic passion), 1980

VOCAL

For solo vv, chorus, orch: Tito, to smo mi svi [Tito, That Is All of us], 1947; Svečana svita [Solemn Suite], 1949; Taga za jug [Homesickness], 1950; Gorski vijenac, 1951; 3 igre iz Crne Gore i Boke [3 Dances from Montenegro and the Bay of Kotor], 1954; Vu kleti [In the Pub], 1956; Zibu-haju, 1958; Slavna naša kumpanija [Our Glorious Company], 1958; Došel je oktober, 1965; Isti smo hod [We Walk Together], 1965; Zima [Winter], 1966; Mesto svedido [Place] (cant.), 1978

For chorus: Crveni makovi [Red Poppies], 1936; Matiji Gupcu, 1938; Druze Tito, ljubičice bijela [Comrade Tito, You White Violet], 1944; Republici, 1947; Novoj Jugoslaviji [To New Yugoslavia], 1948; Vojnički snovi [Soldiers' Dreams], 1961; many other pieces

For 1v, orch: 3 pesme posvećene Musorgskom [3 Songs Dedicated to Musorgsky], 1938–63; Dekle v zaporu, 1944–50; Uspavanke majke partizanke [Lullaby of the Partisan Mothers], 1946–9; 6 Zmajevih satiričnih pesama [6 Satirical Poems of Zmaj], 1953–5; Zadnja popevka [The Last Song], 1952–63; 3 balade Petrice Kerempuha, 1952–63; 5 pesama Gupčevih puntara, 1963

For 1v, inst: 3 medjimurske pesme [3 Songs from Medjimurje], 1v, pf, 1948; 18 medjimurskih pesama, 1v, hp, 1948–59; Ognjen vlak [Blazing Train], 1v, pf, 1949; Uspavanka iz Dubrovnika [Lullaby from Dubrovnik], 1v, hp, 1949; O pajacu i bubamari, 1v, pf, 1952; Pri zbici, 1v, pf, 1954; 4 pesme Mikule Pavića, 1v, pf, 1958; 4 dubrovačke serenate, 1v, hpd, 1964; 4 meštra [4 Masters], 1v, pf, 1970

Children's songs, folksong arrs. and collections

NIALL O'LOUGHLIN

**Hercules.** *See* HERACLES.

**Herdenglocken** (Ger.). *See* COWBELLS.

**Herder, Johann Gottfried** (*b* Mohrungen, East Prussia, 25 Aug 1744; *d* Weimar, 18 Dec 1803). German man of letters, philosopher and theologian. Familiar from his earliest years with the Protestant songbooks (his father was a verger, Kantor and teacher), he was fond of music all his life. In his Königsberg student days he became acquainted with Kant and Hamann. To his friendship with the latter he owed his first introduction to the theory of the common roots of music and language. Hamann helped secure for Herder a post as teacher (and later as preacher) at Riga, where he met Müthel and became acquainted with Latvian folksong. In 1769 he undertook a journey by sea to France, meeting leading Parisian men of letters. In Germany he met Lessing, Claudius and (at Strasbourg in 1770) the young Goethe; this last must be accounted one of the most influential meetings between writers, giving rise as it did to a series of bold new undertakings for both. From 1771 until 1776 he was at Bückeburg, the court of Count Wilhelm of Schaumburg-Lippe, where his collaboration with J.C.F. Bach produced a series of important cantatas, oratorios and 'dramas for music'. In 1776 he moved to Weimar, where against the taste of the time he strove to re-establish church music in its former integrity. In collaboration with the court Kapellmeister E.W. Wolf he wrote several festal cantatas. A journey to Italy in the company of Dalberg in 1788 gave him little satisfaction, and he spent the rest of his life prematurely old and out of sympathy with the spirit both of the excesses of the *Sturm und Drang* and also of rarefied Weimar Classicism.

Important as were many of Herder's literary writings, he was still more significant for the ideas he introduced, especially to Goethe. He played a large role in the development of the studies of history, language, theology, philosophy and sociology. His conception of music not as an adornment but as one of the wellsprings of all culture and education deserves emphasis: 'Through music our race was humanized; through music it will attain yet greater humanity'. Though he never worked out in detail his views on music, they are based on a wide knowledge of both the theory and practice of earlier generations and of his contemporaries. Especially in folksong (it was he who coined the term 'Volkslied') he achieved work of lasting value – not so much in his translations and re-creations of folksongs as in his recognition that the soul of a people is most readily perceived in its popular music, and that the qualities of lively impulsion ('Sprünge und Würfe') outweigh sophistication and stylistic perfection. The essays on Shakespeare and on the songs of ancient peoples that were included in the manifesto *Von deutscher Art und Kunst* (1773) were of epoch-making importance, and he followed this volume with collections of *Volkslieder* (1778–9) and various essays on music. These include 'Über die Oper', 'Ob Malerei oder Tonkunst eine grössere Wirkung gewähre?', 'Cäcilie', 'Die Tonkunst: eine Rhapsodie' and 'Tanz und Melodrama'; music is the subject of a number of his poems; and apart from the oratorios, cantatas and allegorical and dramatic works he wrote for music, he translated *Messiah* (Handel being one of the earlier composers he most warmly admired).

Among those who set Herder's lyrics are Beethoven, Brahms, Liszt, Neefe, Schubert, Richard Strauss and Weber. While despising much in contemporary German opera, he nevertheless conceived of a unified theatrical work in which poetry, music, action, décor and dance would become one. Gluck was the opera composer against whose achievements he measured all others, but Gluck did not accept Herder's invitation to set his *Brutus* (it was actually set by J.C.F. Bach). Herder considered music to be a cosmic and natural force as well as the more conscious product of individual genius; reason could not account for it, just as in ancient poetry that quality he called *aerugo* ('rust') was a sign of age and naturalness, defying the analysis of the pedant yet immediately recognizable as a hallmark of true art.

PETER BRANSCOMBE

**Heredi, Francesco.** *See* EREDI, FRANCESCO.

**Heredia, Pedro (de)** [Eredia, Pietro] (*b* Vercelli, Piedmont; *d* Rome, 1648). Italian composer, organist and musician, of Spanish ancestry. His father, who was secretary to the Duke of Savoy, made him study music at the Collegio degli Innocenti, the choir school of the cathedral at Vercelli. He then studied for the priesthood at the archiepiscopal seminary there. After being ordained in 1595, he moved to Turin and entered the service of the court of Savoy as a musician. The following year he returned to Vercelli and became *maestro di cappella* of the cathedral. The cathedral chapter also appointed him to a canonry, which, however, he was obliged to resign shortly afterwards when it was assigned to another candidate as a result of dissension within the Roman curia. By 1616 he was in Rome, where he contributed to an anthology of small-scale pieces by Rome-based composers. From 1617 to 1629 he served regularly as an extra organist alongside Frescobaldi for major feastdays at the Basilica di S Pietro, including its consecration in 1626 and a 12-choir extravaganza organized by Paolo Agostini for the feast of SS Peter and Paul in 1628. No information has survived regarding his activities during the next ten years, but he almost certainly remained in Rome, where in 1639 (and possibly earlier) he was *maestro di cappella* of both the Seminario Romano and Il Gesù. A few sacred works by him survive, but a number of others are no doubt lost, since he enjoyed a high reputation for his knowledge of the theory and practice of composition and was admired by, among others, G.B. Doni (*Compendio*, 163ff and *Lyra Barberina*, i, 356; ii, 226) and Della Valle (*Della musica*, 160). His extant music shows that to a great extent he remained faithful to the classical polyphonic traditions of the late 16th century.

ARGIA BERTINI/NOEL O'REGAN

**Heredia, Sebastián Aguilera de.** *See* AGUILERA DE HEREDIA, SEBASTIÁN.

**Hereford.** City in England. Hereford was too small and too remote a city to develop much public musical life, and it began to be of significance only from the end of the 19th century. No doubt, however, the members of the College of Vicars-Choral performed a good deal of secular ensemble music, and prominent among them was William Felton, vicar-choral from 1742 to 1769, some of whose compositions may well have had their origins in the society. It was this college (not the cathedral chapter, as sometimes stated) that formerly possessed the most complete surviving set of Barnard's *First Book of Selected Church Musick* (1641, now at *GB-Och*). Notable among earlier organists of the cathedral were John Bull, a former chorister of the cathedral (1582–*c*1585), John Clarke-Whitfeld (1820–33) and S.S. Wesley (1832–5). Wesley's famous anthems *The Wilderness* and *Blessed be the God and Father* were composed and first performed at Hereford. George Townsend Smith, organist from 1843 to 1877, had some antiquarian tastes, and it is by his bequest that the cathedral library now possesses (R.11.xlii) valuable autographs of Roger North's *Musicall Grammarian* and *Memoires of Musick*. George Robertson Sinclair, whose initials are found on the 11th variation of Elgar's 'Enigma', was organist from 1889 to 1917, and his successors have been Percy Hull (1918–49), Meredith Davies (1949–56), Melville Cook (1956–66), Richard Lloyd (1966–74) and Roy Massey (from 1974). Ouseley was precentor of the cathedral from 1855 and also canon from 1886 until his death in 1889, and John Jebb, who did valuable pioneer work on the choral Use of the Church of England, was a prebendary (from 1858) and a canon (1870–86). From 1904 to 1911 Elgar lived in Hereford, where he wrote the *Introduction and Allegro* for strings, *The Kingdom*, the Violin Concerto and both symphonies. Every three years the THREE CHOIRS FESTIVAL is held at Hereford. (W. Shaw: *The Organists and Organs of Hereford Cathedral*, Hereford, 1976, 2/1988)

WATKINS SHAW/JOHN C. PHILLIPS

**Heremita, Giulio.** *See* EREMITA, GIULIO.

**Herger.** German poet. *See* SPERVOGEL, (1).

**Hergot** [Herrgott], **Hans** (*b* ?Nuremberg; *d* Leipzig, 20 May 1527). German printer. He was officially registered as a printer in Nuremberg from 1524 to 1526. Most of the actual business, however, was apparently conducted by his wife Kunegunde (*d* 7 Feb 1547), while he travelled about the country distributing pamphlets, often of a heretical or politically radical nature. He was caught circulating one of these, *Von der newen Wandlung eynes Christlichen Lebens*, in Leipzig, then ruled by Duke Georg of Saxony, a fierce opponent of both the Reformation and peasant reform. In proceedings supervised by the duke himself he was tried and condemned to death, and after a futile attempt on his wife's part to persuade the Nuremberg city council to intercede, was publicly executed. His widow continued the printing business in her own name until 1538, although she had married another Nuremberg printer, GEORG WACHTER, shortly after Hergot's death.

As a printer Hergot was known mainly for his piracy of Luther's writings, which he reprinted with such brazenness that the author himself was moved to complain. However, he was the first printer to include melodies for the Lutheran Mass, adding the notes by means of block printing. His widow published numerous sacred songs, generally in the form of small leaflets of four to eight folios each, making them readily saleable. Wachter also preferred this format which was continued into the 1560s by such Nuremberg printers as Valentin Neuber and Christoff and Friderich Gutknecht.

MARIE LOUISE GÖLLNER

**Hergot** [Hergotin], **Kunegunde** (*d* Nuremberg, 7 Feb 1547). German printer and wife first of HANS HERGOT and later of GEORG WACHTER.

**Herier** [Erier], **Thomas** (*fl* 1240–70). French trouvère. Although he cannot be identified, traces of dialect in his poetry indicate that he was a native of Picardy; the persons named in his chansons fix his approximate dates and indicate the area of Arras. Herier appeared as a joint author with Gillebert de Berneville in a jeu-parti (R.1191), and quite possibly also with Guillaume le Vinier (in R.842). He dedicated a poem to the trouvère Jacques de Cysoing, and another to a certain Trésorier – possibly either the Trésorier de Lille or the Trésorier d'Aire. Other persons named include Jeanne, Countess of Ponthieu; the Sire du Roeulx (Rués); the Arras banker Audefroi Louchart; and the Arras sheriff Mikiel le Waisdier.

Herier's poetry displays a certain elegance, but is commonplace in thought and imagery. There is little variety to the poetic structures; they rely heavily on heptasyllabic lines (except for the decasyllabic *Mais n'os chanter*), and most strophes are isometric. The same lack of imagination is displayed in the surviving melodies. With the exception of the descort *Un descort vaurai retraire*, all are cast in bar form. *Nus ne set* is noteworthy for the irregularity that extends the second *pes* to three phrases in place of two. There is a clear preference for the authentic D mode, with the melody beginning on the 7th, 8th or even 5th degree, and wending its way downwards to establish the final at the end of the second phrase. No melodies survive in mensural notation. *Bien me sui aperceus* and *Ja ne lairai mon usage* are more ornate than others. Several melodies suggest the appropriateness of the second mode through occasional regularity of ligature disposition, but contradictions to this form of rhythmic organization are not infrequent.

THEODORE KARP

**Heriger.** German poet. *See* SPERVOGEL, (1).

**Herigerus** [Hériger] (*d* Lobbes, nr Liège, 1007). Benedictine monk of Liège. From 990 he was abbot of Lobbes. He accompanied Bishop Notker of Liège (formerly Provost of St Gallen) to Rome in 989. Herigerus taught divinity and the liberal arts; Berno of Reichenau described him as 'of no small authority' ('vir non parvae auctoritatis', *PL*, cxlii, 1033). He wrote mainly hagiographical and biographical works; in the dedication of his *Gesta episcoporum leodiensium* to Bishop STEPHEN OF LIÈGE, he quoted documents showing that Stephen composed the Office of the Trinity. His works on chronology were dedicated to his disciple, the monk Hugo, who in 1033 also became abbot of Lobbes. Albéric de Trois-Fontaines recorded that Herigerus in 990 composed *Regulae numerorum super abacum Gerberti* (see Olleris, 1867, pp.311–24).

In 980 he was mentioned as 'learned and skilled in the art of music' ('didascalum ac musicae artis peritum', *Elevatio s. Landoaldi*, chap.3; ed. Olleris, 1888, p.610). No musical treatise survives, but according to the continuation of his *Gesta* (Manitius, p.227), he composed the antiphons *O Thomas Dydime* (CAO, iii, 1968, no.4083) and *O Thomas apostole*; and other pieces, including a *Hymnus abecedarius Ursmari leodiensis* (ed. K. Stecker, MGH, *Poetarum latinorum medii aevi*, v/1, 1937/*R*, pp.208–10) and a hymn *Ave per quam* comprising *versus* based on the ancient Latin translation of the Greek Akathistos Hymn, probably composed at Cambrai (text ed. in AH, xlviii, 1905/*R*, p.103; and ed. G.G. Meerssemann, *Der Akathistos in Abendland*, Fribourg, 1958, i, p.104; melody ed. M. Huglo, 'La prose à Notre-Dame de Grâce de Cambrai', *Revue grégorienne*, xxxi, 1952, pp.115–17).

MICHEL HUGLO

**Herincx, Raimund** [Raymond] **(Frederick)** (*b* London, 23 Aug 1927). English bass-baritone. He studied in Belgium and Milan, making his début in 1957 as Boito's Mefistofele for the WNO. The same year he joined Sadler's Wells Opera and during his ten years with the company sang some 40 roles, among them Count Almaviva, Nick Shadow, Pizarro, Rigoletto, Germont, and the Messenger and Creon in *Oedipus rex* (which he also sang under Stravinsky in Greece in 1966). In 1974–5 he returned to the company to sing his first Wotan and Hagen, and in 1976 sang the former role with impressive authority in a complete cycle. At Covent Garden he first appeared in 1968 as King Fisher in Tippett's *The Midsummer Marriage*, then created the parts of Faber in Tippett's *The Knot Garden* (1970), the White Abbot in Maxwell Davies's *Taverner* (1972) and the Governor in Henze's *We Come to the River* (1976). He made his Metropolitan début in 1977 as Mathisen (*Le prophète*). In concerts Herincx was notable as Elijah and in Walton's *Belshazzar's Feast*. He was particularly successful at portraying villainy and anger. His powerful voice and vivid sense of character can be heard on his recordings of King Fisher and Faber.

ALAN BLYTH

**Hérissant, Jehan** [Johannes, ?Joseph] (*fl* Paris, 1550–60). French singer and composer. In 1550 he succeeded Nicolas Pagnier to become *magister symphoniae puerorum* at Notre Dame, where he had served his apprenticeship as a chorister. According to Chartier, Hérissant saw the number of boys increased to 12, but was compelled to let one of the best – Vincent – go to the royal chapel in 1557. On his retirement in 1559, he was succeeded by Gilles Bracquet. A large proportion of Hérissant's chansons set simple rustic texts in the lively, syllabic contrapuntal idiom made famous by Janequin. These pieces are generally in a clear major tonality and treat short phrases with duple rhythms in close imitation.

WORKS

*all for 4 voices*

FRANK DOBBINS

**Her Majesty's Theatre.** The name of the King's Theatre, London, after the accession of Queen Victoria (1837). It became known as His Majesty's after her death in 1901, but became Her Majesty's once more at the accession of Elizabeth II. *See* LONDON, §VI, 1(i).

**Herman, Andrew.** *See* TOBANI, THEODORE MOSES.

**Herman, Jerry** [Gerald] (*b* New York, 10 July 1933). American composer and lyricist. He was self-taught as a musician and studied drama at the University of Miami, where he also began writing for revue. He moved to New York, working as a night club pianist and writing for television, and reused some of his earlier material from Miami for the revue *I Feel Wonderful*, presented off-Broadway (1954). His next revue *Nightcap* (1958) was later revised as *Parade* (1960). His first full-scale musical was *Milk and Honey* (1961) which gave him a hit song in 'Shalom'; it starred the opera singers Robert Weede and Mimi Benzell and the long-established Yiddish performer, Molly Picon. *Hello Dolly!* (1964) reinforced Herman's breezy style and the show won ten Tony awards including those for Best Actress for Carol Channing's famous portrayal of Dolly Levi and Best Composer for Herman. With *Mame* (1966) Herman wrote a fine score that again incorporated a rousing title song; other numbers ranged through vaudeville ('Bosom Buddies'), emotive ballad ('If He Walked into My Life') and the incorrigibly cheerful ('We need a little Christmas'). Angela Lansbury established a long association with Herman's work in playing the title role, and took the lead in his less successful but more adventurous next piece, *Dear World* (1969). An adaptation of Giradoux's *La folle de Chaillot*, it marked a strong change in subject matter; its more complex and dark themes were reinforced in songs such as 'I don't want to know' and 'And I was beautiful'. 'The Tea Party' remains an effective piece of ensemble writing, while the opening number 'The Spring of Next Year' skilfully conveyed the show's irony by combining witty lyrics about pollution with a sweeping waltz, a form with which Herman had previously demonstrated an affinity in 'Dancing' (*Hello Dolly!*). With *Mack and Mabel* (1974) he wrote one of the most instantly appealing and tuneful Broadway scores. The show has built up a following on disc, but has been less succcessful when staged. The show allowed full rein to Herman's revue-based style through its setting in the early days of silent films, with novelty numbers ('Tap your troubles away'), a trademark cumulative chorus ('When Mabel comes in the Room') and a love song typically approached at a tangent ('I won't send roses').

It was some nine years later that Herman had his next success with *La cage aux folles* (1983). The show is remarkable for its older conventional Broadway style in the face of the contemporary pervading influence of Sondheim – the antithesis of much of Herman's approach – and for its light farce underpinned by songs of unusual intensity that seem to be a summation of Herman's technical achievement. It was an unexpected success and has become a standard of the repertory. Since 1983 Herman has been represented by revivals and the compilation show *Jerry's Girls* (1985), which drew on the strong female characters at the centre of most of his shows. In 1996 he wrote the television musical 'Mrs. Santa Claus', whose title role was again played by Lansbury; with a pleasant, serviceable score, it lacks the variety of his previous works. He received the ASCAP Foundation Richard Rodgers Award for lifetime achievement in musical theatre (1998).

*Milk and Honey* established that essential Herman quality of a determined, optimistic and aspirational spirit which runs through his shows in, for example, 'Before the parade passes by' (*Hello, Dolly!*) and 'Open a new window' (*Mame*), and was expressed in its most assertive form in *La cage aux folles* through 'I am what I am',

which became a major disco hit for Gloria Gaynor and subsequently a quintessential gay liberation anthem. In 'Let's not waste a moment' and 'I will follow you' *Milk and Honey* also presaged the haunting lyricism of 'Ribbons down my back' (*Hello, Dolly!*). Herman's distinctive use of multi-section chorus numbers was first most clearly established in *Hello, Dolly!* through 'Put on your Sunday clothes' and the now-classic title song; the former also used the climactic device of a slowed-down melody over a double-time accompaniment, a recurring feature in Herman's shows that reached its extreme in 'I am what I am'. Characterized by an immediate tunefulness and joie de vivre, Herman's writing is often viewed as formulaic, but within its reliance on established popular song structures are subtle adaptations for each new dramatic setting, for example with the Israeli local colour of *Milk and Honey* ('Independence Day Hora'), the silent-film-music figurations of *Mack and Mabel* ('Movies were movies') and the evocative French lyricism in *Dear World* (the waltzes 'I don't want to know' and 'The Spring of Next Year'). As a lyricist, Herman imbues his songs with strong emotions through the compact use of everyday language, as in the ballad 'Time heals everything' (*Mack and Mabel*) or 'Song on the Sand (La Da Da Da)' (*La cage aux folles*). The easy appeal of the latter belies its technical command: its subject is a half-forgotten lyric, musically matched by 'incomplete' phrases, six rather than eight bars in length.

Although Herman's output has been relatively small, his works have achieved a rare degree of lasting popular appeal. They provide a defining image of a particular strand of the Broadway musical in the second half of the 20th century that has defied the increasing elevation of overt subtexts and musical motifs over light plots, memorable tunes and an uplifting spirit.

WORKS
(*selective list*)

*unless otherwise stated, all stage musicals in 2 acts, music and lyrics by Herman and dates those of first New York performance; other writers shown as (co-lyricist; book author)*

I Feel Wonderful (revue, B.A. Grael), Theatre de Lys, 18 Oct 1954

JOHN SNELSON

**Herman, Nicolaus** [Niklas] (*b* Altdorf, nr Nuremberg, 1500; *d* Joachimsthal [now Jáchymov], West Bohemia, 15 May 1561). German writer of hymn texts and melodies. From 1518 to 1560 he was schoolmaster, organist and Kantor in Joachimsthal. Johann Matthesius, Luther's first biographer and headmaster of the Latin school there from 1532, was also, until 1565, minister of the church; Herman was associated with him both as a close friend and as a colleague, and thus came into contact with the Reformation from an early date. As early as 6 November 1524 Luther wrote to him as 'viro pio et erudito'. Herman's importance lies in his hymns, which were published in several volumes. He wrote both text and music, but most melodies are used for several texts. His poems are rhymed syllabic verses with no fixed metre. His Sunday Gospels, which retell Bible stories in rhymed stanzas, remained models for a succession of works of the same type well into the 17th century. In his endeavours to express Christian beliefs in the form of hymns Herman's texts are close to those of Luther. Though never attaining the poetic force of the latter's work, many have retained their place in the standard German Lutheran hymn repertory: above all 'Lobt Gott, ihr Christen alle gleich', 'Erschienen ist der herrlich Tag', 'Die helle Sonn leucht jetzt herfür', 'Hinunter ist der Sonnen Schein' and 'Wenn mein Stündlein vorhanden ist'. Many of his melodies show clear affinities with folk music: in particular the traditions of *Bergreihen* (songs in folk style from the region of the Erzgebirge between Saxony and Bohemia) and *Abendreihen* (evening dances sung in a circle). In a number of melodies he employed elements of plainchant, sometimes alongside folk elements. Thus his well-known tune for 'Lobt Gott, ihr Christen alle gleich' is probably connected with the Christmas antiphon *Hodie Christus natus est nobis*, while that for 'Erschienen ist der herrlich Tag' is at least indirectly related to the Easter antiphon *Ad monumentum venimus gementes*.

WALTER BLANKENBURG

**Herman, Vasile** (*b* Satu Mare, 10 June 1929). Romanian composer and musicologist. He studied the piano with Angela Perianu at the Satu Mare Conservatory (1945–9) and continued his education with Toduţă (counterpoint and composition), Jarda and Comes (harmony), and Ana Voileanu and Radu (piano) at the Dima Conservatory, Cluj (1949–57). In 1959 he became a professor at the conservatory in Cluj. In 1969 he attended the Darmstadt summer courses, and in 1974 took a doctorate in musicology at Cluj. His early compositions, including the oratorio *Pintea Viteazul* and the *Sonata da ricercar* (1958), were in a diatonic or chromatic modal language, but later works show an elaboration on the basis of mathematical procedures, with certain elements (free rhythms, simple accompaniments and instrumental colours) reminiscent of Romanian folk music. He has received prizes from the Romanian Academy (1977) and the Romanian Composers' Union (1978).

VIOREL COSMA

**Herman, Woody** [Herman, Woodrow Charles Thomas] (*b* Milwaukee, 16 May 1913; *d* Los Angeles, 29 Oct 1987). American jazz bandleader, clarinettist, alto saxophonist and singer. In 1934 he joined Isham Jones, and when Jones's group disbanded in 1936 Herman used its leading sidemen as the nucleus for his own orchestra. By the mid-1940s, under the name Herman's Herd, it was internationally famous for the force and originality of its music, for example *Apple Honey* (1945, Col.). Herman reformed the band in 1947; the distinctive feature of the Second Herd was the group of saxophonists (three tenor and one baritone) which can be heard on the album *Four Brothers* (1947, Col.). Among the musicians who played in the section were Serge Chaloff, Stan Getz, Zoot Sims, Al Cohn and Gene Ammons.

After the demise of the Second Herd in 1949, Herman continued to lead bands; these were perhaps less creative, but their consistently high level of musicianship assured his continuing reputation. The Anglo-American Herd, which he organized in 1959, was significant in the history of English jazz; Herman broadened his scope in the late 1960s, when he took up soprano saxophone and included young jazz-rock players in his groups. He toured widely in the 1970s, and in 1982 held a residency in a club in New Orleans. Thereafter he worked principally on the West Coast, before taking up another residency in the St Regis Hotel, New York, in 1985. He celebrated his 50th anniversary as a bandleader with the formation of a new orchestra in 1986.

Although Herman's instrumental expertise was considerable, his essential importance was as an organizer. His rare ability to assemble and sustain bands notable for the quality of their musicians grew especially clear in the late years of World War II, when his group consisted of brilliant improvisers whose ensemble playing was exuberant and incisive; Igor Stravinsky was so impressed by its sound that in 1945 he composed his *Ebony Concerto* (1946, Col.) for the band. The harmonic procedures of bop influenced Herman's next orchestra even more deeply, confirming his freedom from the contemporary sectarianism in jazz. The ebullient *Lemon Drop* (1948), with its succession of exciting improvisations, illustrates Herman's shrewd openmindedness as a bandleader, as do more overtly ambitious recordings like the two-part *Lady McGowan's Dream* (1946, Col.) and the four-part *Summer Sequence* (1946–7, Col.), both composed by Ralph Burns.

MICHAEL JAMES/R

**Hermann of Carinthia** [Hermannus Dalmata, Hermannus Sclavus, Hermannus Secundus] (*fl* 1138–43). Music theorist. He referred to Thierry of Chartres as 'teacher', and is attested in León, 'on the banks of the Ebro', Toulouse and Béziers, where he translated from Arabic into Latin several works on mathematics, the science of the stars, and the Islamic religion. In 1143 he completed an elaborate cosmogony, *De essentiis* ('on the essences'), based on Arabic and Latin sources. This includes a well-worked-out account, following the Neoplatonic tradition of Plotinus and al-Kindī's *De radiis*, of the 'music' of the universe, by which the movements of the upper world ensure the perpetual generation of sublunar things through the principle of sympathetic vibration. Analogous to this is the harmony between the body and the soul (*musica humana*), as Hermann pointed out at the end of the *De essentiis* (79vC) and, in a deliberate departure from the Arabic text, in his translation of Abū Ma'shar's *Introduction to Astrology*.

CHARLES BURNETT

**Hermannus Contractus** [Hermann der Lahme, Hermann von Reichenau] (*b* Swabia, 18 July 1013; *d* Reichenau, 24 Sept 1054). Benedictine monk, chronicler, writer on scientific subjects (astronomy, arithmetic, music) and composer. Some aspects of his life are recorded with extraordinary precision in a biography written shortly after his death by his pupil, Berthold, and Hermannus himself included a number of detailed references to his family in his well-known world chronicle. As a young child Hermannus was crippled by a disease that left him seriously incapacitated in movement and speech for his entire life. He started school at the age of seven, probably at Reichenau, but did not profess until he was about 30, on the advice (according to Berthold) of his abbot, Berno, who was also a renowned musician.

It seems clear from the range and quality of his accomplishments (which also included clock- and musical instrument maker) that he was a man of exceptional mental capacity and resolution. At the same time, many accounts of his life and personality are feverishly exaggerated in tone and probably legendary. This makes difficult the determination of authenticity of a number of writings, in particular of his musical compositions. Of 22 compositions mentioned or discussed by Oesch, seven are immediately characterized as false ascriptions, with two others considered quite doubtful. A further three have only inner (i.e. stylistic) criteria in support of Hermannus's authorship.

In fact, only two works have excellent credentials: the sequence *Grates, honos, hierarchia*, and an Office for St Afra, *Gloriosa et beatissima*. Four other Offices mentioned by Berthold have disappeared without trace. Although the most venerable ascriptions to Hermannus – the Marian antiphons *Alma Redemptoris mater* and *Salve regina* – have been taken away by most recent scholarship, the true authorship is still, and possibly will be for ever, the subject of controversy. Under the circumstances it is impractical to characterize Hermannus's compositional style or technique.

*Musica*, his single work on theory (a supposed second work, on the monochord, is probably the same work under a different title) presents no such problems. There are only two manuscript sources with no serious difficulties in establishing the text. Like all of Hermannus's scientific works, it is specialized, not general in treatment. He had no intention of dealing with the whole of music, as it was conceived by his time, or even a large area of it. His focus was on the central concern of 11th-century Germanic speculative theory: the relationship of the species of 4th, 5th and octave to the ecclesiastical modes. He assumed his readers to be thoroughly versed in the monochord, and the prevailing mode of exposition is strictly logical. It is thus not an essay for beginners. At the same time, Hermannus went to some trouble to insist that his speculative theories be put into practice in the singing of sacred music. This is consistent with an attitude uncharacteristic of his time: that of conceiving the ideal *musicus* as a person who not only can think but also can compose and sing expertly.

Hermannus is renowned for a unique system of interval notation using both Greek and Roman letters. It plays no part in his major work, but is associated with two didactic songs for the learning of intervals, *Ter tria iunctorum* and *Ter terni sunt modi*. These, along with the poem which serves as a key to the notation, *E voces unisonas aequat* (see illustration), appear in more than a dozen manuscripts, sometimes also in neumes and standard alphabetical notation. It has been suggested that Hermannus developed this system after an early Byzantine model.

Critical estimates of the value and influence of Hermannus's work as a theorist vary considerably. Where some regard it as a highpoint of medieval theory, others see it as sterile theorizing for the sake of theory. The two views are not, to be sure, mutually exclusive.

*Hermannus Contractus's didactic poem 'E voces unisonas aequat', with the beginning of 'Ter tria iunctorum' (A-Wn 2502, f.27v); the signs represent intervals from the unison to the major 6th (except the tritone)*

**Hermannus Dalmata** [Sclavus; Secundus]. *See* HERMANN OF CARINTHIA.

**Hermann von Reichenau.** *See* HERMANNUS CONTRACTUS.

**Hermans, Willem** [Guglielmo] (*b* Thorn, nr Roermond, 6 March 1601; *d* Rome, 14 Feb 1683). Dutch organ builder, active mainly in Italy. In October 1631 he entered the Jesuit novitiate at Mechelen as an organ builder and lay brother. His early organs were for the Jesuit establishments at Breda (1632), Mechelen (1633), Ghent (1634), Leuven (1637) and Ypres (1644), and he may have been active in northern France. From 1648 to 1663 he was based at the Jesuit house in Genoa. He built the organ at Como Cathedral (1649–50; *C'* to *c'''* short octave, 'ravelement' compass, 57 notes), of which only the case survives. On its completion, a booklet was published listing recommended combinations of stops; it was reprinted several times until 1730. From 1657 to 1660 he built the organ at S Maria Assunta in Carignano, Genoa, assisted by Johann Heid and Hans Dietrich. The organ has been rebuilt at least twice within the west gallery case (which is by Georges Heigenmann), but the façade pipes may be original. The organ at SS Andrea ed Ambrogio, Genoa, built at the same time, met a similar fate. Hermans may have made a trip to La Flêche (France) during this period. He worked in Rome (Il Gesù, S Apollinare, and S Agnese in Agone), Palermo (1672) and Trent.

His ouput is estimated at about 80 organs, of which two small ones survive in their original state: in Pistoia (S Ignazio, now Spirito Santo, 1664), and Collescìpoli, near Terni (1678); both single-manual, with 45 keys (*C–c'''*, short first octave) and a pull-down pedalboard of 9 notes (*C–c*). Technically the organ at Pistoia shares many characteristics with northern instruments, e.g. the use of tinned iron for trumpet resonators, the construction of the chest by gluing the bars on the table flush with the side cheeks (rather than excavating the grooves), and the grouping together of the highest three ranks of the Ripieno. The reeds are the oldest surviving in Italy. This instrument became a model for the two Pistoian organ-building families AGATI and TRONCI. Another small organ built by Hermans in Orvieto (SS Apostoli, 1673–4) was removed in 1993.

GUY OLDHAM/UMBERTO PINESCHI

**Hermanson, Åke** (*b* Mollösund, Bohuslän, 16 June 1923; *d* Stockholm, 8 Aug 1996). Swedish composer. He studied the piano with Bäck, the organ with Asplöf and Linder, and composition with Rosenberg; he went to Paris in 1962 for further studies. In 1969–71 he was chairman of the Swedish Composers' Union. A member of the Royal Swedish Academy of Music from 1973, he won several prizes including the ISCM honorary award of 1964 and the Nordic Council Prize (1982). His compositions seem to have retained something of the harshness, the rough, rocky landscape and the wide marine horizon of his native Bohuslän. Working in isolation and with concentration, he created a series of compact and lyrical pieces which he spoke of as 'satellites' and 'meteorites' around a yet unwritten mother vocal work. The smaller pieces, the 'meteorites', were often characterized by sharp, insistent signals or a general state of alarm, while the 'satellites' exploited a more shimmering and expansive instrumental texture. These 'satellites' were four very important and concentrated orchestra pieces: *In nuce*, Symphony no.1, *Appell I–IV* and *Ultima*. His magnum opus, however, was *Utopia*, in which he came close to the horizons reached by his admired Sibelius.

WORKS
(*selective list*)

Orch: In nuce, op.7, 1962–3; Sym. no.1, op.9, 1964–7; Appell I–IV, op.10, 1968–9; Ultima, op.13, 1971–2; Sym. no.2, op.15, 1973–5; Utopia, op.20, 1977–8; Sym. no.3, op.21, 1980; Sym. no.4 'Oceanus', op.25, 1981–4

Vocal: Stadier (K. Vennberg), op.5, S, ens, 1960–61; Nenia bahusiensis [Lament from Bohuslän], op.8, children's/female chorus, 1963; 2 Lagerkvistsånger, op.14, S, pf, 1971–81; Mässa för måsar [Mass for Gulls] (E. Lindqvist), op.18, mixed vv, 1976; Somliga stränder [Some Shores] (A.-G. Wide), op.24, 16 solo vv, obbl fl, 1982

Chbr and solo inst: Prelude and Fugue, op.1, org, 1951, rev. 1965; En slottssaga [A Tale of a Castle], pf, 1951; Lyrisk metamorfos, op.2, str qt, 1954–7; A due voci, op.3, a fl, va, 1957–8; Invoco, op.4, str, 1958–60; Suoni d'un flauto, op.6, a fl, 1961; Alarme, op.11, hn, 1969; In sono, op.12, fl, ob, va, vc, 1970; Flauto d'inverno, op.16, b fl, 1976; Ars lineae, op.17, fl, ob, cl, bn, hn, trbn, 1976; Flauto del sole, op.19, fl, 1978; La strada, op.22, hn, org, 1980; Str Qt no.2, op.23, 1982–3; Nature theme, op.26, ob, 1983; Inscrit pour le piano, op.27, pf, 1984; Rockall: urtidsvision i nutid, op.29, 2 hn, trbn, tuba, perc, 1984; Hymn till Saltö, op.31, vc, 1985

ROLF HAGLUND

**Herman the Monk of Salzburg.** *See* MONK OF SALZBURG.

**Hermanus de Atrio** (*fl* *c*1460). Composer, possibly South Netherlandish. He is known only from the ascriptions of two pieces copied together in the manuscript *I-TRmp* 89 (ff.238*v*–240) in the late 1460s. The first (ed. in DTÖ,

xiv–xv, Jg.vii, 1900, p.256) is untexted but is evidently a three-voice rondeau setting, very much in the manner of the French song repertory in the years around 1460 (the text applied to it in DTÖ comes from an entirely different song that happens to have the same opening notes in one voice). The other, for four voices, carries the text incipit *In Maria vite vitam* (the opening of a hymn, ed. in AH, lii, 1909/*R*, 47) and ends with four held chords that are presumably for the word 'Amen'; but it is far more elaborate than the known vespers polyphony of those years. In its clear sectional structure, its use of duple mensuration, and its inclusion of two *tripla* sections, it stands as a highly individual work.

The composer may be the Armanno de Atrio who was a singer at Florence Cathedral and SS Annunziata in 1491–2 (F.A. D'Accone, *JAMS*, xiv, 1961, 307–58, esp. 343–5), and subsequently at 's-Hertogenbosch (to 1514). Perhaps he was related to Jaspar de Atrio, *tenorista* at the church of Our Lady, Bruges, from 1485 to 1500 (*StrohmM*, p.152). Certainly the music would suggest origin in Flanders.

DAVID FALLOWS

**Hermelink, Siegfried** (*b* Gniebel, nr Tübingen, 10 May 1914; *d* Fréconrupt, Alsace, 9 Aug 1975). German musicologist. After his studies at the Musikhochschule in Stuttgart with Hermann Keller (1933–6), he studied musicology at Tübingen University (1938–9) and with Besseler at Heidelberg University (1941–5). He took the doctorate at Heidelberg in 1945 with a dissertation on the prelude in Bach's keyboard music. He was an assistant lecturer at Heidelberg University (1943–52) and taught organ and music history at the Evangelisches Kirchenmusikalisches Institut before succeeding Hermann Poppen as music director at Heidelberg University. In 1959 he completed his *Habilitation* in musicology with a study of mode in the music of Palestrina and his contemporaries. He became research fellow at Heidelberg in 1961 and supernumerary professor in 1965. In addition to his musicological studies, which included work on Palestrina, Lassus, Schütz and Bach and research into rhythm, he was active in the performance of early music, conducting the Heidelberg University Choir and Collegium Musicum in concerts and on the radio. He edited a number of volumes of masses for the new Lassus collected edition.

HANS HEINRICH EGGEBRECHT/HERMANN JUNG

**Hermeneutics** (Ger. *Hermeneutik*). The discovery of meaning in a text by way of understanding, i.e. by an approach to a text that is empathetic rather than empirically verifiable. This approach is applicable particularly where a text appears at first sight to have no meaning, or where its meaning is remote or opaque, or where there may be another meaning or meanings than those that are immediately accessible. It has sometimes been considered as an actual practice, and sometimes as the theory, lying behind the practice of interpretation. In the later 19th century it acquired the status of a methodology for the historical and social sciences, in contrast to scientific method.

'Texts', in the above definition, may be restricted to written texts, or taken also to embrace spoken utterances, and may be expanded to include works of art. This expansion makes way for its application to music, whether composed or improvised. Hermeneutics came to prominence in writing about music implicitly in the 19th century and explicitly in the early 20th, and has undergone a resurgence since 1960 as part of a reaction again positivism.

Meaning assumes different forms with different types of hermeneutics. In its traditional sense it constitutes a message from a source to a recipient. In other cases it can signify the role of a work within its contemporaneous society; or the world of the composer's mind laid open to the listener (or reader of a score); or a dynamic experience that unfolds during listening; or a field of experience that reveals itself to the listener. Otherwise, it can constitute an infinite stream of latent experiences for a succession of unknowable future audiences. In the 19th and early 20th centuries, musical hermeneutics was related tangentially to PHILOSOPHY OF MUSIC, and at times came close to PSYCHOLOGY OF MUSIC; in more recent times it has bordered on SOCIOLOGY OF MUSIC. Examination of some of its mechanisms brings it into contact with semiology (*see* SEMIOTICS) and structuralism (*see* STRUCTURALISM, POST-STRUCTURALISM) and most recently one stream of hermeneutics has fused with RECEPTION theory. At times, it has been mutually related to the ANALYSIS of music, at other times extraneous. Throughout its history, it has run parallel with music CRITICISM, sometimes being interwoven with it, sometimes separate.

1. EARLY HISTORY. The Greek word *hermeneutikos* ('of, or for, interpreting') suggests an association with the deity Hermes in his capacity as god of eloquence and of divination, hence an origin in unravelling the meaning of oracles. Among the earliest practices of hermeneutics was the critical examination of the Homeric epics and Greek myths – the foundational texts, oral and written, of Greek culture – in order to extract meaning relevant to a later, and increasingly sceptical, Greek society. A hermeneutics of the Hebrew scriptures, evident even within those scriptures, was firmly established by about 300 BCE and has continued to the present day. Christian hermeneutics of the Old Testament is an important component of the New Testament itself; and a hermeneutics of the New Testament, hence biblical hermeneutics as a whole, existed by the second century CE.

These three traditions, different by virtue of the texts they examined, and each itself subdivided into conflicting schools of thought, as well as changing over time, nonetheless had two things in common. First, they recognized a distance between text and reader. This distance was the product partly of time, of course, but more particularly of the special status of the text, which was considered to be either the direct word of God or the result of divine inspiration. The texts in all three cases were thought to have emanated from a realm higher than that of mortal man, a realm to which man had no direct recourse to obtain clarification. Secondly, the spectrum of scholastic opinions within each tradition defined two opposite approaches to a text: (1) the search for meaning literally by way of the text itself – often called the 'grammatical' approach; and (2) the search for meaning hidden behind the text – often called the 'allegorical' approach. These two common factors (text–reader distance, and the grammatical/allegorical polarity) have functioned as constants in hermeneutics through to the 20th century. A further tradition existed: juridical hermeneutics, which concerned itself with the law and justice. The body of extant law, together with precedent and legal practice, constituted a 'text' which, although not of divine origin, was distanced from the citizen, and needed constant examination as to both its letter and its spirit.

2. GENERAL HERMENEUTICS: 19TH CENTURY. It was not until the end of the 18th century that these traditions began to coalesce into a single 'general hermeneutics'. Its precursors were the philologists Friedrich Ast (1778–1841) and August Wolf (1759–1824), and its principal architect was Friedrich Schleiermacher (1768–1834). Schleiermacher was closely associated with August and Friedrich Schlegel and other founders of the Romantic movement in Germany, and was himself the leading Protestant theologian of his day. He recognized that every text, however familiar its language, is to some extent foreign to us and that misunderstanding is almost certain. Understanding must therefore be actively sought, not just passively assumed. It becomes the task of hermeneutics to penetrate to the message of a text, which entails divining the intention of the author, and so ensure understanding on the part of the reader. The hermeneuticist – to return to origins – must adopt the role of Hermes the messenger: he must deliver the message from its source, free of distortion and correctly interpreted, to the receiver.

In pursuing this aim, Schleiermacher's inquiries, after a cursory reading, shuttled constantly between two pairs of opposites: between whole and part, and between subjective and objective. The latter is the ancient polarity between grammatical and allegorical recreated in the context of 19th-century thought. Rather than subscribing to one school or the other, Schleiermacher worked equally from the two poles. By 'objective' is meant examining the language used in the message and the grammatical structure in which it is cast; by 'subjective' is meant exploring the mind of the speaker/author that lies behind the message. The hermeneuticist thus works neither on the text nor on the speaker/author alone; instead, he works on the message that lies between the two, and does so by two alternating actions, the one a linguistic and grammatical examination, the other a psychological investigation. The convergence of these two actions, the fusion of the two outcomes, constitutes the understanding of the message. By this means, he developed, in the words of Hans-Georg Gadomer, 'a real art of understanding instead of an "aggregate of observations"'.

The other pair of opposites reveals the organicist cast of Schleiermacher's thought. Every element of a text is itself a part of some larger whole (the whole text, the whole of the author's writings etc.) and at the same time the whole of which parts exist (the clauses of a sentence, grammatical parts of a clause, individual words of a predicate etc.). Likewise with the exploration of the speaker/author: the mind behind the text is part of the mind behind a larger body of utterances or works, which is in turn part of the that person's whole mental life, which is part of his or her intellectual environment and so on. Since these levels are organically all of a piece, whenever the hermeneuticist encounters a problem (an *aporia*), he can safely shift up or down a level and continue the investigation, eventually working his way back to and through the impasse.

Shuttling back and forth across these pairs of opposites – subjective/objective, whole/part – is what is meant, for Schleiermacher, by the 'hermeneutic circle'. Such shuttling is essential to all communication, since 'nothing that needs interpretation can be understood at once', and understanding results only from a convergence of actions. And the end product is to understand the message better than its speaker or author understood it him or herself. This last notion has special resonance where a text is a work of art, the product of 'artistic genius'.

Schleiermacher's work survived in manuscripts dating from between 1805 and 1833 and relied on word-of-mouth transmission from his many students. One item was published in 1838. The first biography (1870, incomplete) was written by Wilhelm Dilthey (1833–1911), who promoted Schleiermacher's ideas and, as a philosopher, himself made significant contributions to hermeneutics. Comte's *Course in Positive Philosophy* (1830–42) came at the time of, and John Stuart Mill's *System of Logic* (1843) after, Schleiermacher's death. Their affirmation of the scientific method, and belief that all knowledge is based on positive facts, provided the background for Dilthey's work. Dilthey fought to assert the existence of a 'human sciences' independent of the natural sciences and operating according to different laws. Whereas the natural scientist 'explains' (*erklärt*) his data, the human scientist – for example, the historian, the theologian, the literary critic – 'understands' (*versteht*) his. Explanation involves purely intellectual processes;

understanding (*Verstand* or *Verstehen*) involves 'the combined activity of all the mental powers in apprehending'.

Understanding entails probing the context of those data, entering into the mind behind it, examining its social and cultural circumstances. For Dilthey, the data of the human scientists comprised 'life-expressions'. As he put it: We describe as 'understanding the process by which mental life comes to be known through an expression of it given to the senses'. This broadened the scope of hermeneutics beyond 'text' even in Schleiermacher's inclusive sense, extending it to include symbols and signs, gestures and actions, hence to the realms of sociology, anthropology and psychology.

At the outset of the 20th century, then, Schleiermacher's general hermeneutics had been harnessed as the methodological foundation of a new field, the 'human sciences'. Understanding, reconceived as the activity of the full range of mental powers, came about as the result of experiencing for oneself expressions of human life. This reconception involved two factors: the historical and the psychological. First, in response to the growth of history as a discipline in the 19th century, Dilthey introduced a historical awareness that Schleiermacher's hermeneutics had lacked. By this are meant several things: that individual experience happens in the passage of time and is in constant flux, but that it is recalled as a series of snapshot-like images (including written texts) that are interconnected. The totality of these 'life-expressions' makes up a kind of collective consciousness called 'objective mind'. This leads to the second factor: late in life, Schleiermacher had called the 'subjective' side of hermeneutics the 'psychological'. Dilthey intensified this notion: the interpreter belongs to his or her own moment in history, conditioned by society and culture. Understanding of history, then, comes about by the interpreter's 'injecting himself into' (*Sichhineinversetzen*) such life-expressions of the past, and making them his own experiences through 'sympathetic feeling' (*Nachfühlen*). (*See also* DILTHEY, WILHELM.)

3. MUSICAL HERMENEUTICS: 19TH CENTURY. What, then, would constitute a hermeneutics of music in the 19th century? It would be a type of writing concerned primarily not with the 'how' of music – abundantly represented in past theoretical writings by Rameau, Marpurg, Kirnberger, Gottfried Weber and others – but the 'what', not with mechanism but with meaning, not with technique but with content.

To the best of our knowledge, no author in the 19th century wrote about music under the banner of hermeneutics. There is no evidence that any such writer was familiar with the theory of hermeneutics put forward by Schleiermacher, or the extensions of that theory made by Wilhelm von Humboldt, Johann Gustav Droysen or Philip August Boeckh, nor yet with Dilthey's contribution. The one tangible exception is E.T.A. Hoffmann, who was personally acquainted with Schleiermacher from 1807, such that some of his musical writings might be seen as reflecting Schleiermacher's methodology – and who made perhaps the greatest contribution to 19th-century music criticism.

There is, however, a long lineage of writing about music between 1800 and 1900 that meets the above specification for a hermeneutics of music. Moreover, Hermann Kretzschmar, writing in 1902, retrospectively appropriated much of that lineage to hermeneutics. In 'Proposals for the Promotion of Musical Hermeneutics', the first of three essays, he identified Friedrich Rochlitz's periodical, the *Allgemeine musikalische Zeitung*, founded in 1798, as a forum for musical hermeneutics, citing C.F. Zelter and E.T.A. Hoffmann as notable contributors. In journalism he also cited Weber, in programme notes Wagner, and for introducing hermeneutics into music biography Carl Winterfeld and Otto Jahn. In his third article he cited Schumann as having 'formulated . . . in an eminently viable and wholly practicable way . . . the procedure for a rational and productive musical hermeneutics'. From later in the 19th century he identified others who, while excessively poetic or concerned with detail, were nevertheless working towards a new hermeneutic 'doctrine of affects'. Kretzschmar left implicit that his own *Führer durch den Konzertsaal* (1887–90) provided a model of such writing.

The notion of the *Allgemeine musikalische Zeitung* as the cradle of music hermeneutics is appealing in that Rochlitz hand-picked his reviewers, issued a directive to them at the time (1798) and subsequently published both that directive and a fuller statement by the Swiss writer Hans Georg Nägeli (1802). Both authors thought of the new journal as a 'literary-artistic institute' and, striking a high moral tone, sought to make it a 'tribunal of artistic judgment'. They expected all reviewers to share a common understanding on how judgment should be rationally administered. Rochlitz (1798) set up a tripartite schema for a review, covering (1) 'the sense and spirit', (2) 'the means' and (3) 'the grammar' of the work under examination. In proposing a methodology for the music critic, Nägeli (1802) outlined a 'horizon [*Gesichtskreis*] of pure objectivity' from which to determine the 'purely artistic content' of an absolute instrumental work. The horizon has four vantage-points (*Standpunkte*): (1) technical, (2) psychological, (3) historical and (4) idealistic. Of these, the first traced the ascent from 'elements and materials' to complete structures, judging by the rules of strict and free composition, to retrieve the 'technical content'. The second penetrated from the perceived effects to the 'essence' of the work to retrieve the 'psychological content', and here mutual understanding would have to give way to the reviewer's personal reaction and reflection. The third related the musical work to its time and culture, using historical data, to obtain its 'historical value'. The fourth looked for signs of 'genius, the infinite, the divine' in the completed work. The second and fourth were said to be insufficiently charted areas. Nägeli identified the fourth as the area in which 18th-century writing about music 'from Mattheson right up to Vogler, and even some in the *Allgemeine musikalische Zeitung*' had come to grief, asserting that 'some signs of genius may be accessible to theorizing understanding [*Verstand*]'. In addition, Nägeli created a procedure for 'applied music', e.g. a pedagogical work, vocal music or opera; for these, the absolute procedure is first carried out, and then a series of further criteria are applied.

The methodology constituted not a musical hermeneutics as such, but a bold comprehensive post-Kantian strategy for judgment. It involved the reviewer in traversing the musical work from different sides; in using established technical criteria, adducing historical evidence and risking unregulated personal reaction; and in performing an overarching manoeuvre from technical detail to the divining of spiritual presence. Together these uncannily foreshadowed the hermeneutic operation.

A review of the 'Eroica' Symphony published in February 1807 (three years after Schleiermacher's first published example of hermeneutic inquiry) distinguishes the 'technical and mechanical side' of the work's study from the 'aesthetic side', both needing investigation, and a 'midpoint' needing to be achieved if the symphony's 'individuality and rich content' are to be grasped. Cast thus as a critical project, this mirrors Schleiermacher's objective/subjective polarity, even hinting at the shuttling action of hermeneutic enquiry (Hyer, 1996).

E.T.A. Hoffmann's review of Beethoven's Fifth Symphony of 1810 – one of the most celebrated pieces of music criticism of all time – approximates to Schleiermacher's hermeneutic model in that it oscillates on two planes, between technical detail and transcendent effect, and between part and whole, until the entire four-movement work is held in view at the end (Bent, 1995). It even encounters and deals with *aporia* (e.g. why are the closing chords of the finale so oddly placed, destroying the composure of the previous moments? – in order to recall similar strokes in the first movement, and to rekindle tension at the last moment).

Schumann, in the opening issues of his new journal, the *Neue Zeitschrift für Musik* (1834), produced several articles that conform to the directives of Rochlitz and Nägeli remarkably closely. These include reviews of music by Heinrich Dorn, J.N. Hummel (June 1834), Ferdinand Hiller and J.C. Lobe (January 1835), and adopt a tripartite scheme. The most highly articulated is that of Hiller's 24 Etudes for piano op.15. It begins with a preliminary assessment of Hiller's historical placement, a cursory impression of the music, and a statement of critical policy that concludes (ii, 42):

> In this review as little as possible will be neglected, and Hiller's work will be apprehended from many sides – from the aesthetic side just as much as from the theoretical, not forgetting the pedagogical. . . . For as a teacher I think particularly in terms of three things: as it were, of flower, root and fruit; or of the poetic, the harmonic-melodic and the mechanical content; or in other words of what benefits the heart, the ear and the hand . . . I choose to divide this review, like a well-ordered sermon, into three parts, and to close the whole thing with a thumbnail sketch of each etude . . .

The review proper then proceeds: I, 'The poetry of the work; blossoms; spirit', II, 'Theoretical matters: relationship of melody to harmony; form and period structure' (including an elaborate formal chart); and III, 'Mechanical [=pedagogical] aspects', and concludes with a characterization of each of the 24 etudes. (The verdict is a mixed one.) In some of these reviews Schumann's fictitious characters, Florestan, Eusebius and Master Raro represent the different vantage points.

The fullest extension of the schematic review is that of Berlioz's *Symphonie fantastique* (*NZM*, July–August 1835). It is in two main sections, the second subdivided into 'the four viewpoints [*Gesichtspunkte*] from which a piece of music may be considered': I ('Florestan') ['psychological treatment']; II ('R. Schumann') [Introduction: statement of plan] – (1) form; (2) techniques of composition: harmony – melody – counterpoint – working-out – style – orchestration – piano arrangement; (3) idea; and (4) governing spirit. The plan is strikingly reminiscent of Nägeli's methodology, constituting a broadly hermeneutic plan that begins with a cursory impression, moves through technical and textual issues and concludes with the spirit of the work.

Franz Brendel (1811–68) carried Rochlitz's and Nägeli's programme further in a manifesto for his editorship of the *NZM* in 1845. He spoke of Rochlitz's lasting contribution in achieving the 'vantage-point of psychological description' in music criticism and recognized the current trend of 'bringing together the different intellectual disciplines under one general viewpoint'. He urged writers to study the music that historians and editors were then restoring for developmental patterns, so as to assimilate history into contemporary life. He envisaged a 'higher criticism' which could 'engage with general life, with literature and science and, in proceeding from the world of musical feeling, progress towards generally comprehensible principles of thought', drawing parallels with the other arts. In order to achieve this grand epistemological goal, music criticism needed to absorb and transcend both the objectivity of its first phase ('technical': 18th century) and the subjective grasp of content of its second ('psychological': early 19th century), to yield a criticism for which these two sides are inseparable. This would open up a 'broader horizon' for an 'autonomous general music criticism'.

In Germany, a growing tradition of non-technical, descriptive writing about music takes hold in the second half of the 19th century, most of it a response to the need to decipher meaning in Beethoven's music. Wagner's programme notes on the Ninth Symphony, the 'Eroica' and other works (1846, 1852–4) formed a prototype followed in similar notes for concert performance of his own works (1859–82). Ernst von Elterlein (Ernst Gottschald) belonged to Brendel's circle and was an advocate of F.T. Vischer's system of idealist aesthetics. He produced two pocket volumes, *Beethoven's Symphonien in idealen Gehalt* (1854) and *Beethoven's Clavier-Sonaten für Freunde der Tonkunst erläutert* (1856), which interprets the music through vivid, often apocalyptic naturalistic images. F.L.S. Dürenberg's descriptions of symphonies by Beethoven and others (1863) was in similar vein, as indeed were the programme notes that Sir George Grove began writing for Crystal Palace in 1856 and which culminated in the musical descriptions within his *Beethoven and his Nine Symphonies* (1896). Hans von Wolzogen's thematic guides to Wagner's operas belong to this tradition, as do the 400 *Meisterführer* of works by many composers released by H. Bechhold and later Schlesinger from 1894 onwards and Max Chop's *Erläuterungen zu Meisterwerken der Tonkunst* published by Reclam.

If these represent hermeneutics, they do so in an undisciplined form. Two authors, however, stand apart from these. Wilhelm von Lenz, in *Beethoven et ses trois styles* (1852), made a serious attempt to marry imagistic description with informed technical commentary, as part of a developmental biography of the composer's style that itself fell within a pioneering catalogue of the works. Von Lenz's aim in describing a work was to uncover the idea (*idée*) that 'presided over' that work. A.B. Marx, in the early criticism that he produced in his *Berliner Allgemeine musikalische Zeitung* (1824–30), and more particularly in his study of the life and creativity of Beethoven (1859), took this same notion of 'idea' (*Idee*) and employed it consistently in its Hegelian application, as an inner determining, holistic force. 'Idea' is an initial perception on the part of the composer. It drives the creative process forward, incorporates new insights, allows for changes of plan and ultimately governs the organic development of a

piece of music from nothing to the fully fledged work, but always with a view of the whole work in mind. In its mature form, Marx's method was no mere flight of fancy, but a systematic pursuit of evidence – from the circumstances of the composer's life, the development of mind and artistic sensibility, and the work itself in final form. He reconstructed the process of composition, seeking, like Schleiermacher, the world in between the work and the psychology of its creator. His two most fully developed examples of the method are his 1859 studies of the 'Eroica' Symphony (Burnham, 1997, pp.157–88) and the Ninth Symphony (Bent, 1994, ii, 213–37).

4. General hermeneutics: 20th century. For Martin Heidegger (1889–1976), hermeneutics was still 'the methodology of the historical humanistic disciplines', as it had been for Dilthey; but by then (1927, trans. 1996), this was only a 'derivative' sense (pp.37–8, 398). Hermeneutics had now assumed a much greater role within the work of philosophy, as the hermeneutics of human existence, *Dasein* (literally: 'being-there', p.436). That is to say, the understanding and interpretation that humanist scholars conduct spring from operations that take place at the very basis of human existence in its relation to the nature of being. In Heidegger's knotty language, it is hermeneutics 'through which the proper meaning of being and the basic structures of the very being of Da-sein are *made known* to the understanding' (p.37) which a human existence has of being. The meaning implicit in that understanding comes to be articulated through interpretation. In this way, hermeneutics is charged with the initial task of philosophy, the 'analytic of existence' (p.436).

Heidegger also confirmed the essential role of the circle in the hermeneutic situation: rather than avoiding it, 'our attempt must aim at leaping into this "circle" primordially and completely, so that . . . we make sure that we have a complete view of the circular being of Da-sein' (pp.315–16).

What were the consequences of this strange turn of events? what did it mean that hermeneutics, while continuing to be a methodology for history, the arts, psychology and the social sciences, had suddenly become one of the fundamental processes of philosophy? In one sense, nothing had changed. For man to distance himself from the world and view it dispassionately ('subject-in-Being': the way of technology) was still a false path: man must experience life, must engage with the world. On the other hand, the centre of focus had changed: 'author' (indeed, any other single human being) had disappeared and hermeneutics had become discovery of oneself in respect to the rest of human life.

The human mind brings preconceptions – 'prejudgments' (*Vorurteile*) – to whatever it encounters. 18th-century Enlightenment philosophy had sought to exclude these as prejudicial and to submit all things to pure reason; it also took a sceptical view of 'tradition'. Dilthey and Heidegger both explored the role of prejudgments, but it was Hans-Georg Gadamer (*b* 1900) who made both prejudgment and tradition central to his hermeneutics. Gadamer argued that in the human sciences the object of research never exists in isolation. In historical research, that object exists always within the passage of history. He saw a new type of historical consciousness, marked by self-criticism, as having came into being not with the great 19th-century German historians (such as Droysen and Mommsen), but after World War I (1960, trans. 1975, pp.290, 293; italics original):

> The self-criticism of historical consciousness leads finally to recognizing historical movement not only in events but also in understanding itself. *Understanding is to be thought of less as a subjective act than as participating in an event of tradition*, a process of transmission in which past and present are constantly mediated. This is what must be validated by hermeneutic theory, which is far too dominated by the idea of a procedure, a method. . . . [T]he circle of understanding is not a 'methodological' circle but describes an element of the ontological structure of understanding.

Gadamer rejected three aspects of the notion that the interpreter injects himself into the mind of the author (Schleiermacher, Dilthey). First, the focus on the author's psychology, on biography and on divination, was misdirected: the real meaning of a text depends not on the author but on the historical world from which that text speaks to us. Secondly, the subordination of the interpreter's mind to that of the author was unacceptable because it replicates the objectivism of Enlightenment and Romantic hermeneutics. Thirdly, even 'injection', or 'transposition', of the interpreter into the author's world was itself insufficient; instead, Gadamer employed the concept of 'horizon' (borrowed from the philosopher Husserl), 'the range of vision that includes everything that can be seen from a particular vantage point' (p.302). But to think of *two* horizons – the author's and the interpreter's – would be mere abstraction: 'the horizon of the past – is always in motion', as is also that of the interpreter. Hermeneutic activity consists of the fusion of those two ever-changing horizons into a single one: it 'involves rising to a higher universality that overcomes not only our own particularity but also that of the other' (p.305). Fusion, projecting a single historical horizon, involves constantly assessing one's own prejudgments, acknowledging one's connection to tradition and combining these with the horizon from which the original text was produced. This process is what Gadamer called 'consciousness of being affected by history' (*wirkungsgeschichtliches Bewusstsein*). Intangible though this may seem, we can be reassured that the hermeneutic experience remains one of 'questioning and understanding' the text (pp.374–5): interpretation remains a dialogue, in which, as fusion occurs, both our understanding and the meaning of the text change. The hermeneutic circle continues to operate, now not between subjective and objective (Schleiermacher), but between the text's 'strangeness and familiarity to us, between being a historically intended, distanciated object, and belonging to a tradition. *The true locus of hermeneutics is this in-between.*'

What in Gadamer's hermeneutics was 'prejudgment' took on a different cast in the work of Jürgen Habermas (*b* 1929), a member of the Frankfurt School, who engaged Gadamer in public debate from 1967. Habermas explored the possibility that understanding might depend not on context, not on a consensus of the tradition within which a given utterance occurred, but instead on a force exerted upon it that resulted in 'systematically distorted communication'. He argued that, while Gadamer's hermeneutics assumed human communication to be rational, in reality it is subject to distortion and deception. Habermas gave two instances: the operation of the unconscious mind as revealed by Freud; and the working of ideology within a society. Neither is localized: both are pervasive in human society. Habermas argued that these two forces cannot be left to the psycho- and political analyst respectively; that

hermeneutics itself must take on the task of interpreting such distorted communication, and that its result will be 'emancipation'.

Paul Ricoeur (*b* 1913) entered this debate in the late 1960s, seeking a middle position between those of Gadamer and Habermas. He accepted, with Gadamer, the notion of 'classic' texts that survive major cultural changes and acquire their own authority, an authority that is not that of the author – they decontextualize themselves. He was at the same time drawn to Habermas's interest in hermeneutics' liberating function, which is achieved through a process of self-reflection or critique (1970–79, trans. 1981, pp.59ff, 78ff). Via a course between Gadamer and Habermas, Ricoeur (whose thought is influenced by the work of Saussure, Pierce and Lévi-Strauss) sought to rehabilitate hermeneutics from the role Heidegger had assigned to it (the 'analytic of existence') to the world of text – what Ricoeur called 'the return route from ontology to epistemology' (p.88).

There are four components to this return. First are: (*a*) treating the distance between text and author – distanciation – as a positive attribute that grants it autonomy, and permits it to recontextualize itself with each new reading; (*b*) ridding hermeneutics of the explanation/understanding dichotomy and replacing it by reconstruction within a dialogue between reader and work; (*c*) allowing the world of the work to 'open up' to an unlimited series of new readings, such that, instead of discovering that world behind the text, hermeneutics unfolds it in front of the text. These lead to (*d*) a situation in which: 'To understand is not to project oneself into the text but to expose oneself to it; it is to receive a self enlarged by the appropriation of the proposed worlds which interpretation unfolds' (pp.94, 140ff).

5. MUSICAL HERMENEUTICS: 20TH CENTURY. 'Proposals for the Promotion of Musical Hermeneutics': the first ever use of this defining phrase was by Hermann Kretzschmar in the titles of two articles published in 1902 and 1905 (cited in §3 above; a third followed in 1906). This was a rallying cry for a conceptual syllabus, a training in identifying the mental/spiritual content of a piece of music, designed for listeners, performers and composers. It was to begin with a 'preparatory training in musical aesthetics' (an allusion to Jean Paul's *Vorschule der Aesthetik* of 1804). Kretzschmar invokes here the 'original meaning of the word "aesthetics", namely 'the doctrine of feelings and perceptions, in particular sensuous and artistic ones' (*Gesammelte Aufsätze*, ii, 179–80). This 'preparatory training' comprised two stages, 'aesthetics of motive' and 'aesthetics of theme', a secure grasp of which constitutes 'the foundation of all hermeneutics' (p.189) but in fact extends to include a knowledge of basic formal procedures, namely cadence and variation. The final stage, the 'aesthetics of composition' (*Satzästhetik*), constitutes musical hermeneutics proper, i.e. the study of entire compositions, whereby 'the play of thoughts and feelings is clarified and a grasp of the whole is made possible' (p.283). Kretzschmar's motivic and thematic foundation is a 'rehabilitation' of the Baroque doctrine of affects to which the collaboration of psychologists is 'altogether indispensable' (p.293). This rehabilitation is an indictment of the formal aestheticians of the 19th century, above all Hanslick ('The content of music is tonally moving forms', 1854, trans. 1986, p.29), for having failed musicians in their need to understand music, and the point is driven home by Kretzschmar's recommendation that abstract instrumental music is the best material on which to begin the course of study.

Kretzschmar's student, Arnold Schering (1877–1941), spurned psychological explanations of works and offered instead 'interpretations' (*Deutungen*) in the form of painstaking 'reconstructions' of how a work had taken shape in its composer's mind. He worked primarily with the music of J.S. Bach and Beethoven. From clues given by the latter's acquaintances, and by the matching of rhythmic patterns to prominent phrases of text, he identified literary works that Beethoven was thought to have read and that had provided the imaginative stimulus for instrumental compositions (1934, 1936). In this way he interpreted all the symphonies, most of the string quartets, 16 of the piano sonatas, seven violin sonatas and several other works. In the vocal works of Bach, he claimed to deduce the composer's intentional meanings through the forms of musical symbolism that Albert Schweitzer had recently uncovered (1925, 1928).

Interest in musical hermeneutics rekindled in the 1960s and 70s after several decades during which musicologists in Europe and America, in the prevailing spirit of positivism, had held it in disrepute. In Germany, the renewal centred on Carl Dahlhaus, who included in his *Foundations of Music History* (1977, trans. 1983) an examination of the rift that developed after 1920 between a type of analysis based on internal and verifiable evidence alone and a type that admitted evidence external to the work. He later examined the hermeneutics of E.T.A. Hoffmann as a set of dichotomies traceable back to the antithesis of *prima* and *seconda pratica*, and extending through to Kretzschmar (Dahlhaus, 1978, trans. 1989). Dahlhaus was the focal figure in a symposium on musical hermeneutics held in Frankfurt in 1973, contributors to which included Werner Braun, Karl Gustav Fellerer and Tibor Kneif (1975). The symposium recognized the methods of Kretzschmar and Schering as unsatisfactory, brought into consideration the work of Gadamer and the writings of Adorno, and sought to open a path to a less restricted concept of hermeneutics, offering attempts at interpretations of works by Mahler and Liszt.

Two writers contributed to the rekindling of interest on the American musicological scene from the 1960s on: Joseph Kerman and Leo Treitler. Kerman called trenchantly – notably in a 1965 polemic and a subsequent critique of the state of musicology (1985) – for a return to a humane 'criticism', a medium exemplified in his own books on the Elizabethan madrigal, opera and Beethoven's string quartets. Not quite itself a manifesto for a new hermeneutics of music, his polemic was instrumental in opening the way to several new kinds of discourse about music that relate at least tangentially to hermeneutics. More measured in tone was a series of articles by Treitler, beginning in 1966, maintaining that 'the meaning of a text is not fixed within its boundaries but is ever contingent upon the interests and the circumstances of the community of readers or listeners' (1989).

In 'Schubert's Promissory Note' (1982), Edward T. Cone maintained that relationships between music and external ideas and things can only fully be explained if they take into account relationships within the music. Showing how, in a Schubert *Moment musical*, a note the consequences of which are unrealized early in the piece – punningly, a 'promissory note' – and unfold only later,

can affect the entire structure, he posited human experience analogous to that tonal process and then mapped this experience on to biographical data to speculate on a concrete situation in the composer's life at the time of the piece (Schubert's realization of the implications of syphilis). Ten years earlier, Cone had delivered a series of lectures, later to become his book *The Composer's Voice* (1974), which proved seminal in American thought about music and did much to initiate a line of inquiry adapting literary techniques of narrativity (deployed by Vladimir Propp, André Jolles, A.-J. Greimas, Gérard Genette, Tzvetan Todorov and others) to music (*see* NARRATOLOGY, NARRATIVITY). Among writers pursuing this line cogently in the 1980s and 90s were Anthony Newcomb, Carolyn Abbate and Fred Maus.

The first in the English-speaking world to offer a theoretical formulation of the way in which musical hermeneutics operates, and a practical means of proceedings, was Lawrence Kramer (1990, chap.1); Kretzschmar had attempted neither of these things. Kramer was influenced by Gadamer and also by Nietzsche, Freud and an eclectic array of late 20th-century philosophers and writers on literature and music. His starting-point was Kant's assertion that, although moving the mind perhaps even more than poetry, while it lasts, music 'does not leave a residue of thought-content behind for the mind to reflect on' in retrospect. It is this notion that Kramer challenged, along with an inheritance from Hanslick, fortified by a battery of 20th-century analytic techniques that treat music as pure form and syntax. He recognized that meaning in music was not of the sort about which claims of truth or falsehood can be made. He saw music not as a species of 'language', but rather as a form of activity within society: a cultural practice. He maintained nonetheless that meanings do inhere in music, meanings 'definite enough to support critical interpretations comparable in depth, exactness, and density of connection to interpretations of literary texts'. However, those meanings have to be worked for, since music 'resists fully disclosing itself'. Invoking Derrida and J.L. Austin, he presented a theory of 'expressive acts' in music – acts that may recur under different circumstances in the course of a piece, those circumstances exerting their own distinct 'forces' on those acts. Interpretation comprises precisely recognizing and reflecting on those acts and forces.

The means to articulate this secretive meaning in music is through 'hermeneutic windows'. Such windows are entry points from the surface world of the music into a world of hidden meaning, and are mostly to be found at anomalies in the music's continuity, especially at moments of under- or over-determination, of 'surplus' and 'deficit', as he later called them. (The narratologist somewhat similarly looks for discontinuities in discourse, prising them open to reveal different voices at work.) Kramer identified three types of window, successively more difficult to detect: (1) textual inclusions – titles, epigraphs, on-score annotations etc.; (2) citational inclusions – musical quotations or allusions, links to visual images etc.; and (3) structural tropes, the most powerful presumably because the most intrinsic – this is where 'expressive acts' come into play. Kramer suggested a way for the interpreter or critic to detect these windows. Meaning does not necessarily come singly. Several meanings may exist at a given window; moreover, the meanings of different windows overlap and interlace with one another ('cultural practice is multiply determined'), such that a hermeneutic interpretation will typically have to contend with several strands at a time.

The work should not be thought of as the centre of a universe, or as merely relating to the cultural and historical environment in which it was formed. On the contrary, it is an active part of a network of interrelations of which no one 'site' is the centre: 'Meaning ... circulates everywhere'. Hermeneutic interpretation in consequence, is by its nature incapable of being systematized or disciplined. It pursues what it finds; it cannot be verified or falsified. Kramer exemplified the operation of his hermeneutic method on piano works by Beethoven and Chopin, Liszt's Faust Symphony and Wagner's *Tristan und Isolde*. He subsequently (1995) harnessed it to issues in musical POSTMODERNISM and of subjectivity and sexuality in the songs of Schubert (1998), where hermeneutics was brought into contact with psychoanalytic theories of Gilles Deleuze and Jacques Lacan.

A hermeneutics that takes from Gadamer the notions of prejudgment ('consciousness of being affected by history') and dialogue with the text, and from Ricoeur those of textual autonomy and distanciation, together with the two writers' mutual rejection of the recovery of an author's intentions, is employed by Gary Tomlinson in his study of *Music in Renaissance Magic* (1993). The focus of this inquiry is the Florentine humanist and philosopher Marsilio Ficino (1430–99), in particular his magical practice of singing Orphic hymns to improvised lyre accompaniment, of which there exist contemporary descriptions but no written artefacts. Sceptical modern thought is apt to dismiss a historical trace of this sort, incapable as it is of being reconstructed, and also antipathetic to the modern scientific outlook. In examining how these songs might have worked, Tomlinson constructed a rich and multi-stranded discourse on the role of magic in Renaissance life and the place of music within magical practice; into this discourse he wove the tenets of Neoplatonism, the views of a succession of thinkers who engaged with the occult, the fusion of the doctrine of the harmony of the spheres with modal ethos to produce an astrological musical practice, contemporary understanding of the body, the spirit and the soul, the relative importance of aural and visual communication, and the experience of demonic possession and the temporary escape of the soul from the body.

Hermeneutics as deployed here can, however, only expose the unbridgeable gap between the modern thinker and magical practice in late 15th-century Italy. In an attempt to span that gap, Tomlinson invoked the notion of the 'archaeology' of thought, as developed by Michel Foucault (1966, 1969). Foucault's conception is of penetrating beneath the surface record of history (documents, records, artefacts) so as to reach 'layers' at which things happen ever more slowly, and thus to uncover the unconscious meanings concealed beneath the conscious ones and, ultimately, the slow, grand intellectual movement of man's thought across the centuries. By his intandem use of hermeneutics and archaeology, Tomlinson strove to enter 'the space between people like Ficino and us' and to feel the 'irreducible difference' between them and us, while never being able to 'cross over to his side'.

In Germany, re-engagement with hermeneutics began only slightly earlier than in America, but in a more focussed way. Scholars in the field, in any case more

numerous, tended to work in research groups, often around a central figure, and held 'conversations' and symposia, often publishing collectively rather than independently. Building on the tradition of philosophical hermeneutics, a group of researchers centred around Constantin Floros in Hamburg sought to revitalize the extraction of content from music. Floros's three-volume work on Mahler (1977) exemplifies this school; the subtitles of volumes 1 and 2 reveal their connections to Kretzschmar and Schering: 'the spiritual world of Gustav Mahler, presented systematically', and 'Mahler and 19th-century symphonism in a new meaning: towards the establishment of a contemporary musical exegesis'. In these volumes, formal analysis and style criticism are only preliminary stages leading to an exegesis of Mahler's intentions (by means of letters, remarks, reports, scores etc.) and of his musical symbolism (bird calls, night music, cowbells etc.), which aims to open up the world of his mind/spirit (*Geist*) to the reader and listener. Another group, including Roland Harweg and Tibor Kneif, questioned whether music was capable of being 'understood' at all, instancing situations in which it produces an aesthetic effect upon its listeners without being understood (Reinecke and Faltin, 1973). A further group centred on Hans Heinrich Eggebrecht at Freiburg, who takes a radical view of understanding as an infinite process in which the only fixed point is the 'I' of the inquirer (1995).

The University of Konstanz group of literary theorists, centred around Hans Robert Jauss, developed 'Reception theory' (*Rezeptionsästhetik*) and promulgated its ideas through its journal *Poetik und Hermeneutik* (1964–). Reception theory disputes the notion that the meaning of a work of art is set for all time once it is released to the public, and can thus be understood purely by reconstructing contemporaneous conventions and beliefs. Against this latter 'essentialism' (which contributes to the dignification of some works as 'canonical' masterpieces), the theory contends that a work has a historical life which merely begins at its appearance – a life in which it interacts with its audience, influences society and comes into relationship with new works that are created after it. Instead of a fixed understanding of a work in its own time, Jauss substituted the idea (adapted from Gadamer) of a 'horizon of expectations'. A research group associated with the Salzburg Institute for Musical Hermeneutics, including Siegfried Mauser, Gernot Gruber and Wolfgang Gratzer, sought to apply Jauss's literature-based theory to works of music, the performance-based and non-representational nature of which presents significant obstacles. Their emphasis on understanding as process rather than as static phenomenon tends to shift the focus away from the work as notated score towards performance, and its study towards listening and hence to listener reaction and the realm of perception. A crucial term is *Aktualisierung*, 'making actual' or 'bringing into the present moment', thus the process whereby a listener brings a work into conjunction with his or her own experience and sees it against the background of society, past and present.

IAN D. BENT

**Hermes.** Ancient Greek god. Hermes, son of Zeus and Maia, appears in many contexts. A prominent aspect of his nature is that of the shepherd-god. Music has an assured place among his activities, thanks largely to the first of two HOMERIC HYMNS (iv and xviii) in his honour. In its 580 lines, it portrays a startlingly precocious new-born Hermes who killed a mountain tortoise (*chelus*, a name that came to designate the lyra proper) and used its carapace for the sound-chest of the first lyra. He thereupon stole the cattle of his brother APOLLO. Compelled by Zeus to reveal the theft, he made amends by presenting Apollo with the lyra.

It was inevitable that Hermes should have been credited with devising the syrinx (panpipes), in view of his pastoral attributes. More surprising is his association with the double aulos: a vase painting shows him playing the instrument, and he seems to have been among the many whom Greek writers named as its inventor. All these attributions are probably due to the outstanding cleverness which regularly characterized his portrayal in myth, and which made him a natural choice as the discoverer of many arts and devices, including astronomy, the alphabet and even music. It was only as an inventor, however, that Hermes had any noteworthy connection with the musical culture of Greece.

The Roman god Mercury may possibly have developed in part out of the figure of Hermes.

WARREN ANDERSON/THOMAS J. MATHIESEN

**Hermstedt, (Johann) Simon** (*b* Langensalza, 29 Dec 1778; *d* Sondershausen, 10 Aug 1846). German clarinettist. The son of an army band conductor, he was sent to a school for soldiers' children at Annaberg, where he learnt to play several instruments, including the violin. Later, he studied the clarinet with Franz Tausch. From 1801 until 1839 he was court clarinettist to Duke Günther I of Schwarzburg-Sondershausen. Under Hermstedt's tuition the duke became a keen clarinettist and commissioned Spohr's first concerto for the instrument. All Spohr's solo clarinet works – four concertos, two sets of variations and a potpourri – were written for and first performed by Hermstedt. Max Karl Eberwein, Methfessel and Spaeth also composed for him, as did Iwan Müller who, with Crusell, considered Hermstedt's talent unrivalled. He was an early advocate of the compositions of Mozart.

Hermstedt performed with success throughout Germany, often being judged the equal of Heinrich Baermann. His delivery, said to have been formed on that of the violinist Kreutzer, combined great technical brilliance and striking gradations of tone. Spohr's concertos, decidedly violinistic in style, proved so difficult that Hermstedt was obliged to add seven extra keys to his standard five-keyed instrument. Later he changed to a 14-keyed model, which had tuning slides. Ever adventurous, Hermstedt experimented with different mouthpiece materials and was one of the first to use a metal ligature.

PAMELA WESTON

**Hernandes, Pedro.** Spanish composer, perhaps identifiable with PEDRO HERNÁNDEZ DE TORDESILLAS.

**Hernández (Gonzalo), Gisela** (*b* Cardenas, 15 Sept 1912; *d* Havana, 23 Aug 1971). Cuban composer and teacher. She studied in Havana at the Bach Conservatory with Maria Muñoz de Quevedo (1930–35) and at the Conservatorio Municipal with José Ardévol (1940–44), and then in the USA at the Peabody Conservatory (1944–7) with Gustav Strube and Theodore Chandler. From 1947 to 1953 she was conductor of the Choral de La Habana and until 1962 was also a teacher and administrator at the Hubert de Blanck Conservatory. She became particularly involved in music education, developing together with the composer Olga de Blanck Martín a new method of music teaching and writing educational material; she was also co-founder of Ediciones de Blanck, publishers of educational and academic music books. After the Cuban Revolution (1959) she taught at the Instituto Nacional de Cultura and became an adviser to several government and educational organizations and, in 1969, to Cuban Radio.

Hernández's early works (1924–40) consist mostly of small-scale and educational pieces, and include the *Pequeña* suite (1929) for piano. In the early 1940s she was a founder member of the Grupo de Renovación Musical (1942–8), which included Argeliers León, Harold Gramatges, Hilario González, Edgardo Martín and Serafín Pró and was led by Ardévol. She adopted a contemporary, neo-classical and impressionist language and continued to write mainly small-scale vocal, choral and chamber works, of increasing quality and individuality. In 1944 she was awarded the National Composition Prize of Cuba for her *Suite coral* (1942) to a text by F. García Lorca. From 1947 until her death a strengthening of the nationalist aesthetic is evident, a nationalism whose roots lay in the works of 19th-century composers Manuel Saumell Robredo and Ignacio Cervantes and which gained legitimacy between 1925 and 1940 with Amadeo Roldán and Alejandro García Caturlat. Hernández increasingly used melodic material from Afro-Cuban songs as well as the rhythmic content of forms such as the *son* and *guajira*; she also set the words of contemporary Cuban poets and wrote children's songs. A significant work from this period is the choral cycle *Tríptico* (1967) to verses by the poet Nicolás Guillén. The strongly nationalist aesthetic of the final years does not indicate a break with the past but rather the integration with and enrichment of previously established principles.

WORKS

ALICIA VALDÉS CANTERO

**Hernández, Julio Alberto** (*b* Santiago de los Caballeros, 27 Sept 1900). Dominican composer. He studied solfège with his uncle, P.T. Camejo (1910–12), the saxophone with R.E. Peralta at the municipal Academy of Music and in 1912 the piano with J.O. García Vila and Manuel Quiroz; in the same year he joined the municipal band of Santiago. He was mainly self-taught in harmony, though he studied in Cuba with Pedro Sanjuán. In 1919 he became organist of the main church in Santiago and pianist of the Teatro Colón, where he accompanied visiting performers. He started teaching in the same year and in 1923 founded the José O. Garcia Vila School of Music; as a teacher he influenced musicians including Susano Polanco, Eduardo Brito and Guarionex Aquino. In 1927 the municipal band celebrated a festival with his works.

In Santo Domingo, he was a founding member of the Sociedad de Conciertos (1928) and the Orquesta Sinfónica (1932), which he directed until 1937; he conducted the orchestra of the Teatro Capitolio. He was appointed teacher of choral music in the city's schools (1934), and became artistic director of the radio station HIN (1935). In Santiago he became director of the radio station HIL (1937) and conductor of the orchestra of the radio station H19B. In 1942 he was appointed director of the Academy of Music and municipal band in Baní, but returned to Santiago (1944) to direct the Instituto Musical, succeeding J.F. García in the conductorship of the city's municipal band. He directed the public Elementary School of Music in Santo Domingo (1950–55), the National Conservatory's feeder school.

His unsystematic research into Dominican traditional music coloured much of his output. Principally a composer of salon music, his works include a zarzuela (1941) and various short works for band, orchestra and small chamber ensembles, though he is best known for his songs for voice and piano or orchestra based on folk music. In contrast with García, who popularized the *merengue*, the

main folkdance of northern region, Hernández put words to his *merengues*. He has written many articles on music.

MARTHA ELLEN DAVIS

**Hernández, Rafael** (*b* Aguadilla, 1891; *d* San Juan, 1965). Puerto Rican composer, bandleader and instrumentalist. Born into a humble musical family, he and his siblings Victoria and Jesús were skilled multi-instrumentalists. During World War I, Hernández played in the Hellfighter's Infantry Band of James Reese Europe. Later, he established the trend for guitar-based trios and quartets among New York Puerto Ricans in the 1920s and 30s, founding the Trio Borinquén (1926) and the Cuarteto Victoria (1932). In the period 1932–47 Hernández lived in Mexico, continuing to compose and also conducting radio and dance orchestras, between frequent visits to New York and back to Puerto Rico. He returned permanently to Puerto Rico in 1947, remaining active as a composer and bandleader until his death.

Revered as Puerto Rico's greatest and most prolific popular composer, Hernández is said to have written over 2000 songs. He is best known for *Lamento Borincano* (1930), a bolero which became an anthem for Puerto Ricans. Hernández composed sophisticated songs in a semi-classical vein, reflecting his extensive training and conservatory background. Focussing on romantic and poetic themes, his compositions feature complex melodic lines, contrapuntal vocal parts and frequent major–minor tonal shifts.

LISE WAXER

**Hernández Balaguer, Pablo** (*b* Havana, 13 July 1928; *d* Havana, 31 Jan 1966). Cuban musicologist. He studied the cello with Ernesto Xancó in Cuba and Barcelona, and musicology in Prague, Budapest and Moscow. In 1956 he settled in Santiago de Cuba, reviewing and organizing the music collections of the Museo Bacardí and Santiago de Cuba Cathedral, which resulted in the inauguration of the Museo Eclesiástico and the Archivo Provincial de Oriente, where he was director from 1959 until his death. He also lectured in music history, morphology and Cuban folk music at the Universidad de Oriente and Esteban Salas Conservatory. In 1961 he published the *Catálogo de música de los archivos de la catedral de Santiago de Cuba y del Museo Bacardí*, a catalogue of the names and works of local musicians, and in 1986 his study of the works of Salas y Castro culminated in the book *Los villancicos, cantadas y pastorelas de Esteban Salas*, the first history of the Santiago de Cuba music chapel, especially during Salas's tenure as master, which also contains analyses of the composer's non-liturgical religious music. This book, together with the catalogue and his essays published in a collection in 1986, places Hernández Balaguer in Cuba's historiography as a pioneer in the study of the country's religious repertory. It was his early death that prevented the completion of his proposed history of Cuban music. In addition he composed several works in a variety of genres including *Pastoral* for piano (1951), *Lied* for voice and piano (1951), *Madrigal* for mixed choir (1951), and *Divertimento* (1957) and *Elegía* (1958) for chamber orchestra.

VICTORIA ELI RODRÍGUEZ

**Hernández López, Rhazés** (*b* Petare, 10 July 1918; *d* Caracas, 13 Jan 1991). Venezuelan composer, flautist and writer on music. He began his musical studies with his father, Pedro Hernández Mujica. His musical education continued at the Academia de Música y Declamación, where his teachers included Vicente Emilio Sojo and Juan Bautista Plaza, graduating there in 1939. Later he studied composition in Caracas with Thomas Mager, Desiré Defaw, Primo Casale and Primo Moschini, the flute with Georges Barrère and musicology with José Antonio Calcaño. From 1934 he played the flute in the Venezuela SO. He taught the instrument at a number of institutions, and was head of the arts department of the Universidad Central de Venezuela and of the research department of the Instituto Latinoamericano de Investigaciones y Estudios Musicales Vicente Emilio Sojo. He was also cultural

director of the University of the Andes and general secretary of the Asociación Musical. He lectured in cultural institutions throughout the country. He published more than 2000 articles about Venezuelan music in the Venezuelan press and for encyclopedias around the world.

Hernández was one of the first Venezuelan composers to compose atonal and 12-note music. He won many awards as composer, such as the Premio Oficial de Composición (1951), the Premio Nacional Teresa Carreno (1970) and the National Prize of Music (1983).

JUAN FRANCISCO SANS

**Hernández Moncada, Eduardo** (*b* Jalapa, Veracruz, 24 Sept 1899; *d* Mexico City, 31 Dec 1995). Mexican composer and conductor. He studied in Mexico City with Rafael Tello, Joaquín Beristáin and Aurelio Barrios y Morales. He began his career working as a pianist in cafés and cinemas. In 1929 he was invited by Carlos Chávez to join the Mexico SO and the National Conservatory. In the orchestra he performed as a pianist and percussionist (1929–36) and as assistant conductor (1936–43), after which he left altogether. At the conservatory he taught various courses and held many posts until his retirement in 1957. He also lectured in other professional music schools.

From 1947 to 1956 he directed the Opera Academy, to which he introduced works which had never before been performed in Mexico, such as Milhaud's *Le pauvre matelot* and Debussy's *L'enfant prodigue*. He also translated the librettos of *The Visitors* by Chávez and the *Dialogues des carmélites* by Poulenc, and directed the first Mexican performance of the latter opera in 1959. He orchestrated many popular songs and composed scores for several ballets, plays and films, including the film *Enamorada*, directed by Emilio Fernández.

Hernández Moncada's work belongs to the Modernist period in Mexican music, and has a marked nationalist ideology. In general terms, his compositions are dominated by a treatment of melodies and themes which evoke his native state of Veracruz, but without resorting to specific references. His harmonic construction is chromatic and rhythmically innovative. His Symphony no.1, with its original treatment of rhythm within a classical format, the opera *Elena*, various songs such as *Tres sonetos de sor Juana*, and his piano piece *Costeña* are all noteworthy compositions.

EDUARDO CONTRERAS SOTO

**Hernández Salces, Pablo** (*b* Zaragoza, 25 Jan 1834; *d* Madrid, 10 Dec 1910). Spanish composer and organist. He was a choirboy at Nuestra Señora del Pilar in Zaragoza, where he studied music with Valentín Metón (organ and composition) and Ignacio Rabanals (violin). In 1848 he became organist of the parish of S Gil in Zaragoza, and in 1856 he moved to Madrid for further studies of the organ and composition (the latter he studied with Hilarión Eslava). In 1858 he won by competition the position of organist of S María de Atocha in Madrid, and in 1863 he was made professor of solfège at the Madrid Conservatory. Later he became organist at the church of Buen Suceso in Madrid. He was a prolific composer, writing masses, psalms, motets and *gozos*; his best works were published in his lifetime, resulting in their diffusion throughout Spain. He is one of the most representative composers of the Spanish school of church music in the second half of the 19th century, with all its merits and defects. His *Método técnico-práctico elemental de órgano* is an important source of information on the musical aesthetics of this school.

JOSÉ LÓPEZ-CALO

**Hernando (y Palomar), Rafael (José María)** (*b* Madrid, 31 May 1822; *d* Madrid, 10 July 1888). Spanish composer. From 1837 to 1843 he studied with Ramón Carnicer, Pedro Albéniz and Baltasar Saldoni at the Madrid Conservatory. During the next five years he took lessons with Filippo Galli, Manuel García (1805–1906) and others at the Paris Conservatoire, where in 1848 he completed the opera *Romilda*. Unable to get it performed in Paris, he returned to Madrid that same year, thenceforth dedicating himself to smaller theatrical genres, variously called 'sainete', 'zarzuela' and 'opereta'. Thanks to the librettist of *Romilda*, Peral, he was invited to add a number to Oudrid's zarzuela *El ensayo de una ópera* (1848), the success of which caused Peral to collaborate with him again in the one-act *Palo de ciego* (1849). His greatest triumphs were the zarzuelas *Colegiales y soldados* (1849) and *El duende* (1849), whose première was followed by a 126-night run. Barbieri later called *El duende* the very 'cornerstone of the modern zarzuela, because from its popularity stemmed the public taste for the zarzuela' (Casares Rodiccio, 1986). In the 1850s he composed five more zarzuelas and collaborated in another three. Hernando blamed the commercial failure of his last zarzuelas on his quarrels with Gaztambide, Oudrid and Barbieri; he attributed (preface to *Colegiales y soldados*, 1872) his 'exclusion' from the theatre to their opposition. Thereafter he composed religious works and music for state occasions and dedicated himself to other aspects of music. In the late 1850s he was involved in reorganizing the curriculum of the Madrid Conservatory, where he had served as harmony professor and secretary since 1852. In 1860 he founded a musicians' mutual assistance league, the Asociación Artistico-musical de Socorros Mutuos, and in 1864 published in Madrid the *Proyecto-memoria presentado a S.M. la Reina (q.D.g) para la creación de una academia de música*, designed to stir support for a national academy of music. He also published *Petición de subvención para el teatro lírico nacional* (Madrid, 1881) in support of opera and *Dictamen proponiendo la creación de una sección música en las academias provinciales de bellas artes* (Madrid, ?1884).

WORKS

STAGE

*zarzuelas etc.; all first performed in Madrid; printed works are vocal scores published in Madrid*

Palo de ciego (1, J. Peral), 15 Feb 1849 (1851); Colegiales y soldados (2, M. Pina and F. Lumbreras), Instituto, 21 March 1849 (1872); El duende (2, L. Olona), Variedades, 6 June 1849 (1849); Bertoldo y comparsa (2, G. Romero y Larrañaga), Basilios, 23 May 1850; Escenas en Chamberí (1, J. Olona), Circo, 19 Nov 1850, collab. Barbieri, Gaztambide, Oudrid; Segunda parte de El duende (2, L. Olona), Circo, 18 Feb 1851; El confitero de Madrid (2, L. Olona), Circo, 7 Nov 1851, collab. Inzenga

Por seguir a una mujer (4, L. Olona), Circo, 24 Dec 1851, collab. Barbieri, Gaztambide, Inzenga, Oudrid; El novio pasado por agua (3, M. Bretón de los Herreros), Circo, 20 March 1852; El secreto de la reina (3, L. Olona), Circo, 13 Oct 1852, collab. Gaztambide, Inzenga; Don Simplicio Bobadilla (3, M. Tamayo y Baus), Circo, 7 May 1853, collab. Barbieri, Gaztambide, Inzenga; Cosas de Don Juan (3, Bretón de los Herreros), Circo, 9 Sept 1854 (1854); El tambor (1, E. Álvarez), Conservatorio, 28 April 1860

Unperf.: Romilda (opera, 4, Peral), 1848; Una noche en el serrallo (2), 1856; El alcázar (1, J. Ruiz del Cerro), 1858; Don Juan de Peralta (3, J. Morán), 1862; Aurora (3)

OTHER WORKS

Sacred: Stabat mater, Paris, 1847; Misa votiva á S Cecilia, Madrid, 1867; Himno inaugural de los premios á la virtud

ROBERT STEVENSON

**Hernried, Robert (Franz Richard)** (*b* Vienna, 22 Sept 1883; *d* Detroit, 3 Sept 1951). American composer, conductor and musicologist of Austrian birth. He studied at the Vienna Conservatory under Heuberger, Fuchs and Mandyczewski, and at the University of Vienna. Between 1908 and 1914 he conducted opera in various provincial theatres in Austria and Germany, wrote two operas (one later performed), and published the first of his many articles. After World War I he taught in Mannheim (1919–22) and Erfurt (1924–6) before being invited to Berlin as editor and administrator for the Reichsverbandes Deutscher Orchester und Orchestermusiker. He taught at the Stern Conservatory (1926–8) and at the Akademie für Kirchen- und Schulmusik (1927–34); concurrently he carried on research and editing, published several books and numerous articles and reviews, and composed a great deal of music.

Deprived of his position by the Nazis in 1934, Hernried went to Vienna, and in 1939 to the USA, where he taught at St Ambrose College in Davenport, Iowa (1940–42), the State Teachers College in Dickinson, North Dakota (1942–3), and St Francis College in Fort Wayne, Indiana (1943–6). In 1946 he became professor of theory and composition at the Detroit Institute of Musical Art, and lecturer on music history and education at the University of Detroit. As a longstanding friend of Wilhelm Furtwängler, Hernried was convinced that the conductor had remained in Germany during the war for the noblest reasons, and he tried to restore Furtwängler's good reputation in the USA.

Hernried's music is well written in a solidly tonal idiom which he himself characterized as 'progressive Romantic'. About 100 of his pieces have been published. Apart from his two operas, *Francesca da Rimini* and *Die Bäuerin*, he wrote a concert overture for orchestra, many songs, several pieces for woodwind solo with piano, and a Concerto in the Old Style for violin. He also produced a

large number of choral works, both sacred and secular, among them a Mass in D which employs both a modal style and modern dissonance. He prepared the first modern edition of Geminiani's Concerti grossi op.3 (Leipzig, 1935) from the original 1732 parts. His numerous articles in European and American publications cover a wide range of subjects, and include several in the *Musical Quarterly* in which he published some hitherto unknown music of Schumann, and letters of Weber, Liszt and Hugo Wolf.

RAMONA H. MATTHEWS

**Herold** [Hérold], **(Louis Joseph) Ferdinand** (*b* Paris, 28 Jan 1791; *d* Paris, 19 Jan 1833). French composer of Alsatian descent. He was primarily an opera composer whose *opéras comiques* were regarded as masterpieces of *goût français*, and popular throughout the 19th century.

1. LIFE. Herold was the son of the pianist and composer François-Joseph Herold (*b* Seltz, Bas-Rhin, 10/18 March 1755; *d* Paris, 1 Sept 1802), who had studied with C.P.E. Bach in Hamburg. In 1781 François-Joseph Herold settled in Paris to teach music, and he was soon much sought after as a piano teacher. His own compositions were confined to piano pieces, chamber music and arrangements. He obviously taught his son Ferdinand to play the piano at a very young age, since the boy was only six when he composed his first works for the instrument. At the age of 11 Ferdinand Herold entered the famous Pension Hix, where his remarkable skill attracted attention; the young Fétis was one of his teachers. In 1806, when he was not quite 16, he entered the Paris Conservatoire, where he studied piano with Louis Adam, violin with Rodolphe Kreutzer and harmony with Charles-Simon Catel. In 1810 he won the *premier prix de piano*, offering a piano sonata of his own (op.1) instead of the requisite compulsory piece. In 1811 he was accepted into Méhul's composition class; the composer had a lasting influence on his musical development. During 1812 works by Herold were performed publicly for the first time. They included a piano concerto given on 6 April at the Théâtre Italien, with Herold himself playing the solo part. He won the Prix de Rome in the same year with his cantata *La duchesse de la Vallière*. The prize-giving ceremony took place on 3 October 1812, and Herold began his stay in Rome in November, but for reasons of health he did not spend the full year at the Villa Medici. In September 1813 he moved to Naples, where he obtained the favour of King Joachim Murat, who engaged him to teach his daughters music. While in Naples Herold met Paisiello and Zingarelli, and in 1814 he was commissioned to write his first opera, *La gioventù di Enrico quinto*, to a libretto from Alexandre Pineux-Duval's play *La jeunesse de Henry V*, adapted by Herold himself and versified by Landriani. The letters Herold sent his mother during rehearsals show how unusual it was for a French musician to be asked to write an Italian opera. *La gioventù di Enrico quinto* was given its première on 5 January 1815 at the Teatro del Fondo before the entire court, with the tenor Manuel García in the title role; the 24-year-old composer's first stage work had an enthusiastic reception. Soon after this success, however, Herold left Naples to travel to Vienna by way of Rome and Venice. As his letters show, the increasingly tense political situation of the time made the course of this journey remarkably dramatic. He reached Vienna finally on 30 May. He had permission to stay there for three months, two of which still remained to him; he met Salieri, whom he admired, and heard operas by Mozart as well as more recent works such as Weigl's *Der Bergsturz*, Gyrowetz's *Agnes Sorel* and Salieri's *Palmira*. As far as instrumental music was concerned, he particularly admired the works of Hummel.

Herold's journey home was by way of Munich, where he met Peter von Winter. He arrived in Paris in August 1815, and took up the post of accompanist (*maestro al cembalo*) at the Théâtre Italien in 1816. He was given his first commission to compose for a Parisian theatre in the same year, when Boieldieu offered him the chance to contribute to the opera *Charles de France*, an occasional work celebrating the marriage of the Duke of Berry to Princess Marie-Caroline of Naples. Herold wrote the second act. He next began working on *Corinne au Capitole*, intended for the Académie Royale de Musique, but he abandoned the composition because of problems over the libretto. In 1816 Théaulon asked him to write the music for a full-length opera, *Les rosières*, which was produced with great success at the Opéra-Comique on 27 January 1817 and had 44 further performances that year. Herold had another triumph with *La clochette* (1817), an adaptation of the tale of 'Aladdin and the Wonderful Lamp' from the *Thousand and One Nights*.

In the years that followed he continued to experience difficulty in finding suitable librettos. *Le premier venu* (1818), *Les troqueurs* (1819) and *L'auteur mort et vivant* (1820) were unsuccessful, and *L'amour platonique* (1819) was withdrawn during rehearsals. After these failures Herold wrote no more operas for two and a half years. In 1821 the director of the Théâtre Italien asked him to go to Italy to find new pieces, and more particularly to recruit singers; the theatre needed a *prima donna* and a *buffo cantante*, and the outcome was the engagement of Giuditta Pasta, Carlo Zucchelli and Filippo Galli. During his four months in Italy Herold visited Milan, Mantua, Florence, Verona, Venice, Rome and Naples. In Milan he heard Rossini's *La donna del lago*, which made a great impression on him, and attended performances of *La gazza ladra* in Mantua and *Ricciardo e Zoraide* in Florence. His journey home took him through South Germany, where he heard Meyerbeer's *Emma di Resburgo* in Munich.

In 1823 Herold had another opera produced, *Le muletier*, and this time with real success. Although the libretto was not of great literary quality, Herold's music was praised. He found his own language for the first time in this work, and the opera may be regarded as marking the emergence of his personal style. Soon afterwards, however, he had yet another bitter disappointment: his *L'asthénie* failed at the very theatre where he most wished to succeed, the Opéra. A one-act opera, it had 26 performances, but was not well received. It was followed by two occasional works, a collaboration on *Vendôme en Espagne* (1823) and *Le roi René, ou La Provence au XVe*

*siècle* (1824). *Le lapin blanc* (1825) was an even greater failure than *L'asthénie*, and was withdrawn after a single performance.

However, Herold's fortunes improved with *Marie* (1826), which was a resounding popular success. Planard had adapted the libretto from his own story *Almédan, ou Le monde renversé*. With this opera and Boieldieu's *La dame blanche* (1825), which had just been performed for the 100th time when *Marie* was produced, the Opéra-Comique had two outstandingly successful productions within a year. *Marie* equalled *La dame blanche* in its number of performances the next year, and over the following period the two operas dominated the repertory of the Opéra-Comique.

In November 1826 Herold gave up his post at the Théâtre Italien and became *premier chef de chant* at the Opéra. Major works of the emergent *grand opéra* genre (*Le siège de Corinthe*, *Guillaume Tell*, *Robert le diable*) were produced while he was the Opéra's singing coach. Meyerbeer greatly appreciated the work of his ever-loyal colleague. However, Herold's position did not help him to get a commission to write an opera for the Académie Royale de Musique; he was asked to compose ballet music instead, and over the following three years he wrote five ballets for the Opéra, including *La somnambule* (1827), *La fille mal gardée* (1828) and *La belle au bois dormant* (1829). Two more *opéras comiques*, *L'illusion* and *Émmeline* (both 1829), also fall into this very productive period; although interesting in themselves they were not particularly successful with the public, and the one-act opera *L'auberge d'Auray* (1830), written in collaboration with Carafa, was a fiasco. The sole purpose of this piece was to provide a vehicle for the actress Harriet Smithson.

The last three years of Herold's life were dominated by the composition of his two masterpieces, *Zampa* (1831) and *Le pré aux clercs* (1832). Two minor works, *La marquise de Brinvilliers* (1831) and *Le médecine sans médecin* (1832), were also composed during this period, but the only other work of importance that Herold wrote at the time was the *Hymne aux morts de juillet* (1831), a cantata set to words by Victor Hugo to celebrate the first anniversary of the July Revolution. With Mélesville's *Zampa, ou La fiancée de marbre*, Herold at last had a genuine *pièce bien faite* in his hands. The libretto contained the exact Romantic ingredients to guarantee success with the public, and Herold seized on the opportunity it offered. Even outside France, *Zampa* became one of the most popular *opéras comiques* of the 19th century. The reason why the opera was not an immediate resounding success is to do with the Opéra-Comique's financial difficulties and the fact that Jean-Baptiste Chollet, for whom the title role was tailor-made, left Paris for Brussels.

In 1832 the Opéra-Comique had to close because of the cholera outbreak and the riots of 5 and 6 June. During this period Herold finished another opera, *Le pré aux clercs*, to a libretto by Planard based on Prosper Mérimée's *Les chroniques du temps de Charles IX* (1829). It aroused wild enthusiasm at its première on 15 December 1832. However, Herold himself was unable to enjoy its triumph in the theatre as the tuberculosis from which he had suffered all his life had become considerably worse, and five weeks after the première he died, at the age of 42. However, he left the Opéra-Comique one of its best operas; by the end of the century *Le pré aux clercs* had been performed over 1500 times in Paris. Herold was able to do no more than sketch out his final project, an opera entitled *Ludovic*. His friend Halévy completed the score, and the work was performed three months after Herold's death.

*Ferdinand Herold: lithograph by Lemercier after L. Dupré, after 1832*

2. Works. Herold's work as a composer of opera was inevitably bound up with the problem of finding a good libretto. Although to set a text by Théaulon was a fine opportunity for the young composer, the collaboration was not an easy one: once he had completed a libretto Théaulon took little further interest in its operatic realization and the practicalities of staging it, so that Herold was left to his own devices. In spite of many deficiences in the librettos of his early operas, Herold's talent for music drama was evident in his first works for the stage. It is particularly obvious in his orchestration, which is far more colourful and varied than that of comparable *opéras comiques*. The score of *La clochette* is rich in every way, particularly in its melodic inventiveness, musical texture and instrumentation. Herold's ingenuity extends to the sound effects in the overture, where he directs the violins to play small pitch variations as if tuning up. Similarly, he showed a feeling quite early on for the transition between the spoken and sung parts of *opéra comique*, something that may be attributed to the influence of Méhul. It is present in the introduction of preceding recitative (*La clochette*, no.2) and the integration of spoken text into the musical numbers (*Le premier venu*, no.9). In certain passages Herold also gives directions for the tempo at which dialogue should be spoken above the music. All these details show that he had very precise ideas about the *opéra comique* genre.

While his first works were still written in imitation of the current *opéra comique* model, Herold found his own musical language with *Le muletier* (1823). The fact that the libretto was written by a lightweight author, Paul de Kock, does not seem to have affected Herold's inspiration. *Le muletier* very clearly reflects his intention of making use of the influences both of Rossini and of German

opera. His skill is evident wherever he has to give musical expression to emotion through subtle instrumentation; his nocturnes are among the finest passages in his scores in this respect.

The fact that Herold had a strong sense of musical drama can be inferred from his writings as well as his operas. While he was in Vienna he began jotting down his ideas. With typical understatement, he described his notes as a *Cahier rempli des sottises plus ou moins grandes, rassemblées en formes de principes par moi (Vienne 1815)*. The question of the stylistic synthesis to which Herold aspired, and which occupies a central role in his thinking, surfaces again and again in these reflections. When dealing with a serious genre he followed the lead of Salieri, whose *Danaïdes* and *Palmira* he regarded as operatic models. The mingling of Italian and French tastes was a prime concern: 'Try to find the middle ground between the vague music of Sacchini and the vigour of Gluck'. Similarly, the name of Mozart is connected with the blending of styles ('Keep thinking of Mozart'), but Herold also had faith in his own originality: 'And try to be myself, not Mayr'. As well as practical comments, for instance on the modulation of an aria, the *Cahier* contains reflections indicating Herold's own musical and dramatic ideas of *opéra comique*: 'The writer of comic opera must not depict morals or characters; the comedy must be the comedy of situation, of pantomime, of what can be seen; it must speak to the eyes, not the mind' (Pougin, 1906, p.31). Most significant of all, however, are Herold's ideas for a large-scale five-act opera, which anticipate the poetic concept of *grand opéra* (Pougin, 1906, p.54):

Act 1: Short, no special emphasis anywhere: little or nothing in the way of divertissements, but some interest to arouse curiosity. Opportunities for agreeable singing, and a good finale.

Act 2: In the grander style now. A little dancing, not of the same kind as in the first act. A bit of brilliant singing; a finale on a large scale. A short act.

Act 3: Very imposing scenery from the start. The utmost pomp here; large-scale divertissements; dancing for groups of 12, of 20, for one dancer, for two; a *revue*; horses. Military music on stage, a novel method, not over-done. The same goes for the singing: anything you like. A long and entertaining act.

Act 4: Very short; three scenes. Pathos, vigour: clashing, colourful crowds; original ending.

Act 5: Another short act, but with two changes of scenery, or anyway a striking final tableau. Several fluent, agreeable songs. The ending to be left to the scene painter, stage machinery designer or director.

The achievement of a blended style is most obvious in *Marie*, where Herold uses elements of both Rossini's and Beethoven's musical language. In terms of content Planard's libretto, with its emotional and sentimental aspects, approached Herold's idea of stylistic synthesis. It is clear that Herold was attempting to write an 'opéra de demi-caractère' from the juxtaposition of a naive and sentimental tone in the first act, a dramatically effective storm scene in the finale of the second act and tragic moments in the third act. Herold creates a connecting thematic link in his use of reminiscence motifs. The musical colouring in *Marie* is put to the service of dramatic truth and characterization, and the opera represents a crucial turning point in Herold's writing. Gérard de Nerval described *Marie* as the 'golden link' between the early operas *La clochette* and *Le muletier*, and the later masterpieces *Zampa* and *Le pré aux clercs*.

Herold's contribution to ballet must not be underestimated. During his period as singing coach at the Opéra he gave new life to narrative ballet by abandoning the tradition of arranging a series of well-known melodies. Instead, Herold's ballet scores are all entirely original compositions, written with a high degree of concern for the dramatic effect of the staging. Through him, music again became an important component of ballet. Adolphe Adam said that Herold had no rivals in the genre. Although he had not encountered leading librettists for his operas at this time, he did find them for his ballet scenarios, in Jean Aumer and Eugène Scribe.

In *Zampa, ou La fiancée de marbre*, his skill is particularly evident in the way he provides a musical version of Mélesville's drama, with all its contrasts; the subject's derivation from the Don Juan story seems to have inspired him in this. The overture, with its five different themes, points up the contrasting ideas in a striking manner, and the juxtaposition and opposition of varied musically expressive ideas give the score its quality and colour. *Zampa* displays Herold's particular skill in differentiating between the traditional numbers of *opéra comique*, from the solo numbers (*ballade*, *barcarole*, chanson etc.), used to illustrate the various characters, to the large-scale finales, notable for their skilful variation and the building of a dramatic climax. Although Berlioz thought *Zampa* a typical 'produit industriel' of Paris, its Romantic features made it extremely successful outside France.

In *Le pré aux clercs* Herold took a genuinely French subject, a cloak and dagger drama by Planard after Prosper Mérimée. The action, like that of Meyerbeer's *Les Huguenots* (1836), takes place in Marguerite de Valois's circle, and its treatment of the theme of Restoration represents an idealization of French history. The historical elements were made relevant to the present by Herold's very French style of composition; the success of the work showed that a historical subject could be appealing, and not solely by virtue of its local colour. Among the finest passages in the score are the overture (one of the few French overtures with real development sections), Isabelle's aria 'Jours de mon enfance', with solo violin accompaniment (Act 2), and the quartet 'L'heure vous appelle' in the third act, where a special effect is produced by tuning the violas down a semitone.

Herold did not think very highly of his non-theatrical compositions, which include two symphonies. Judging by the number of editions, his *Grandes variations* on 'Au clair de la lune' for piano (op.19) was the most popular of these works. His many arrangements and variations on well-known themes from operas suited the taste of the time.

Herold was one of the few French musicians who did not teach at the Conservatoire, but whose financial independence was not guaranteed by composing alone. Unlike Auber, he had no official links with any institution, nor was he fortunate enough to work on a regular basis with the outstanding librettist of the period, Scribe. Like Bizet, Herold had to wait a long time for a really good libretto, and it seems no coincidence that they were both at their most inspired in their *chefs-d'oeuvre* based on stories by Prosper Mérimée. As with Bizet, again, Herold's premature death ended a musical career full of promise for the future. Of all French operatic composers, Herold was certainly the most strongly influenced by German

music. He shared Weber's ideas of musical dramatization and his sometimes bold use of harmonics. However, he was very much the paradigm of French music of his time, and many of his contemporaries regarded him as the greatest composer in France.

WORKS

*printed works published in Paris unless otherwise stated*

STAGE

*autograph MSS at F-Pn unless otherwise stated*

La gioventù di Enrico quinto (oc, 2, Herold, Landriani, after A.V. Pineux-Duval), Naples, Fondo, 5 Jan 1815, vs (*c*1890)
Charles de France, ou Amour et gloire [Act 2] (oc, 2, E. de Rancé, M.E.G.M. Théaulon de Lambert and F.V.A. d'Artois de Bournonville), OC (Feydeau), 18 June 1816, vs (1816) [Act 1 by A. Boieldieu]
Les rosières (oc, 3, Théaulon de Lambert), OC (Feydeau), 27 Jan 1817 (1817)
La clochette, ou Le diable page (opéra féerie, 3, Théaulon de Lambert), OC (Feydeau), 18 Oct 1817 (1817)
Le premier venu, ou Six lieus de chemin (oc, 3, J.B.C. Vial and F.A.E. de Planard), OC (Feydeau), 28 Sept 1818 (1818)
Les troqueurs (oc, 1, F.V.A. d'Artois and L.C.A. d'Artois, after J.-J. Vadé, after J. de la Fontaine), OC (Feydeau), 18 Feb 1819 (1819)
L'amour platonique (oc, 1, A. Rousseau), comp. 1819, unperf.
L'auteur mort et vivant (oc, 1, Planard), OC (Feydeau), 18 Dec 1820 (1820)
Le muletier (oc, 1, P. de Kock, after La Fontaine, after Boccaccio), OC (Feydeau), 12 May 1823 (1823)
L'asthénie (opéra, 1, B. Chaillou), Opéra, 8 Sept 1823 (*c*1824)
Vendôme en Espagne (opéra, 3, E. Mennechet and A.-J.-S. d'Empis), Opéra, 5 Dec 1823 [collab. Auber]
Le roi René, ou La Provence au XVe siècle (oc, 2, G.A. Belle and Sewrin [C.A. de Bassom Pierre]), OC (Feydeau), 24 Aug 1824
Le lapin blanc (oc, 1, Mélesville [A.-H.-J. Duveyrier] and P. Carmouche), OC (Feydeau), 21 May 1825
Marie (oc, 3, Planard), OC (Feydeau), 12 Aug 1826 (?1826)
Astolphe et Joconde (ballet, 2, Aumer), Opéra, 29 Jan 1827
La somnambule (ballet, Scribe and Aumer), Opéra, 19 Sept 1827
Le dernier jour de Missolonghi (incid music, 3, J.G. Ozaneaux), Odéon, 10 April 1828 (1828)
Lydie (ballet, 1, Aumer), Opéra, 2 July 1828
La fille mal gardée (ballet, 2, d'Auberval and Aumer), Opéra, 17 Nov 1828, suite, arr. J. Lanchbery (London, 1960)
La belle au bois dormant (ballet, 4, Scribe and Aumer), Opéra, 27 April 1829
L'illusion (oc, 1, J.-H. Vernoy de Saint-Georges and C. Ménissier), OC (Ventadour), 18 July 1829 (?1829)
Émmeline (oc, 2, Planard), OC (Ventadour), 28 Nov 1829 (*c*1830)
La noce de village (ballet-tableau, 1), Palais des Tuileries, 11 Feb 1830
L'auberge d'Auray (oc, 1, C.F.J.B. Moreau de Commaguy and J.-B.V. d'Epagny), OC (Ventadour), 11 May 1830 (1830) [collab. Carafa]
Zampa, ou La fiancée de marbre (oc, 3, Mélesville), OC (Ventadour), 3 May 1831 (1831)
La marquise de Brinvilliers (drame lyrique, 3, E. Scribe and Castil-Blaze) [F.-H.-J. Blaze]), OC (Ventadour), 31 Oct 1831 (1831), collab. Auber, Batton, H.-M. Berton, Blangini, Boieldieu, Carafa, Cherubini and Paer (1831), autograph lost
La médecine sans médecin (oc, 1, Scribe and J.F.A. Bayard), OC (Bourse), 15 Oct 1832 (?1832)
Le pré aux clercs (oc, 3, Planard, after P. Mérimée), OC (Bourse), 15 Dec 1832 (?1833)
Ludovic (oc, 2, Saint-Georges), OC (Bourse), 16 May 1833 (1833) [completed by F. Halévy after Herold's death]
Fragments: Idoménée, 1808 [Act 1]; Corinne au Capitole (Gosse), 1816/17 [1 act]; Kasem (A. Bursay), *c*1817 [1 act]; Les puritains [Act 1 finale, 2 scenes Act 3]; Le clerc de la Basoche (Scribe), *c*1830; Le porte-faix (Scribe), *c*1830, [Acts 1 and 2]; Sophonès
Projected works: La princesse de Nevers, *c*1817; Les florentines (E. Théaulon), *c*1822

Many excerpts and arrs. pubd separately

OTHER VOCAL

Lyric scenes: Ariane, S, orch, 1811, *F-Pn**; Hercule mourant, B, orch, 1811, vs (Leipzig, *c*1895); Alcyone, S, orch, 1811, *Pn**, vs (?1887); La duchesse de la Vallière (d'Avrigny), S, orch, 1812 (*c*1890) [Prix de Rome cant.; Scena ed aria (Erga ciascuno a Bacco), 1v, chorus, 1814, *Pn*; others
Hymne de la Transfiguration (Lat. text), S, A, T, B, orch, 1814, *Pn**
Cantate pour la fête du roi (Perier), S, T, B, chorus, orch, 1816, *Pn*
Regrets des braves (Lacroix), pf acc., ?1820 (*c*1890) [stanzas on the death of the Duke of Berry]
Hymne aux morts de juillet (V. Hugo), T, chorus, orch, 1831 (n.d.)
Gloire à notre France éternelle (cant.), 1v, male chorus, 1831, vs (1880)
21 romances (*Pn*; nos.9–11, 18 lost): 1 Loin de toi, ma félicie; 2 J'aime la folie, 1807; 2bis La gaîté nous a abandonné, 1808; 3 Belles cessez, 1808; 4 On lit charmant, 1808; 5 La belle Alcimadure allait un jour, 1808; 6 Puisqu'éloigné de ma chère, 1808; 7 Des bergers de notre village; 8 Quand j'entends un homme sensé, 1808; 12 Ami sensible; 13 Pour Zéphire il faut chanter, 1811; 14 Adèle a su toucher mon coeur, 1811; 15 Lorsque Vénus donna le jour aux grâces, ?1812; 16 Je pense à lui, 1811; 17 Rose si vermeille et si belle; 19 Un jour l'amour éloigné de sa mère; 20 Est-ce là ce bocage, 1816; 21 Autrefois dans mon village, 1816
Other songs: Alcione, air, S, pf, 1811 (*c*1890); Canzonetta (Placido zeffiretto), 1v, pf, 1813 (*c*1885); Le chasseur des montagnes (Crevel de Charlemagne), romance; Le cor du bandit, ballade, 1v, pf, *Pn*; L'ermite et la bergerette (A. Bétourné), ballade; Les grandes journées (A. Talabot), chant national, S, pf; Quittons la danse (Bétourné), chansonette; Strophes à la cérémonie du Panthéon, 1v, pf/hp

THOMAS BETZWIESER

**Herold** [Heroldt], **Johannes** (*b* Jena, *c*1550; *d* Weimar, bur. 8 Sept 1603). German composer. He was an outstanding representative of Protestant musical life in Inner Austria (Styria, Carinthia and Carniola) at the end of the 16th century, along with J.F. Fritzius and Wolfgang Striccius. By 1593 he had settled at Klagenfurt on account of the Reformation, and served as Kantor at the Protestant collegiate school; he was also director of plainchant and polyphony at the church of St Egyd. When he had to leave Klagenfurt in 1601 because of the Counter-Reformation, he succeeded Nicolaus Rosthius as Kapellmeister of the court chapel in Weimar. Only one of his works is extant, *Historia des Leidens und Sterbens unsers Herrn und Heilands Jesu Christi aus dem Heiligen Evangelisten Mattheo mit 6 Stimmen componiert* (Graz, 1594; ed. in MAM, iv, 1955).

The work is roughly contemporary with Leonhard Lechner's *Historia der Passion und Leidens Christi* for four voices, and like this work it is a German Passion in motet form. Though less expressive than Lechner's Passion, Herold's is the more modern of the two and is considerably shorter. The influence of the Venetian style is readily apparent in the dramatic nature of the work. To judge from the title of the lost collection of songs, *Schöne weltliche Liedlein nach Art der welschen Cantionen mit 4 Stimmen auf allerley Instrumente zu gebrauchen*, Venetian influences were equally apparent here. Neither the *Etliche christliche Gesäng*, a collection of motets designed for use in the Protestant collegiate school in Klagenfurt (*c*1593), nor the *Teutsche Liedlein zu 4 Stimmen* (Nuremberg, 1601), has survived.

HELLMUT FEDERHOFER

**Herold, Vilhelm Kristoffer** (*b* Hasle, Bornholm, 19 March 1865; *d* Copenhagen, 15 Dec 1937). Danish tenor. He studied in Denmark and Paris and made his début at the Royal Theatre, Copenhagen, as Gounod's Faust in February 1893; later that year he appeared at the World's Columbian Exposition in Chicago. He sang at the Swedish Royal Opera (1901–3, 1907–9) and made his Covent Garden début in 1904 as Lohengrin, his most famous role; his voice was said to resemble that of Jean de Reszke in sweetness and beauty of timbre. In Denmark his Canio (*Pagliacci*) was equally esteemed. He also sang Walther, and in 1905 Roméo and Faust, admired for control, musicianship and presence. He returned to Covent Garden in 1907 as Walther and also sang in Berlin, Dresden and other German cities, but continued to sing in Copenhagen until he retired in 1915. He was director of the Kongelige Opera, Copenhagen, 1922–4, after which he taught (Melchior was among his pupils). He recorded excerpts from his roles, showing his restrained, thoughtful style.

LEO RIEMENS/ALAN BLYTH

**Hero of Alexandria.** Mathematician and engineer of the late 1st century CE; his description of the HYDRAULIS is still extant.

**Heroux, Franz (Ignaz Xaver)** (*b* Schwetzingen, 1 Aug 1760; *d* ?Frankfurt, after 1814). German violinist, keyboard player and composer. He was the son of Johann Nikolaus Heroux (*b* Strasbourg, 20 Oct 1720; *d* after 1776), a violinist at the courts in Zweibrücken (1748–55) and Mannheim (1756–69), and his wife Maria Magdalena, a member of the Wendling family. Franz began his career as a supernumerary violinist in Mannheim (1775–7). After serving in Zweibrücken (1779–94) he moved to Frankfurt, where he was a member of the theatre orchestra and directed one or two concerts a year that featured his own talented children. His known compositions include six lieder (Mainz, *c*1805), two keyboard potpourris (Mainz, n.d.), three keyboard trios and an overture, as well as smaller pieces for the piano, the flute and the violin.

Franz's brother, Johann Nikolaus Heroux (*b* Zweibrücken, 12 Jan 1755; *d* ?Frankfurt, after 1807) was a flautist in Mannheim, Zweibrücken (1768–95) and Frankfurt, and was long admired for his beautiful tone in both high and low registers. A sister, Magdalena Heroux, made her début in 1769 as a soprano at the Mannheim court, where she was a *virtuosa di camera* from 1770 to 1777; the Katharina Heroux who sang at Mannheim in 1771 and 1776 is probably another sister. His two sons, Karl Heroux (*b c*1786) and Franz Heroux (*b c*1795), were both violin prodigies.

ROLAND WÜRTZ

**Herpol** [Herpoll, Herpolitanus], **Homer** [Homerus] (*b* Saint Omer, *c*1520; *d* Konstanz, before 19 Oct 1573). Flemish composer. He was a cleric and in 1554 he became Kantor at the collegiate church of St Nicolas in Fribourg. One of his duties was to house and instruct the choirboys. Probably before 1550 and also from 1555 to 1557 he studied under Heinrich Glarean in Freiburg im Breisgau. In 1560 he asked for leave in order to visit Saint Omer, and in 1563 he again moved to Freiburg for some time. Four years later, because of moral lapses on his part, he

had to give up his office and prebend in Fribourg and leave the city. He applied for the position of Kapellmeister at Augsburg Cathedral, but he did not take up employment there. Subsequently he found a post as *Informator choralium* at Konstanz Cathedral. He took up the appointment on 3 October 1569 and was provided with a lucrative benefice. Part of his office was to instruct the choristers of the cathedral choir, and to provide new compositions.

Herpol's main work, *Novum et insigne opus musicum*, a collection of 54 motets on the Gospel texts of the whole ecclesiastical year, appeared in 1565 and enjoyed widespread popularity. This was the first known complete cycle, and in it the influence of Glarean's modal theory can be seen. The greater part of the collection is divided into four groups, each with 12 settings and each covering the range of the 12 church modes. Between the second and the third group there are five motets in the Dorian, Phrygian, Ionian, Hypoionian and Mixolydian modes, and the last group is followed by one motet in the Mixolydian mode. Smooth declamation and simple melodic structure combine with imitative and canonic technique to produce a balanced and pleasing whole. The melodic motifs often relate directly to the text, either as interpretations of it or as depictions of an individual word. Most of the motets are in two parts, often linked to each other by common sections. In his seven *Magnificat* settings Herpol set only the even verses. Some of the phrases in these compositions are related to the relevant recitation tones; others introduce freely invented motifs. The style of the settings is predominantly polyphonic and imitative; homophonic sections occur only occasionally. The interrelationships between the parts vary continually in these compositions and different voice combinations are frequently used. Among his best works are a *Salve regina* and a *Regina coeli*. It can be assumed that the works in manuscript belong to Herpol's later period: the seven *Magnificat* settings, *Salve regina*, *Regina coeli* and the responsories were probably composed in Konstanz after 1567. Herpol's style is clearly that of the generation of composers influenced by Josquin, and he is one of the most important representatives of the Franco-Flemish school in Switzerland and south-west Germany.

WORKS

*ed. in Sauerborn unless otherwise stated*

Novum et insigne opus musicum (Nuremberg, 1565) [54 motets]
Quia fecit, 3vv, in *Uss Glareani Musick ein Usszug* (Basle, 1557)
Canon, a 3, in A. Raselius: *Hexachordum seu quaestiones musicae* (Nuremberg, 1589), not in Sauerborn

7 Magnificat, 4vv
Officium in die sancto penthecostes, 4vv, ed. in Cw, cxxvii (1978)
Regina coeli, 4vv, ed. in Cw, cxxviii (1978)
Responsiones ad praefationes ad orationes dominicas in missis defunctorum, 4vv, *KA* 10
Salve regina, ed. in Cw, cxxviii (1978)
Several Dixit Dominus settings mentioned by Geering have no certain foundation.

MANFRED SCHULER

**Herrad of Landsberg** (*b* Château de Landsberg, nr Strasbourg, *c*1130; *d* Mont Ste-Odile, nr Strasbourg, 1195). Alsatian noblewoman and abbess. She was the compiler of the manuscript *Hortus deliciarum* ('Garden of Delights'), one of the earliest polyphonic sources from a nunnery. She entered the Augustinian house of St Odilien at an early age and became abbess in 1167; her learning soon became renowned, and earned the praise of the emperor Frederick Barbarossa.

She began compiling *Hortus deliciarum* as a pedagogical tool for her novices in 1167 and finished it in 1185. Although the manuscript's contents were not for the most part original, its scope was unusually encyclopedic and it could serve as a compendium of 12th-century knowledge. It was burnt in 1870, but some of the illustrations, poems and music had been published in facsimile by Engelhardt, thus permitting some degree of reconstruction. The illustrations are the most famous aspect of the manuscript: there were 336 symbolic representations of theosophical, literary and philosophical themes. Some are considered technically admirable and artistically imaginative to a rare degree.

Herrad clearly believed in the importance of music: at least 20 song texts were interspersed with extracts from pagan and classical writers in the manuscript. Few of these are now identifiable, but those that are can be linked to the conductus repertory: among these, *Leto leta cantio* is also found in the rondeaux section of *I-Fl* Plut.29.1, and *Veri floris sub figura* was widely known. *Sol oritur* (facs. in Engelhardt) and *Frigiscente caritas* have concordances in *GB-Ob* Add.A.44, which transmits mainly conductus texts. These songs are mainly note-against-note pieces, with refrains of 'o, o, o ... ' for each strophe. They were notated in semi-quadratic neumes on systems of two four-line staves; Vogeleis stated that all the song texts were notated.

NICKY LOSSEFF

**Herrando, Joseph de** (*b* Valencia, late 1720/early 1721; *d* Madrid, 4 Feb 1763). Spanish violinist and composer. His father was José de Herrando (*c*1700–*c*1750), a composer and performer in musical comedies. Herrando was the most important violinist in 18th-century Spain: he played for the most prestigious musical institutions and wrote the only substantial Spanish violin tutor of the time. He may have received musical training from Giacomo Facco. He entered the service of the Real Convento de la Encarnación in Madrid probably in the 1740s and became principal violinist in 1756. Farinelli employed him as one of 16 violinists at the Coliseo del Buen Retiro; he appears in its records for 1747 and 1758. He was also selected for Farinelli's orchestra at Aranjuez. His high reputation in these circles is born out by one of Jacopo Amiconi's official royal portraits in which three musicians, Herrando, Farinelli and Domenico Scarlatti, are depicted in a balcony overlooking the royal family. A tapestry in La Granja depicts the same triumvirate

appearing in a window. Some of Herrando's compositions were written at Farinelli's request, such as the six sonatinas for five-string violin. Herrando also forged professional affiliations with the well-respected Geminiani family. Miguel Geminiani (brother of Francesco) also played violin at the Buen Retiro, and Herrando was his successor as principal violinist at the royal chapel; Geminiani held the post until 1758, it then fell to Francisco Manalt and eventually to Herrando in 1759, despite the fact that his poor eyesight caused him to miss several notes during the sight-reading exam. In the 1750s and early 1760s he worked with José de Parra's company in the major theatres in Madrid. He was closely associated with the dukes of Alba and Arcos the latter being his patron and *dueño*.

It has been suggested that Herrando possibly went to Paris to oversee the printing of his violin treatise and probably met Francesco Geminiani there. Geminiani used the engraving from the beginning of Herrando's treatise (in which Herrando is seen playing the violin) in the French translation of his own violin method (Paris, 2/1762), substituting his own head for Herrando's. It may have been Geminiani who brought Herrando's music to England, thus explaining the publication of some of his sonatas in London.

Herrando's *Arte y puntual explicación* is a comprehensive compendium of advice on violin technique and performing practice. His 28 violin exercises are roughly analogous to Bach's *Das Wohltemperirte Clavier* in that Herrando wrote one study in each of the major and minor keys. The set works progressively through the sharp keys and then the flat keys, continuing, unlike Bach's set, to the extremes of C♯ major and A♯ minor and C♭ major and A♭ minor. The pieces become longer and technically more demanding as the book progresses, and they run the gamut of techniques and effects. In many ways they are worthy cousins to Corelli's op.5 sonatas. One of Herrando's most fascinating pieces is his sonata *El Jardín de Aranjuez en tiempo de primavera con diversos cantos de páxaros y otros animales* ('The Aranjuez garden in springtime with the diverse songs of birds and other animals'). It incorporates bird calls (e.g. canary, cuckoo, quail and dove) and other natural sounds (e.g. a murmuring brook and a tempest) reproduced on the violin.

CRAIG H. RUSSELL

**Herra Rodríguez, Luis Diego** (*b* San José, 23 Feb 1952). Costa Rican conductor and composer. After completing his musical studies at the Castella Conservatory (1969) he took a degree in conducting at the University of Costa Rica (1978). He took a further degree in composition (1985), studying with Benjamín Gutiérrez and Bernal Flores. He travelled to Europe to attend further classes and workshops, including the Summer Academy in Nice and classes in composition and analysis with Malec and Jolas at the Paris Conservatoire (1982). From 1982 he has been teaching at the University of Costa Rica and was the dean of the Faculty of Fine Arts of that university (1994–98).

From 1981–2 he conducted the Costa Rican Youth Orchestra and also taught conducting and composition to the orchestra's members (1982–5). He was assistant conductor to the National SO (1983–4) and has been a guest conductor of the University of Costa Rica SO. He

has conducted orchestras throughout Central America and in France.

His output as a composer includes symphonies, chamber music, solo pieces and music for ballet and theatre. He has twice won the Aquileo J. Echevarría National Music Prize: in 1984 (*Hálitos*, for brass quintet and tape), and in 1990 (Symphony no.1).

JORGE LUIS ACEVEDO VARGAS

**Herrer** [Herrerius], **Michael** (*b* ?Bavaria, 1550–75; *d* ?Carinthia, after 1608). German writer of contrafacta and editor. He was a Master of Arts and an Augustinian canon. Before 1591 he was dean of the foundation at Baumburg, Lower Bavaria. Later he was provost of at least three other foundations: from November 1591 at Suben am Inn, Upper Austria, from 1599 to 1603 at St Nicolai, near Passau, and then at Strassburg an der Gurk, Carinthia. He published four volumes of contrafacta. *Canticum gloriosae deiparae Virginis Mariae ... super varia (ut vocant) madrigalia* for six voices (Passau, 1602) is an edition of works by another canon from Suben, Martin Langreder. There are nearly 100 works in his more significant three-volume collection *Hortus musicalis* (Passau, 1606[6], and Munich, 1609[14-15]). The first book (which he stated was ready as early as 1602) is for five voices, the second for five and six, the third for five and more voices. (For further details, including the full texts of the introductions to his collections, see Leuchtmann.) Works by Italian composers predominate, but Netherlanders working in Germany and Italy (e.g. Lassus, Monte and Wert) are also represented. It is worth noting that Herrer included pieces by two composers – Jan van Turnhout and Peter Philips – whose vocal music had hitherto been published only in the Netherlands.

HORST LEUCHTMANN, A. LINDSEY KIRWAN

**Herrera, Juan de** (*b* Bogotá, *c*1670; *d* Bogotá, shortly before 18 March 1738). Colombian composer. He may have come from a wealthy family, as his father, Fernando de Herrera, was an *alférez*, a generally bought honorary military title that only the privileged could afford. Juan seems to have had a good education: it is possible that he pursued his clerical studies at the Jesuit Colegio de S Bartolomé, and he took a degree in either arts or theology, since he is referred to as *bachiller presbítero*. From about the late 1690s until his death he was chaplain and choirmaster to the nuns of the Dominican S Inés Convent, Bogotá. One of his students, María Gertrudis Teresa de Santa Inés, was well known for her beautiful voice. In January 1703 he became maestro de capilla of Bogotá Cathedral, a post he held until his death. This position, which required the provision of a regular supply of new compositions, as well as the teaching of choirboys, made him the most prolific composer of colonial Colombia. The cathedral records for 1711 show that the chapter considered him too permissive with the musicians, reprimanded him and even replaced him for a few months, only to reinstate him under pressure from the musicians. He wrote his will on 2 February 1738 and died during Lent; an interim successor was appointed on 18 March.

Of his 41 or so extant works at Bogotá, 30 are to Latin texts, the remainder being in the vernacular; the more mature works, dating from his period as maestro de capilla, include five masses, three requiem masses, several sets of vesper psalms, three collections of Lamentations, an incomplete *Officium defunctorum* and several villancicos. Most of his liturgical works are polychoral. In his earliest dated work, *Laudate Dominum, omnes gentes* (1689), for three choirs and harp continuo, the choirs are treated antiphonally and come together only at the final cadences of the three sections; the third choir is in only two parts, whose high tessitura suggests that they were intended for boys' voices. This work reveals Herrera's superb skill in treating polychoral techniques as well as in combining imaginatively the various sonorities of the three choruses. The two complete masses, for eight voices, also display solid choral writing and at times a rich harmonic vocabulary; some works survive only in posthumous copies, and several attributions by Perdomo Escobar are doubtful.

WORKS
*all in CO-B*

30 Lat. works: masses, 8, 9, 11vv (2 dated, 1725, 1758); vesper pss 7–11vv (2 sets dated, 1690, 1691), 2 ed. R. Stevenson, *Latin American Colonial Music Anthology* (Washington, DC, 1975); Officium defunctorum, 8vv (inc.), 1744; 3 Lamentations, 8, 12vv (2 dated, 1719, 1759); motets, 5–8, 10, 12vv, 1689–1733, 1 ed. GERARD BÉHAGUE

**Herrera, Martín Gómez de.** *See* GÓMEZ DE HERRERA, MARTÍN.

**Herrera, Tomás de** (*fl* Cuzco, 1611–20). Peruvian composer and organist. He was appointed organist of Cuzco Cathedral at Pentecost in 1611 at the annual salary of 300 pesos. On 16 August 1611 the cathedral chapter raised his pay to 450 pesos on the condition that he agree to continue in his post for four years, playing daily. His charming three-part chanzoneta *Hijos de Eva tributarios*

was copied in the second half of the 17th century into a 500-page commonplace book *Tesoro de diversas materias* (in Buenos Aires, Ricardo Rojas Museum, Gregorio de Zuola MS; transcr. in Stevenson, 1960; facs. in Vega). His two sons succeeded him at Cuzco Cathedral as chief organists; the elder, referred to as 'the licentiate Thomas de Herrera, priest', died shortly before 25 February 1682, and was immediately succeeded by the younger.

ROBERT STEVENSON

**Herrerius, Michael.** *See* HERRER, MICHAEL.

**Herresthal, Harald** (*b* Neuwied, Germany, 15 Jan 1944). Norwegian musicologist and organist. He completed studies in organ and church singing at Oslo Conservatory in 1966 and the MA in musicology at Oslo University in 1968; he also studied the organ with Grunenwald in Paris and Flor Peeters in Mechelen (1967–8). He was appointed lecturer (1964) at the Oslo Conservatory, and was made full professor of organ and chair of the department of church music and musicology in 1978; he also served as the president of the school, 1980–82. At the same time he was an active performer and was appointed organist of the Majorstua Kirke in Oslo in 1974. He has been editor of *Studia musicologica norvegica* (1990–93), the series Nordens Musikkhistorie and Masterpieces of Nordic Music. His writings focus on church music and Norwegian music of the 19th and 20th centuries and he has written music criticism for the *Morgenbladet*, *Verdens Gang* and *Aftenposten*.

KARI MICHELSEN

**Herreweghe, Philippe** (*b* Ghent, 2 May 1947). Belgian conductor and chorus director. In Ghent he pursued studies in both medicine and music, taking piano and organ lessons with Marcel Gazelle. In 1969 he founded his own choir, Collegium Vocale. The excellence of this group was noticed by Nikolaus Harnoncourt and Gustav Leonhardt, who invited it to collaborate in their recordings of the complete sacred cantatas of Bach. In France Herreweghe was invited to form a comparable ensemble to interpret French 17th- and 18th-century music, which led in 1977 to the founding of the Chapelle Royale choir and orchestra. With these groups he has recorded not only music of the *grand siècle*, including works by Lully, Lalande and Rameau, but also Classical and Romantic repertory by composers as disparate as Mozart, Mendelssohn, Berlioz and Bruckner. More recently, Herreweghe has further diversified his interests: in 1988 he formed the Ensemble Vocal Européen, comprising between five and 12 singers, to perform Renaissance polyphony, and in 1991 he founded the Orchestre des Champs-Elysées, a period-instrument ensemble specializing in late Classical and Romantic music.

As well as directing his own groups, Herreweghe is regularly invited to conduct established symphony orchestras, including the Concertgebouw and the NDR SO. In 1982 he was appointed artistic director of the early music festival at Saintes in south-west France. He has been honoured both in his native Belgium and in France, where in 1994 he was made an Officier des Arts et des Lettres. Although he has been admired in performances and recordings embracing a wide repertory, his recordings of Bach and of Romantic choral works have received special acclaim.

NICHOLAS ANDERSON

**Herrgott, Hans.** *See* HERGOT, HANS.

**Herrgott, Kunegunde** (*d* Nuremberg, 7 Feb 1547). German printer and wife first of HANS HERGOT and later of GEORG WACHTER.

**Herrick, Christopher** (*b* Bletchley, 23 May 1942). English organist. A boy chorister at St Paul's Cathedral, he sang with the choir at the Coronation in 1953. After studying at Oxford and with Adrian Boult at the RCM, he was assistant organist at St Paul's Cathedral from 1967 to 1974. He spent the next ten years at Westminster Abbey (from 1979 to 1984 as sub-organist), playing at royal and state occasions and giving more than 200 recitals. In 1984 he embarked upon a solo career which has taken him all over the world; at home he gave the solo organ concert in the centenary Proms season (1994). In addition to his concert and broadcasting schedule, Herrick has made highly individual recordings of all Bach's organ works on Metzler organs in Switzerland, flanked by an acclaimed series of virtuoso organ 'fireworks' on notable instruments in many countries. He broke new ground by recording the 12 Daquin *Noëls* on the restored 1739 Parizot organ in St Rémy, Dieppe.

STANLEY WEBB

**Herrmann, Bernard** (*b* New York, 29 June 1911; *d* Los Angeles, 24 Dec 1975). American composer and conductor. In 1929, while still a student at DeWitt Clinton High School, he enrolled for classes in composition and conducting at New York University. The subsequent year he followed his conducting teacher Albert Stoessel to the Juilliard School of Music, where he was taught composition by the Dutch émigré Bernard Wagenaar. He left the Juilliard School after less than two years, apparently because he found the institution too conservative, and returned informally to New York University during the academic year 1932–3 to attend a course in composition and orchestration given by Percy Grainger. Grainger's eclectic approach revealed to Herrmann the range and diversity of the musical materials available to the contemporary composer. Early in 1933, he formed the New

Chamber Orchestra from a group of unemployed musicians as a vehicle for his talents as both conductor and composer. The orchestra's repertory brought together contemporary compositions (including those of Ives, with whom Herrmann formed a lasting friendship) and works by English composers such as Purcell and Elgar, symptomatic of his anglophile tendencies.

In 1934 Herrmann was appointed assistant to Johnny Green, a conductor and composer at CBS, and from 1936 to 1940 composed a considerable quantity of incidental music for the radio series 'The Columbia Workshop' (1936–7, at least 75 shows), 'The Mercury Theater on the Air' (1938, 22 shows directed by Orson Welles) and 'The Campbell Playhouse' (1938–40, 56 shows, also directed by Welles). During his apprenticeship in radio theatre he developed a musical style which was immediate and economical, both in terms of the instrumental resources employed and melodic and harmonic language. The partnership he forged with Welles resulted in his first film score, *Citizen Kane*, composed in 1940 and released by RKO in 1941. In 1942 he scored a second film for Welles, *The Magnificent Ambersons*, but refused to let his name appear in the credits after the savage cutting of his music following poor audience response to the preview.

In the subsequent 12 years, Herrmann composed a number of scores for Fox studios, but it was his partnership with Alfred Hitchcock at Paramount and MGM (1955–64) which cemented his reputation. *Vertigo* (1958), *North by Northwest* (1959) and *Psycho* (1960) are generally held to represent the summit of his film scoring achievement; the infamous shower scene of *Psycho*, which Hitchcock initially intended to be unscored, is one of the most frequently referenced and influential cues in cinematic history. Throughout this period he composed cues and stock scores for CBS TV series such as *Rawhide*, *The Twilight Zone* and *The Alfred Hitchcock Half Hour*. In 1966 Herrmann felt unable and unwilling to acquiesce to Hitchcock's demand for a more overtly popular score for *Torn Curtain*, and composed no further music for him thereafter. During the final ten years of his career, he worked with the directors François Truffaut (*Fahrenheit 451*, 1966, and *La mariée était en noir*, 1967), Brian de Palma (*Sisters*, 1973, and *Obsession*, 1976) and ultimately Martin Scorsese on *Taxi Driver* (1976).

For Herrmann, orchestration was a composer's musical thumbprint. Unlike most other Hollywood composers of his generation he orchestrated his own music rather than passing a short score to a team of orchestrators. His instrumentation was often unusual: *The Day the Earth Stood Still* (1951) uses two theremins (an electronic instrument previously used by Miklós Rózsa in his 1945 scores for *The Lost Weekend* and *Spellbound*), electronic violin, bass and guitar, four harps, four pianos, percussion and brass; *Psycho* is scored for string orchestra; *Journey to the Center of the Earth* (1959) requires five organs; *On Dangerous Ground* (1951) has a solo part for viola d'amore. Herrmann generally avoided the 'leitmotif' system adopted by many film composers, finding that short phrases were less limiting to the composer than the closed forms of 8- and 16-bar melodies. Ostinato figures built around one- or two-bar units feature prominently in his later scores, often being associated with obsessive behaviour. Although Herrmann's musical language is fundamentally tonal, he makes sustained use of dissonance and chromatic embellishment, and employs complex harmonic units such as the superimposed E♭ minor and D major triads near the beginning of *Vertigo*.

Despite his wide acclaim as a film composer, Herrmann's concert works and operas have not had the same level of public success. His opera *Wuthering Heights* (1943–51) is perhaps his finest and most sustained achievement in this field. A complex and enigmatic figure who could be egotistical and irascible, refined and sentimental by turns, who hustled at the centre of the American culture industry, yet yearned for the English pastoral, he remains one of the central figures of film-music composition.

### WORKS

#### FILMS

*director in parentheses*

Citizen Kane (O. Welles), 1941; All That Money Can Buy (W. Dieterle), 1941; The Magnificent Ambersons (Welles), 1942; Jane Eyre (R. Stevenson), 1943; Hanover Square (J. Brahm), 1945; Anna and the King of Siam (J. Cromwell), 1946; The Ghost and Mrs Muir (J.L. Mankiewicz), 1947; The Day the Earth Stood Still (R. Wise), 1951; On Dangerous Ground (N. Ray), 1951; Five Fingers (Mankiewicz), 1952; The Snows of Kilimanjaro (H. King), 1952; Beneath the Twelve Mile Reef (R.D. Webb), 1953; King of the Khyber Rifles (King), 1953; White Witch Doctor (H. Hathaway), 1953; The Egyptian (M. Curtiz), 1954 [collab. A. Newman]; Garden of Evil (Hathaway), 1954; The Kentuckian (B. Lancaster), 1955; The Trouble with Harry (A. Hitchcock), 1955; Prince of Players (P. Dunne), 1955

The Man in the Gray Flannel Suit (N. Johnson), 1956; The Man who Knew Too Much (Hitchcock), 1956; Williamsburg, the Story of a Patriot (G. Seaton), 1956; The Wrong Man (Hitchcock), 1956; A Hatful of Rain (F. Zinnemann), 1957; The Naked and the Dead (R. Walsh), 1958; The Seventh Voyage of Sinbad (N. Juran), 1958; Vertigo (Hitchcock), 1958; Blue Denim (Dunne), 1959; Journey to the Center of the Earth (H. Levin), 1959; North by Northwest (Hitchcock), 1959; The Three Worlds of Gulliver (J. Sher), 1960; Psycho (Hitchcock), 1960; Cape Fear (J. Lee Thompson), 1961; Mysterious Island (C. Endfield), 1961; Tender Is the Night (King), 1961; The Birds (Hitchcock), 1963 [as sound consultant]

Jason and the Argonauts (D. Chaffey), 1963; Marnie (Hitchcock), 1964; Joy in the Morning (A. Segal), 1965; Fahrenheit 451 (F. Truffaut), 1966; Torn Curtain (Hitchcock) 1966 [rejected score]; La mariée était en noir [The Bride Wore Black] (Truffaut), 1967; Twisted Nerve (R. Boulting), 1968; The Battle of Neretva (V. Bilajic), 1969; The Road Builder [The Night Digger] (A. Reid), 1971; Endless Night (S. Gilliat), 1971; Sisters (B. de Palma), 1973; It's Alive (L. Cohen), 1974; Obsession (de Palma), 1976; Taxi Driver (M. Scorsese), 1976

#### TELEVISION AND RADIO

Television (all series or compilations partly scored by Herrmann): The Alfred Hitchcock Half Hour; Alfred Hitchcock Presents; The Americans; Collector's Item; Convoy; Ethan Allan; Forecast; Gunsmoke; Have Gun Will Travel; House on 'K' Street; Impact; The Kraft Suspense Theatre; Landmark; Pursuit; Rawhide; Studio One; The Twilight Zone; The Virginian

Radio: The Campbell Playhouse; Columbia Presents Corwin; The Columbia Workshop; Crime Classics; Mercury Summer Theatre; The Mercury Theater on the Air; Orson Welles Show; Suspense; others

#### VOCAL

Ops: Wuthering Heights (op, L. Fletcher, after E. Brontë), 1943–51; A Christmas Carol (M. Anderson, after C. Dickens), 1954 [television]; A Child is Born (after S.V. Benét), 1955 [television]

Musical: The King of Schnorrers (D. Lampert and S. Wencelberg after I. Zangwill), 1968

Cants.: Moby Dick (W.C. Harrington, after H. Melville), solo vv, male chorus, orch, 1937–8; Johnny Appleseed, solo vv, chorus, orch, 1940, incomplete

Other: The Fantasticks (N. Breton), song cycle, S, A, T, B, chorus, orch, 1942

#### INSTRUMENTAL

Orch: Variations on Deep River and Water Boy, 1933; Currier and Ives, suite, 1935; Nocturne and Scherzo, 1936; Sym., 1939–41; For the Fallen, 1943; Welles Raises Kane, suite, 1943

Chbr: Aria, fl, hp, 1932; Marche Militaire, chbr orch, 1932; Aubade, 14 insts, 1933 [rev. as Silent Noon, 1975]; Prelude to Anathema, 15 insts, 1933; Sinfonietta, strs, 1935; Echoes, str qt, 1965; Souvenirs de voyage, cl, str qt, 1967

Principal publisher: Novello

DAVID COOPER

**Herrmann, Gottfried** (*b* Sondershausen, 15 May 1808; *d* Lübeck, 6 June 1878). German pianist, violinist, organist, composer and conductor. He was born into a family of musicians; his father, J.H.W. Herrmann, was a Nordhausen town musician. He studied the piano with Seebach (the local organist), the piano and organ with Mühling and the violin with his father, and subsequently in Kassel he had free violin lessons with Spohr (1826–7) and studied theory and composition with Hauptmann. On Spohr's recommendation he became first violinist in the Hanover Hofkapelle (1827), continuing his studies with the court organist and pianist Aloys Schmitt. In 1829 he joined the Frankfurt municipal orchestra as first violinist and formed an excellent string quartet which made several concert tours.

After a period in Nordhausen during the aftermath of the July Revolution (1831) he moved to Lübeck as deputy organist of the Marienkirche (1832, organist from 1833), and in 1833 the post of city music director (with responsibility for sacred and secular music and music education) was created for him. In the same year he obtained citizenship and in 1835 married his singing pupil Luise Bruhns. From 1834 he conducted regular subscription concerts, in which he promoted contemporary works, and he became acquainted with such visiting performers as Loewe, Ole Bull, Clara Wieck and Liszt. He also conducted the Gesangverein, Alte Liedertafel, Cäcilienverein and the municipal theatre orchestra, initiated the Norddeutscher Musikfestverein (1839) and gave private lessons.

During a concert tour to Paris (1843) Herrmann was rated a better violinist than Vieuxtemps and was apparently considered as prospective organist at the Madeleine. However, he subsequently became royal Kapellmeister at Sondershausen (1844), where he introduced works by Wagner as well as Spohr, Berlioz and Liszt, and founded a chamber-music society, Euterpe (1849). In 1852 he returned to Lübeck as city director of secular music; he directed opera and theatre performances, giving the first Wagner performance in Lübeck (*Tannhäuser*, 1855), and organized an annual series of eight chamber concerts (from 1853). On visits to Hamburg he got to know Brahms (1859, 1860) and gave two concerts of his own compositions (1862, 1874). In Altenburg (1868) his String Octet was performed twice on successive days. At his memorial concert (9 Nov 1878) his choral work *Heilig* and Second Symphony were heard.

Herrmann was not recognized as a composer during his lifetime. His operas failed because of their untheatrical texts, but their music has dramatic power and melodic invention. Spohr's influence is obvious, though not excessive, in the concertos and chamber music and Beethoven's in the symphonies. His weightiest work, the First Symphony (*Sinfonia patetica*, 1841), has been considered (Göhler) to equal Schumann's and Mendelssohn's symphonies in stature and to anticipate Wagner's *Tristan* style and the technique and instrumentation of Brahms.

Gottfried's brother Carl (*b* Sondershausen, 10 March 1810; *d* Sondershausen, 17 Feb 1890), a violinist and oboist, followed him to Frankfurt and Lübeck, playing in the municipal and theatre orchestras; from 1834 he was royal Kammermusikus of the Sondershausen Hofkapelle and retired in the late 1870s. Carl's daughter Clara (*b* Sondershausen, 18 May 1853; *d* Lübeck, 28 Feb 1931) was a gifted pianist and continued Gottfried Herrmann's Lübeck chamber concert series until 1921.

HANS HAASE

**Herrmann, Hugo** (*b* Ravensburg, 19 April 1896; *d* Stuttgart, 7 Sept 1967). German composer and organist. Having no systematic music education, he intended originally to follow his father as a provincial schoolteacher, but after war service he studied at the Stuttgart Conservatory and then at the Berlin Hochschule für Musik under Gmeindl and Schreker. He worked as an organist and choral conductor in Balingen and Ludwigsburg (1919–23) and then went to the USA for two years, serving as organist of the Church of the Holy Redeemer, Detroit. Back in Germany he worked in Reutlingen (1925–9, 1932–5), held a position at the Wiesbaden Staatstheater (1929–32) and was from 1935 director of the Trossingen Städtische Musikschule, where he was made professor in 1950. A composer of *Gebrauchsmusik*, he was particularly active during the 1930s in directing music festivals such as Donaueschingen (1934–7) for the purpose of creating community music. At Hindemith's suggestion, he composed the *Sieben neue Spielmusiken* (1927) which is generally regarded as the first work of musical importance written for the accordion. This was followed by several other works of substance for the instrument (concertos, duos and solo pieces). Herrmann was also an enthusiastic proponent of the harmonica.

WORKS
(*selective list*)

Stage works: Gazellenhorn (chbr op, 1, E. Rupp-Gerdes), Stuttgart, 20 Mar 1929; Der Rekord (school op, Seifer), 1930; Vasantasena (2, L. JOHN MORGAN/ERIK LEVI

**Herrmann, Jakob Zeugheer.** *See* ZEUGHEER, JAKOB.

**Herrmann, Karl-Ernst** (*b* Neukirch, Upper Lusatia, 1936). German director and designer. He studied design and scenography with Rudi Wagner and Willi Schmidt at the Hochschule für Bildende Kunst in Berlin. He began designing for the theatre in Ulm (1961) and in 1969 encountered the director Peter Stein in Bremen, beginning a long association with him with a sensational production of Brecht's early play *Im Dickicht der Städte*. After working with Stein at the Berlin Schaubühne, Herrmann left in 1978 to work as a freelance opera and theatre designer. His first major opera production was *Das Rheingold* (directed by Stein), the first part of the Paris Opéra *Ring* of 1976 (which proceeded only as far as *Die Walküre*, directed by Klaus-Michael Grüber, before the cycle was abandoned). In 1978 Herrmann designed *Così fan tutte* for Luc Bondy at the Théâtre de la Monnaie, Brussels, which has since been the centre of his activities. There he made his début as the director as well as the designer of an opera, in Mozart's *La clemenza di Tito*. The success of that production led to a cycle of Mozart operas (*Don Giovanni*, *Die Entführung aus dem Serail*, *La finta giardiniera*, *Die Zauberflöte* and *Le nozze di Figaro*), which has been hailed as one of the most original in the 1980s and early 1990s. He has also directed *La traviata* and Gluck's *Orfeo ed Euridice* there. Herrmann's work, in close conjunction with his wife, Ursel Herrmann, and Geoffrey Layton, is characterized by a strong neo-classical visual vocabulary and the creation of a temporary ensemble of actor-singers. His productions formed the keystone of Gérard Mortier's régime at La Monnaie. Significantly, Mortier imported his Brussels versions of *La clemenza di Tito* and *La finta giardiniera* for his inaugural Salzburg Festival in 1992.

HUGH CANNING

**Hersant, Philippe** (*b* Rome, 21 June 1948). French composer. He studied at the Paris Conservatoire, where he was a pupil of Jolivet, subsequently receiving bursaries to work at the Casa Velazquez, Madrid (1970–72), and the Villa Médici, Rome (1978–80). He became a producer at Radio France in 1973. His many awards have included the Prix Arthur Honegger (1994), the Prix Maurice Ravel (1996) and three SACEM prizes, including the Grand Prix de la Musique Symphonique (1998). Between 1998 and 2000 he was composer-in-residence with the Orchestre National de Lyon.

Hersant has composed in a variety of genres, tackling each with a rigour that never clouds the originality of his imagination and lyricism. A common structural device in his music is the projection throughout a composition of a single stable idea, such as a chord, a recurrent motif or a pedal note. Stylistic references to the past, whether to Tallis or Monteverdi, Liszt or Bartók, are always closely tied in with the atmosphere of the work as a whole. His vocal works set the most challenging poetry – writers such as Hölderlin, Leopardi and Heiner Müller – in a way that allows each text to condition the form of the composition differently. He has developed a mastery of orchestration which is as apparent in his handling of the full orchestra as in his skilful, and often original, exploitations of specific instrumental groups (as in the Cello Concerto no.1 and *Landschaft mit Argonauten*); significantly in his opera *Le château des Carpathes*, it is the orchestra that structures the course of the dramatic action.

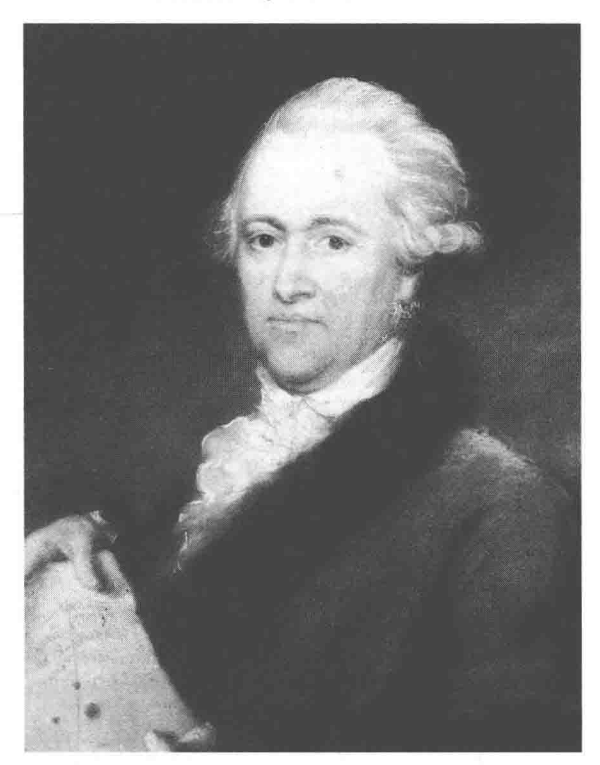
MYRIAM SOUMAGNAC



**Herschel,** Sir **William** [Friedrich Wilhelm] (*b* Hanover, 15 Nov 1738; *d* Slough, 25 Aug 1822). English musician and astronomer of German birth. The son of the violinist and

oboist Isaac Herschel (*b* 14 Jan 1707; *d* 22 March 1767), he was born Friedrich Wilhelm Herschel and became a naturalized English citizen on 30 April 1793 with the name William Herschel. As a young boy he excelled at scientific studies but was soon engaged by the Hanover Guards as an oboist and violinist (1 May 1753). 'This engagement', he said, 'furnished the means for my improvement not only in music, which was my profession, but also in acquiring a knowledge of the French language, with the advantage of studying above two years under a very well informed teacher [Hofschläger], who . . . encouraged the taste he found in his pupil for the study of philosophy, especially logic, ethics and metaphysics.'

In 1756 the Seven Years War began and in April the Hanover Guards were posted to England in anticipation of possible attack by the French. On their return to Germany that autumn Herschel and his father found the conditions severe. Following the Battle of Hastenbeck Isaac's concern for his son's safety led him to discover that on account of the latter's youth he had not been sworn in and therefore could be easily granted dismissal from military service. This was quickly procured.

Later that year, William and his elder brother, Jacob (*b* 20 Nov 1734; *d* 1792), returned to England and tried to establish themselves as musicians. William soon found work as a music copyist while Jacob, after taking on some private pupils, returned to Hanover in 1759. William 'found [himself] in great difficulties, and seeing no likelihood of doing well in London [he] intended to try for better success in the country'. The best opportunity was as head of a small band for a regiment of militia in Yorkshire. The band consisted of only two oboes and two french horns but Herschel considered them excellent performers and composed military music 'on purpose to show off our instruments'. These were his first known compositional efforts and their success can be judged by the fact that he produced a substantial number of works over the next five years. Compositions extant from 1759 include two viola concertos and one oboe concerto, all undoubtedly reflecting his performing ability. Between 1760 and 1766 Herschel wrote many more compositions, including 18 symphonies, which he rehearsed with groups he conducted, often also appearing as soloist. His several autobiographical accounts, together with his methodical grouping and dating of manuscripts, give a clear picture of a talented and energetic young man intent on establishing himself in the Newcastle area. In 1761 he conducted a band of 30 musicians in Newcastle to honour the King's coronation day and in 1762 he became manager of the subscription concerts in Leeds.

In March 1766 Herschel was appointed organist at St John the Baptist, Halifax, where he remained for just three months, and in late 1767 he became organist at the Octagon Chapel, Bath. By now he was well established in musical circles in the important centre of Bath but his interests focussed increasingly on his scientific, and particularly astronomical, activities. In 1777 he commented that 'Musical business carried on as usual. All my leisure time was given to preparing telescopes and contriving proper stands for them. I kept a regular account of any experiments of polishing'. On 13 March 1781 he famously discovered Uranus (then named Georgium Sidus, after King George III). The following spring, the King awarded Herschel an annual stipend of £200 so that

*William Herschel: portrait by John Russell, pastel on blue paper, 1794 (National Maritime Museum, London)*

he might devote himself entirely to astronomy and he gave up his musical career.

So compact is Herschel's compositional career that it is perhaps surprising to find in it stylistic change. The earliest works (1759–62) are heavily influenced by the North German tradition from which he had sprung. They are full of common elements of the *empfindsamer* and *Sturm und Drang* styles. Duckles cites the slow movements of the d-minor viola concerto (1759) with its melodic style, abrupt contrasts of dynamic and sudden changes of texture suggesting an improvisatory quality. In 1762 the style changed profoundly to a much more *galant* or Italianate style that was superficially pleasing but lacked depth.

His brother, Jacob, was also a composer. During his stay in England he published a sinfonia in Robert Bremner's Periodical Overture series (it has often been incorrectly accounted a composition by William); Jacob also published in London *Six sonates à deux violons et la basse* (1769) and *Six quartettos* (after 1783) for strings (probably the same works as the *Six quartettos for two violins, a tenor and violoncello*, London, n.d.), and in Amsterdam *Sei quartetti per il cembalo obbligato, due violini e violoncello* op.1 (1771–2). Two of his violin concertos survive in manuscript (in *GB-Lbl*) and another symphony (in *D-RUl*).

WORKS

*most MSS autograph*

Syms. (all in *GB-Lbl*): nos.1–6 (G, D, C, d, f, B♭), str, bn, hpd, 1760; nos.7–12: 5 *a* 4 (d, c, F, g, F), 1 *a* 10 (D), 1761; nos.13–18: 2 *a* 4 (E♭, E♭), 4 *a* 8 (D, E, C, E♭), 1762; nos.19–24, for Grand Orch (c, C, b, a, D, C), 1762–4: nos.2, 5, 13 ed. in The Symphony 1720–1840, ser. E, iii (New York, 1983)

Concs (all *US-BEm*, unless otherwise stated): E♭, ob, str, bc, May 1759; d, va, str, bc, Aug 1759; F, va, str, bc, Oct 1759; a, vn, str,

bc, bns, July 1760; G, vn, str, 1761; C, vn, str, bc, Sept 1762; d, vn, str, bc, July 1764; C, ob, str, bc; C, ob, str, 2 hn, 2 bn; Allegro, C, ob, str [possibly opt. 3rd movt to preceding conc.]; C, vn, str, hns; C, inc., vn, str [last movt not scored]; D, org, str, G, org, orch [with alternative Andante 2nd movt], both 1767, in S. Jeans's private collection, now in *GB-Lbl*: ob concs. all ed. W. Davis Jerome (Philadelphia, 1998)

Chbr and solo inst: 6 sonate, hpd, vn, vc (Bath, 1769) [also for hpd alone]; 3 sonatas, hpd, *US-BEm* [may be identical with 3 of above entry]; Andantino, arr. 2 basset-hn, 2 ob, 2 hn, 2 bn, *GB-Lbl*; XII Solos, vn, bc, *c*1763, 10 in *US-BEm*; 24 capriccios, sonata, vn solo, *BEm*

Kbd (all *GB-Eu*, unless otherwise stated): 6 fugues, org; 24 Sonatas, org [14 extant]; 33 Voluntaries and Full Pieces, org, inc.; 24 Full Pieces, org [2 sets, some inc.]; 12 Voluntaries, org [1 extant]; 25 Variations upon the Ascending Scale of the Treble, *US-BEm*; 2 minuets, see Lubbock

Vocal: The Favorite Eccho Catch Sung at the Vauxhall Gardens (London, *c*1780); Service in A, *GB-WRsg*; TeD and Jub, *Lcm*; 4 ps settings, 4vv, *Lcm*; numerous anthems, etc., perf. Bath, Octagon Chapel, 1767–82, most lost; vocal works, vv, orch, *Cpl*

T. HERMAN KEAHEY

**Herschkowitz, Philip** [Herşcovici, Filip; Gershkovich, Filip] (*b* Iaşi, 7 Sept 1906; *d* Vienna, 5 Jan 1989). Romanian-born composer and music theorist. After graduating from the conservatory in Iaşi, Herschkowitz went to Vienna in 1927 and matriculated at the Music Academy, but soon left to study privately with Alban Berg (1928–31), and attended various conducting courses under Hermann Scherchen (1932 onwards). He adopted twelve-note composition at the age of 22, and thus belonged to the first generation of composers to employ a fully developed serial technique from their earliest works. *Fugue* for chamber orchestra (1930) demonstrates the contrapuntal and formal maturity he already commanded.

After a period of critical self-examination, Herschkowitz decided to undergo a second course of study, this time with Anton Webern. (His letters to Berg indicate that regular tuition from Webern began in 1935.) Webern's influence gave his musical thought a systematic orientation that formed the basis of the theory of musical form that he himself elaborated four decades later. He worked for Universal Edition as a freelance editor during the 1930s, and thus came to be entrusted with proofreading and editing Berg's last works. Herschkowitz was unable to leave Vienna immediately after the Nazi occupation of Austria in 1938, and went on seeing Webern regularly until September 1939. He then fled to Bucharest, where he lived for a year without any financial resources. He took Soviet citizenship in order to avoid persecution as a Jew and in 1940 moved to Czernowitz, where he taught harmony at the conservatory. He continued to compose but the works of this period have not been found. He was due to make his public conducting debut on 22 June 1941, but the German invasion of the Soviet Union on that day prevented it. Herschkowitz again fled before the German advance and reached Central Asia, eventually settling in Moscow in 1946. He had joined the Soviet Composers' Union in 1942, but was expelled in 1949.

The compositions surviving from the early period in Moscow do not reveal any concessions to the directives of Soviet musical ideology. His works were not performed, and he earned his living as a music editor and orchestrating film scores for the Cinematographic SO. From the 1960s onwards he gave private tuition in musical analysis and form, but not in composition. He gave a lecture on the musical views of Anton Webern to the Leningrad Composers' Union in 1966, and followed it with series of lectures to the Kiev and Yerevan conservatories in 1968 and 1969. He also began to compose again in 1960; the music he wrote in Moscow during the last three decades of his life builds on the achievements of the Second Viennese School, to which Herschkowitz remained loyal in all circumstances.

His teaching eventually prompted Herschkowitz to undertake theoretical writings. Mostly in Russian, in number they had reached an impressive total by the time of his death; they included memoirs of his teachers Berg and Webern, treatises on the relationships of tonality and serialism to each other and of both to musical form, and detailed analysis of works by Mozart, Beethoven, Schubert, Mahler, Schoenberg and Webern. Beethoven studies form the core of Herschkowitz's theoretical works, which make up what may well be the most comprehensive, connected corpus of writing based on Webern's theories ever conceived. He was able to publish only two of these works in his lifetime, in Estonia (Tartu). His widow began publishing a complete edition in 1991, in Moscow.

Herschkowitz, who always wanted to return to Vienna, applied for an exit visa for Israel in 1979 but was not allowed to emigrate until 1987 after an invitation by the Alban-Berg-Stiftung to visit Vienna. He lived in Vienna until his death, and there wrote his last composition, *Drei Gesänge mit Begleitung eines Kammerensembles* (Three Songs with Chamber-Ensemble Accompaniment), settings of poems by García Lorca, Rilke and Celan. To Herschkowitz, the fact that the texts were in different languages mirrored the vicissitudes of his career. In spite of the often catastrophic changes of fortune that he endured, he never ceased to think of himself in his heart of hearts as a specifically Viennese composer. The influence of the Viennese masters reigned above all in the foundations of his musical thinking, not in the external features of his style. He heard very little of his music performed – there are records of only one performance of one of his works before the 1960s (in 1933 in Vienna). So far as he had any reputation at all, it was as a theorist. He did not live

to witness the belated appreciation of his unusual significance as a composer.

WORKS
(*selective list*)

VOCAL

Wie des Mondes Abbild zittert (H. Heine), 1v, pf, 1932
4 Lieder (P. Celan), Met, pf, 1962: Schlaf und Speise, Espenbaum, Der uns die Stunden zählte, Leuchten; all arr. Met, 2 fl, 2 cl, b cl, 2 bn, 4 hn, small drum, pf, 4 vn, 2 va, 2 vc, early 1970s; Espenbaum arr. Met, fl, 2 cl, perc, pf 4 hands, 6 va, db, early 1970s; Leuchten arr. Met, 2 fl, 2 cl, b cl, 2 bn, 4 hn, pf, 4 vn, 2 va, 2 vc, early 1970s
3 lieduri (I. Barbu), 1v, pf, 1965–6: Margini de seară [On the Edge of Evening], Grup [Group], Lemn sfînt [Holy Wood]
Brandmal (Celan), 1v, pf, 1960s, arr. Mez, fl, 2 cl, pf 4 hands, perc, 6 va, db, 1971
Malaya kamernaya syuita [A Small Chbr Suite], Met, 2 cl, vn, 2 va, vc, pf, 1979: Moderate; Derevo pesen [Tree Songs] (F. García Lorca); Dama pered zerkalom [The Lady In front of the Mirror] (R.M. Rilke)
Madrigalïi, 1983: Dame ver dem Spiegel (Rilke), Mez, 2 cl, vn, va, vc, pf; Der Alchimist (Rilke), Mez, 2 cl, b cl, 2 va, 2 vc, pf; Derevo pesen (García Lorca), Mez, 2 cl, 2 va, pf; Automne (G. Apollinaire), Mez, 2 fl, 2 ob, 2 cl, b cl, 2 bn, 4 hn, 2 tpt, perc, 12 vn
3 Gesänge, after 1987: Derevo pesen (García Lorca), Mez, 2 cl, 2 va, pf; Dame vor dem Spiegel (Rilke), Mez, 2 cl, vn, va, vc, pf; Brandmal (Celan), Mez, fl, 2 cl, b cl, perc, pf 4 hands, 2 vn, 2 va, vc

INSTRUMENTAL

Fugue, fl, ob, cl, b cl, bn, hn, tpt, a sax, hp, perc, vn, va, vc, db, 1930
Vesenniy tsvetï [Spring Flowers], pf, 1947
4 Stücke, vc, pf, 1968
Klavierstiück, 4 movts, 1969;
3 Klavierstücke, in 1960s, nos. 2–3 arr. as Kleine Kammer-Suite, 2 cl, vn, va, vc, pf, in 1970s
3 Stücke, vc, pf, in 1970s

KLAUS LINDER

**Herşcovici, Philipp.** *See* HERSCHKOWITZ, PHILIP.

**Hersee, Rose** (*b* London, 1845; *d* London, 26 Nov 1924). English soprano. She was the daughter of Henry Hersee (1820–96), teacher, critic of *The Observer* until 1894, librettist of Cowen's *Pauline* (1876), and translator into English of *Die lustigen Weiber von Windsor*, *Carmen*, *Aida* and other operas. She studied with her father and made her début at the age of 11 at the St James's Hall, London, in a concert with Sims Reeves. After singing small roles, including the Mermaid in *Oberon*, with Mapleson's company at Her Majesty's and Drury Lane in the 1860s, she toured the USA with the Parepa-Rosa company from 1865 to 1871. She then returned to England and joined the new Carl Rosa Opera Company, singing Susanna in its opening performance of *Le nozze di Figaro* at the Princess's Theatre, London, in September 1875. She subsequently toured Australia, where in 1879 she sang the title role in *Carmen* every night for three weeks in the opera's first production in that country. In 1884 she appeared in a season of opera in English at Covent Garden, on 7 January singing in the first London performance of Nessler's *Der Rattenfänger von Hameln* (in a translation by her father). She also appeared frequently at the Covent Garden Promenade Concerts and at the Crystal Palace. After retiring from the stage she became a successful teacher.

HAROLD ROSENTHAL

**Herseth, Adolph** (*b* Lake Park, MN, 25 July 1921). American trumpeter. He studied under Marcel LaFosse and Georges Mager at the New England Conservatory from 1946 to 1948. In 1948 he became first trumpeter with the Chicago SO, a position he held for some 50 years, thus becoming the longest-serving American principal trumpeter. Perhaps the most respected American orchestral trumpet player, he has influenced countless musicians. Among the innovations adopted by the Chicago SO trumpet section during his time are the use of four identical trumpets (Vincent Bach large-bore C trumpets with no.229 bell), resulting in a previously unknown homogeneity of sound, and, from 1965, the use of German rotary valve trumpets (J. Monke, L.A. Schmidt) in certain older works for reasons of timbre. Herseth was elected a charter member of the Trumpet Hall of Fame in Denver, Colorado, in 1970. (See M. Tunnell: 'Adolph Herseth: in a Class by Himself', *International Trumpet Guild Journal*, xxii/3 (1997–8), 5–23.)

EDWARD H. TARR

**Hert** (*fl c*1440–60). Composer. He is known for his arrangement of Dunstaple's *O rosa bella* in *I-TRmp* 1377 (olim 90). To the original discantus he added a duetting tenor at the same pitch which employs frequent and sometimes ill-mannered imitations; a contratenor in lower register makes fuller harmony but may be omitted. A similar discantus by Ockeghem on the next page of the manuscript has nothing to do with Hert's arrangement. The editors of DTÖ, vii, Jg.iii (1896/*R*; p.233), attempted to fit Ockeghem's discantus into Hert's version. Even the revisers of MB, viii (1970) were unclear about the distinction (p.200).

Hert may have been the John Herte who was a member of the Gild of Parish Clerks in London and died soon after 1457. Otherwise the name may be from the Netherlands; there were two Herts living in Bruges. One of them, Bartholomaeus, became a chaplain at St Donatian on 9 February 1453 and later became a curate of Nieuwpoort (now Belgium), where he fostered the practice of polyphonic music (Strohm).

BRIAN TROWELL

**Hertel.** German family of violinists and composers.

**(1) Jakob Christian Hertel** (*fl c*1667–*c*1726). He was Kapellmeister in Oettingen from about 1667 until the turn of the century, and then held the same position in Merseburg. An orchestrally accompanied ode for Duchess Christina Ludovica of Brunswick, attributed to him and dated 24 July 1667, survives in the Herzog-August-Bibliothek, Wolfenbüttel.

**(2) Johann Christian Hertel** (*b* Oettingen, 25 June 1697; *d* Neustrelitz, Oct 1754). Viol player, violinist and composer, son of (1) Jakob Christian Hertel. He studied theology at Halle University (1716) and came into contact with the musician Johann Kuhnau in Leipzig. After studying the viol with Ernst Christian Hesse in Darmstadt (1717), he was hired in 1718 as a viol player in Duke Johann Wilhelm's court orchestra in Eisenach. Throughout his career he made concert tours in Germany and Holland, including a visit to J.S. Bach in Leipzig in 1726. He was Konzertmeister and director of music in Eisenach from 1733 until the dissolution of the Hofkapelle in 1741. On Franz Benda's recommendation he came to the Mecklenburg-Strelitz court as Konzertmeister, but there, as in Eisenach, the Kapelle was dissolved (in 1752), and he retired.

Hertel was one of the best viol players of his time and a prolific composer of instrumental music, although much of it is lost. While at Eisenach he pursued the French style, but during his time at Neustrelitz he adopted the more eclectic taste of the Berlin school. Apart from six published sonatas for violin and viol or harpsichord (op.1, 1727) his only extant compositions are in manuscript. These include two overtures, eight orchestral suites, 22 symphonies, eight violin concertos, one trio for flute, violin and basso continuo, one sonata for flute, viol and harpsichord (in *D-SWl*), one overture and 11 sonatas for flute and basso continuo (in *D-ROu*), one trio for flute, violin, cello, and harpsichord, and one suite for harpsichord (in *D-Bsb*). Four overtures in Darmstadt are lost.

**(3) Johann Wilhelm Hertel** (*b* Eisenach, 9 Oct 1727; *d* Schwerin, 14 June 1789). Violinist, keyboard player and composer, son of (2) Johann Christian Hertel. Destined at first to be a lawyer or theologian, he nevertheless received an early musical education from Bach's pupil J.H. Heil (1706–64) and by the age of 12 he accompanied his father as harpsichordist on concert tours. In 1742–3 he was a violin pupil of Carl Höckh, the Konzertmeister in Zerbst, and in 1744 he was violinist and harpsichordist at the Strelitz court, where his father was also employed. He had contacts with leading Berlin musicians such as Franz Benda, C.H. and J.G. Graun, and C.P.E. Bach; Franz Benda taught him the violin and C.H. Graun encouraged him to compose. After the Strelitz Hofkapelle was dissolved (1752) he became court composer in Schwerin in 1754, and worked at times as organist and church music director in Stralsund (1759–60). He was Princess Ulrike's private secretary from 1764 and when the Hofkapelle moved to Ludwigslust in 1767 Duke Friedrich dismissed him from it so that he could remain in Schwerin. From 1770 he was the privy councillor in the service of Princess Ulrike but continued to compose, arrange concerts at the court and give music instruction. In his last years he gave up the violin and devoted himself to keyboard instruments.

In his youth Hertel was considered one of the best violinists of Franz Benda's school; he composed an impressive series of nine violin concertos as well as chamber music and trio sonatas. His 17 keyboard concertos, rich in invention and distinguished by fluent passage-work, are important north German achievements in this genre and rank beside C.P.E. Bach's and A.C. Kunzen's. His sonatas and other works for keyboard, mostly still typical of harpsichord composition, are markedly inferior to the concertos. His 40 symphonies occupy a major place in his creative output. While his symphonic writing at first adopted the style of the Berlin school of Hasse and Graun, after 1760 it underwent a stylistic change unique in north Germany at the time by absorbing south German influences. Scored mainly for strings, horns, oboes and flutes, his symphonies are notable for their uncomplicated, straightforward technique and an almost aphoristic, rhythmically succinct and brilliant handling of thematic material. He also wrote incidental music for stage works, overtures and other instrumental concertos including ten oboe concertos.

It was undoubtedly Hertel's extremely rich vocal compositions, however, that caused Gerber to place him among the 'most tasteful composers' of the second half of the 18th century. He wrote in many vocal genres for the Schwerin court, including masses, settings of the Passion, sacred cantatas, secular festive cantatas, and arias and chorales with orchestral accompaniment. Indeed very little of his vocal production was known outside Schwerin; only one aria and two collections of lieder (1757–60) were published, apart from songs in contemporary anthologies or periodicals. The two lieder collections (with texts by J.F. Löwen, court secretary in Schwerin) show the influence of C.P.E. Bach, Telemann, J.V. Görner and A.C. Kunzen; they contain folklike, light-textured songs which can also be played on the piano alone. His literary works include a treatise on thoroughbass, three autobiographies and a collection of essays by Voltaire and others.

WORKS

VOCAL

Lieder: Johann Friedrich Löwens [24] Oden und Lieder (Leipzig, 1757); Johann Wilhelm Hertels Musik zu 24 neuen Oden und Lieder aus der Feder des Herrn Johann Friedrich Löwen (Rostock, 1760); 5 in Unterhaltungen, vii–x (Hamburg, 1769–70); 5 in D.B. Münter: Sammlung geistlicher Lieder, i (Leipzig, 1773); 2, *D-SWl*; 2 vols., *B-Bc*

Other secular: 12 festival cantatas (J.F. Löwen), most for 2 S, T, B, orch, 1754–7, *Bc*, *D-SWl*; Il vero omaggio (Metastasio), 1761, *B-Bc*; more than 40 arias (most by Metastasio), 1v, orch, *Bc*, *D-ROu*, *SWl*; Divertissement, 4vv, orch, 1767, *B-Bc*; 2 serenatas: 1 for 1v, orch, 1763 *D-SWl*; 1 for 1v, choir, orch, *B-Bc*, *D-SWl*

Sacred cants., all *B-Bc*, *D-SWl*, for 2 S, T, B, orch: Das traurige Schicksal der Grossen auf Erden (Palitzsch), 4vv, orch, 1753, *B-Bc*; Die Geburt Jesu Christi (H.J. DIETER HÄRTWIG

**Hertman, Corneille** (*fl* early 17th century). French printer who inherited the firm formerly owned by PIERRE HAULTIN.

**Hertz (Hz).** The unit of frequency, equal to one cycle per second. *See also* SOUND, §4.

**Hertz, Alfred** (*b* Frankfurt, 15 July 1872; *d* San Francisco, 17 April 1942). American conductor of German birth. He was educated at the Hoch Conservatory in his native city, and then held posts in Halle (1891–2), Altenburg (1892–5) and Barmen-Elberfeld (1895–9). In 1899 he conducted concerts in London, then went to the Breslau Opera for three years. In 1902 he went to the Metropolitan Opera, New York, making his début with *Lohengrin* and staying until 1915 as principal conductor of German opera. There he conducted, on Christmas Eve 1903, the first *Parsifal* outside Bayreuth (to the displeasure of Cosima Wagner – Hertz never again appeared in a German theatre), the American premières of *Salome* and *Der Rosenkavalier*, and the world premières of Humperdinck's *Die Königskinder* and of all the American works brought out during his time there.

He was with the company in San Francisco at the time of the 1906 earthquake; nonetheless, after disagreements over artistic policy with Gatti-Casazza, he was happy to succeed Henry Hadley as conductor of the four-year-old San Francisco SO. Under his direction (1915–30), it became a professional orchestra playing a full season. It was one of the first American orchestras to record and the first to take women players (other than harpists). Hertz, hospitable to new talents among composers and performers, was also the first conductor in the USA to give a regular concert series for radio. In summer 1922 he inaugurated the concerts at the Hollywood Bowl. After he retired from the San Francisco SO, in addition to his radio and Hollywood Bowl commitments he took on the directorship of the Federal Music Project for Northern California and conducted the San Francisco Federal SO, remaining the dominant figure on the San Francisco musical scene. Hertz Hall, on the campus of the University of California at Berkeley, and the Hertz scholarships for advanced studies in music owe their existence to his bequest. He was married to the Austrian lieder singer Lilly Dorn. His diverting autobiography appeared posthumously in the *San Francisco Chronicle* in 30 instalments, between 3 May and 14 July 1942.

MICHAEL STEINBERG

**Hertz, Michał** (*b* Warsaw, 28 Sept 1844; *d* Warsaw, 8 Jan 1918). Polish composer, pianist, conductor and teacher. He studied the piano at the Warsaw Music Institute with Ferdynand Dulcken, and composition with Adam Minchejmer, then studied the piano in Breslau with K. Mächtig, and in Leipzig with Moscheles, Reinecke, E. Wenzel and L. Plaidy; he also studied conducting with Hans Richter and Hans von Bülow in Munich. From 1870 to 1872 he conducted at the Polish Theatre in Poznań, later becoming professor of piano at the Stern Conservatory in Berlin (1872–?1878); he also studied composition in Berlin with Kiel and Kullak.

From 1878 Hertz lived permanently in Warsaw, taking an active part in the city's musical life. He taught the piano at the Music Institute and the Aleksandryjsko-Maryjski Institute; from 1883 he also taught at the music school of the Warsaw Music Society. For over 20 years he was assistant director of the Warsaw Music Society, and he also conducted the society's amateur orchestra (1895–8, 1899–1900). From 1890 he was accompanist and répétiteur at the Warsaw Opera. To a large extent he was responsible for staging Wagner's works in Warsaw at that time. He also wrote music reviews in the Warsaw journals *Kłosy* and *Kurier poranny*.

Most of Hertz's works are vocal or theatrical. His songs, symphonic pieces and occasional stage works enjoyed great popularity during his lifetime. Like most Polish composers of his time he worked within the stylistic framework of the first half of the nineteenth century, and he employed rhythmic patterns from Polish dance forms, especially in his songs. His choral songs *Wędrówka lirnika* ('The Lyrist's Wandering'), *Rolnik podolski* ('The Podolian Peasant'), *Straż nad Wartą* ('The Guard on the Wartą ') and *Wiatr* ('The Wind') won the prize offered by the Warsaw choir Lutnia in 1888. A number of his works were published in Warsaw, Kraków, Poznań and Leipzig (by Hofmeister).

WORKS

Stage: Gwarkowie [The Miners] (op, 4, F. Schober, after T. Körner: *Die Bergknappen*), Warsaw, Wielki, Nov 1880, *PL-Wtm*; Bogna, córka wygnańca [Bogna, the Exile's Daughter] (op, 4, M. Radziszewski), composed *c*1890, vs, printed privately (Leipzig, *c*1900); Syrena [The Mermaid] (ballet), frags. *Wtm*, Adagio arr. pf, pubd in *Echo muzyczne, teatralne i artystyczne*, x (1893), no.503, appx; Kwiat paproci [The Fern Flower] (ballet); Lekcja śpiewu [The Singing Lesson] (incid music, Szober), Warsaw, 28 Aug 1868; Jak się wam podoba [As You Like It] (incid music, W. Shakespeare), Warsaw, 1895, *Wtm*; Szklana góra [The Glass Mountain] (incid music, Jarnecki), Kraków, 22 Dec 1895, *Wtm*; much other incid music, frags. *Wtm*

Vocal: choral songs incl. Wędrówka lirnika [The Lyrist's Wandering], Rolnik podolski [The Podolian Peasant], Straż nad Wartą [The Guard on the Wartą], Wiatr [The Wind], 1888; Ave Maria, 1v, pf, before 1895 (Poznań, n.d.); over 100 other solo songs

Inst: Marsz uroczysty [Solemn March], C, orch, *c*1879, *Wtm*; Mazur symfoniczny [Symphonic Mazurka], A, orch, pts. *Wtm*; Wielki polonez jubileuszowy [Grand Jubilee Polonaise], A, orch, before 1900, *Wtm*; Marsz [March], A, orch, *Wtm*; Krakowiak, D, orch, *Wtm*; Bajka o wilku [fairy tale about a wolf], pf, orch, *Wtm*; Thema con variationi et Finale, str qt, *Wtm*; pf pieces

ZOFIA CHECHLIŃSKA

**Hertzmann, Erich** (*b* Krefeld, 14 Dec 1902; *d* Berkeley, 3 March 1963). American musicologist of German birth. He studied musicology at the University of Berlin under Wolf (as well as Schering, Sachs, Hornbostel and Blume), and later with André Pirro in Paris. In 1931 he received a doctorate from Berlin with a dissertation on the secular polyphony of Adrian Willaert. At first he worked as a music critic (1930–33), but with the advent of Hitler he left Germany; after a visit to the USA in 1936, he settled there permanently in 1939. Except for his last months, when he taught at the University of California, Berkeley, and occasional periods of residence in Princeton, he taught at Columbia University from 1939 until his death, becoming full professor in 1956. In 1952 he married the singer and teacher Evelyn Chamberlain.

Though Hertzmann's interests ranged from medieval music to the 19th century, they centred particularly on Renaissance music and on the study of the creative process in the works of Mozart and, particularly, in Beethoven. His first major publication was his dissertation, with which were associated his early essays on the basse danse and on polychoral music of the earlier 16th century. In later years his most important publication was his study of the autograph manuscript of Beethoven's *Rondo à capriccio* ('Rage over a Lost Penny'), op.129. This was only a small part of Hertzmann's work in the transcription and interpretation of Beethoven's sketches and autographs. At his death he left uncompleted a full-length study and transcription of the papers of Mozart's pupil Thomas Attwood, the most important surviving document of Mozart's teaching practice. The publication was completed after Hertzmann's death by Alfred Mann and Daniel Heartz.

LEWIS LOCKWOOD

**Hertzmann [Gertsman], Yevgeny Vladimirovich** (*b* Odessa, 22 Jan 1937). Russian musicologist. He graduated from the Odessa State Conservatory in 1962 and the Far East Pedagogical Institute in 1970. In 1971 he undertook postgraduate work at the Gnesin Academy of Music with Yury Tyulin. He received the doctorate in 1991 from the Institute of Art History in Moscow for his book on Byzantine musicology. He was a senior teacher at the Far East Pedagogical Institute (1970–78) but was forced out of his position on the instructions of the KGB (1978–83). He resumed work as a teacher of the piano and history of music (1983–88) and subsequently became a scholar at the Institute of Theatre, Music and Cinematography in St Petersburg and a professor in the department of ancient Russian music and musical palaeography at the St Petersburg Conservatory. Hertzmann's main area of study is the history and theory of Ancient Greek and Byzantine music. His discoveries include the previously unknown manuscript *Synopsis musicae*, and biographical details on Glykys and Koukouzeles. He has prepared Russian translations of treatises by Boethius, Pollux and Cassiodorus, and compiled the first catalogue of Greek manuscripts in the National Library of Russia.

MARINA GEORGIYEVNA YERMAKOVA

**Hertzog.** *See* HAMMAN, JOHANN.

**Hervé** [Ronger, Florimond] (*b* Houdain, 30 June 1825; *d* Paris, 3 Nov 1892). French composer, singer and conductor. On his father's death in 1835, his mother took him to Paris. He found employment at the church of St Roch, where he learnt the rudiments of singing, organ and harmony; he then briefly studied harmony with Elwart at the Conservatoire and later composition with Auber. From 1839 to 1845 he was organist at the Bicêtre asylum and began a music class for the patients, writing songs, choruses and other entertainments for them. For eight years from 1845 he was organist at St Eustache.

For his theatrical career he took the name Hervé, gradually gaining recognition through his *Don Quichotte et Sancho Pança* (1848) and engagements at the Théâtre de l'Odéon and Théâtre du Palais-Royal, where he appeared as author, composer, conductor, actor, tenor *buffo* singer and producer, as required. His five-act *Folies dramatiques* (1853), satirizing various operatic and other musical conventions, led him to open his own small theatre, the Folies-Concertantes (later Folies-Nouvelles) in 1854; there he produced many short musical farces of his own as well as works by Offenbach, Delibes and others. From 1859 to 1862 Hervé was conductor at the Délassements-Comiques, and later went on tour with his own company to the provinces and Cairo. He was then for some years conductor at the Eldorado *café-concert*, for which he wrote many short vocal pieces and dances. At the same time he was increasing his reputation through more substantial operettas culminating in *L'oeil crevé* (1867), *Chilpéric* (1868; with Hervé himself in the title role) and *Le petit Faust* (1869; a parody of *Faust*). His later operettas achieved little success until in 1879 he began a series of vaudeville operettas including his most durable work, *Mam'zelle Nitouche* (1883). In 1878 he appeared as Jupiter in Offenbach's *Orphée aux enfers*. He had close connections with London, having homes (and families) on both sides of the Channel: he learnt English in order to star in *Chilpéric* in London, wrote *Aladdin the Second* for the Gaiety (1870), conducted at the promenade concerts at Covent Garden in 1874 and was musical director at the Empire Theatre from 1886. Hervé's compositions were mostly written for unsophisticated audiences and often hastily produced. Though the books and situations display considerable comic and satiric invention, the music lacks the sparkle and technical resource of Offenbach.

WORKS

STAGE

(*selective list*)

*first performed in Paris, with librettos by the composer, unless otherwise stated; many publications in vocal score in Paris shortly after first performance*

*pantomimes, revues etc. excluded. For full list see GroveO*

PBP – *Théâtre des Bouffes-Parisiens*
PFC – *Théâtre des Folies-Concertantes*
PFN – *Théâtre des Folies-Nouvelles*
PV – *Théâtre des Variétés*

**Hervé, Paul.** *See* PHILIPP, ADOLF.

**Hervelois, Louis de Caix d'.** *See* CAIX D'HERVELOIS, LOUIS DE.

**Hervey, Arthur** (*b* Paris, 26 Jan 1855; *d* London, 10 March 1922). English composer, author and critic of Irish parentage. He was educated at the Oratory, Birmingham, and studied music with Berthold Tours and Edouard Marlois. He was intended for the diplomatic service, but from 1880 took up music as a profession, serving as music critic to *Vanity Fair* from 1889 to 1892 and *Morning Post* from 1892 to 1908. Enjoying some success with his festival commissions and with the song *Once*, arranged for many different combinations, he was best known for his writings. Particularly well-informed about French music, he kept up-to-date with its latest trends. His own music, conventional at first, experimented with French techniques and he was critical of much contemporary English music which he found all too often to be 'dull imitations of Brahms'. A committed Wagnerite, he was critical of the tardy acceptance of Wagner by the French and could not accept Nietzsche's view that Bizet and Wagner were opposites. He regarded Bizet as a seminal figure and traced the 'vérisme' of Bruneau and Charpentier back to *Carmen* which he greatly admired. He was an early champion of Bruneau, and Saint-Saëns was another enthusiasm; he saw Saint-Saëns's belief that one should be 'of one's own time and of one's own country' as a unifying maxim. He was critical of 'decadent' composers, of whom he considered Debussy the 'high priest', believing the realists to be of a 'healthier growth'. Ultimately he was a critic whose viewpoint, from across the channel, is remarkable for its open-minded acceptance that music has, in his own words, 'many mansions'.

WORKS

Stage: The Fairy's Post-box (op, 1, Palgrave Simpson), London, Court Theatre, 1885; Ilona (op), London, Court Theatre, 12 May 1914
Orch: Love and Fate, dramatic ov., St James's Hall, 1890; 2 Tone Pictures, 1 On the Heights, 2 On the March, sym. poem, Cardiff Festival, 1902 (1903); Youth, concert ov., Norwich Festival, 1902 (1903); In the East, sym. poem, Cardiff Festival, 1904 (1907); Life Moods, symphonic variations, Brighton Festival, 1910 (1911)
Instr: Dans ma nacelle, pf (1875); Eglantine, pf (1875); Paquita, pf (1875); Reverie, vn/fl/vc, pf (1882); 6 Album Leaves, pf (1888); Cantilène, vc, pf (1895); Légende espagnole, vc, pf (1895); A basso porto, pf (1900); Berceuse, vn, pf (1900); Elevation, vn, pf (1902); 3 Pieces, pf (?1915)
Vocal: The Gates of Night (descriptive ballade), Bar, orch, Gloucester Festival, 1901 (1901); 6 Liebeslieder (Heine) (London, 1883); Herzens-Stimmen, 6 songs (Heine) (London, 1884); Neue Liebeslieder, 8 songs (London, *c*1890); 12 Songs of Heine (*c*1895); many individual songs to texts by various poets

J.A. FULLER MAITLAND/RICHARD LANGHAM SMITH

**Hervig, Richard B(ilderback)** (*b* Story City, IA, 24 Nov 1917). American composer and educator. He studied English at Augustana College, Sioux Falls, South Dakota (BA 1939), and after teaching for a time in the public schools, studied composition with Clapp at the University of Iowa (MA 1942, PhD 1947). He joined the faculty there in 1955 and became the founding director of the Center for New Music in 1966. Upon his retirement in 1988, he was appointed to a post at the Juilliard School. His pupils have included Charles Dodge and William Hibbard, among others. He has received commissions from the National Music Council, the National Federation of Music Clubs and numerous performers.

Hervig's compositions, most of which are instrumental and tonal, show a disciplined approach to standard forms and an exploration of timbral possibilites. In two early works, the Clarinet Sonata no.1 and the String Quartet, he casts sections in conflicting rhythms, exploiting the resulting tensions. In the Chamber Music for Six Players, he continued his concern for establishing relationships between the parts while maintaining a separate musical personality for each instrument; in this way, his compositional approach takes on concerns more readily associated with the theatre.

WORKS

Orch: Music for a Concert, 1959; Sym., 1960; A Diversion, band, 1963; Iowa Festival, band, 1964; The President's Fanfare, band, 1964; In Those Days, 1987; In Summer Season, str, 1988; Conc., vn, chbr orch, 1992

J. GOTTLIEB

**Hervortretend** (Ger.: 'coming forward'). A direction to bring out a part that might otherwise be buried in the texture. Various qualifications appear: for instance, Bruckner used *immer deutlich hervortretend*, *sanft hervortretend* and *zart hervortretend* ('always coming out clearly', 'coming out gently', 'coming out sweetly'). □

**Herwart** [Hörwart], **Johann Heinrich** (*b* Augsburg, 1520; *d* Augsburg, 28 July 1583). German collector of music. He came from one of the oldest patrician families of Augsburg, where his father Georg was mayor. As a judge and a member of the higher and lower councils he was one of the most influential men in Augsburg public life. Through large-scale commercial and banking businesses, partly in collaboration with the house of Habsburg and with Anton Fugger, he and his brother Johann Paul amassed a considerable fortune. In 1548 they were ennobled, along with another brother, Johann Jakob. Herwart's descendants lived in Augsburg until 1801 and the male line continued uninterrupted in Prussia until the early 20th century. The Herwart brothers used part of their wealth to acquire works of art, books and musicalia. After his death Johann Heinrich's valuable collections passed to Duke Wilhelm V of Bavaria in 1585 and 1594; they included over 400 items of printed and manuscript music (the nucleus of the collection in *D-Mbs*). A book of songs with an 'ex libris' bearing the name Hans Heinrich Herwart, begun in 1458 and completed in 1513 by the town piper of Augsburg Jakob von Hurlach, contains 80 sacred and secular songs by Hofhaimer, Senfl, Heinrich Finck and others (now in *D-As*).

ADOLF LAYER

**Herz, Daniel** (*b* Munich, 4 June 1618; *d* Wilten, 28 May or 5 June 1678). Tyrolean organ builder. He settled in Brixen (now Bressanone) in 1646, became court organ builder in Innsbruck in 1656 at the latest and established his workshop in Wilten, near Innsbruck, in 1671. His first known work was the reconstruction of the organ at Klausen (now Chiusa; 1641–3). Among his new organs are: Sillian (1644); the Liebfrauenkirche, Brixen (1648–9; only parts survive); an organ for the Brotherhood of Corpus Christi, in St Michael, Brixen (1650); Brixen Cathedral (positive, 1651–2); Stilfes (also Stilves; 1656); Trens (1656); Tschengls (also Cengles; contract 1657); Latsch (also Laces; 1659); Maria Waldrast (1660); St Martin in Passeier (also S Martino in Passiria; 1660–61); Niederdorf (also Villabassa; contract 1664); Belluno Cathedral (1665); Partenkirchen (before 1671); Meran (also Merano) parish church (1671–2); Virgen (contract 1675); St Laurentius, Wilten (1676; a positive after the extensions system with nine stops out of three ranks); Strigno (undated); and Jerusalem (undated). Herz was the most important Tyrolean organ builder of the 17th century; his reputation spread widely outside the country. The traditions of the Herz workshop were carried on in Brixen by Jacob Köck (1630–73) and in Wilten by Johann Hackhofer (1645–88).

ALFRED REICHLING

**Herz, Gerhard** (*b* Düsseldorf, 24 Sept 1911; *d* Louisville, KY, 4 Sept 2000). American musicologist of German birth. He studied at the universities of Freiburg (under Wilibald Gurlitt) and Berlin (under Curt Sachs and

Friedrich Blume), and received the doctorate in 1934 from the University of Zürich, to which he had transferred because of the political climate in Germany, with a dissertation on J.S. Bach. From 1934 to 1936 he worked as a freelance music critic in Düsseldorf, where he reviewed concerts in the city's synagogue, and in Florence, where he covered the Maggio Musicale of 1935 for the newspaper *Jüdische Rundschau* in Berlin and the *Frankfurter Zeitung*. Aided by recommendations from Albert Schweitzer, he emigrated to the USA in December 1936, and in 1938 became the first instructor of musicology at the University of Louisville. He was chairman of the university's music history department (1956–78), and held visiting appointments at Indiana University (1945) and the University of Chicago (1965). He was the first chairman of the American chapter of the Neue Bach-Gesellschaft, established in 1972. Other distinctions include receiving honorary membership of the Neue Bach-Gesellschaft, the American Bach Society and the Riemenschneider Bach Institute, and the honorary doctorate from Baldwin-Wallace College in 1982 and three years later the Albert Schweitzer International Prize for Music. In 1998 the Louisville Chamber Music Society honoured him as one of its original founders in 1938 and for his 60 years of service as a trustee.

Herz's scholarly writings and editions have focussed on the music of J.S. Bach, its sources, reception and performance. Based upon scrutiny of Bach's autograph scores, he discovered new clues clarifying the solo-tutti principle in the B minor Mass and other choral works, and his elucidation of Bach's use of Lombard rhythm has been established as standard practice in modern performances and editions. In addition, through his introduction to the Norton edition of Cantata no.140, the new chronology of Bach's works established by Alfred Dürr and Georg von Dadelsen was first published in English. He has also lectured widely to general audiences, particularly on Mozart, Beethoven and 20th-century music. His interest in the last profoundly influenced the character of the musical culture of Louisville, specifically through the inspiration he gave for the conception of the Louisville Orchestra First Edition Recordings. He was a member of the committee that selected composers to be commissioned by the Louisville Orchestra for the project, and served on the board of the orchestra from 1946 to 1965.

SUSAN PARISI

**Herz, Henri** [Heinrich] (*b* Vienna, 6 Jan 1803; *d* Paris, 5 Jan 1888). Austrian pianist, composer and teacher, active in France. His earliest music lessons were with his father, and he later studied in Koblenz with the organist Daniel Hünten. He was a prodigy, performing and composing from the age of eight. In April 1816 he gained admission to the Paris Conservatoire, where he studied with Pradher (piano), Dourlen (harmony and composition) and Reicha (counterpoint and fugue) and later became a professor of piano (1842–74). With his brother Jacques Simon Herz (*b* Frankfurt, 31 Dec 1794; *d* Nice, 27 Jan 1880), he founded the Ecole Spéciale de Piano de Paris.

Herz became one of the most famous virtuosos and popular composers in Paris in the 1830s and 40s. He travelled widely, touring the European continent (including Russia), South America and the USA, which he crossed three times (1845–51), and wrote a memoir of his experiences. His compositions consist largely of variations and fantasies on themes by other composers, but they also include eight piano concertos, various dances, salon pieces and exercises, amounting to some 225 works with opus numbers, and the same number again without.

In the early 1830s Schumann used Herz's Piano Concerto no.1 as the model for his own (unfinished) Piano Concerto in F (Macdonald), and took a theme by Herz as the basis of his *Phantasie satyrique*. However, his later perception was that Herz's compositions exemplified

the hollow state of the Parisian virtuosos in the second third of the 19th century, and he levelled sharp criticism at Herz in his reviews in the *Neue Zeitschrift für Musik*. Many of Herz's works are nevertheless of considerable merit; in particular the first two of the *Trois nocturnes caractéristiques* (1828) are fine examples of the genre. His variations on 'Non più mesta' from Rossini's *La Cenerentola* (*c*1831) were particularly popular with his contemporaries; each variation exhibits a different facet of the pianist's technical skill, including glissandos in 3rds, rapid scales and arpeggios and taxing dotted-note passages. Along with Chopin, Czerny, Pixis and Thalberg, Herz was asked by Liszt to contribute to *Hexaméron*, a set of variations on a theme from Bellini's *I puritani*, intended for performance at a benefit concert for Italian refugees in 1837. Herz's variation (the fourth) was cast in a *legato e grazioso* style, in *moto perpetuo*.

Herz was also involved in piano manufacture, establishing his own factory in 1851. His instruments were regarded by his contemporaries as equal to those of Erard and Pleyel, and one of his pianos won first prize at the Paris Exhibition of 1855. Although he was later accused of pirating another's invention, he also invented and marketed the 'dactylion', designed to strengthen pianists' fingers.

STEVE LINDEMAN

**Herz, Joachim** (*b* Dresden, 15 June 1924). German director. He was educated at the Kreuzschule, Dresden (1934–42), and studied the piano, clarinet and theory privately. He then attended the Musikhochschule in Dresden (1945–50) and the Humboldt University, Berlin (1949–51), where he studied musicology. From 1953 to 1956 he assisted Felsenstein at the Komische Oper, Berlin, returning, after appointments in Cologne (1956–7) and Leipzig (1957–77), as Intendant (1976–81). He was principal director of productions at Dresden from 1985 to 1990.

Herz's first important production was of Richard Mohaupt's *Die Bremer Stadtmusikanten* at the Dresden Staatstheater (1950), with students of the Musikhochschule and Palucca School; the choreographer was Ruth Berghaus. The first of his productions at the Komische Oper was of Joseph Haas's *Die Hochzeit des Jobs* (1953) and at the Dresden Staatsoper of *Albert Herring* (1955). His *Meistersinger* (his first Wagner production) opened the new opera house at Leipzig in 1960; his *Fliegender Holländer* in 1963 was the first work to be produced at the Bol'shoy by a foreigner; his *Katerina Izmaylova* at Leipzig in 1965 was the first performance of the work in East Germany; and his *Freischütz* opened the restored Semper Oper in Dresden in 1985. For a large part of his career his work was scarcely known outside East Germany, but his *Guillaume Tell* at the Colón in 1966 initiated a series of productions there, and his *Ring* (Leipzig, 1973–6) was influential in the establishment of the new wave of socially critical stagings of Wagner: several of its ideas (for example the setting of Act 2 of *Walküre* inside Valhalla) became commonplace in subsequent productions. His first production in Great Britain was of *Salome* for the ENO in 1975, in which the princess expired 'having attained her fulfilment' rather than being crushed by the soldiers' shields. Further productions there were a powerfully theatrical *Fidelio* (1980) that emphasized the contemporaneity of the work's revolutionary aspirations, and a *Parsifal* (1986) that offered a radical reappraisal of the role of Kundry (who participated actively in the final Grail ceremony) and of womankind generally. Herz has also staged *Madama Butterfly*, restoring some of the original music (1978) and *Forza del destino* (1981) for the WNO. His production of *Lulu* at the Komische Oper in 1980 was the first staging of this opera in the former East Berlin.

BARRY MILLINGTON

**Herzmansky, Bernhard.** Austrian music publisher. *See under* DOBLINGER.

**Herzog, Benedictus.** *See* DUCIS, BENEDICTUS.

**Herzog, Eduard** (*b* Vienna, 8 June 1916; *d* Prague, 26 Feb 1997). Czech musicologist. He studied at the Bratislava Academy (1934–6) and at the Prague Conservatory (1936–40), where he was a pupil of Pavel Dědeček (conducting) and Jaroslav Řídký (composition). After the war he took his final examinations (1946) and studied musicology with Hutter at Prague University, where he took the doctorate in 1947 with a dissertation on the meaning of 4th chords. Except for the years 1948–52, when he worked as a music producer for Czechoslovak radio, he taught in the music department of the Prague University faculty of education (1947–8, 1952–61). After teaching for a while at general art schools in Benešov and in Prague he became a music producer at the Supraphon gramophone company, later serving as head music producer and then deputy editor-in-chief. During his musicological studies he had considered questions of contemporary compositional techniques, successfully combining creative insight with rigorous theoretical argument partly derived from the principles of Mukařovský's structural aesthetics. The paucity of his output is outweighed by the inspiration it has provided for musicologists and composers with whom he was in close contact, and whose new stylistic orientations he has helped to direct. With Vladimír Lébl he held courses in electronic music (1965–7) organized in Prague and Plzeň by Czechoslovak radio and the Union of Czechoslovak Composers. His study of 12-note rows containing every

interval produced valuable results, described in his manuscript study *Zwölftonallintervalreihe* (1958).

JOSEF BEK

**Herzog, George** (*b* Budapest, 11 Dec 1901; *d* Indianapolis, 4 Nov 1983). American ethnomusicologist of Hungarian birth. He studied at the Royal Academy of Music, Budapest (1917–19), at the Berlin Hochschule für Musik (1920–22) and with Egon Petri (piano) in 1921; while at Berlin University (1922–4) he was an assistant to Hornbostel at the Phonogramm-Archiv. On emigrating to the USA in 1925 he took a postgraduate course in anthropology at Columbia University, where he was influenced by Franz Boas; he was a research associate in anthropology at the University of Chicago (1929–31) and at Yale University (1932–5), participating in the University of Chicago Anthropological Expedition to Liberia (1930–31). In 1935 and 1947 he was awarded Guggenheim Fellowships. He took the doctorate at Columbia University in 1938 with a dissertation on the musical styles of Pueblo and Pima and also worked there as a visiting lecturer (1936–7), visiting assistant professor (1937–8) and assistant professor of anthropology (1939–48). It was mostly through Herzog's efforts that Bartók came to the United States of America and eventually to Columbia University. In 1948 he became professor of anthropology at Indiana University, bringing with him the Columbia University Archives of Folk and Primitive Music (established by him in 1936), which became the Indiana University Archives of Traditional Music, modelled on the Berlin Phonogramm-Archiv. He retired as emeritus professor in 1962.

Herzog was a founder of ethnomusicological studies at American academic institutions. Besides teaching courses in linguistics and cultural anthropology he introduced courses in primitive and folk music (1936) and comparative musicology (1941) at Columbia, later amalgamating them as a course in folk, primitive and oriental music (1944). He was one of the leading authorities on North Amerindian music, having engaged in field research among such tribes as the Apache, Comanche, Dakota, Maricopa, Navaho, Pima, Pueblo, Yuma and Zuni. His interest in methods of transcription and analysis extended his research into European folk music (Greek, Irish, Spanish and south Slav) and to the study of Jewish (Babylonian, Yemenite and Judeo-Spanish), Peruvian and Javanese traditions. Besides building up an archive of commercial and field recordings, he undertook invaluable bibliographical surveys of published materials and compiled descriptive catalogues of archives in museums, institutions and private collections. His entry on 'Song' in the *Funk & Wagnalls Standard Dictionary of Folklore* (1950) furnishes important insights concerning the functional aspects of folksong.

WRITINGS

'The Yuman Musical Style', *Journal of American Folklore*, xli (1928), 183–231

Transcr. of over 100 melodies and comments in F. Eckstorm, M.W. Smyth and P. Barry: *British Ballads from Maine* (New Haven, CT, 1929)

ISRAEL J. KATZ

**Herzog, Johann Georg** (*b* Hummendorf, nr Kronach, 5 Aug 1822; *d* Munich, 3 Feb 1909). German organist and composer. He was educated at Altdorf and followed his career first in Munich, where in 1843 he became organist and in 1848 Kantor at the Evangelical church. From 1850 he also taught the organ at the conservatory: Rheinberger was one of his pupils. In 1854 he moved to Erlangen to become director of the university's new institute for church music; he served as organist of the university church and taught singing at the Gymnasium (1859–79). In 1861 he established a series of historical organ concerts. He was awarded an honorary doctorate in 1866 and retired in 1888. Herzog was an outstanding organ virtuoso and a prolific composer of organ music and sacred vocal works. His pedagogical books, e.g. *Praktisches Hilfsbuch für Organisten* op.10 (Mainz, n.d.), *Präludienbuch* op.30 (Erfurt, n.d.), *Orgelschule* op.41 (Erlangen, 1867), were long in use throughout Europe.

HERMAN FISCHER

**Herzogenberg, (Leopold) Heinrich (Picot de Peccaduc),** Freiherr von (*b* Graz, 10 June 1843; *d* Wiesbaden, 9 Oct 1900). Austrian composer. The son of an Austrian court official, he received his education in the humanities at the Gymnasien in Feldkirch (Vorarlberg), Dresden and Graz. From 1862 to 1865 he studied law at the University of Vienna as well as composition at the conservatory with Felix Otto Dessoff, through whom his lifelong friendship with Brahms was formed. In 1868 Herzogenberg settled in Graz as a freelance composer, but moved to Leipzig in 1872. There he founded the Bach-Verein with Philipp Spitta and Alfred Volkland in 1874, and became its leader in 1875. In 1885 he succeeded Friedrich Kiel as professor of composition at the Hochschule für Musik in Berlin, where he also gave a masterclass in composition. After an absence from his teaching activities caused by ill-health, he lost his position at the Hochschule to Woldemar Bargiel in 1889. In 1891 he also gave up his masterclass, and he became a member of the Senate in 1892. After Bargiel's death in 1897 he took over his work at the Hochschule and the Akademie der Künste. Further illness forced him to retire in the spring of 1900.

Herzogenberg was one of the most distinguished composers from the circle of conservative Berlin academics. He had an all-round training, his musical activity being influenced by the various movements of the 19th century. A few of his early works, especially the dramatic cantata *Columbus* op.11, bear witness to his clash with Wagner, and his piano works and songs were initially influenced by Schumann, and later, increasingly, by Brahms, on whose chamber works he modelled his own. Herzogenberg's interest in earlier music, especially that of Bach, was principally nurtured by Spitta. It found its expression in his own Protestant church music, which Herzogenberg, though of Catholic upbringing, had emphasized in his output since 1893 when he came under the influence of the theologian Friedrich Spitta (1852–1924), Philipp's brother. The cantata *Totenfeier* op.80 stands at the transition to this period, the central focus of which is made up of the three church oratorios, *Die Geburt Christi* op.90, *Die Passion* op.93 and *Erntefeier* op.104. In 1868 Herzogenberg married Elisabeth (*b* Paris, 13 April 1847; *d* San Remo, 7 Jan 1892), daughter of Bodo Albrecht von Stockhausen (a diplomat of the Hanoverian Court); she was a pianist and a former pupil and close friend of Brahms.

WORKS

*all published in Leipzig unless otherwise indicated*

SACRED CHORAL

Requiem, chorus, orch, op.72 (1891); Totenfeier, cant., solo vv, chorus, orch, op.80 (1893); Mass, solo vv, chorus, orch, op.87 (1895); Die Geburt Christi, oratorio, solo vv, chorus, children's chorus, ob, str, harmonium, org, op.90 (1895); Die Passion, oratorio, solo vv, chorus, str, harmonium, org, op.93 (1896)

Erntefeier, oratorio, solo vv, chorus, orch, org, op.104 (1899); Gott ist gegenwärtig, cant., chorus, orch, op.106 (1900); 2 biblische Scenen: Der Seesturm, Bar, chorus, str, org, Das kananäische Weib, S, Bar, male vv, org, op.109 (1903)

Motets, psalms, liturgical songs, other works (most unacc.): opp.28, 34, 60, 71, 81, 88, 92, 99, 102, 103

SECULAR CHORAL

Orch acc.: Nachthyme, Bar, 1869, unpubd; Columbus, dramatic cant., T, Bar, B, male vv, op.11 (1872); Der Stern des Lieds, ode, op.55 (1887); Die Weihe der Nacht, A, op.56 (1887); Nannas Klage, S, A, op.59 (1887)

Pf acc.: Deutsches Liederspiel, solo vv, chorus, pf 4 hands, op.14 (1872); 4 notturnos, op.22 (1876); 6 Mädchenlieder, 3 female vv, pf, op.98 (1897)

Unacc.: Lieder, op.10 (Vienna, 1870); Lieder und Romanzen, 4 female vv, pf ad lib, op.26 (1879); 12 deutsche Volkslieder, op.35 (1882); 6 Gesänge, op.57 (1888)

OTHER VOCAL WORKS

Duette, S, T, pf, op.38 (1883); 3 Gesänge, 4vv, pf, op.73 (1891); 3 Duette, S, B, pf, op.74 (1893); 5 Kanons, 3 S, pf ad lib, op.79 (1893)

*c*150 solo songs and ballads: opp.1–2 (1865); op.8 (Vienna, 1871); opp.29–31 (1881); opp.40–41 (1883); opp.44–5, 47–8 (1885); op.51 (1886); opp.65–6 (1890); op.69 (1891); op.82 (Berlin, 1894), hpd acc.; op.89 (1896), vn, org acc.; op.91 (1895); opp.96–7 (1897); opp.100–01 (1898); op.105 (1900); op.108 (1901)

ORCHESTRAL AND CHAMBER MUSIC

Orch: 3 syms., 'Odysseus', op.16 (1873), no.1, op.50 (1885), no.2, op.70 (1890); 5 syms., unpubd; Humoreske, 1873, unpubd; Serenade, fl, ob, cl, 2 bn, 2 hn, str orch, 1879, unpubd; Vc conc., 1880, unpubd; Vn conc., 1889, unpubd

Chbr: Pf Qnt, op.17 (1876); Qnt, pf, ob, cl, hn, bn, op.43 (1884); Qnt, 2 vn, 2 va, vc, op.77 (1892); 2 pf qts, op.75 (1892), op.95 (1897); 5 str qts: op.18 (1876), 3 as op.42 (1884), op.63 (1890); 2 pf trios, op.24 (1877), op.36 (1884); Trio, pf, ob, hn, op.61 (1889); 2 str trios, op.27 (1879); 2 pf qts, 2 pf trios, 2 str qts, all unpubd

2 insts: Fantasia, vn, pf, op.15 (1873); 3 vn sonatas, op.32 (1882), op.54 (1887), op.78 (1892); Legenden, va/vc, pf, op.62 (1890); Duo, vc, pf, op.12 (1872); 3 vc sonatas, op.52 (1886), op.64 (1890), op.94 (1897)

KEYBOARD

For 2 pf: Theme and Variations, op.13 (Vienna, 1872)
For pf 4 hands: Waltzes, 2 bks, op.53 (1887), op.83 (1896); 4 variation sets, op.23 (1876), opp.84–6 (1896); other works, opp.33, 76
For pf solo: Pf Pieces, 4 bks, op.25 (1879), op.37 (1883); op.49 (1885), op.68 (1891); other works, opp.3–6 (1866), op.7 (Berlin, 1866), op.9 (Vienna, 1870), op.58 (1889), op.107 (1900); sonata, 1881, Fantasia quasi sonata, 1895, both unpubd
For org: 2 fantasias, no.1 'Nun komm, der Heiden Heiland', op.39 (1883), no.2 'Nun danket alle Gott', op.46 (1885); 6 Choräle, op.67 (1890)
Opp.19–21 not known

OTHMAR WESSELY/BERND WIECHERT

**Heš, Vilém** [Hesch, Wilhelm] (*b* Týnec nad Labem, Bohemia, 3 July 1860; *d* Vienna, 4 Jan 1908). Czech bass. His naturally developed and even voice enabled him to make a successful début as Kecal in *The Bartered Bride* in Brno on 5 December 1880 with no more training than a few lessons from Jan Ludvík Lukes and František Pivoda (1877–82). He became a member of the Pištěk Theatre Company and in 1882 joined the Prague National Theatre, with which he achieved great success in 1892 at an international theatre festival in Vienna. In 1894 he was engaged by the director Pollini for Hamburg, and from 1896 he was a soloist with the Vienna Hofoper. During his time in Hamburg he became a friend of Mahler, for whom he was to be a useful co-worker in the staging of Smetana's operas; after the production of Janáček's *Jenůfa* in Brno (1904) he tried unsuccessfully to persuade Mahler to stage it in Vienna. In both Prague and Vienna he quickly attained prominence through his vocal accomplishment and his unusually colourful characterizations. His repertory included serious and comic parts, of which *buffo* roles suited his talents better. He excelled as Smetana characters, especially Kecal, and also as Mephistopheles, Rossini's Bartolo, Beckmesser, Papageno, Leporello and Sarastro. Recordings show him to have had a dark voice and authoritative delivery.

ALENA NĚMCOVÁ/R

**Hesbert, René-Jean** (*b* Sorel-Moussel, 22 Jan 1899; *d* Saint-Wandrille, 2 March 1983). French scholar of plainchant. After taking a degree in mathematics at the Sorbonne (1922) he entered the abbey of Solesmes, where he took vows in 1924. In 1929 he was assigned to Paléographie Musicale and began work on the critical reconstruction of Gregorian melodies. He developed an objective method based on the classification of manuscripts, whereas his predecessors had confined themselves to reconstruction 'by guesswork'; the problem is discussed in the introduction to volume xiv of Paléographie Musicale, which he prepared. Subsequently he applied his method to the Antiphonal of the Mass (*Antiphonale missarum sextuplex* presents the six earliest Gregorian examples) and later to the Antiphonal of the Office (the monumental *Corpus antiphonalium officii* provides a reconstruction of its archetype: its general plan and the composition of each of its formularies, with a critical reconstruction of each of their parts, texts and melodies). Hesbert was also editor-in-chief of the collection of manuscripts and studies Monumenta Musicae Sacrae (1952–81).

CHRISTIANE SPIETH-WEISSENBACHER/JEAN GRIBENSKI

**Hesch, Wilhelm.** *See* HEŠ, VILÉM.

**Hesdin, (Nicolle des Celliers de)** (*d* Beauvais, 21 Aug 1538). French composer. The name Hesdin – none of the sources for his music identifies him further – probably indicates his place of birth. Speculations on his identity and career by Fétis and Huber appear to have no documentary foundation. The only record of his full name comes from the epitaph on his tomb in Beauvais Cathedral, where he served as master of the choirboys from at least 1536 until his death. The opening words of the epitaph – 'Atropos … thinking to have robbed Hesdin too early of his life' – suggest that he died young, which could explain the rather modest size of his output. His music began to circulate in the late 1520s; by 1533 he had acquired sufficient reputation for Lanfranco (*Scintille di musica*) to place him alongside Costanzo Festa, Jacquet of Mantua and Willaert as one of the eminent 'moderni'. Since the others mentioned by Lanfranco all worked in Italy at the time, it seems conceivable that Hesdin too spent some of his career there.

An unusually high percentage of the works found under Hesdin's name have conflicting attributions. For the masses and chansons these prove relatively easy to resolve, for the motets considerably less so. The attribution of the *Missa 'Benedicta es celorum regina'* to Willaert in two manuscripts has little credibility, since the sources that assign the piece to Hesdin include the Ferrarese choirbook *I-MOe* α.N.1.2, a volume copied in the mid-1530s by a scribe who had worked with Willaert in the Este *cappella*. On the other hand, several reliable sources attribute the *Missa 'Veni sponsa Christi'* to Lupus Hellinck; the ascription to Hesdin in *I-Rvat* C.S.17 probably reflects nothing more than a confusion between the two names. A similar confusion may account for the publication of a contrafactum from a mass by Lupus under the name 'Lupus Hesdin'. The chanson *Dueil, double dueil*, reliably credited to Hesdin in a number of Parisian prints, appears as a work of Johannes Lupi in the Flemish collection RISM 1544[10], probably because of a failure to distinguish between this piece and Lupi's six-part setting of the same text, which share some melodic material. Another Flemish source, *F-CA* 125–8 (dating from 1542), calls Hesdin the author of *Grace et vertu*, but more trustworthy Parisian prints attribute it to Roquelay.

No fewer than five motets have multiple ascriptions. The attribution of *Sancta et immaculata* to Gombert – from whose style it differs markedly – occurs in a source of no particular authority for that composer, and probably results from a confusion with his five-part setting of the same text; it surely cannot match the combined testimony of the Parisian and Ferrarese prints (RISM 1534[6] and 1538[5]) that ascribe the work to Hesdin. Gombert also seems unlikely as the composer of *Alleluia spiritus Domini*, included in the first edition of a print devoted to his five-voice motets: he does not appear to have played any part in assembling the collection, and the transparent texture of the music, with its frequent antiphonal writing, contrasts sharply with his normal practice. The motet accords stylistically with Hesdin's more securely attributed compositions, however, so its attribution to him in the Ferrarese print RISM 1539[7] probably deserves credence. Two other pieces ascribed to Hesdin in this source, *Ego sum qui sum* and *Salus populi ego sum*, pose more difficult problems. The first appears under Mouton's name in one manuscript and under Richafort's in two Netherlandish choirbooks; although the pervasively imitative style of the work surely excludes Mouton, who never wrote for five voices in this manner, the sources would seen to favour Richafort – who worked mostly in the Netherlands – over Hesdin. Attaingnant (RISM 1535[5]) credited *Salus populi ego sum* to 'G. Cadeac'; other sources assign it to 'Cadeac' and 'Pierre Cadeac'. The dense and sometimes awkward counterpoint of the piece seems atypical of Hesdin, and it probably does not belong

to him. *Ecce odor filii mei*, published under Hesdin's name in the Flemish print RISM 1547[5], clearly belongs to Manchicourt, who included it in the volume of his own motets brought out by Attaingnant.

The bibliographic confusion surrounding Hesdin's output seems specially regrettable in view of the prevailing high quality of his music, which shows a sensitivity to sonority and a sure feeling for structural articulation. His writing has considerable variety. The masses and the motets in Italian sources adopt a predominantly imitative syntax, while the sacred music published by Attaingnant uses a looser blend of free imitation and homophony. (The stylistic distinction between these two bodies of work might lend further support to the assumption of an Italian phase in Hesdin's career.) The chansons range from pieces in the 'Parisian' manner – used with particular eloquence in *Dueil, double dueil* – to swift patter songs. Like several of his contemporaries in the generation between Josquin and Palestrina, Hesdin deserves more attention than he has received.

JOSHUA RIFKIN

**Heseltine, James.** *See* HESLETINE, JAMES.

**Heseltine, Philip.** *See* WARLOCK, PETER.

**Heses** (Ger.). B♭♭; *see* PITCH NOMENCLATURE.

**Hesiod** (*fl* ? late 8th century BCE). Greek poet. He was clearly later than Homer, whose work he used. His particular genre was the didactic epic, in which he retained much Homeric diction as well as dactylic hexameter; unlike Homer, however, he was an explicit teacher and thus dispensed with the objective narrative method. Two major works are attributed to Hesiod, the *Works and Days* and the *Theogony*. The first of these, a kind of

versified farmer's almanac, contains half a dozen references to music centred on the Muses. Givers of glory through song (1), they have taught Hesiod the art (657–62), and he begins by bidding them sing the praise of Zeus (2). The rivalry of bard with bard (26), which had remained implicit in the *Odyssey*, is directly commended. In the *Theogony*, or 'Genealogy of the Gods', references to music are confined to the long initial invocation of the Muses (1–115), who appear once again as singers (10, 36–41, 60–69) and this time as dancers too (4, 70). It is they who grant 'lovely song' (104); with Apollo, they are the patrons of bards and kithara players (94–5). The power of music is acknowledged: men forget their sorrows 'when a singer ... chants the glorious deeds of men of old' (98–103). Hesiod's own gift of song was imparted to him during a single brief visitation by the Muses.

The opening portion (1–56) of the *Shield of Heracles*, an obvious imitation of *Iliad*, book xviii, may conceivably be Hesiodic. The remainder, however, must be attributed to his successors; and it is here that specific references to musical instruments occur – to Apollo's phorminx (202–3), and elsewhere (278–81; cf 283) to syrinx and aulos. The syrinx, or shepherd's panpipe, is mentioned outside a pastoral context, as once in Homer (*Iliad*, x.13; cf xviii.526). (*See also* LINUS.)

In the works that may with reasonable confidence be assigned to Hesiod, instrumental music is mentioned only once (*Theogony*, 95). His silence reflects the fact that he was not writing for an audience of aristocrats who would gather at feasts to listen to a kithara-playing bard or a girl aulos player. He set forth a plebeian ethic, profoundly different from the feudal standards of Homeric heroism yet not inferior to them. Plato recognized this: in the *Laws* (ii, 658d6–e3) he wrote approvingly of awarding the prize to recitations of Homer or Hesiod in a competition among both bards and rhapsodes. His comment serves to emphasize the point that, despite various references to singing, Hesiod represented the first evidence in Greek literature of rhapsodes, the professional reciters of poetry (*see* AOIDOS). Originally they accompanied their recitations on the kithara; later, when musical accompaniment had been abandoned, they held a staff instead (Pausanias, ix.30.iii, explicitly associated Hesiod with the later stage, but also asserted, in x.7.3, that Hesiod was debarred from the Pythian games because he could not accompany himself on the kithara). So, in the *Theogony* (30), the Muses present Hesiod with a staff as they fill him with their inspiration. It is a moment of transition, and not an insignificant one, in the musical history of Greece.

WARREN ANDERSON/THOMAS J. MATHIESEN

**Hesitation waltz.** *See under* BOSTON (ii).

**Hesletine, James** (*b* *c*1692; *d* Durham, 20 June 1763). English organist and composer. One of the last boys trained by Blow in the Chapel Royal choir, he was appointed organist of Durham Cathedral in January 1711. Hawkins said he was also organist of St Katharine-beside-the-Tower, London, executing this office by deputy; and further that on account of some pique he tore all his own compositions out of the Durham Cathedral choirbooks. That destruction was not complete, and other copies, owned by his nephews, have come to light (in *GB-DRc* and *Ob*). Also extant is the verse anthem, 'Unto thee will I cry', composed in 1707 shortly before he finished as a chorister (*Lbl* Add. 30860, holograph). Consequently, of the seven extensive verse anthems whose texts are given in *A Collection of Anthems* (Durham, 1749), only two have no surviving settings. A letter from Hesletine to one Mickleton, promising to furnish copies of church music from Durham, presumably for Tudway's collection, also survives (*Lbl* Harl.3779). Another letter, from Hesletine's nephew Granville Sharp inviting him to musical activities in London, is a compilation of phrases from operas and songs (*GLr* D3549).

WATKINS SHAW/BRIAN CROSBY

**Hesperinos** (Gk.: 'evening'). An evening Office in the Greek Orthodox Church, equivalent to Vespers of the Roman rite. Together with ORTHROS, the morning Office, it is one of the principal hours in both the urban and monastic rites.

1. History and development. 2. Structure.

1. HISTORY AND DEVELOPMENT. Although the observance of evening prayer independent of any vigil had become customary in Christian communities in the East by the 4th century, it was only some 200 years later that a specifically Eastern liturgy for the evening Office developed, distinct from that celebrated in the Western Church. An account of the evening Office as it was performed on the Sinai peninsula during the 6th century includes the name of a Greek hymn, *Phōs hilaron* ('O gladsome light'), whose words are still sung at Hesperinos today.

In the 6th century differences emerged in the way the Byzantine Office was celebrated in monasteries and in urban churches. Each of these liturgical traditions evolved within two distinct geographical and ecclesiastical regions: the monastic Office developed in the south, in the Laura of St Sabas near Jerusalem; and that of the urban churches in the north, in the political centre of Constantinople. The Great Church of Hagia Sophia in the imperial capital performed its own special urban or 'chanted' rite (ASMATIKĒ AKOLOUTHIA), while the liturgical practice in Greek monasteries was influenced by the Palestinian traditions at St Sabas.

The Great Church of Hagia Sophia maintained its authority over the chanting of the urban Office among metropolitan areas in the empire until 1204 when its elaborate Greek services were suppressed by Latin crusaders. Even before this date, however, the Office liturgy of Hagia Sophia had already begun to merge with the

monastic tradition of St Sabas. By 1453, when the Byzantine Empire fell to the Turks, a hybrid rite had emerged composed of elements from both the urban and monastic traditions. This rite, the culmination of nine centuries of liturgical conflict and reconciliation in the East, reached its maturity only in the late empire; it proved to be a lasting tradition and the antecedent of the Office of Hesperinos observed in the Greek Orthodox Church today.

Descriptions of the urban Office survive only from the end of the 14th or the beginning of the 15th century. Archbishop Symeon of Thessaloniki wrote his treatise *Peri tēs theias proseuchēs* (*De sacra precatione*, *PG*, clv, 535–670) 200 years after the urban rite of Constantinople had ceased to exert its influence, and described this rite not as it was celebrated in Hagia Sophia in the imperial capital but as he performed it in his own church of Hagia Sophia in Thessaloniki. By then the urban service was more a vestige of past imperial splendour in a provincial city than a living rite. Although a few 14th-century AKOLOUTHIAI manuscripts transmit the melodies of chants for Hesperinos and Orthros, in this archaic form the anonymous repertory of the urban liturgy stands outside the musical developments during the last two centuries of the empire. There is a prose description of the Offices of the new mixed rite in the *Diataxis tēs hierodiakonias* (*Ordo sacri ministerii*; *PG*, cliv, 745–66) written before 1379 by Philotheos, Patriarch of Constantinople. This document provides a detailed account of the liturgical actions of the priest and deacon and is the most comprehensive commentary on the Byzantine Office from the late empire. A second, more cursory description is contained in a 15th-century work, the *Exēgēsis tēs ekklēsiastikēs akolouthias*(*Expositio officii ecclesiastici*, *PG*, clx, 1163–94) by Markos Eugenikos, Archbishop of Ephesus.

At the beginning of the 14th century the fully developed mixed rite received attention from Byzantine composers. The oldest extant sources that transmit the new musical repertory for the Byzantine Office are the two early 14th-century manuscripts *ET-MSsc* 1256 and 1257 (copied in 1309 and 1332 respectively) and the earliest extant akolouthiai manuscript *GR-An* 2458 (copied in 1336). These three manuscripts show that at the beginning of the 14th century JOANNES KOUKOUZELES revised the musical repertory of the Office and transformed both the musical vocabulary and the performing practice. This process of musical enrichment continued throughout the 14th and 15th centuries and even beyond. In each successive akolouthiai manuscript, newly composed chant melodies were increasingly attributed to contemporary Byzantine composers.

2. STRUCTURE. The Ordinary chants and psalmody for Hesperinos are generally found in the akolouthiai manuscripts, while the music for the Proper chants is supplied from the STICHĒRARION. The order of Hesperinos on Saturday evenings and the evenings before important feasts in the fully developed mixed Byzantine rite runs as follows:

(*i*) The *prooimiakos* (Psalm ciii): a selection of verses from Psalm ciii, beginning with verse 28*b* and concluding with 24*b*, and the refrain *Doxa soi, ho Theos* ('Glory to Thee, O God'); it is preceded by a short, anonymous invitatory. The two halves of the choir sing the verses antiphonally in a relatively simple psalmodic style. Some of the verse melodies in the akolouthiai manuscripts are anonymous, but others are newly composed and attributed to specific composers. In the older, traditional chants the unembellished refrain is no more than a brief appendage after a line from the psalm. With the appearance in the 14th century of new melodies for Psalm ciii, both the text and the music of the simple refrain were gradually expanded. Originally the refrain consisted of the repetition of one or two words, but by the 15th century it overshadowed and in some cases dominated the psalm text and reflected subtle theological nuances in its tropes. Vocal range was also expanded in the new repertory (the older chants were predominantly conjunct). For the final verse and the doxology the choir united in a more florid setting.

(*ii*) The *kathisma*: a division of the Psalter (approximately one-twentieth of the complete text). As the entire Psalter was sung once a week, starting at Great Hesperinos on Saturday, selected verses from Psalms i–iii, the first division (*stasis*) of the first *kathisma* are found in the akolouthiai manuscripts, beginning with *Makarios anēr* (Psalm i.1*a*). A number of traditional anonymous and local melodies are preserved together with 'quasi-traditional' settings ascribed to named composers. Most akolouthiai manuscripts also contain an additional repertory of kalophonic ('beautified') verses for Psalm ii. Compared with the simple psalm settings, the kalophonic chants are extensive, melismatic works with a rhapsodic vocal style (*see* KALOPHONIC CHANT, and BYZANTINE CHANT §12).

(*iii*) The *Kyrie ekekraxa*: a complex of psalms (cxl, cxli, cxxix and cxvi), of which the first two verses only (the *kekragarion*) are provided with melodies in the akolouthiai manuscripts; the melodies for the rest of the chant were probably generated from these relatively simple psalmodic settings. In the manuscripts a *kekragarion* is supplied for each of the eight modes. Depending on the importance of the feast, *stichēra* (*see* STICHĒRON) were interpolated between the last ten, eight, six or four verses of the psalm complex.

(*iv*) The *Phōs hilaron*: an ancient Christian hymn dating from the 6th century at least. Its melody was transmitted orally until the 17th century, when notations show that a single very simple and rather monotonous melody in the 4th plagal mode probably lay behind all the earliest notated settings.

(*v*) A PROKEIMENON: a chant sung before the evening readings. The psaltika and akolouthiai manuscripts contain a set of eight *prokeimena*, one for Hesperinos on each day of the week and one for Sunday morning. These psalm verses were performed responsorially in the 'psaltikon' style. The melodies of the refrains (the *dochai*) are contained in the asmatikon manuscripts.

(*vi*) The *aposticha*: a selection of *stichēra* with single psalm verses and a concluding doxology.

(*vii*) The TRISAGION.

(*viii*) The *troparion apolytikion* (see TROPARION).

EDWARD V. WILLIAMS/CHRISTIAN TROELSGÅRD

**Hespèrion XX.** Ensemble dedicated to the performance of early music. It was founded in 1974 by JORDI SAVALL (stringed instruments), Montserrat Figueras (singer), Lorenzo Alpert (wind and percussion) and Hopkinson Smith (plucked strings), with the prime aim of reviving unknown and neglected European and, especially, Spanish repertory of the Middle Ages, Renaissance and Baroque. The ensemble has toured in Europe, the USA, South America, Mexico, Australia, New Zealand and Japan, presenting programmes such as 'Music in the Age of Cervantes', 'Neapolitan Music of the Renaissance', 'Sephardic Romances' and 'Songs of the Troubadours'. Hespèrion XX has made more than 50 recordings, ranging from vocal works by Encina, Morales, Cabezón and Victoria through Purcell and François Couperin to Bach's *Art of Fugue*.

MARICARMEN GÓMEZ

**Hespos, Hans-Joachim** (*b* Emden, 13 March 1938). German composer. Musically self-taught, he first aroused attention when he won the 1967 Gaudeamus Foundation composition prize. A scholarship took him to the Villa Massimo in Rome (1972–3), and he returned to teach in Delmenhorst. During 1981 and 1982 he gave masterclasses in Israel, the USA, Brazil and Japan. In 1990 he was visiting professor at the Academy of Arts and Music in Bremen, and he became a member of the Free Academy of Arts in Hamburg in 1991. He works as a freelance composer in Ganderkesee near Bremen.

Hespos's music initially revealed closer ties to Schoenberg than to Webern, especially to Schoenberg's Expressionism. He differs from Schoenberg, however, in that composing is for him not a matter of the re-ordering of given material, as with serialism, but the creation of sounds. The disjunct nature of Hespos's work arises from a concentration on the particular sound; each phrase is precisely articulated, often requiring a frankly Expressionist delivery ('like a scream', 'agitated', 'mangled').

CLYTUS GOTTWALD

**Hess, Joachim** (*b* Leeuwarden, 24 Sept 1732; *d* Zeist, 27 Dec 1819). Dutch organist, writer and composer. Born of German parents, he began his musical career as organist of the Lutheran church in Leeuwarden (playing an organ made by Arp Schnitger); on 1 November 1749 he was appointed organist of the Lutheran church in Gouda (playing the former organ of the Grote Kerk there, built by Heinrich Niehoff in 1552–6). In November 1753 he became organist of the Grote Kerk in Maassluis (with an organ made by Rudolf Garrels, 1732), and in January 1754 of the Grote Kerk in Gouda (with an organ made by Jacob François Moreau, 1736). He held this last position until his retirement in 1813. He spent his last years in the Moravian Community (Hernhutters) in Zeist.

Hess's views constantly changed during his life. His education was founded on the classic principles of organ playing. An anonymous addition to Hess's autobiography (MS, 1818, Zeist, Broedergemeente PA 11, R 7, 6) reports that he had an unusual ability for improvising a fugue according to strict rules, a talent for which he was famous throughout the country. He evidently preferred imitative or illustrative music. During a visit by William V, Prince of Orange, to the Grote Kerk in Gouda on 27 August 1768, Hess played a battle piece (*veldstuk*) during the entry of the company, an improvisation on the Vox humana during the tour of the stained-glass windows,

and a fantasy for full organ during its departure. The registration examples in his *Luister van het orgel* demonstrate a preference for these genres. As a composer he wrote music in the Moravian tradition for the inaugurations of new organs, especially those built by his brother Hendrik Hermanus Hess (1735–94); he also wrote 14 melodies for the *Evangelische gezangen* (1806), the first official Dutch chorale book.

Hess's organological works are still important today. His *Luister van het orgel* and *Over de vereischten in eenen organist* were intended mainly to give information concerning correct performance on the organ. His description of the organ in the Grote Kerk in Gouda, originally published anonymously in Gouda and ascribed by some to Hess, later appeared as a supplement to his *Dispositien der merkwaardigste Kerk-orgelen*; his continuation of the same work and his *Korte schets van de allereerste uitvinding* are extremely important sources for the history of organ building. Hess examined many instruments personally, but he also used information from others, not always sufficiently critically. Modern Dutch organography owes much to his work.

THEORETICAL WORKS

Korte en eenvoudige handleiding tot het leeren van 't clavecimbel of orgel-spel (Gouda, 1766, 5/1792/*R*)
Luister van het orgel (Gouda, 1772/*R*)
Dispositien der merkwaardigste Kerk-orgelen, welken in de zeven Vereënigde Provincien, als mede in Duytsland en Elders aangetroffen worden (Gouda, 1774/*R*)
Over de vereischten in eenen organist (Gouda, 1807)
Korte schets van de allereerste uitvinding en verdere voortgang der orgelen tot op dezen tijd (Gouda, 1810)
Dispositien van kerk-orgelen welke in Nederland worden aangetroffen (MS, *c*1815, Gemeente-museum, The Hague); ed. J.W. Enschedé (Amsterdam, 1906) [suppl. to *Dispositien*, 1774]

MAARTEN ALBERT VENTE/GERT OOST

**Hess, Marjorie Ann.** *See* BOSCH, MAURA.

**Hess,** Dame **Myra** (*b* London, 25 Feb 1890; *d* London, 25 Nov 1965). English pianist. She first studied with Julian Pascal and Orlando Morgan at the GSM before winning an Ada Lewish scholarship at the age of 12 to study with Tobias Matthay – a lifelong friend and influence – at the RAM. Her début came in 1907 when she played Beethoven's Fourth Concerto and Saint-Saëns's Fourth Concerto with Beecham at the Queen's Hall, London, giving Chopin's F♯ minor Nocturne and A minor Etude op.25 no.11 as encores. In 1908 she first appeared at the Promenade Concerts, playing Liszt's E flat Concerto with Sir Henry Wood, the first of 90 collaborations. Partnerships with Nellie Melba, Lotte Lehmann, Fritz Kreisler and Joseph Szigeti followed, and she also formed a piano duo with her cousin Irene Scharrer. In 1912 Hess achieved a major success playing the Schumann Concerto with Mengelberg in the Netherlands, and by 1920 she was playing nearly 100 concerts a year in Britain and Europe. In 1922 she made her début in the USA, where she enjoyed particular acclaim. At the start of World War II, when all London's concert halls were closed, she commenced her legendary daily lunchtime recitals at the National Gallery. Playing 146 concerts to full houses, she joyfully proclaimed 'never have I played more and practised less'. She was created a CBE in 1936 and a DBE in 1941. After the war she resumed her regular visits to the USA, giving 14 concerts at Carnegie Hall between 1946 and 1954. In 1951–2 she played at Casals' Prades Festival. She suffered a heart attack in 1960 and that year gave her last public performance, of Mozart's A major Concerto K488. Her final years were clouded by rapidly declining health.

Hess's repertory, initially wide and enterprising, centred increasingly on the Viennese Classics; Beethoven's Fourth Concerto, his last three sonatas and many of the Mozart concertos seem inseparably associated with her warmth, poetry and regal authority. Among her many piano transcriptions of Baroque music, that of J.S. Bach's chorale-prelude 'Jesu, joy of man's desiring' (Cantata 147) attained worldwide popularity. She disliked recording ('when I listen to myself play, I feel I am going to my own funeral'), but the few discs she did make have been greatly admired. A performance of Chopin's F minor Fantasie taken from a 1941 University of Illinois recital shows her scintillating virtuosity, while a 1951 performance of Brahms's Second Concerto with Bruno Walter finds her more than equal to its rigours. Beethoven's sonatas opp.109 and 110 and Schumann's Concerto, *Carnaval* and *Etudes Symphoniques* were among her greatest successes in the recording studio. Hess's students included Ann Schein and Stephen Kovacevich.

BRYCE MORRISON

*Myra Hess*

**Hess, Willy** (i) (*b* Mannheim, 14 July 1859; *d* Berlin, 17 Feb 1939). German violinist. He studied with his father, a pupil of Spohr. In 1865 he went to the USA to continue his studies and, at the age of nine, he toured with the Thomas Orchestra. In 1872 he left for the Netherlands, moved to Heidelberg and then went to Berlin in 1876 to complete his studies with Joachim. He led the opera and museum concerts orchestra at Frankfurt (1878–86) and in 1886 became a professor at the Rotterdam Conservatory. Hess moved to Manchester to lead the Hallé Orchestra (1888–95), to Cologne as a professor at the conservatory (1895–1903), and then to London to the RAM (1903–4). From 1904 to 1910 he led the Boston SO. He eventually settled in Berlin and taught at the Hochschule für Musik (1910–28).

Hess was distinguished as a leader, a 'passionate and inexhaustible' teacher (according to Flesch), and a quartet player (he played in the Hess Quartet in Boston and the Halíř Quartet in Berlin). An intelligent and sensitive musician, whose playing was strongly influenced by Joachim, he produced a rich, full tone and led with a certain impetuosity of attack. His fine violin was by G.B. Guadagnini.

WATSON FORBES

**Hess, Willy** (ii) (*b* Winterthur, 9 Oct 1906; *d* Winterthur, 9 May 1997). Swiss musicologist and composer. He studied the piano and music theory with Andreae, Paul Müller and Walter Frey at the Zürich Conservatory, and musicology at Zurich University (1926–9). After studying in Berlin (1929–30) he resumed piano lessons with Frey. During the years 1942–71 he was a bassoonist in the Winterthur Stadtorchester and was also active as a music teacher, composer, music critic and musicologist. His work centred on Beethoven: with the primary object of bringing unknown compositions to light he published a definitive catalogue (1957), and contributed over 400 publications to Beethoven studies. Between 1959 and 1971 he published 14 volumes of supplements to the complete Beethoven edition, as well as numerous editions of separate works. His writings were otherwise chiefly concerned with questions of musical form and the works of Bruckner, but he also wrote on modern music and the Swedish explorer of Asia, Svan Hedin. Hess composed a large number of tonal works based on various Classical models.

JÜRG STENZL

**Hesse.** *See* HASSE family.

**Hesse, Adolf Friedrich** (*b* Breslau, 30 Aug 1809; *d* Breslau, 5 Aug 1863). German organist and composer. He was taught by F.W. Berner in the Silesian Bach tradition, and on his first major concert tour in Germany met Hummel in Weimar and Spohr in Kassel. In Darmstadt he met Rinck, who had studied with Bach's pupil J.C. Kittel, and with whom he studied for six months in the winter of 1828–9. From 1831 until his death Hesse was organist of the Bernardine church in Breslau. In 1844 he inaugurated the Doublaine-Callinet organ at St Eustache in Paris, where his interpretation of Bach's organ works, hitherto almost unknown there, created as great a sensation as his own virtuosity. In 1851 he played very successfully in the Crystal Palace and elsewhere in London. Hesse was the first 19th-century German organist to win international recognition as a touring virtuoso, even before Mendelssohn. His concert programmes consisted mainly of his own compositions and works by Bach, including fugues from *Das wohltemperirte Clavier*. Doubt has recently been cast on the significance of Hesse's teaching of J.N.

Lemmens, whom Fétis regarded as Hesse's heir and thus a link between the tradition of Bach and the modern French school.

Hesse's compositions combined fugal polyphony modelled on Bach with rich, Romantic harmonies influenced by Spohr, whom he greatly admired. While his organ works were widely distributed, his orchestral and choral compositions were little known outside Breslau. During the last 15 years of his life, feeling dissatisfied at the direction of 'modern music', he hardly composed at all.

MARTIN WEYER

**Hesse, Ernst Christian** (*b* Grossgottern, Thuringia, 14 April 1676; *d* Darmstadt, 16 May 1762). German composer and viol player. While still at school in Langensalza and at Eisenach he became known as an excellent viol player. The Landgrave Ernst Ludwig of Hesse-Darmstadt heard him play in 1692 and attached him to his court in Giessen, where he also studied law at the university. In 1694 he went with the court to Darmstadt, becoming an assistant in the government chancellery, playing in the court orchestra and studying music with the elderly Kapellmeister, W.C. Briegel. Between spring 1698 and autumn 1701 he developed his instrumental technique still further under Antoine Forqueray and Marin Marais in Paris at the Landgrave's expense.

After his return to Darmstadt he was installed as viol player and secretary for war. On 3 December 1701 he married Anna Katharina Merck, a member of the well-known family of pharmacists. Tours as a concert virtuoso took him in 1705 to Hamburg (where he made friends with Handel), then to the Netherlands (where he played before the Duke of Marlborough) and afterwards to London. He played before Queen Anne and appeared at concerts with J.E. Gaillard and Thomas Clayton. In Darmstadt early in 1707 he directed musical festivities in honour of the Elector of Hanover, later King George I of England, and on the strength of this he was appointed by the Landgrave as his Kapelldirektor. In 1708 Hesse went to Mantua with Prince Philipp, Ernst Ludwig's brother, to study Italian operatic style under the prince's Kapellmeister, Vivaldi, and he subsequently gave concerts throughout Italy. In April he was in Rome taking part in Handel's oratorio *La Resurrezione*. After a short spell in Darmstadt, where J.C. Graupner had recently taken charge of the musical establishment, Hesse undertook further journeys between September 1709 and the beginning of 1710, visiting Dresden and Vienna, where he played with Pantaleon Hebenstreit before Emperor Joseph I and was highly praised. He declined invitations to profitable appointments but then secured a good permanent position in Darmstadt as from 1 June 1710.

In 1713, soon after the death of his wife (by whom he had six children), he married the well-known singer JOHANNA ELISABETH DÖBRICHT. In 1714, when quarrels developed between the women singers in Darmstadt, Hesse resigned his post as Kapelldirektor but was given a military appointment and was able to undertake concert tours with his wife. In 1726 he was promoted to the war council; besides this, he devoted himself to his lucrative wine business and to his property. Later he withdrew still further from musical life, suffering acutely from gout.

About 1712 his Italian opera *La fedeltà coronata* was performed. It includes arias according to 'Lombardian taste', expressive recitatives and an important ensemble. His divertimento *Apollo in tempe* dates from a later period and shows a French style of orchestration and greater integration of the individual numbers. The flute sonata and the duo for bass viol and continuo are skilfully written, with a pleasant vein of melody.

WORKS

ELISABETH NOACK/STEFFEN VOSS

**Hesse, Johann Heinrich** (*b* c1712; *d* Eutin, bur. 29 June 1778). German composer. In 1733 he was appointed Kantor and organist in Eutin (near Lübeck), and he may also have been the director of the small Kapelle in Eutin of Prince-Bishop Adolph Friedrich (later king of Sweden). There he was also active as a composer of lieder. His first collection, *Lieder mit Melodien* (1755, manuscript in *D-SWl*), was apparently never published, though some of the pieces may have been taken into his first published collection, *Lieder zum unschuldigen Vergnügen* (Lübeck, 1757), two years later. He also published two volumes of lieder to texts by Gellert (Eutin, 1766, and Hamburg, 1774), besides sets of *Moralische Oden und Lieder* (both Eutin, 1777, 1780, now lost), few of which rise above the level of mediocrity. His *Kurze, doch hinlängliche Anweisung zum General-Basse* (Hamburg, 1776) seems to have been his most popular work.

RAYMOND A. BARR

**Hessenberg, Kurt** (*b* Frankfurt, 17 Aug 1908; *d* Frankfurt, 17 June 1994). German composer. He studied in Leipzig with Raphael and Teichmüller (1927–31), and in 1933 he was appointed to teach composition at the Hoch Conservatory (renamed 'Musikhochschule' in 1937) in Frankfurt; he remained there throughout his career and was made professor in 1953. Among the many awards made to him were the National Composition Prize (1940) and the Robert Schumann Prize given by the city of Düsseldorf (1951). He composed in almost every genre but opera, and choral music forms a substantial part of

his oeuvre. While his music is deliberately academic and conventional in general, he combines a fluent contrapuntal skill (developed from his study of Baroque music) with a quite individual tonal harmonic style. His slow movements have a delicately woven poetry, together with – in his music for voices – a very smooth melodic line. His first major successes were with the Concerto grosso and the Second Symphony, both first conducted by Furtwängler.

WORKS
(*selective list*)

5 symphonies: op.11, 1935–6; op.29, 1943; op.62, 1954; op.109, 1980; op.129, 1986

Other orch works incl. Pf Conc., op.21, 1939; Conc. grosso, op.18, 1938; Konzertante Musik, op.39, 2 str orch, 1947; 2 Pf Conc., op.50, 1950; Regnart-Variationen, op.65, 1955; Conc. for Orch, op.70, 1957; Sinfonietta, op.73, str, 1959; Konzertante Variationen über ein Thema von Robert Schumann, op.88, pf, orch, 1971–2: Kammerkonzert, op.92, ob, small orch, 1973; Vc Conc., op.96, 1975; Vn Conc., op.100, 1976; Sinfonietta no.2, chbr orch, op.104, 1978; Sinfonietta no.3, op.117, fl, ob, cl, bn, pf, str qt, 1982–3; Sinfonietta no.4, op.122, 2 hn, 4 tpt, 2 trbn, tuba, 1984

Choral pieces with orch incl. Fiedellieder, op.22, 1939–40; Weihnachtskantate, op.27, 1942–3; Psalmen-Triptychon, op.36, 1945–6; Vom Wesen und Vergehen, op.45, 1948; Struwwelpeter-Kantate, op.49, 1949; Weihnachtsgeschichte, op.54, 1950–51; Kantate vom dankbaren Samariter op.57, 1952; Passionsmusik nach dem Evangelisten Lukas, op.103, 1977; Messe, op.113, 1981–2

8 str qts, 2 pf qts, 2 str trios, other chbr works; pieces for pf, org, hpd; 7 song cycles, many sacred and secular choruses

Principal publisher: Schott (Mainz)

KLAUS KIRCHBERG

**Heterophony** (from Gk. *heteros*: 'other', 'different' and *phōnē*: 'voice'). Term coined by Plato, of uncertain meaning; now used to describe simultaneous variation of a single melody. Plato used the word (*Laws*, vii, p.812) when discussing the unsuitability of music for lyre and voice in musical education. It is not clear if he meant that the 'other voice' (the lyre) provided a contrasting melody, a harmonization of the vocal part or deliberate variations on it. Thus its meaning could range from reference to minute discrepancies in singing or playing in unison or octaves (even, for instance, those produced unintentionally within the first violins of an orchestra) to the most complex of contrapuntal writing.

In modern times the term is frequently used, particularly in ethnomusicology, to describe simultaneous variation, accidental or deliberate, of what is identified as the same melody. Ex.1, from Beethoven's *Missa solemnis*, illustrates the practice of distributing the same melody among different voice or instrument parts with different rhythmic densities. While this is a common enough occurrence between the cello and double bass parts in European orchestral writing, it is basic to some non-European music, for example the gamelan music of south-east Asia (*see* INDONESIA).

**Ex.1** Beethoven: *Missa solemnis*, Credo

**Ex.2** Opening of 'Martyrdom', Isle of Lewis, Hebrides (Knudsen)

The term 'heterophony' is also used in discussion of much accompanied vocal music of the Middle East and East Asia, where the instrument provides an embellished version of the vocal part. One instance is the relationship between *lyra* and voice in the performance of Kleftic ballads (*see* GREECE, §IV, 1(iv)). Heterophony is also likely to occur frequently in group singing within orally transmitted monophonic traditions, as in ex.2, where the highly individual and ornamental treatment given to a straightforward metrical psalm tune is explained as the work of 'individual people, who in the singing fellowship reserve the freedom to bear witness to their relation to God on a personal basis' (Knudsen).

PETER COOKE

**Heteš, Jan.** *See* HATAŠ family.

**Hets** [Khets]. Mongolian FRAME DRUM, also known as *hengereg*. Mongol shamanic drums have a single head stretched over a wooden frame and are held by an interior wooden handle. There are two such frame drums displayed in Ulaangom Museum, Uvs *aimag* ('province'), Mongolia. The drum-handle of one of these, belonging to Badalgarav shaman from Züünhangai *sum* ('district'), comprises two crossed wooden sticks. In addition, a twisted wire stretches along the back from which hang a row of small percussive devices (*holbogo*) in the shape of weapons. The handle of the second frame drum, belonging to a Tuvan shamaness, Yamaan, from present-day Naranbulag *sum*, is a single wooden stick representing the shaman's ancestor-spirit (*ongon*). The head and chest of the carved figure are coloured pink, its crown black, and its eyes and forehead bright red. The lower end of the figure/handle, with its red and blue patterns, give the impression of a costume. Along the wire that serves as 'arms' hang eight *holbogo*; others are attached to the drum's frame and also dangle as earnings of the *ongon*. Nine anklebones are fitted around the 185 mm-deep frame over which deer-skin is stretched. The beaters of both instruments are similar: one side bears percussive metal devices attached to a metal strip running like a spine down its leaf-shape; the other is made partly of single and partly of double hide.

Among Tsaatans of Hövsgöl *aimag*, north-west Mongolia, the frame and handle of the drum must be made from a larch tree struck by lightening. The instrument symbolizes the saddle animal on which the shaman travels or the mount that carries the invoked spirit to the shaman, and the animal is identified with that of the skin from which the single drumhead is made (Potapov). Among certain Mongol groups, the shamanic drum is called the 'black stag' (Heissig). That the Darhats of Hövsgöl *aimag* perceive the drum as a riding animal is indicated by the material used for it: horse-hair, reindeer's sinew, red cotton thread representing blood vessels, and anklebones; and the naming of its various parts: 'ear', 'heart', 'backbone', 'sacrificial ribbon', 'halter', 'rein' and so on (Diószegi). Drums are 'enlivened' during a special ceremony before being used for shamanizing. The skin of a Buryat Mongol shaman's drum in the possession of the Mongolian academic Tsoloo is decorated with representations of a moon and crow.

CAROLE PEGG

**Hetsch, (Karl) Ludwig Friedrich** [Louis] (*b* Stuttgart, 26 April 1806; *d* Mannheim, 28 June 1872). German composer, conductor and teacher. In 1824 he went to Tübingen to study theology, but on leaving the seminary he set up as a music teacher; Princess Elisabeth of Württemberg was among his earliest pupils. He soon moved back to Stuttgart where his first large-scale work, the opera *Ryno*, was produced in 1833 and published soon afterwards. Hetsch became director of music at Heidelberg in 1846, and in 1856 director of the court theatre at Mannheim, where he had wider scope for his talents and where he remained until his death. The University of Tübingen gave him an honorary doctorate in 1867.

One of Hetsch's lifelong friends was the poet Eduard Mörike, with whom he shared an enthusiasm for Mozart and an antipathy to Wagner. His settings of the poems in Mörike's novella *Maler Nolten* (1832) were published in an appendix to the novella, and Mörike dedicated his short story *Mozart auf der Reise nach Prag* (1855) to Hetsch. Hetsch's songs are unpretentious but have some melodic charm. They include settings of *Der Feuerreiter* and *Das verlassene Mägdlein*. Other compositions include a setting of Psalm 130 for soloists, chorus and orchestra op.9 (1846), incidental music for *Die Jungfrau von Orleans*, masses and orchestral music.

GWILYM BEECHEY

**Hettisch, Johann.** *See* HATAŠ family.

**Heuberger, Richard (Franz Joseph)** (*b* Graz, 18 June 1850; *d* Vienna, 28 Oct 1914). Austrian critic and composer. He gave up an engineering career in 1876 to devote himself to music, studying in Graz with W.A. Rémy. Moving to Vienna, he became director of the Academischer Gesangverein in 1876 and the Singakademie in 1878, was a teacher at the conservatory from 1902 and directed the Wiener Männergesang-Verein, 1902–9. He was also a music critic, writing for the *Neues Wiener Tagblatt* from 1881, the Munich *Allgemeine Zeitung* from 1889, and succeeding Hanslick on the important and influential *Neue freie Presse* (1896–1901); he also edited the *Musikbuch aus Österreich* (1904–6). Besides collections of his criticisms, he published a biography of

Schubert (1902). He composed two ballets, four operas and several operettas, and achieved considerable renown in his day with his choral and orchestral works; he is now remembered almost exclusively for his operetta *Der Opernball* (1898). This remains a mainstay of the German operetta repertory, esteemed especially for the insinuating duet 'Geh'n wir ins Chambre séparée' (for soprano and mezzo-soprano). Otherwise his stage works had little success, and when he was offered the libretto of *Die lustige Witwe* he was unable to supply music to suit the management of the Theater an der Wien, who thereupon handed it over to the young Lehár.

WORKS
(*selective list*)

*operettas unless otherwise stated*

Die Abenteuer einer Neujahrsnacht op. 29 (Komische Oper, 3, F. Schaumann, after H. Zschokke), Leipzig, Stadt, 12 Jan 1886; Manuel Venegas (op, 3, J.V. Widmann, after P. de Alarcon: *El niño de la bola*), Leipzig, Stadt, 27 March 1889; Mirjam [Das Maifest] (op, 3, L. Ganghofer), Vienna, Hofoper, 20 Jan 1894; Der Opernball op. 40 (3, V. Léon and H. von Waldberg, after A. Delacour and A. Hennequin: *Les dominos roses*), Vienna, An der Wien, 5 Jan 1898 (Leipzig and Vienna, 1898); Ihr Excellenz (3, Léon and Waldberg, after Hennequin and A. Millaud: *Niniche*), Vienna, An der Wien, 28 Jan 1899

Der Sechsuhrzug (3, Léon and L. Stein, after H. Meilhac: *Décoré*), Vienna, An der Wien, 20 or 21 Jan 1900; Das Baby (3, Waldberg and Willner, after A.W. Pinero), Vienna, Carl, 3 Oct 1902; Barfüssele (op, prelude, 2, Léon, after B. Auerbach), Vienna, Volksoper, 22 Dec 1905; Der Fürst von Düsterstein (3, Gaudeamus), Vienna, Johann Strauss Theater, 3 March 1909; Don Quichotte (2, H. Reichert and F. Grünbaum, after M. de Cervantes), Vienna, Hölle, 1 Dec 1910

ANDREW LAMB

**Heudelinne** [Heudeline], **Louis** (*fl* 1700–10). French composer and viol player. He published the first collection of pieces for treble viol in France: *Trois suites de pièces à deux violles* (Paris, 1701). In 1710, when he was living in Rouen, his *Second livre de pièces pour le dessus et basse de violle* was published in Paris. The first collection was also reprinted in Amsterdam (a unique copy with the composer's corrections is at *GB-DRc*). Each of the three suites of the 1701 collection, written for treble and seven-string bass viols, includes one or two preludes, an allemande, courante, sarabande, gigue, and several additional movements (some with *doubles*): gavotte, menuet, rondeau, chaconne, rigaudon or 'sonate'. A few may be played alone (the prelude, allemande and rondeau of no.1 and the prelude of no.2). The difficulty of Heudelinne's music is caused by its passages and broken rather than chordal figuration; a melody with few chords or double stops characterized for him the nature of the treble viol (*avertissement*: 'ce jeu tendre & brillant qui fait de propre caractère du dessus de viole'). His second collection includes 60 pieces, some of which are for two trebles and bass, grouped by keys (D, g, G, e, E, A, d). Some of these have descriptive titles, such as 'pièce luthée à petits coups d'archet', 'cloches ou carillons' and 'la villageoise'.

MARY CYR

**Heugel.** French firm of music publishers. The Heugel family became associated with publishing on 1 January 1839, when Jacques-Léopold Heugel (*b* La Rochelle, 1 March 1815; *d* Paris, 12 Nov 1883) became a partner of Jean-Antoine Meissonnier (*b* Marseilles, 12 Dec 1783; *d* Paris, 6 May 1857). Before association with Heugel, Meissonnier, established in Paris from 1809, published a *Journal de guitare* (1822), *Le troubadour des salons* (1825) and other light music. He had bought the business of Savaresse (1835); on 10 August 1838 he moved to 2 bis rue Vivienne. When Meissonnier retired on 20 April 1842 Heugel became sole owner. In 1974 the firm moved to Galerie de Montpensier in the Palais Royal, and in 1980 was bought by Leduc.

The firm acquired the popular weekly journal *Le ménestrel* (12 Feb 1840) from Jules Lovy, who had founded it in 1833, and continued publication until 1940 except during the Franco-Prussian War of 1870 and World War I. Built at first on *Le ménestrel* and illustrated albums of popular songs, the catalogue expanded rapidly. Jacques-Léopold published several pedagogical works (including Cherubini's) and a significant collection of harpsichord works edited by Amedée Méreaux (1855–60). In 1857 Heugel founded *La maîtrise*, a journal dedicated to renewal of religious music and directed by d'Ortigue and Niedermeyer. In the mid-19th century Heugel's mainstay was theatre music. Among countless successful publications were works by David (*Le désert*, 1844; *La perle du Brésil*, 1851); Offenbach (*Croquefer*, 1857, then *Orphée aux enfers*, *Barbe-bleue*, *La belle Hélène* and many others); Thomas (*Mignon*, 1866; *Hamlet*, 1868); Delibes (*Coppélia*, *Sylvia*, *Lakmé*); and French versions of works by Johann Strauss (ii) and his brothers.

In 1883 Jacques-Léopold was succeeded by his son Henri-Georges Heugel (*b* Paris, 3 May 1844; *d* Paris, 11 May 1916), who had become a partner in 1876. By 1885 Heugel was publishing at least one work daily, and catalogue purchases provided further expansion: the remainder of Edmond Gérard (1887 and 1890, Jacques-Léopold having bought part in 1882), Hartmann (1891, numerous works by Franck, Lalo, Reyer and Massenet), Tellier (1898) and part of Pérégally & Parvy (1904). Henri's nephew Paul-Emile Chevalier (1861–1931) supplied the capital to buy Hartmann's catalogue and thereupon became Heugel's partner. Chevalier directed the firm from May 1916 until 1919, the succession of Henri's son Jacques-Paul Heugel (1890–1979) being

delayed by the war. Chevalier retired on 22 July 1919 and Jacques led the firm alone until 22 March 1944, when it became a 'société anonyme'. He was then appointed president and general director. His sons François Henri Heugel (*b* Paris, 22 Aug 1922) and Philippe Gérard André Heugel (*b* Paris, 8 July 1924; *d* 13 June 1992) were named artistic director and commercial director respectively in 1947.

Under Jacques Heugel and his sons publication of contemporary music was balanced with concern for earlier music. 20th-century composers prominent in Heugel's catalogue include Auric, Delannoy, Fauré, Hahn, Harsányi, Ibert, d'Indy, Jolivet, Milhaud, Poulenc, Schmitt, Tailleferre, Alexander Tcherepnin and Widor, as well as the later Amy, Arrigo, Boulez, Dutilleux, Hersant, Jolas, Martinet and Mihalovici. An extensive collection of practical editions of early music, *Le pupitre*, begun in 1967 under the direction of François Lesure, now extends to some 72 volumes. Heugel's catalogue contains the publications of the Societé Française de Musicologie (to *c*1980). From 1954 to 1974 Heugel's current activities were detailed in a semi-annual *Carnet de notes*. Since acquiring Heugel in 1980, Leduc has maintained its individual editorial policy. Many out-of-print works are being reissued, including vocal scores of famous operas with documentation and iconography. Heugel also publishes educational works and the choral collection of the Centre d'Études Polyphoniques d'Ile de France *DEMF*, ii

ROBERT S. NICHOLS/JEREMY DRAKE

**Heugel, Johannes** (*b* ? between 1500 and 1510; *d* Kassel, before 31 Jan 1585). German composer. His identity is unclear: according to Cramer, he could be 'Joannes Heugelius Wetteranus Hessus', born between 1510 and 1515 in Wetter, near Marburg, while Gottwald thinks he was born in the Strasbourg-Basle area. Nagel identifies him with 'Johannes Heygel ex Teckendor' (Deggendorf an der Donau), a student at Leipzig in winter 1513, but Pietzsch's research has largely disproved Nagel's theory. Heugel may have received his musical education in south-west Germany: he composed epitaphs for Thomas Sporer in Strasbourg in 1534 and Balthasar Arthopius, who worked in Weissenburg and Speyer, in 1535. Stylistic similarities between settings of *Christ ist erstanden* by Matthias Greiter and Heugel also suggest that Heugel, like Greiter, may have been a pupil of Sporer. Heugel had another link with the Palatinate, for from 1535 onwards he dedicated several compositions to the Palatine princes.

The earliest reference to Heugel as a musician is in a Kassel account book dating from the end of 1536, in which he is described as a 'companist' and, as in the accounts for the following year, listed among the trumpeters; he received the highest salary and seems to have been held in great esteem. His earliest dated compositions were written in 1534. However, he was commissioned by Philipp, Landgrave of Hesse, to set a satirical poem and an elegy on Zwingli, known to have been written in 1531 and 1532 respectively, and he would hardly have composed them later than 1533; he may therefore already have begun his service at the Hesse court at that time. As court composer it was Heugel's duty to build up a repertory for the court musicians by composing new works and copying the works of others. 12 of his manuscripts (mostly incomplete) survive in the Kassel Landesbibliothek. In 1547 Heugel's name headed the list of singers; he probably succeeded Georg Kern, Philipp's 'Gesangsmayster', although he did not adopt that title. He probably had the function of a Kapellmeister, taking responsibility for all the music at the court. During the whole of his time there he never had more than 13 singers (seven men and four to six boys) or 15 instrumentalists. A builder's clerk of the same name is mentioned in the documents for 1553 and 1578 but it seems unlikely that this could be the composer. When Landgrave Philipp died on 31 March 1567, it was Heugel who composed a lament. Philipp's successor Wilhelm IV retained Heugel in his service, but the latter appears gradually to have done less composing (his last datable composition is from 17 March 1577) and generally to have spent the last years of his life more quietly. In 1585 his salary was paid up to 30 April to his widow. On 1 May his successor Bartholomäus Clausius was appointed Kapellmeister.

In the 50 years or so that he worked at Kassel, Heugel produced a large and varied corpus of compositions, of which about 500 survive, though some are incomplete. They include motets for the most important festivals in the church year and for all the usual services, *Te Deum* and *Magnificat* settings, Latin psalms, a complete German psalter, German song motets and hymns, Latin occasional motets with political or personal texts for court, university and home use, and also German songs and instrumental pieces. Heugel composed in nearly all the forms then current, the only exceptions being the Mass (which was no longer celebrated at the Kassel court), dance music and keyboard music. He used a wide range of techniques and forces: his surviving works include motet-like compositions in seven to 12 parts for vocal or instrumental ensembles (or a combination of both), predominantly polyphonic four- to six-voice motets and songs, and two- or three-voice settings of humanist odes and other pieces. Though trained in the German tradition, Heugel increasingly adopted the Flemish style of the post-Josquin generation.

Heugel's earlier compositions include a group of important polyphonic works for voices and instruments from the 1530s and 1540s; they include canons and 'riddle' canons (for which detailed instructions are provided) and although the music draws heavily on the Flemish tradition of polyphony, it remains, particularly for the instruments, individual in style. The eight-voice *Consolamini, populе meus* (1539) is probably the earliest German piece for double choir. The seven-part *Lerman* is an unusual instrumental piece specifically for wind instruments. In contrast, the four-voice psalm motets, a Credo and the two Zwingli motets show the influence of a later, simpler Flemish style. The late works reveal a distinct preference for homophony; the *Querela* for Landgrave Philipp ranks with the best funeral music of its time. Another striking late work is the ten-part *Colloquium hospitis et nymphae* (1566), a rich, homophonic composition with written-out echo effects. Among the numerous motets, the setting of Burkhard Waldis's translation of the psalter deserves mention; Heugel used a variety of techniques in setting the psalms, though the melody is invariably in the tenor. The settings are motet-like and even sometimes instrumental in conception, and are far removed from the later homophonic chorale.

WORKS

22 Magnificat settings, 4vv, Magnificat, 5vv, *D-Kl* 4° Mus.9 (according to Kirsch at least 7 are not by Heugel)

29 motets, 7–12vv, *Kl* 4° Mus.38 (dated July 1535–Jan 1566; A II, T II lost)
16 motets, 5–6vv, *Kl* 4° Mus.91 (dated April 1544–Dec 1571; Sup II lost)
5 motets, 8vv, *Kl* 4° Mus.143 (dated 1566; 1 doubtful; only A ii and T extant)
88 motets, 5–9vv, *Kl* 4° Mus.118 (dated Feb 1534–March 1577; Sup lost)
11 motets, 4–5vv, *Kl* 4° Mus.142 (dated Dec 1540–May 1550; B lost)
22 motets, 4–5vv, *Kl* 8° Mus.4 (dated Oct 1534–Jan 1536; A lost)
16 psalm motets, 4–5vv, *Kl* 4° Mus.24 (dated Sept 1537–April 1550; Vagans lost)
156 German psalms, 4–5vv, *Kl* 4° Mus.94 (dated Feb 1562–1565, but probably incl. compositions from 1555–70)
61 sacred German songs, ?4–5vv, *Kl* 8° Mus.53, 1 (dated June 1534; only Sup extant)
2 sacred and 4 secular German songs, *B-Bc* XY 15.030 (MS score August 1836, ed. M. Hauptmann, probably from lost MS formerly in *D-Kl*)
2 German songs, *Kl* (single sheet of lost MS; only T I and T II extant)
55 various pieces, 4vv, *Kl* 4° Mus.43 (dated March 1534–Dec 1570)
6 various pieces, ?3vv, *Kl* 8° Mus.53, 2 (dated Feb 1534–Oct 1546; Sup only)
3 lost works, listed in *HEu* Pal.Germ.318

**Heurteur, Guillaume (le).** *See* LE HEURTEUR, GUILLAUME.

**Heuschkel, Johann Peter** (*b* Harras, 4 Jan 1773; *d* Biebrich, 5 Dec 1853). German oboist, organist, composer and teacher. He was oboist at Hildburghausen in 1792, court organist in 1794, and music teacher to the children of Duke Frederic. In 1796 he taught Weber, who acknowledged that Heuschkel had given him, 'the true, best foundation for strong, clear, characteristic playing on the pianoforte and the equal training of both hands'. In 1818 he became court music teacher at Biebrich, where in later years he taught his grandson Wilhelm Dilthey. Heuschkel wrote wind music, oboe concertos and variations, piano sonatas and variations, and songs; in 1808 he published a book of choral music for use with the Hildburghausen hymnal of Wagner and Genssler. His later works were all published by Schott in Mainz, and include an arrangement for wind ensemble of his former pupil's *Euryanthe*, and one of the overture to *Der Freischütz* for piano duet.

JOHN WARRACK/JOACHIM VEIT

**Heuss, Alfred (Valentin)** (*b* Chur, Switzerland, 27 Jan 1877; *d* Leipzig, 9 July 1934). German musicologist and critic. From 1896 to 1898 he was a student at the Stuttgart Conservatory; subsequently he attended the Munich Akademie der Tonkunst and studied at Munich University. From 1899 to 1902 he was a pupil of Kretzschmar at the University of Leipzig, and took the doctorate in 1903 with a dissertation on the instrumental music of Monteverdi's *Orfeo* and the Venetian opera sinfonia. From that time on he worked principally as a music critic, for the *Signale für die musikalische Welt* (1902–5), the *Leipziger Volkszeitung* (1905–12) and the *Leipziger Zeitung* (1912–18). In addition he was editor of the *Zeitschrift der Internationalen Musikgesellschaft* (1904–14) and the *Zeitschrift für Musik* (1921–9).

Heuss's lively intellect was turned both to questions of general criticism, whether of his own time or of earlier periods, and to more specific scholarly problems, which he pursued with characteristic vigour and enthusiasm. The starting-point for all his observations was the concept of music as something to be listened to, not merely seen on paper. This is understandable, since he was himself a composer. His general approach was a brilliant application of the interpretative analytical methods of his teacher Kretzschmar, and this often led him to arrive at highly idiosyncratic results on the basis of the most minute detail (e.g. the minor 2nd in Mozart's G minor Symphony), so that the chief fascination of his conclusions consists not infrequently in the enthuthiasm with which they are propounded. As a composer he devoted himself principally to song, a genre with which he also felt close sympathy as a scholar. He played a prominent part in German musical life of the 1920s, and strongly opposed the modern school of the time. As president of the Verband deutscher Musikkritiker he concerned himself, in a wide variety of publications, with contemporary musical matters of every sort.

ANNA AMALIE ABERT

**Heuzenroeder, Moritz** (*b* Ottersburg, 15 July 1849; *d* Tanunda, S. Australia, 9 Nov 1897). Australian pianist and composer of German birth. He first visited Australia about 1865, but returned to Stuttgart for advanced musical training at the Musikschule, where he studied composition with Lebert before moving permanently to Adelaide in 1872. He took singing and keyboard pupils, gave numerous private concerts and wrote and directed works including several German operettas (1882–3) for the chorus and concert orchestra of the South Australia German Club. He established the Adelaide Harmonie Society and performed light operas, among which his own Australian opera *Immomeena* (two acts, H. Congreve Evans, 1893) successfully combined current operatic conventions with a local realistic setting. His other compositions include songs, patriotic odes and piano pieces, but his main contributions were his extensive teaching, recitals and pioneering activities in the German musical societies of Gawler and the Barossa Valley, where shortly before his death he formed an orchestral and choral society.

ELIZABETH WOOD

**Heve, Alphonse d'.** *See* EVE, ALPHONSE D'.

**Heward, Leslie (Hays)** (*b* Littletown, Yorks., 8 Dec 1897; *d* Birmingham, 3 May 1943). English conductor and composer. The son of an organist, he was educated at Manchester Cathedral Choir School, becoming assistant organist at the cathedral and, in 1914, organist of St Andrew's, Ancoats. He moved to London in 1917 with a composition scholarship to the RCM, became assistant music master at Eton College, and undertook a variety of other work ranging from playing as a cinema organist in Brighton to writing music for the theatre and conducting the British National Opera Company. He was appointed musical director of the South African Broadcasting Corporation and conductor of the Cape Town Orchestra (1924–7); he significantly raised its standard and performed with it at the 1925 Empire Exhibition at Wembley and at a command performance at Buckingham Palace. Returning to England in 1927, Heward succeeded Boult as conductor of the City of Birmingham Orchestra in 1930, with which he broadcast a wide range of works. He showed a predilection for Dvořák, and enjoyed a deserved reputation as an exponent of Sibelius and of contemporary British composers. His pioneering recording of Moeran's Symphony in G minor has won deserved acclaim. He seldom conducted his own works, many of which he destroyed; they include a symphonic poem, two unfinished operas, a string quartet, choral works and numerous songs and partsongs.

ERIC BLOM/R

**Hewitt, Angela (Mary)** (*b* Ottawa, 26 July 1958). Canadian pianist. Born into a musical family, she first studied the piano with her mother (her parents have been a profound influence throughout her career) before studying from the age of six at the Royal Conservatory of Music in Toronto, where her teachers included Myrtle Rose Guerrero. Her most important teacher was Jean-Paul Sévilla, with whom she studied at the University of Ottawa. She graduated at the age of 18, and after a seven-year spell in Paris settled in London in 1985. That year she won first prize at the Toronto International Bach Piano Competition, and it is as an interpreter of Bach that she has laid the bedrock of her reputation. Her Bach has a poetic verisimilitude that transcends the issue of instrumental representation. As her recordings illustrate, her playing is infused with rhythmic vitality and tonal clarity, and shows an idiomatic empathy that has drawn comparisons with some of the most exalted Bach pianists, including Rosalyn Tureck and Edwin Fischer. Her large repertory extends far beyond Bach, and she is especially renowned for her warm and colourful playing of French music, particularly Ravel and Messiaen.

TIM PARRY

**Hewitt, Helen (Margaret)** (*b* Granville, NY, 2 May 1900; *d* Denton, TX, 19 March 1977). American musicologist. She took the BA at Vassar College in 1921 and the MusB at the Eastman School of Music in 1925. She completed graduate degrees at Union Theological Seminary (MSM 1932) and Columbia University (MA 1933) and then went to Europe, where she studied under Besseler at the University of Heidelberg. She took the doctorate at Harvard in 1938; she also studied the organ with Widor and harmony with Boulanger at the American Conservatory, Fontainebleau (1926), and the organ with Lynwood Farnam at the Curtis Institute (1928–30). After teaching at the State Normal School, Potsdam, New York (1925–8), Florida State College for Women (1938–9) and Hunter College (1942), she was appointed to the faculty of North Texas State University in 1942, where she taught until her retirement in 1969. She prepared exemplary editions of two of Petrucci's three chanson collections, *Harmonice musices odhecaton A* and *Canti B*. For each of these important Renaissance anthologies she provided a scholarly introduction with extensive lists of sources, concordances and textual and musical analyses. She was also compiler of the first four editions of *Doctoral Dissertations in Musicology* (1952), the comprehensive listing of American theses.

PAULA MORGAN

**Hewitt, James** (*b* ?Dartmoor, 4 June 1770; *d* Boston, 2 Aug 1827). American conductor, composer and publisher of English birth, father of JOHN HILL HEWITT. Apart from family records giving his place and date of birth, the first documented information about him is that he occupied 12 Hyde Street, Bloomsbury, London, during 1791–2. He arrived in New York on 5 September 1792. Although he advertised himself there as having had concert experience in London under 'Haydn, Pleyel, etc.', no evidence of this has been found. He lived in New York until 1811, his longest period of residence at one address being from 1801 to 1810 at 59 Maiden Lane. From 1792 until the end of March 1808, he was conductor of the orchestra at the Park Street Theatre, where his duties included arranging and composing music for many ballad operas and other musical productions. He also operated his own 'musical repository', where he gave lessons and sold musical instruments and music composed by himself and others.

Although his musical activities in Boston began as early as 1805, the family did not move there until 1811. He pursued the same musical interests there as in New York, conducting the orchestra at the Federal Street Theatre, giving lessons, and composing and publishing music; he was also the organist at Trinity Church. In 1816 he returned to New York, taking his two eldest sons with him. Between 1820 and 1825 he travelled often between Boston, New York and several southern cities, particularly Charleston, and Augusta, Georgia. In late 1826, an unsuccessful operation was performed in New York. In early 1827 he was brought back to his family in Boston, where he died. His place of burial is unknown.

Hewitt published at least 639 compositions, mostly by British composers such as William Shield, Michael Kelly and James Hook, though he also issued works by Handel, Haydn and Mozart, and approximately 160 of his own compositions. These include instrumental and vocal compositions and stage works (largely ballad operas), many making use of American patriotic and popular tunes. He also arranged instrumental and vocal works by others and was the author of three pedagogical treatises.

Hewitt was an influential figure in New York during the first decade of the 19th century. His position as conductor of the Park Street Theatre orchestra and leader of the orchestras for many concerts gave him a key role in the city's musical life. In Boston, his activities included business dealings with Gottlieb Graupner. Of James Hewitt's children, his daughter Sophia Henrietta Emma Hewitt (1799–1845) was well known as a concert pianist, his son James Lang Hewitt (1803–53) was a successful music publisher, and another son George Washington Hewitt (1811–93) taught and composed music.

WORKS
(*selective list*)

*all published in New York, n.d., unless otherwise stated*

Stage: *c*20 works, incl. Tammany, or The Indian Chief (ballad op, A. Hatton) (*c*1794), 1 song extant; The Tars from Tripoli (ballad op) (*c*1806–7), partly by Hewitt; 7 pantomines, 2 ballets, lost except 2 ovs.

Inst, pubd in kbd score: 3 pf sonatas, D, C, F (*c*1795–6), no.1 ed. in RRAM, vii (1980), no.3 ed. in RRAM, i (1977); The Battle of Trenton, D (*c*1797), partly by Hewitt, ed. in RRAM, vii (1980); Thema with 30 Variations, D (*c*1803–6), ed. in RRAM, i (1977); marches, waltzes, variations, sonatas, rondos

Other vocal: 84 songs, 1v, pf, many ed. in RRAM, vii (1980); 7 hymns in Harmonia sacra (Boston, 1812)

JOHN W. WAGNER

**Hewitt, John Hill** (*b* New York, 12 July 1801; *d* Baltimore, 7 Oct 1890). American composer and music teacher, son of JAMES HEWITT. After apprenticeships in various trades in New York and Boston, he secured a commission to the military academy at West Point in 1818, but resigned in 1822. He received his only known instruction in music from the academy's bandmaster, Richard Willis. In 1823 Hewitt accompanied his father on a theatrical tour of the Southeast which ended unsuccessfully when a fire destroyed the theatre in Augusta, Georgia. He established himself as a music teacher beginning a long and largely itinerant career as a teacher and journalist spent almost entirely in the Southeast.

Hewitt returned to Boston in 1827. After his father's death later that year, he married Estelle Magnin of New York; the couple had seven children. Their eldest son, Horatio Dawes Hewitt (*b* Baltimore, 9 March 1829; *d* Baltimore, 23 Dec 1894), operated music stores in New Orleans, Baltimore, and possibly St Louis. He composed several dances for the piano and a three-act opera, *The Pearl of Granada*. From 1828 to 1840 John Hill Hewitt was in Baltimore, where he won a poetry competition in which Edgar Allen Poe also took part. After more years of travelling, including a stay in Washington, DC, where he gave music lessons to President Tyler's daughter Alice, Hewitt and his family settled at the Chesapeake Female College near Hampton, Virginia, in 1848. Hewitt remained there until his wife's death in 1859.

In 1863 Hewitt married Mary Alethia Smith. After spending the remainder of the Civil War in Augusta and Savannah, Georgia, and the immediate postwar years at various colleges in Virginia, he moved his family to Baltimore in about 1874.

Hewitt was a prolific writer and composer. He is best remembered as a composer of songs, most of which were published; the most popular, *The Minstrel's Return'd from the War*, was also his first attempt at composition. Hamm (1983) considers *All Quiet along the Potomac Tonight* (1863) – 'powerful, dramatic, antiwar' – to be the best song of Hewitt's output. Hewitt's prose, poetry and plays remain largely unpublished; four volumes of his autobiographical writings are in Emory University Library, Atlanta, and a fifth is in the New York Public Library.

WORKS
(*selective list*)

*texts by Hewitt unless otherwise stated*

MSS in *US-ATu*

Edition: *J.H. Hewitt: the Collected Works*, ed. N.L. Orr and L.W. Bertrand (New York, 1994)

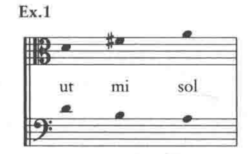
JOHN W. WAGNER

**Hexachord** (from Gk. *hex*: 'six', *chordē*: 'string'). A term denoting a series of six notes ascending stepwise through two whole tones, a semitone and two further whole tones, used as a complement to the eight-note diatonic system (including B♭ and B♮) in the teaching of practical music and music theory, and thus in composition (particularly in the later period), from the Middle Ages to the 17th century. The six notes of a hexachord are named after the first syllables of the lines of the hymn *Ut queant laxis*: *ut*, *re*, *mi*, *fa*, *sol*, *la*.



The concept of the hexachord as a mnemonic device for teaching plainchant melodies was first described by Guido of Arezzo, who expanded the tetrachordal structuring of melodies (deriving from the Greek tonal system) to include one tone either side of the tetrachords on A and D (*Micrologus*). The lowest note of the system was the note below A, indicated by the Greek letter Γ (*gamma*); the hexachordal ranges were from Γ (G) to E and from C to A. In his *Epistola de ignoto cantu* he defined the abstract tonal relationships between different six-note groups, showing how their intervallic similarities meant that they could be defined by the same group of six syllables, introducing for the purpose the syllables from *Ut queant laxis* (*see* THEORY, THEORISTS, fig.2). Thus *mi–fa*, the only semitone in such a group, became a central point of reference, and any note could be defined in relation to those around it by the use of the note-name with the 'solmization' syllable (*vox*) – hence '*d re*', '*a re*' and also '*g re*'. This enabled the singer to conceptualize intervallic relationships within any melody. Such practice was related to the wide-ranging use of the hand for the demonstration of melodic intervals, traditionally attributed to Guido but probably not introduced by him, by which each degree was assigned to one of the joints of the hand and fingers.

Johannes Cotto in his *De Musica* attested the rapid dissemination in other parts of Europe of the practice of learning melodies by syllables; alternative sets of syllables were also used (*see* SOLMIZATION, §I, 1). Johannes suggested that the student use his hand to 'test, correct or compose' a melody, thus expanding its use to encompass all the needs of the music practitioner. Guido's contemporaries continued to work in the tetrachordal system (using the syllables *ut–fa*), although Crocker has argued that the major 6th as discussed by Hermannus Contractus was identical to the hexachord. In any case, the hexachord system developed in the 11th century from the traditional tetrachordal structure.

Melodies that exceeded the range of a 6th required an expansion to another hexachord by means of mutation. The hexachord on C became the point of reference and was named *hexachordum naturale*. A progression by semitone above A was marked by the 'soft' or rounded letter B (♭), and the ensuing hexachord on F *ut*, with A–B♭ solmized *mi–fa*, was named the *hexachordum molle*. A progression by a tone above A required the 'hard' or square B (♮), with B♮–C solmized *mi–fa*, using the *hexachordum durum*. The entire gamut was covered by seven hexachords, with each note named by the solmization syllables of the hexachord or hexachords to which it belonged (for a table of the hexachords *see* SOLMIZATION, §I, table 2). This tri-hexachordal system was fully described in 13th-century treatises. Engelbert of Admont (*De musica*) delineated both the process of stepwise mutations beyond *la* as well as the solmization of leaps by 7ths (*GerbertS*, ii, 324–5), and there are also descriptions by Elias Salomo and Hieronymus de Moravia.

In the 14th century the hexachordal system was expanded in response to an increased use of signed accidentals (the ♮ and ♯ signs are later derivations of the square B sign); from the beginning of the 14th century music using such notes was called MUSICA FICTA. Petrus frater dictus Palma ociosa stated in his *Compendium de discantu mensurabili* (1336) that the introduction of a *ficta* degree involves a mutation into a *ficta* hexachord (ex.1). The anonymous author of the Berkeley treatise

Ex.1

(Ellsworth anonymi, *US-BEm* 744; *c*1375) expanded the gamut to *F* below Γ, thus forming an eighth hexachord which is not 'in usu' but 'in arte': that is, not part of the Greek system but artificially formed. In this way the low *B*♭ (*gravis*) became a *recta* degree. The Berkeley treatise

also introduced the term *coniuncta* for the note that is common to two conjunct hexachords, and this term also came to delineate the expansion of the hexachordal system, whereby, for instance, B♭ *fa* of the *hexachordum molle* could become *ut-fa* of a new conjunct hexachord, leading to a new note *fa* above D *mi*, which we would today call E♭. Furthermore, the Berkeley treatise discusses 'disjunct' movement from one hexachord to another, 'without whatever mutation of syllables might be possible there' (Ellsworth, pp.48–9).

Although Prosdocimus de Beldemandis (early 15th century) discussed notes of *musica ficta* as separate degrees with no reference to hexachords (Herlinger), the basic tri-hexachord system remained as standard in the 15th century, with dependence on the sign ♭ (either as a staff signature or before a particular note or passage) to determine whether the *hexachordum molle* should be used (otherwise the *hexachordum naturale* and *hexachordum durum* were assumed), a practice dating from at least the mid-13th century. On the other hand, a ♯ or ♮ sign could be used without a change of hexachord, as described in a number of sources from the 14th to 16th centuries – a note prefixed with either of these signs was never solmized as *mi*, but may be either *ut*, *fa* or *sol* temporarily raised by a semitone. This system was in use well into the 16th century, but there were signs of simplification in the second half of the 15th century when it became acceptable for the sign ♭ to be solmized as *fa* without a change of hexachord being necessary. Further simplifications led ultimately to systems of SOLMIZATION still in use today.

From the end of the 15th century the hexachord was used as the thematic basis for compositions, the mass and the instrumental fantasia being the two forms for which the hexachord was most frequently used. The earliest hexachord mass is Brumel's *Missa 'Ut re mi fa sol la'* (1503); later masses with the same title were composed by Morales and Palestrina, among others. The hexachordal instrumental fantasia was a slightly later development, one of the most extreme examples being the work *Ut re mi fa sol la* by Alfonso Ferrabosco (ii), based on a series of hexachords, ascending in the first section and descending in the second, that are transposed on each repetition by a semitone. This composition was one in a line of similar works by composers from Bull to Sweelinck; Frescobaldi also composed a number of *Capricci* on a hexachordal theme (*see also* INGANNO (i)).

The hexachord retained its status even when its relevance was increasingly questioned. Mattheson's request to dispense with both hexachords and modes (*Das neu-eröffnete Orchestre*, 1713) was angrily challenged by Fux, leading to Mattheson's mocking riposte of 1717, *Das beschützte Orchestre* (J. Lester, *CMc*, xxiv, 1977, pp.37–62).

For the use of the term hexachord in connection with twelve-note music, *see* SERIALISM and TWELVE-NOTE COMPOSITION.

**Hexatonic.** A term applied to any music, mode or scale based on a system of six different pitches to the octave. It has been adopted by Richard Cohn to refer (by analogy with OCTATONIC) to the six-note scale or collection consisting of alternating minor 3rds and semitones. The scale has only four distinct transpositions, and is therefore a 'mode of limited transposition' under Messiaen's definition, although it was not documented by him. Schuster-Craig traces examples of the collection (which he terms 'Mode Ib') in music by Liszt, Rimsky-Korsakov and Bartók.

CHARLES WILSON

**Hexenscheit** (Swiss-Ger.). A strummed ZITHER of Germany and the Alpine areas.

**He Xuntian** (*b* Mianyong, Sichuan, 15 May 1953). Chinese composer. He studied with Gao Weijie at the Sichuan Conservatory in Chengdu (1977–82) and began to teach composition at the Shanghai Conservatory in 1992. His best-known work is the evocative *Tianlai* (1986) for seven performers and over 30 instruments designed by the composer. It is a daring experiment in sound colour and spatial contrasts, and had a major impact on other Chinese experimental composers of He's generation. *Tianlai* was followed by *Meng si ze* (1987), a haunting concerto for erhu and orchestra. The sound of the *erhu* is altered and given an eerie quality by attaching pieces of twisted iron to the bridge, analogous to the iron spirals which certain folk musicians use. His works have been performed widely in Asia. Also a writer of pop songs, his album *Sister-Drum* (1994) brought him popular success in China.

FRANK KOUWENHOVEN

**Hey.** A form of dance related to the *carole* and *farandole*. The word may derive from the French *haie* or German *Heide*; the form 'heydeguise' might be rendered 'hedge-wise', signifying a weaving action similar to the laying of a hedge. The dancers follow serpentine passages in single file, concluding in a circle. Descriptive and pictorial references to the *hey* are found from the 15th to the 18th centuries. The form continued in country dances and contredanses and still persists in American 'set-running', in the northern sword-dance, in the 'grand chain' of quadrilles and reels and, as 'the heys', in the horn-dance of Abbots Bromley in Staffordshire.

No particular rhythm or step is asssociated with the *hey*, but when incorporated in figured dances such as the branle or the Italian *bassadanza*, it is adapted to their structure, gesture and step; by turning the file on itself and by the interweaving of dancers facing in opposite directions, innumerable variations of movement are achieved. Three is the smallest number of dancers required. No particular melody is identified with the *hey*, but some affinity has been perceived between the tune 'Shepherd's Hey' and 'An Aliké', a call employed by shepherds in Brittany.

MARGARET DEAN-SMITH/R

**Hey, Julius** (*b* Irmelshausen, 29 April 1832; *d* Munich, 22 April 1909). German singing teacher and writer. He studied first at the Munich Academy of Art, then changed to music and studied harmony and counterpoint with Franz Lachner and singing with Friedrich Schmitt. In 1867 he became the first singing teacher, under Hans von Bülow's direction, at the Königliche Musikschule in Munich, as part of a plan originated by Wagner and King Ludwig II to reform the instruction of singing in Munich. Bülow resigned two years later, but Hey remained until after Wagner's death. He coached a number of the singers for the first complete *Ring* cycle at Bayreuth in 1876, in particular the tenor Georg Unger, whom Wagner had chosen to sing Siegfried, and who worked with Hey in Munich for a year before the performances.

In his book on Wagner, Hey gave a detailed account of the rehearsals at Bayreuth during the summers of 1875 and 1876. According to Ernest Newman, this book 'should be read by all who want to understand what Wagner required of his singers and actors'. Hey's chief publication, *Deutscher Gesangunterricht*, is a comprehensive and systematic four-volume manual of singing instruction, whose method is based on the careful and correct production of speech elements. It was later condensed in a single volume, *Der kleine Hey*, which has remained in use as the standard textbook for German vocal training. Hey's compositions include songs and duets.

ELIZABETH FORBES

**Heyborne, Ferdinando.** *See* RICHARDSON, FERDINAND.

**Heyde, Herbert** (*b* St Michaelis, Saxony, 27 April 1940). German organologist. He played the cornett with the Capella Lipsiensis and studied musicology, indology and ethnology at the University of Leipzig with Besseler, H.C. Wolff, Eva Lips and Johannes Mehlig, 1959–64; thereafter he was on the staff of the Musikinstrumenten-Museum of

the university until 1973. After working as a freelance scholar, he moved to the USA and in 1992 was employed at the Streitwieser Foundation and the Shrine to Music Museum; from 1994 he took up a post at the Metropolitan Museum of Art.

Heyde's work is distinguished by an exemplary thoroughness in a wide range of fields associated with organology. His catalogues of wind instruments in the Leipzig collection have set a new standard with their detailed analysis, photographs and line drawings, which have often helped solve questions of provenance of similar instruments elsewhere. In vols.3 and 5 of his *Katalog* (1980, 1982) he also developed useful parameters for measuring and describing the bell flares of brass instruments. His book on instrument making (1986), which examines the proportional construction and dimensions of pre-Industrial Revolution instruments based on wildly varying local systems of measurement, is a major contribution towards a deeper understanding of their design. His books on valved brass instruments (1987) and on instrument making in Prussia (1994) have become standard works. In 1991 he received the Curt Sachs Award of the American Musical Instrument Society.

EDWARD H. TARR

**Heyden.** *See* HAIDEN family.

**Heyer, (Friedrich) Wilhelm (Ferdinand)** (*b* Cologne, 30 March 1849; *d* Cologne, 20 March 1913). German music patron. The son of a teacher, he entered the paper business and in 1885 founded the paper manufacturing firm of Poensgen & Heyer. As an enthusiastic amateur he played a prominent part in Cologne musical life, serving on the boards of the conservatory and the Musikalische Gesellschaft and assisting young musicians at the start of their careers. He began to collect musical instruments in about 1900. In 1905 he purchased the private collection of the Leipzig collector Paul de Wit; he also received keyboard instruments from the firm of Ibach in Barmen, and acquired the Florentine collection of Alessandro Kraus. In 1906 Heyer established a Musikhistorisches Museum in Cologne, which eventually contained 2600 instruments, with a workshop for their restoration; its library contained 1700 autographs of some 700 composers, more than 20,000 letters and 3700 portraits. Ernst Praetorius was curator of the museum from 1906 to 1909; his place was taken by Georg Kinsky, who catalogued the largest part of the collection, and also took part in concerts at the museum as a keyboard player. The museum was officially opened on 20 September 1913, after Heyer's death, in a newly built three-storey building in Worringer Strasse. The heirs, however, were not in the position to maintain the museum for very long and in 1926 a large part of the collection, mainly instruments, was acquired by the musicological seminar of Leipzig University. This was opened to the public in the Grassi-Museum building in May 1929. It suffered serious damage during World War II but was renovated after 1945 and reopened to the public in 1954. The rest of the Heyer collection was sold by auction. At the end of the 20th century five of Heyer's descendants were still directing the 'Römerturm Feinstpapier Poensgen & Heyer' company in Cologne-Frechen.

OTTO E. ALBRECHT/ROBERT V. ZAHN

**Heylanus, Petrus.** *See* HAILLAND, PETRUS.

**Heymann, Werner Richard** (*b* Königsberg [now Kaliningrad], 14 Feb 1896; *d* Munich, 30 May 1961). German composer and pianist. From the age of 13 he studied theory and counterpoint with the conductor and composer Paul Scheinpflug, who gave the première of his first major composition, *Frühlings-Notturno*, in Berlin in 1917. The following year the *Rhapsodische Symphonie* was given its première by the Vienna PO under Felix Weingartner.

After World War I he wrote stage music for Berlin, where he became acquainted with the leading exponents of Weimar cabaret and, along with Friedrich Hollaender and Mischa Spoliansky, is credited with creating the classic Weimar cabaret chanson. He wrote for the cabaret Schall und Rauch, and was musical director for the Wilde Bühne.

From 1925 onwards Heymann became involved in films and, with the advent of sound pictures, joined with lyricist Robert Gilbert to write extremely successful songs epitomizing the thriving culture of the pre-Nazi German film industry, with evergreens such as *Ein Freund, ein guter Freund*, *Leibling mein Herz lässt Dich grüssen* and *Das gibt's nur einmal*. In 1933 Heymann emigrated to France, composing musical comedies for Sacha Guitry before moving to Hollywood, where he wrote music for films such as *Ninotchka*, *The Shop around the Corner*, *One Million Years BC*, *Knickerbocker Holiday* (with Kurt Weill) and *To Be or Not To Be*. He returned to Europe in 1951, continuing his career as a prolific composer of film music and musical comedies.

THOMAS L. GAYDA

**Heyn, Volker** (*b* Karlsruhe, 13 Dec 1938). German composer. From 1957 to 1960 he studied singing with Walter Neugebauer in Karlsruhe. In 1960 he went to Australia, where he studied the guitar with Antonio Losada (Sydney) and music theory with Don Andrews at the Sydney Conservatory (1966–70). He returned to Karlsruhe in 1971 to continue his guitar studies at the Staatliche Musikhochschule. He also studied composition with Eugen Werner Velte and became a member of Velte's Gruppe für Kreative Musik. As a freelance composer Heyn has lectured at the Darmstadt Summer School (1984, 1986) and given concerts and lectures in Australia and Japan (1987). He was awarded fellowships by the Heinrich-Strobel-Stiftung of South-West German Radio, Baden-Baden in 1983 and 1995, and in 1988 received a Rolf Liebermann opera fellowship.

Heyn's music is unconventional and uncompromisingly experimental. He concentrates on the sound-potential of traditional instruments, greatly extending their timbral capacities through unusual playing techniques. The degree of alienation from traditional acoustic timbres can be so extreme that listeners are convinced that they are hearing electronically generated sound or even the noise of machinery. Since the mid-1990s Heyn's aesthetic goal has been to discover 'poetry in noise' by direct transformation of ambient sounds. His scores demand creative input from the players and sometimes employ graphic notation or words.

ERIKA SCHALLER

**Heyne, Gilles.** *See* HAYNE, GILLES.

**Heyns, Cornelius** (*fl* 1447–65; *d* 1485). South Netherlandish composer and cleric. He was a singer at St Donatian, Bruges, from 25 October 1447. He was appointed

*cappellanus* succentor, with Johannes Boubert, from 1452 to 1454; he served again as succentor from 1462 to 1465. All other statements about his life – for instance, that he served at the Burgundian court or that he might be identified with either HAYNE VAN GHIZEGHEM or the Cornelio di Lorenzo 'd'Anversa' (=?Cornelio de Liloo) who was a singer in both Ferrara and Florence during the 1480s – must be regarded as conjecture. (It may be that Cornelio di Lorenzo was also associated with St Donatian, since he was sent by Duke Ercole I of Ferrara to Bruges in October 1487 with the request that Obrecht be allowed to come to Ferrara.) Perhaps, however, Heyns may be identified with the Cornelius who served as a singer in the chapel of S Giovanni, Florence, in 1449 and who seems to have gone back to the Low Countries in July of that year. He should not be identified with the Cistercian monk Cornelius Heyns, who copied the Seneca manuscript in 1477.

The only work attributed to him is the four-voice *Missa 'Pour quoy'* (in *I-Rvat* C.S.51). However, the same work appears with the title *Missa 'Pour quelque paine'* ascribed to Ockeghem in *B-Br* 5557 (ed. D. Plamenac: *Johannes Ockeghem: Collected Works*, ii, 2/1966, no.16). It is anonymous in a third source (*I-La*). The discrepancy between the two titles is partly resolved by the cantus firmus, which is based on the tenor of an anonymous three-voice chanson in the Seville Chansonnier (*F-Pn* n.a.fr.4379) with the text 'Pour quelque paine'. It is possible that the title used in the Cappella Sistina manuscript was a substitute for the Brussels text. This theory is supported by the existence of a bitextual chanson by Alexander Agricola which has the incipit 'Pour quoy tant' in the discantus and 'Pour quel paine' and 'Pour ce quel paine' in the other voices. In spite of the ambiguous title, Heyns is the more probable composer of the mass, for the attribution to Ockeghem in the Brussels manuscript seems to be a 19th-century alteration of 'c. heyns' to 'ockegan' (*StrohmM*, 131). The style of musical writing demonstrates that Heyns was a composer of considerable skill. The cantus firmus undergoes certain canonic transformations such as inversion and retrograde motion (in the Sanctus and first Agnus Dei respectively). The third Agnus Dei is the only section of the mass to present the cantus firmus tenor without augmented note values; it is also possible to trace the discantus of the chanson in the discantus of this section, particularly towards each cadence. The mass is accordingly an important work in the history of parody masses.

ALLAN W. ATLAS/JANE ALDEN

**Heyther** [Heather], **William** (*b* Harmondsworth, *c*1563; *d* July 1627). English lay clerk. He sang in the choir of Westminster Abbey from 1586 to 1615 and was appointed a Gentleman of the Chapel Royal on 27 March 1615. He was a close friend of William Camden (1551–1623), headmaster of Westminster School, and in May 1622 represented him at the foundation of a chair of history (now ancient history) at Oxford University and was rewarded with the degrees of BMus and DMus by acclamation. As Camden's executor he received in 1623 a warrant to preserve the king's game within the manor of Bexley. In 1627 he gave an endowment to Oxford to provide instruction in music. A *choragus* was to conduct weekly practices in the music school, while a lecturer was to discourse 'on the theory of the art' termly (this lapsed almost immediately). Heyther's benefaction also included instruments, music and portraits. He also bequeathed money to Eton College and the Gentlemen of the Chapel Royal. He was buried in Westminster Abbey. The younger John Hilton dedicated to him his *Ayres or Fa La's for Three Voyces* (1627). Tomkins's six-part madrigal *Music divine* (*Songs*, London, 1622) is inscribed 'To Mr Doctor Heather'. The Oxford chair of music is named after him.

JACK WESTRUP/PENELOPE GOUK

**Heywood, John** (*b c*1497; *d* after 1577). English writer, musician and composer. According to Anthony Wood, he spent some time at Broadgate Hall, Oxford, and later knew Thomas More. He is first mentioned in the court records of Michaelmas 1519, when he received a quarterly fee of £5 for unspecified services; in the following year he received the same amount and is listed as a singer. However, he may have begun his court service somewhat earlier, for in 1520 he was granted an annuity 'in consideracione boni et fidelis servicii'. At the request of the king he was admitted to the freedom of the City of London in 1523, and the next year made a member of the Mercer's Company. In a list compiled in Michaelmas 1525 he is described as 'player of the virginals' with a wage of £25 a year; two years later he appears as *dapifer camerae* and holder of a pension of £10 a year for life.

A staunch Catholic, he was gaoled in 1543, apparently for his part in the plot to overthrow Cranmer; condemned to death the following year for denying the king's supremacy he recanted on 6 July 1544, was pardoned, and had his lands and pension restored in 1545. During these troubled years the composer Thomas Whythorne was Heywood's 'servant and skoller'.

Heywood enjoyed the favour of both Edward VI and Mary I: his pension was increased from £10 to £40 (and later to £50), and he wrote or devised plays for the Children of the Chapel and of St Paul's to present at court. Elizabeth's religious policies drove him into exile in July 1564, and he appears to have settled in Mechelen. Near the end of his life religious troubles again forced him to move, first to Antwerp (1576), then to Leuven (1578).

Heywood is best known as a playwright. The texts of three of his plays call for a little music, but neither titles nor words to the songs are included in the printed play texts. The first stanza of one song ascribed to Heywood, *What hart can thincke or tounge express*, survives in an arrangement for voice with lute accompaniment in *GB-Lbl* Add.4900; the six stanzas of the poem are in Add.15233.

JOHN M. WARD

**Heyworth, Peter** (*b* New York, 3 June 1921; *d* Athens, 2 Oct 1991). English critic. Educated at Charterhouse and Balliol College, Oxford, Heyworth also spent six months at the University of Göttingen before joining the *Times Educational Supplement*. Here he was music critic from 1952 until in 1955 he joined *The Observer*, where his vivid championship of 20th-century European composers helped to pave a way to their wider acceptance when there was still a resistance to them in official English musical life. 20th-century central European music and musical life remained his principal area of interest, and he made a special study of music in Germany in the 1920s and 30s. This led to his major work, a study of Otto Klemperer which is exceptional among lives of conductors in that it brings together sensitive, thoroughly researched biography, discussion of Klemperer's art as he developed from pioneer of new music to one of the last great conductors in the 19th-century German tradition, and not least examination of his position as a Jew and musician in a tormenting and turbulent European political scene. He was also a regular contributor to the *New York Times* for European musical events.

JOHN WARRACK

**He Zhanhao** (*b* Hejiashan village, Zhuji, Zhejiang province, 29 Aug 1933). Chinese composer. A member of the accompanying ensemble of a traditional Zhejiang *yueju* opera troupe as a teenager, he learnt to imitate *erhu* technique on the violin. In 1957 he went to the Shanghai Conservatory, studying composition, with Ding Shande, and the violin. In 1958 he set up a team to research the employment of folk techniques on the violin, and this project fed into his composition, with his colleague Chen Gang, of the violin concerto *Liang Shanbo yu Zhu Yingtai* (1959). Graduating in 1964, he joined the composition department of the Shanghai Conservatory. His music embraces a wide range of historical and traditional themes from both Chinese and Western sources. Combining Western with Chinese instruments in many innovative ways, he has also written for separate ensembles of each. He aims for lyricism and expressive appeal in his music.

WORKS

JONATHAN P.J. STOCK

**Hibbard, William (Alden)** (*b* Newton, MA, 8 Aug 1939; *d* San Francisco, 5 April 1989). American composer. He studied at the New England Conservatory (BM 1961, MM 1963) and the University of Iowa (PhD 1967); his composition teachers included Donald Martino and Richard Hervig. In 1966 he became a member of the composition and theory faculty at the University of Iowa and music director of the university's Center for New Music, which he helped to found; from 1969 to 1976 he also served as director of the Center for New Performing Arts. Hibbard's compositions wed a rigorous exploration of the possibilities of serialism to an increasing fascination with unusual sonorities and complex cross-rhythms. Once having determined a medium, he generated a prodigious quantity of episodes during which the larger aspects of the work took shape. In 1975, while at work on the *P/M Variations* for two double basses, he created a row based on a trichord comprising a perfect 4th and a major 2nd, which occupied his creative imagination throughout the rest of his productive life. In his notes for a 1988 performance of his last composition, *Handwork* (1986) for piano, he characterized the row thus: 'To my ear the overtone series and sympathetic resonances created by these intervals produce a vibrant … sonority, sharply etched and well-defined, seductive without being voluptuous'.

CAROL J. OJA/D. MARTIN JENNI

**Hibeh musical papyrus.** A papyrus of the period 280–240 BCE, discovered at Hibeh in Egypt at the beginning of the 20th century. It contains an anonymous diatribe against those who claim to be harmonicists (*harmonikoi*) but make random critical comparisons and handle theory haphazardly. They are said to believe that 'different types of music' produce different ethical states, including

justness. A brief and erratic rebuttal deals exclusively with the genera; it includes the assertion that the enharmonic genus was used throughout performances of tragedy. The self-styled experts are also accused of maintaining that certain types of music (*melē*) have associations with laurel or with ivy, and even that (?)mimesis in music is obviously excellent. The text breaks off with a phrase about satyrs dancing to aulos accompaniment.

Grenfell and Hunt, following the suggestion of Friedrich Blass, conjectured that Hippias of Elis (later 5th century BCE) might be the author, but Crönert and others argued against this attribution. Stylistic criteria suggest that the author was a contemporary of Isocrates (and perhaps a follower) and, taken with other evidence, that the text dates from around 390 BCE. Alcidamus has been suggested (by Brancacci, followed by West). In any case, the general position attacked is that of the school of DAMON, but the real targets are enthusiasts who went to absurd extremes or were thought to have done so. The theory of ethos ridiculed here is not in every respect Platonic, as the mention of justness and the failure to consider modality show. The doctrine of mimetic excellence reappeared in Plato's late thought as the criterion of 'rightness' in music. The arguments are unconvincing and narrowly empirical throughout. As music criticism, the Hibeh discourse is valuable as a vivid comment on the musical scene in Plato's day.

WARREN ANDERSON/THOMAS J. MATHIESEN

**Hibernian Catch Club.** Musical society founded in Dublin in about 1680, which claims to be the oldest surviving musical society in Europe. *See* DUBLIN, §6.

**Hibernicon.** A bass brasswind instrument developed from the bass-horn by the Rev. Joseph Rogerson Cotter, vicar of Castlemagner, Co. Cork, and patented by him in 1823. The patent, in which the name hibernicon does not occur, covers two sizes, a bass and a tenor; only the former is known to have been made.

The sole surviving hibernicon, in the Bate Collection, Oxford, is of brass and has a sounding length of 5 metres, with a bore that increases steadily from 1·3 cm at the mouthpiece receiver to 6cm at the root of the bell, whence it flares to 24·5 cm (see illustration). It has eight closed-standing keys. It stands in 16′ C (C′); however, it appears not to have been intended primarily to be a contrabass using the pedal notes (as do the serpent, bass-horn and ophicleide), but to play in the bass register from round C upwards. Its inventor claimed it was the sole instrument 'with only six holes capable of giving the whole chromatic scale for two octaves or more', not strictly true since the keyed bugle does so similarly.

Its use was brief. The Edinburgh Wind Instrument Society sold their bass hibernicon in 1840. The only known instance of its use in a major festival orchestra was at the 1835 York Festival. Reporting for the *Allgemeine musikalische Zeitung*, Pellisov wrote:

*Hibernicon by Thomas Key, 1823 (Bate Collection of Historical Instruments, Faculty of Music, Oxford)*

... and another contrabass trumpet called 'Hibernicon' which, like a Goliath, towered heavenwards above the rest of the ophicleides: it was supported on a folding tripod and played by a seated performer. Such is the power of this Hibernicon that the trumpets at the walls of Jericho, nay the last trump itself would be as child's play to it.

*See also* BASS-HORN.

REGINALD MORLEY-PEGGE/ARNOLD MYERS

**Hichiriki.** Japanese oboe. It has a bamboo body with a reverse conical bore tapering from roughly 15 mm to 10 mm in diameter and is about 18 cm long; the reed adds another 4 cm to the length. There are seven finger-holes on the front and two thumb-holes on the back; the thumb-holes are between the first and second and the fourth and fifth finger-holes from the top. Its range is *g'* to *a"*. The body is wrapped with bark and string and then lacquered inside and out, like the *ryūteki* flute. To form the broad reed, which is played using the lips to control the sound, one end of a length of reed stalk is flattened and shaved to a bevel (as for the European oboe); a cane regulating-ring is fitted over the reed to adjust tone colour and volume. 'Hichiriki' is the Japanized pronunciation of the ideograms for the Chinese *bili*, the immediate ancestor of the modern instrument, which would have entered Japan by the 8th century. The *hichiriki* is used in *gagaku* (court music), where it shares the main melody with the *ryūteki*, and also in native court vocal genres. A softer reed is used for *kagura* songs, so as not to overwhelm the singers.

The *hichiriki* is considered very difficult to play. The melody is embroidered with a continuous stream of subtle ornamentation and pitch gliding, effected both by fingering techniques and by embouchure and collectively called *embai*. The flexibility of pitches, made available by the large reed, makes it difficult to describe the instrument's 'basic scale', and the narrow range does result in some surprising melodic leaps, in contrast to the *ryūteki*.

An earlier *dai-hichiriki* ('large *hichiriki*'), known from manuscripts, was reconstructed in 1878 and briefly used in the court orchestra, tuned a 4th lower than the *hichiriki* itself. The *hichiriki* is similar to the Chinese GUAN and the Korean P'IRI.

For illustration *see* JAPAN, fig.3

**Hickford's Room.** An early London concert room, used from about 1697. *See* LONDON, §V, 2.

**Hickmann, Ellen** (*b* Flensburg, 28 July 1934). German musicologist. She completed a degree in music education at the Hamburg Hochschule für Musik in 1959 and studied musicology at Hamburg, with anthropology and early history as secondary subjects. In 1958 she married the musicologist Hans Hickmann, assisting his research and teaching until his early death in 1968. She took the doctorate in 1969 at Hamburg University with a work on the classification of musical instruments in the Middle Ages and from 1970 to 1974 worked as a producer for Deutsche Grammophon, directing the repertory office and the production department. She was appointed professor of musicology at the Hochschule für Musik in Hannover in 1976. She was chairperson of the section for organology of the Gesellschaft für Musikforschung (1981–7; from 1996) and chairperson of the study group on music archaeology for ICTM (from 1981). In addition to her work on instruments, she has contributed significantly to scholarship on music archaeology in Latin America, Egypt and early European society; she has also written on the sociology of music.

RÜDIGER SCHUMACHER

**Hickmann, Hans (Robert Hermann)** (*b* Rosslau bei Dessau, 19 May 1908; *d* Blandford Forum, Dorset, 4 Sept 1968). German musicologist. After schooling in Halle, he showed student ability there as a pianist, organist and conductor. His musicological training started in Halle and continued at the University of Berlin with Blume, Sachs, Schering, Schünemann, Hornbostel and Wolf. He graduated in 1934 with a thesis on the portative organ. His first contact with the Middle East was in 1932, when he visited the Siwa oasis for the Berlin Phonogrammarchiv; the following year he settled in Cairo and worked as organist, conductor, teacher and broadcaster. He became secretary of the Egyptian section of the ISCM, and composed music for films, chorus, chamber groups, voice and piano.

As a scholar he was interested in demonstrating the connection between Egyptian musical traditions and those of Europe and Asia. He catalogued the musical instruments in the Cairo Museum and wrote articles on many aspects of ancient Egyptian music. An accurate observer and meticulous recorder of facts, he occasionally produced speculative theories on the nature of Egyptian music.

In 1957 Hickmann became director of the German Cultural Institute in Cairo, but later that year returned to Germany and was appointed professor of ethnomusicology at Hamburg. He succeeded Fred Hamel in 1958 as director of the Archiv Produktion section in the Deutsche Grammophon Gesellschaft, supervising the growth of an imaginative catalogue. From 1959 he was the first president of the Deutsche Gesellschaft für Musik des Orients. Among his honours were the Palmes Académiques of the Académie Française and the Bundesverdienstkreuz.

ROBERT ANDERSON

**Hickox, Richard (Sidney)** (*b* Stokenchurch, Bucks., 5 March 1948). English conductor. He studied at the RAM and gained an organ scholarship to Queen's College, Cambridge. His professional conducting début was at St John's, Smith Square, in 1971, and in that year he formed both the City of London Sinfonia and the Richard Hickox Singers. Initially specializing in Baroque music, Hickox soon gained recognition as a gifted choral conductor, and from 1972 to 1982 he was organist and Master of Music at St Margaret's, Westminster. He was appointed director of London Symphony Chorus in 1976 and the Bradford Festival Choral Society in 1978. During the 1970s he became involved in several regional festivals as artistic director, and became director of the Spitalfields Festival, London, in 1974. He began to tour abroad, and was principal guest conductor of the Netherlands Radio PO from 1980 to 1985. He spent eight years (1982–90) as artistic director of the Northern Sinfonia, Newcastle upon Tyne, and was then named conductor emeritus of the orchestra. He was associate conductor of the San Diego SO, 1983–4, and was appointed associate conductor of

the LSO in 1985. In 1990 Hickox formed the period-instrument orchestra Collegium Musicum 90 with the violinist Simon Standage. He has conducted much opera in Britain and abroad, making his ENO début in 1979 and his Covent Garden début (with *Die Zauberflöte*) in 1985; the same year he conducted Handel's *Alcina* at Spitalfields and *Orlando* for Scottish Opera. He was much praised for his restorative work on Walton's *Troilus and Cressida* for Opera North in 1995, which he then added to a tally of over 100 recordings. These include the Elgar oratorios, Haydn's late masses, cycles of Beethoven and Vaughan Williams symphonies, works by Delius and Grainger, and Britten's *Peter Grimes*, *The Rape of Lucretia* and *A Midsummer Night's Dream*. A musically perceptive and notably versatile conductor, Hickox enjoys a deservedly high reputation across a wide-ranging repertory.

NOËL GOODWIN

**Hickson, William Edward** (*b* London, 7 Jan 1803; *d* Fairseat, Kent, 22 March 1870). English writer on music. The heir of a wealthy boot manufacturer, but himself a political radical, in early manhood Hickson began to devote his leisure to social reform. At a time when the menace of Chartism was growing, Hickson was among the first to argue the folly of attempting 'to train any class of men to habits of such unwearied industry that they shall be content to toil on throughout their lives without a moment's relaxation, or any attempt to relieve the monotony of their existence by some pleasurable excitement'. Hickson therefore proposed the teaching of music in schools in order to provide for the children of the poorer classes a lifelong source of enjoyment capable of offering them in later life an alternative to 'vicious and debasing pursuits'.

Hickson was a pioneer in the revival of school music. In a substantial preface to *The Singing Master* (1836) he presented at length his arguments for music as an educational force in its own right, comparing the situation then obtaining in English schools unfavourably with that in Germany and Prussia. The main body of the book contained a collection of 64 secular airs which Hickson had provided with new words 'free from a tendency to corrupt the heart or pervert the understanding'. Those songs were soon to enjoy great popularity throughout the English-speaking world, setting the pattern of the 'Moral Songs' which were to dominate school music lessons for the remainder of the 19th century.

Hickson pursued his campaign for school music with great energy, lecturing regularly, holding demonstration lessons, even addressing the Royal Society on the topic. His successful efforts were to earn him the title of Father of School Music in England – a tribute paid by John Curwen in 1858, by which time Hickson had become an established public figure. He had retired from business in 1840 to devote himself to philanthropic pursuits, purchasing the *Westminster Review*, a major reform journal which he edited from 1840 until 1852 to make his views and activities more widely known.

BERNARR RAINBOW

**Hidalgo, Elvira de** (*b* Aragon, 27 Dec 1892; *d* Milan, 21 Jan 1980). Spanish soprano. She studied in Barcelona and Milan, making her début in 1908 at the San Carlo as Rosina, the role of her Metropolitan début in 1910, when she also sang Amina. She appeared at La Scala, Rome, Buenos Aires and Covent Garden, where she sang Gilda in 1924 with the British National Opera Company. Returning to the Metropolitan (1924–6), she sang Gilda and Lucia. At San Francisco (1925) she sang Rosina, Violetta and Martha, then toured the USA in *Il barbiere* with Chaliapin. Her repertory included Elvira (*I puritani*), Linda di Chamounix and Marguerite de Valois (*Les Huguenots*). She retired in 1932, then taught in Athens (where her pupils included Maria Callas), Ankara and Milan. Her recordings show her bright, agile soprano voice to advantage.

ALAN BLYTH

**Hidalgo, Gutierre Fernández.** *See* FERNÁNDEZ, GUTIERRE.

**Hidalgo, Juan** (i) (*b* Madrid, 28 Sept 1614; *d* Madrid, 31 March 1685). Spanish composer and harpist. In 1630 or 1631 he was received into the Spanish royal chapel as harpist responsible for the accompaniment of both sacred and secular music. In about 1645 he began to serve as chief composer of secular songs, theatrical songs and villancicos, and as leader of the court's chamber musicians. Prolific, cooperative, dedicated and generally admired in his employment, he dominated secular and theatrical music at court until his death and was probably the most influential composer of his time in the Hispanic world. He was known primarily as a court composer of chamber songs and theatre music, but his surviving output includes a large number of sacred villancicos and some liturgical music. In 1655 he received 200 ducats from the archbishop of Seville, perhaps for fulfilling a commission.

Although a brief autobiographical memorandum indicates that Hidalgo's work as a theatre composer began in the 1640s, this essential focus of his activity cannot be otherwise confirmed until the 1650s. He wrote music for at least nine *autos sacramentales* (allegorical religious plays performed in public for Corpus Christi); his work for the court stages included songs for 16 spoken plays (*comedias*), partly-sung zarzuelas and semi-operas, and two exceptional fully sung operas. Among the surviving songs for *comedias*, the lament for the nymph Canente from the pastoral *Pico y Canente* (L. de Ulloa, 1656) is a striking example of his originality and distinctive approach to text expression. He probably collaborated with the dramatist Pedro Calderón de la Barca on productions of the first zarzuelas, beginning with *El laurel de Apolo* (1657), and his songs for a later zarzuela, *Los celos hacen*

*estrellas* (1672) to a text by Juan Vélez de Guevara, survive.

Hidalgo's most extensive and innovative works were the mythological semi-operas and the two operas he created with Calderón. Of the semi-operas, some of his music for Calderón's *La estatua de Prometeo* (*c*1670–75) is available, and the entire extant vocal score for Calderón's monumental *Fortunas de Andrómeda y Perseo* (1653), with its recitatives in triple metre, has been attributed to Hidalgo. The operas *La púrpura de la rosa* and *Celos aun del aire matan* were composed to commemorate the Peace of the Pyrénées (1659) and the Spanish-French royal wedding of 1660. Several versions of Calderón's librettos for the operas survive, but Hidalgo's score to the one-act *La púrpura de la rosa* (1659) is lost. A complete score for the three-act *Celos aun del aire matan* (?1660) survives. Although it is often stated that Hidalgo modelled his theatrical style on that of Italian opera, this contention is not supported by an informed analysis of his works. During his years as court composer the strongest Italian influence upon the Spanish court plays is found in the visual effects created by imported stage designers. In Hidalgo's music the tradition of Iberian secular song dominates, although he followed the non-technical advice of the Italian stage designer Baccio di Bianco and adapted recitative monologue for the weighty dialogues and speeches of the gods in the court semi-operas (beginning about 1652) and for specially significant moments in *Celos aun del aire matan*. This work survives as the earliest extant complete Spanish opera, exceptional in the context of 17th-century Spanish theatrical music only because it is wholly sung. Hidalgo approached this extraordinary commission by exploiting familiar Spanish musical and theatrical conventions developed for the semi-operas. The basic texture is of strophic airs whose forward motion and continuity are interrupted only by dramatic recitative monologues for the most intensely charged moments or as the expression of supernatural power.

Hidalgo's operatic conventions and his musical style clearly differ from any of the several contemporary kinds of opera cultivated in Italy. His sparing, specific use of recitative and his approach to the shaping and rhythm of recitative melodies are distinctive in comparison to other 17th-century dramatic composers. In songs and airs, which are almost exclusively syllabic, diatonic and laced with syncopation and hemiola, his adaptation of Spanish dances (such as the *jácara* and the *seguidilla*) for characterization and verisimilitude is especially important. Moreover, the absence of italianate affective devices or gestures and of formulaic or strophic bass patterns in his airs distances them stylistically from the practices of contemporary Italian composers. During Hidalgo's career Italian opera was not performed in Madrid, Italian operatic composers did not seek employment in Madrid, nor did Spanish composers study abroad. It is doubtful that Hidalgo knew contemporary Italian opera, except for his work with Baccio di Bianco and possible contact with the Roman librettist Giulio Rospigliosi, who stayed several years in Madrid as papal legate.

Hidalgo's music, on the other hand, was known in Italy, France and Latin America. His theatre songs were heard in Madrid and also in revivals elsewhere in Spain and in Latin America, and they were even used by other composers as models for sacred villancicos, though Hidalgo himself contributed many villancicos to the sacred vernacular repertory. Most of the theatre songs are to be found in loose scores and performing parts in numerous libraries and archives in Spain, Europe, the USA and Latin America, as well as in anthologies such as the Novena manuscript (see Stein, 1980, 1986, 1987, 1993), the *Tomo de música vocal antigua* (*E-Mn* 13622; see Stein, 1987, 1993 and Caballero, *RdMc*, xii, 1989) and a more recently recovered anthology of theatre songs in the California State Library at Sutro, San Francisco (see Koegel). For extensive excerpts from Hidalgo's stage works see especially Stein (1993).

Hidalgo's place in the history of Spanish theatre music is comparable to that of Lully in France or Purcell in Britain. Like Purcell, he worked with the greatest dramatist of his age and composed mainly for partly-sung productions designed to appeal both to royal patrons and to a broad but sophisticated public. Like Lully, he not only composed for the most important political occasions but was charged with developing a national theatrical music suitable to the characteristic histrionic style of the Spanish actors, the stylized dignity of the highly symbolic dramatic texts and their exquisite visual effects. As composer he wielded less influence than the dramatist and the scenic designer, but he was fortunate to work with Calderón, arguably the strongest dramatist in Europe, and to benefit from the sponsorship of the ambitiously artistic Marquis de Eliche whose productions, for a brief period, were said to be some of the most daring, opulent and innovative in Europe.

WORKS

*lost unless otherwise stated*

STAGE

Pico y Canente (comedia, 3, L. de Ulloa), Madrid, Buen Retiro, 1656, 1 song *E-Mn*

Triunfos de amor y fortuna (comedia, 3, A. de Solis), 1658, collab. C. Galán, songs *Bc*, *Mn*

LOUISE K. STEIN

**Hidalgo (Codorniú), Juan (ii)** (*b* Las Palmas, 1927). Spanish composer. He studied the piano at the Académia Frank Marshall in Barcelona and composition with Montsalvatge, completing his training in Paris and Geneva. He worked with Maderna in Milan (1956) and at Darmstadt in 1958 met David Tudor and Cage, who were to influence his subsequent development. He was one of the first Spanish composers to write electronic music (*Etude de stage*) and open music (*Caurga*), in addition to composing works which are close to Cage's aesthetic (*Milán piano*, *Roma dos pianos*).

In 1964, with Walter Marchetti and Ramón Barce, he founded the 'Zaj' group in Madrid. From this point his artistic life followed a course totally alien to concert music and even to music as sound, to the extent that no analysis of his music could be made without following the performances and activities carried out in accordance with the Zaj group's premises. Hidalgo suggests an identification between art and life, which has led to his own work identifying with the Zaj attitude. This group, close to but distinct from the international Fluxus group, introduced 'mail art' and the 'happening' into Spain, and cultivated humour and the decontextualization of everyday objects. According to Hidalgo, 'Zaj is based on vulgar everyday acts . . . on an emphasis on non-logical ways of acting' and 'on a love of allusions'. It reached its peak between 1964 and 1967, but continues to admit new collaborators.

ANGEL MEDINA

**Hidalgo, Manuel** (*b* Antequera, Andalusia, 4 Feb 1956). Spanish composer. After studying theory and composition with Juan-Alfonso García, organist of Granada Cathedral, he studied at the Zürich Conservatory (from 1976) with Hans Ulrich Lehmann, among others, and in Hanover and Stuttgart with Lachenmann (1979–84). His early works show the influence of Lachenmann in their treatment of structure as emerging from the experience of the material as sound. *Harto*, which had its première at the Donaueschinger Musiktage (1983), reflects Lachenmann's definition of beauty as the denial of habit and custom. In *Física* for large orchestra (1991), the acoustic conditions necessary for sound generation are accepted as an integral part of the compositional process. His music, however, does not adopt the concept of structural sound that is central to Lachenmann's aesthetic.

Hidalgo's structural ideal, which aims for a procedure in which the most resolved sounds function as fully closed, paraphrases Webern's dictum that to 'develop everything from one main idea provides the strongest coherence'. Fascinated by the elimination of metre in favour of an arrangement of pitch lengths interspersed with rests, Hidalgo was also influenced by the processes of variation, through blurring and distortion, in Webern's rhythmic serialism. The merging of extremes (*discordia concors*) and the sophisticated appearance of simplicity, as exemplified in works such as *Nuut* (1992) and *Romance de le chatelier* (1994), are also central to his aesthetic. His ideal

of comprehensibility paired with his ideal of distortion has created a musical syntax all his own. His opera *Dalí, der grosse Masturbator* (1998–9) demonstrates how elements of his style correspond to Salvador Dalí's surrealism, producing images 'increasingly assuming the form and hue of demoralization and confusion'.

KLAUS MICHAEL HINZ

**Hidas, Frigyes** (*b* Budapest, 25 May 1928). Hungarian composer and pianist. After piano lessons with Zoltán Horusitzky in Budapest, he studied composition with János Viski and sacred music and conducting with László Somogyi at the Liszt Academy of Music (1947–52). He was conductor of the National Theatre (1952–66) and has played the piano and celesta with the Hungarian RSO, also gaining a reputation as an improviser on the piano and organ. In 1959 he received the Erkel Prize for his Oboe Concerto, the first of several works to exploit the abilities of a gifted generation of Hungarian wind players. Hidas has often used Baroque concerto form, particularly in a set of concertinos intended as modern 'Brandenburgs' and incorporating the B–A–C–H motif. Although not closely attached to the Hungarian folksong school, he wrote in a post-Kodály style until the mid-1960s, his lively rhythms sometimes influenced by jazz. Later works showed a deepening concern with structure, sometimes including serial elements, although Hidas has never departed from evident tonality. In contrast with the diverting character of much of his instrumental music, *Gyászzene (Requiem egy hadseregért)* ('Funeral Music (Requiem for an Army)', 1973) stands as a profound avowal of personal beliefs. In 1980 he received his second Erkel Prize and in 1987 the title Artist of Merit; in 1993 he was awarded the Béla Bartók-Ditta Pántory Prize.

GYÖRGY KROÓ (text), ANNA DALOS (work-list)

**Hidden fifths, hidden octaves** [covered fifths, covered octaves]. In part-writing, the approach to a 5th or an octave by similar motion between two parts (ex.1). Strict

Ex.1 Hidden intervals in four-part counterpoint

counterpoint permits the occurrence of hidden 5ths anywhere except between the outer parts (in which case they are sometimes called 'exposed 5ths'). A type of hidden 5ths called 'HORN' FIFTHS, however, in which each part approaches its note from an adjacent note of an overtone series containing that 5th, is permitted anywhere and in fact is common in note-against-note two-part writing.

**Hiefhorn** (Ger.). A hunting HORN.

**HIER.S** [Hie.s, Hiero.s]. Italian wind instrument maker(s) of unknown identity. The maker's marks HIE.S, HIER.S and HIERO.S are found on 31 wind instruments discovered to date: nine cornetts, eight dulcians and 14 recorders, most of them known to have come from the area of Venice. A *quartbass* dulcian depicted in Praetorius's *Theatrum instrumentorum* (Wolfenbüttel, 1620/*R*) and a bass dulcian in a painting by Giovanni Benedetto Castiglione (Rome, *c*1645; *see* BASSOON, fig.5) are similar in design to the surviving instruments. The marks are presumably contractions of the name Hieronymus (a Latin version of the Venetian Jeronimo), but the identity of the maker(s) has not yet been established. The most favoured suggestion attributes these marks to the Venetian branch of the Bassano family, which was founded by Jeronimo Bassano the elder, whose sons at first used the last name de Jeronimo; the instruments resemble those with the '!!' maker's mark, which probably belonged to

the Bassanos. Other suggestions have been Hieronimo da Udine (mentioned in a Venetian letter of 1574) and Hieronymus Geroldi (from whose heirs dulcians were bought by the Ambras court in 1596), as well as Hieronimo de li flauti (mentioned in Venetian documents of the second half of the 16th century), possibly the same man as da Udine or Geroldi.

DAVID LASOCKI

**Hier, Ethel Glenn** (*b* Cincinnati, 25 June 1889; *d* Winter Park, FL, 14 Jan 1971). American composer, teacher and pianist of Scottish origin. She received a diploma in piano from Cincinnati Conservatory in 1908 and immediately established what became a thriving piano studio. In 1911 she returned to the Conservatory for further piano study and took composition lessons with Edgar Kelley; in Germany during the summer of 1912 she studied composition with Hugo Kaun. In 1917 she moved to New York, opening teaching studios there and in New Jersey, and continued composition studies at the Institute of Musical Art, first with Percy Goetschius and later with Bloch. During subsequent summers she worked in Europe with Berg, Wellesz and Malipiero, and in 1923 she resumed piano study with Carl Friedberg.

Hier began publishing teaching pieces for piano in 1912. By 1918 her more ambitious works had won her the first of 14 fellowships at the MacDowell Colony. In 1925 her works were included in the Festival of American Women Composers in Washington, DC, and later that year, with Amy Beach, Mary Howe, Gena Branscombe, Marion Bauer and others, she founded the Society of American Women Composers. She organized the Composers Concerts in New York in 1948 and frequently gave lectures on modern music and other topics. *Asolo Bells* was played at the Festival of American Music at Eastman School of Music in 1939, and in 1945 by the Cincinnati SO; as part of Three Orchestral Pieces it won a Composers Press publication award in 1953. Hier's music combines elements of Impressionism with popular and jazz styles (as in *Click o' the Latch* and *Badinage*). Her use of colouristic effects can be seen in *Asolo Bells*; in *A Day in the Peterborough Woods* and *The Song Sparrow* Hier drew on birdsong. Within an extended tonal scheme she often used parallel triads and tone clusters in a nonfunctional manner. Hier also wrote a play, *The Boyhood and Youth of Edward MacDowell* (1926). Her manuscripts are held at the American Music Center, the College Conservatory of Music at the University of Cincinnati, and the Delta Omicron Library, Cincinnati.

ADRIENNE FRIED BLOCK

**Hieronimus de Zentis Viterbiensis.** *See* ZENTI, GIROLAMO.

**Hieronymus.** *See* HIER.

**Hieronymus Bononiensis** [Jerome of Bologna] (*fl c*1521). Italian harpsichord maker. A 'Jerome of Bologna' was referred to by Michel Corrette in *Le maître de clavecin* (Paris, 1753), but otherwise little is known of this maker who worked in Rome. His only known harpsichord, dated 1521, is now at the Victoria and Albert Museum, London. It was held to be the oldest surviving harpsichord; however this distinction has now passed to an instrument of 1515–16 by VINCENTIUS. A harpsichord in the Castello Sforzesco, Milan (cat. no. 579), falsely dated 1503 and now converted to a crude clavichord, was probably made in 1539 but is of similar size and style and therefore assists in identifying the original state of the Hieronymus instrument.

Recent examinations of the 1521 harpsichord have led to conclusions that supersede some of those of earlier literature (Hubbard, Schott and *Grove I*). Originally the instrument was single strung and, as Debenham discovered, had a 50-note compass. Wraight (1997) judged that the present keyboard may be original, but that the compass has been reduced from *C/E–f‴* (50 notes) to *C/E–d‴*. The wrestplank is a replacement and any estimation of the original scaling and pitch is therefore speculative, but a *c″* string of about 277 mm has been suggested. This would place this instrument with a group of Italian 16th-century harpsichords and virginals intended for iron-wire stringing at a relatively high *8′* pitch, effectively at about *a′* = 520, *see* HARPSICHORD, 2 (i).

DENZIL WRAIGHT

**Hieronymus de Moravia** [Hieronymus Moravus, Jerome of Moravia, Jerome of Moray] (*d* after 1271). Theorist. His one extant treatise (*CoussemakerS*, i, 1–155; ed. S.M. Cserba, Regensburg, 1935) is an encyclopedic compilation touching upon all the principal aspects of music in the Middle Ages: the *ars musica*, music as a mathematical science, ecclesiastical chant and mensural polyphony. The principal sources of the first two headings are the *De institutione musica* of Boethius and the treatise of Johannes Cotto. The chapter on mensural polyphony contains four discant treatises, one anonymous and the

others by Johannes de Garlandia, Franco of Cologne and Petrus de Picardia.

Hieronymus was a member of the Dominican order and is believed to have been active in Paris at the order's convent on the rue St-Jacques. His nationality is less certain. The incipit of his treatise states that it was compiled 'a fratre ieronimo moravo' (by Brother Jerome the Moravian), but the explicit refers to him as 'Jeronimus de Moravie' (Jerome from Moray). Hieronymus is more likely to have come from the convent founded *c*1235 at Elgin in Moray, Scotland, than from the Dominican community in Moravia (see Huglo, 1994). The contents of his treatise suggest that it was compiled during or after 1272, since the text cites St Thomas Aquinas's commentary on *De celo et mundo* of Aristotle, which was apparently completed in that year. The one manuscript preserving Hieronymus's work, *F-Pn* lat.16663, which may have been an exemplar intended for reproduction via the *pecia* system, must have been copied before 1304, when it passed to the Sorbonne on the death of its owner, Pierre de Limoges. The treatise was probably known to the English theorist Anonymus 4, who seems to have based his text on the version of Johannes de Garlandia it preserves.

The aim of the treatise was entirely practical: it was compiled to enable inexperienced ecclesiastics, especially other Dominicans, to judge and perform chant. To this end much of Hieronymus's text is drawn more or less verbatim from recognized authorities. The opening section, presenting the wide-ranging lore associated with the *ars musica*, defines music, its name, inventors, divisions, effect, and the discipline of music. For this, Hieronymus culled material from Isidore of Seville, al-Fārābī, Hugh of St Victor, and his fellow Dominicans Aquinas and Vincent de Beauvais, in addition to Boethius and Cotto. Cotto's account of the hexachord system of Guido is followed by original descriptions of mutation and intervals, and by a discussion of consonances derived largely from Boethius.

Hieronymus's consideration of music as a mathematical science opens with the basic definitions necessary for the ensuing account of relations between numbers (multiple, superparticular and superpartient, and their compounds) and the arithmetic, geometric and harmonic means. Numerical proportions of intervals, the comma, and so on, are demonstrated in copious excerpts from Boethius. Bell tunings and monochord divisions provide access to audible demonstrations of these harmonic relationships. The subject of ecclesiastical chant is introduced through an account of the ancient Greek modes. The church modes are then described and illustrated by a tonary concluding with an exposition of the use of B♭ and B♮ in chant.

The two largely original chapters that follow this material are also concerned with chant; like the tonary they appear to reflect the Dominican usage in many respects. The first (chap.24) shows how to compose new chants, while the second (chap.25) discusses singing and forming notes and pauses in plainchant. In the latter chapter Hieronymus observed that the manner of singing described there applied not only to chant, but to all music, including polyphony (*musica mensurabilis*). The note values shown in Table 1 were given, resolved according to the 'ancients' and the 'moderns'. With certain exceptions, all chant was to be sung in breves of one 'modern' *tempus*. Hieronymus described a group of vocal ornaments including the 'reverberation', an appoggiatura of

TABLE 1

| Note | | Value (*tempora; instantes*) | |
|---|---|---|---|
| | | ANCIENTS | MODERNS |
| ▪ | longa | 6 tp | 2 tp |
| | longior | 9 tp | 3 tp |
| | longissima | 12 tp | 4 tp |
| ■ | brevis | 3 tp | 1 tp |
| | brevior | 2 tp | 2 in |
| | brevissima | 1 tp | 1 in |
| ◆ | semibrevis | | |

several rapid notes, and the 'flower' (*flos*), a vibrato or trill from above.

Chap.26 presents four *positiones*, or theses, on polyphony. To a large extent these represent successive stages in the evolution of discant and rhythmic theory, but their subject matter is necessarily the same: rhythm and its notation, vertical intervallic relationships, and the genres and idioms of *musica mensurabilis*. The first, an unattributed *Discantus positio vulgaris* pieced together from theoretical material of differing ages and origins, is thus named because 'certain nations [i.e. schools or academic faculties] commonly use it, and because it is the oldest of all'. It summarizes elementary information on modal rhythm. The long of two *tempora* and the breve of one are the basic values, while the ternary long and semibreve are described as 'beyond measurement'. Six rhythmic modes are enumerated, 1st mode (long-breve-long) being distinguished from 5th mode (all ternary longs). The teaching of vertical relationships follows other treatises of the 12th and early 13th centuries in numerous respects: it simply defines the unison, 5th and octave as the best concords, and gives examples of octave and 5th progressions in contrary motion. Brief but important definitions are given for the major polyphonic idioms and genres cultivated by the Notre Dame school: discant, *organum purum*, *organum duplex*, conductus, motet and hocket.

The more extended *positio* that follows, Garlandia's *De mensurabili musica*, gives detailed teaching on the rhythmic modes and on the mensural notation that was being developed to facilitate their notation. Consonances and dissonances are classified as perfect, intermediate, and imperfect. Hieronymus's copy of Garlandia has been 'modernized' in comparison with the version of the treatise found in other manuscripts. It is unique in preserving in an integral state Garlandia's chapters on the idioms of copula and *organum per se* (see Reimer, chaps.12–13). It also stands alone in including chapters on three- and four-voice writing (chaps.14–16); these may be additions or reworkings by Hieronymus, and include information on *falsa musica*, rondellus and other forms of variation, and the use of embellishments (*colores*) in a polyphonic context.

The third *positio*, the *Ars cantus mensurabilis* of Franco of Cologne, is ascribed by Hieronymus to Johannes de Burgundia, an Augustinian canon of St Denis, Reims, known as a teacher from other sources. This is possibly the earliest surviving copy of Franco's treatise, a seminal reworking of rhythmic language and its notation which frees both from the constraints of the modal system.

The fourth *positio*, ascribed to Petrus de Picardia, is a truncated version of an *abbreviatio*, or summary, of late 13th-century rhythmic and notational doctrine. The text tells us that it is based on the *ars* of Franco and on what Petrus described as the *arbor* ('tree', apparently a diagram) of Johannes de Burgundia. The treatise is rich in examples drawn from the motet repertory of the period.

The four *positiones* are followed by discussions of Greek terminology for the notes of the gamut (important as an early witness to the 'full' Guidonian gamut) and of positions on the monochord. At the end of the compilation the tunings of the two-string rebec (C–G) and the five-string vielle are described.

FREDERICK HAMMOND/EDWARD H. ROESNER

**Hierosolymites, Andrew.** *See* ANDREW OF CRETE.

**Hifthorn** (Ger.). A hunting HORN.

**Higginbottom, Edward** (*b* Kendal, 16 Nov 1946). English organist and choir director. He was organ scholar of Corpus Christi College, Cambridge (1966–9), and subsequently undertook postgraduate research, taking the PhD in 1979. He was appointed organist, fellow and tutor in music at New College, Oxford, and a university lecturer in music in 1976. He has developed the role of the choir of New College chapel beyond its immediate function of providing liturgical music for worship. In doing so he has helped the cause of such institutions through a period when financial constraints and changes in social attitudes have threatened choral foundations. The choir now has an international reputation through its tours and recordings, and has an important educational role. The choir has recorded music ranging from Tallis and Taverner to Howells, and with the King's Consort under Robert King featured in a series of CDs of Purcell's odes and sacred music. Higginbottom has edited music by François Couperin and Michel Corrette, and written articles on French Baroque music; he was made an Officier des Arts et des Lettres in 1990.

IAN CARSON

**Higgins, Dick** [Richard Carter] (*b* Cambridge, England, 15 March 1938; *d* Quebec, 25 Oct 1998). American composer, performer, writer, artist and publisher. He studied composition and orchestration privately with Harry Levenson (1953), with Cowell at Columbia University (BS 1960), and with Cage at the New School for Social Research (1958–9). In the late 1950s, partly as a result of his studies with Cowell and Cage, Higgins began to explore the areas between music and the other arts – the 'intermedia'. He was associated with the first 'happenings' (1958) and was one of the original adherents of the Fluxus movement (from 1961), collaborating in performances with such artists as Cage, Corner, MacLow, Meredith Monk and Tenney. During the 1960s, Higgins became one of the chief exponents of avant-garde music through his writings and other activities. He founded and directed the Something Else Press (1964–73), a major publisher of avant-garde intermedia works, and ran its performance gallery (1966–9). He also founded Unpublished Editions (1972, renamed Printed Editions in 1978). He received two grants from the Deutscher Akademischer Austauschdienst (1975, 1982), and has held teaching posts at the California Institute of the Arts (1970–71) and as a research associate in the visual arts department of SUNY, Purchase (from 1983). He has written more than 50 books, numerous articles on theatre, visual arts, architecture and poetry as well as music.

Many of his performance pieces can best be described as intermedia works. Many of his musical works rely heavily on improvisatory techniques and employ a variety of media with which the performer interacts. Higgins uses graphic notation effectively both in works for solo instruments (as in *Piano Album*, 1980) and in larger works (for example, *Variations on a Natural Theme*for orchestra, 1981). His manuscripts are housed in the Archiv Sohm, Stuttgart (works of 1958–71), the Getty Center for the Arts and Humanities (works of 1968–93) and the Archives of American Art, New York.

WORKS
(*selective list*)

Dramatic: Hrušalk (op), 1965; 26 Mountains for Viewing the Sunset From, singers, dancers, chbr orch, 1980; Scenes Forgotten and Otherwise Remembered (radio performance piece), 1985; Girlande für John (radio performance piece), 1987; 3 Double Helixes that Aren't for Sale (radio performance piece), 1990; Saint Columba (op), 1994

Inst: Danger Music, various insts, incl. Danger Music no.17, 1961–4; Softly for Orchestra (Graphic no.143), 1967; Wipeout for Orchestra (Graphic no.141), 1967; Telephone Music; The 1000 Symphonies, series, orch, 1968–; Piano Album, 1962–84 (1980); Testing the Boundaries, 1980; 10 Ways of Looking at a Bird, vn, hpd, 1980; Sonata, prepared pf, 1981; Trinity, pf, perc, 1981; Variations on a Natural Theme, orch, 1981; Pf Sonata no.2, 1982; St. Columba, str qt, orch/4vv, chorus, tubular chimes (1983); Song (P. Optianus Porphyrius), any vv/insts (1983); Music for Trumpets and Trees, 1995

Many vocal works; many performance pieces with music; film scores

Principal publishers: Printed Editions, Something Else Press

STEPHEN RUPPENTHAL/DAVID PATTERSON

**Higgins** [Higons, Higgons, Hyggyn, Hyggyns], **Edward** (*b c*1470; *d* mid-Jan 1538). English lawyer and ecclesiastic. He was master at Trinity College, Arundel, and commissioner and donor of the Caius Choirbook. Born into a Shropshire family, he studied at the University of Oxford, from which he held degrees in both canon and civil law by the time of his ordination to the priesthood in 1501. He subsequently pursued a distinguished legal career in London and Westminster as a judge in the Court of Requests (1509–13) and a master in Chancery (9 March 1512); he may also have been the 'Master Higons' named as occupying the privileged position of Clerk of the Closet in Henry VIII's retinue at the Field of the Cloth of Gold in the summer of 1520.

As so often happens, professional advancement and ecclesiastical preferment went hand in hand. During a period of some 30 years Higgins amassed an impressive number of benefices, including at least a dozen rectories, vicarages and deanships, a chaplaincy to Henry VIII (by 1513) and canonries at Salisbury Cathedral (18 January 1507), St Stephen's, Westminster (9 July 1518), Chichester Cathedral (14 April 1525) and Lincoln Cathedral (22 April 1533). His most significant ecclesiastical appointment, however, was probably the mastership of the collegiate church of the Holy Trinity at Arundel (28 August 1520). Arundel seems to have become his base for the rest of his life, although he evidently continued to visit London and Westminster in professional capacities. Other members of his family moved to live nearby; the Humphrey Higgons named as a singing-man of the college in the visitation of 1524 was probably his younger brother. There is some uncertainty over the date of Edward Higgins's death; his last surviving letter, in which he says that he is suffering from a fever, is dated 18 January 1538, yet his canonry at St Stephen's was apparently granted to somebody else (implying that Higgins was already dead) two days earlier.

Higgins's musical importance lies in his connection with the Lambeth and Caius Choirbooks (*GB-Llp* 1 and *GB-Cgc* 667), two major sources of the music of Robert Fayrfax and Nicholas Ludford. The Caius Choirbook contains the inscription 'Ex dono et opere Edwardi Higgons huius ecclesie canonici'; in this context 'opere' probably refers to the commissioning of the manuscript rather than to its copying. Both choirbooks are in fact the work of a single scribe, who also wrote out a much less formal musical source discovered in the Arundel Castle archives in 1982 (Arundel Castle MS A340). It seems likely that all three manuscripts were written at Arundel during the 1520s, and that the two choirbooks preserve some of the repertory sung in the college chapel during Higgins's mastership. The Lambeth Choirbook may well have remained the property of the college until its dissolution in 1544; the Caius Choirbook was probably intended for St Stephen's Chapel, Westminster, where Higgins held his most prestigious canonry and Ludford had charge of the music.

NICHOLAS SANDON

**Higgins, Paula (Marie)** (*b* Framingham, MA, 7 March 1953). American musicologist. She earned the BA at Mount Holyoke College in 1976, then completed graduate studies at Princeton University, where she received the MFA in 1978 and the PhD in 1987 with Lewis Lockwood, Harold Powers, Kenneth Levy and Margaret Bent. Higgins was on the faculty of Duke University from 1984 to 1990. In 1990 she was appointed associate professor at the University of Notre Dame. She has also held visiting appointments at Harvard University, the University of Chicago and Wolfson College, Oxford University.

Higgins' research has focussed on musical culture and composers in late medieval France, particularly the collegiate churches and cathedrals and the French royal and princely chapels. She has also written on the audience, reception and hermeneutics of late medieval music. Her interest in women in music has centred on late medieval and early modern women, women composers of the 19th century (particularly Fanny Mendelssohn Hensel), and feminist and postmodern criticisms. She was also editor-in-chief of the *Journal of the American Musicological Society* from 1996 to 1998.

PAULA MORGAN

**Higginson, Henry Lee** (*b* New York, 18 Nov 1834; *d* Boston, 14 Nov 1918). American music patron. He studied music in Vienna, where he became acquainted with many leading figures, but was quickly disabused of any notion that he could become a professional musician; on his return to the USA he entered on a career in banking. While still in Vienna he planned to create a permanent orchestra in Boston, assembling under a single conductor the finest musicians available. His plans were delayed by the Civil War and later by his private financial commitments, but in 1881 he announced his intention to create the Boston SO to provide a weekly series of subscription concerts in the winter months, for which he would personally guarantee to make good any deficit. Higginson himself chose the music director, George Henschel, but gave him complete freedom in all artistic decisions including the engagement and dismissal of musicians and the choice of repertory. He also envisioned an early summer season of lighter music in a more casual environment; and in 1885 he began the Boston Music Hall Promenade Concerts, which (as the Boston 'Pops') are still considered an extension of the orchestra's regular season. Higginson's early hope that the establishment of the orchestra might lead to the creation of an advanced school for musicians finally came to fruition in 1940 with the founding by Koussevitzky of the Berkshire Music Center at Tanglewood.

STEVEN LEDBETTER

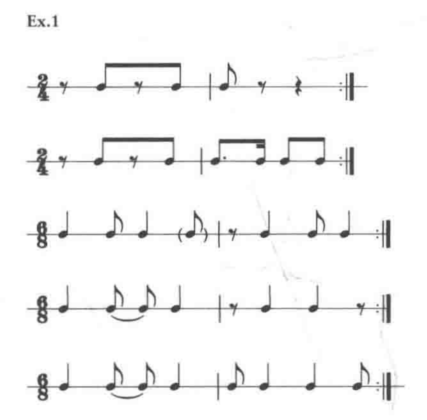
**High boy.** *See* HI-HAT.

**Highlife.** A dance style that first appeared on the West African coast in the late 19th century. It has since developed into one of the most popular modern dance styles in the towns and cities that border the Gulf of Guinea. The term comes from the association of the style with 'high society' (party-going etc.).

1. History. 2. Musical characteristics.

1. HISTORY. The origins of highlife lie in the introduction in the 19th century of European military band instruments to the coastal forts of Ghana which had been built to protect European trading interests. By 1830 there was an African band at Cape Coast Castle which played English tunes by ear. Local bands modelled on those of the British forces sprang up at Elmina, 13 km from Cape Coast, among them the Lion Soldiers' Band and the Edu Magicians' Band. They were predominantly brass bands which played popular pieces of the period in a style that foreshadowed that of highlife. The band instruments were often bought for them by local merchants who acted as their sponsors, but freed slaves, stowaways and stevedores who returned to the area introduced smaller instruments such as concertinas, bandoneons, guitars and fifes. Other early influences included church hymnody, sea shanties of sailors and piano music (Collins, 1985).

By the beginning of World War I, musicians and bands along the west coast were playing local 'pop' music. One of the first styles to emerge in the Cape Coast-Elmina area was the *Annkadan-mu* ('You can't stay in your room when you hear the music'). It was generally performed on guitar and soda bottle with a singer, but other similar combinations were also used. While such music was generally available along the west coast, the development of highlife itself, with its blend of African, black American and Western idioms, was made possible by the unique circumstances at Cape Coast and Elmina.



The early spread of highlife was largely the result of its acceptance by prosperous local merchants and senior employees in large trading companies on the west coast. They acquired harmoniums, pianos, banjos and other Western instruments and held frequent parties; highlife was performed at them and its repertory gradually extended. The Excelsior Orchestra, formed in 1914, is an example of such a west coast ballroom orchestra. Musically, highlife has drawn on a variety of sources – dance bands, 'at home' groups and soirée clubs, then drama groups or concert parties, guitar bands who presented dramatic sketches, and the five- to 14-piece bands which developed in the late 1930s based on international models. These groups spread the popularity of highlife wherever they performed. In 1934 the Cape Coast Sugar Babies Light Orchestra toured Nigeria and performed highlife arrangements of Yoruba songs which were greeted with enthusiasm – though the enthusiasm may have been in response to the use of Nigerian musical material by musicians from another country. During World War II swing influenced West African dance band music due to the American and British military presence. Early swing bands mostly played clubs that catered for Europeans, but a process of Africanization had already begun by the end of the war. One of the most influential of these bands was the Tempos, led by E.T. MENSAH and Guy Warren, who played a repertory comprising swing, highlife and calypso. Mensah later became known as the 'King of Highlife' (Collins, 1985). In Ghana, highlife became an integral element in the comic theatre, 'concert' parties that developed in the 1950s. This music-theatre genre fused, according to John Collins, 'Western theater, and in particular, Vaudeville, with African characters and themes' (1985, p.3). Highlife also spread from the coastal towns to rural areas where according to Collins it was performed on traditional instruments and the acoustic guitar, and referred to as native blues, PALM WINE, *ashiko*, *makossa* and *maringa* (1992, p.143).

By the late 1950s, national rivalry between Ghana and Nigeria was reflected in the rivalry of their capitals, Accra and Lagos, for recognition as the main centre of highlife. This produced experiments in instrumental combinations and idioms that resulted in styles as successful as that of Yoruba highlife with its use of traditional idioms and instruments. Highlife has contributed to the ongoing development of several West African popular music genres such as Afro-beat, *jújù*, *makossa*, *kpanlogo* and

others. Most highlife dance-bands in Ghana and Nigeria had ceased to function by the mid-1960s, at which time guitar-bands assumed greater popularity.

2. MUSICAL CHARACTERISTICS. Dance-band highlife is usually in simple duple time, although examples also occur in 4/4 and, more rarely, in 6/8. There is a slow highlife beat in 6/8 known as the 'blues'. In all cases the various rhythmic patterns conform to a basic beat, and a strict tempo is maintained throughout.

The rhythm section usually comprises combinations of claves, castanets, maracas and drums with an occasional bass. The rhythmic foundation of the piece is reiterated throughout as a rhythmic pattern on castanets and claves, with or without maracas; in some early highlifes a soda bottle was used to strike the rhythmic pattern. Characteristic rhythm patterns found in highlife are shown in ex.1.

The highlife scale is usually diatonic and major, and its melodies are catchy and easily repeatable. While its harmonies are similar to those of earlier American blues without chromaticism, its chord sequences and part organization deviate from the blues and Western musical types. This is partly explained by the improvisation that occurs in the learning of new numbers.

The distinctive qualities of highlife lie, beyond description in terms of scale, melody, harmony, timbre and improvisation, in the basic propulsive drive marked by its verve and precision; in its sonorities, from those of regimental brass bands and Latin American bands; in its emphasis on firm rhythmic outlines and bold tonal palettes; in its atmosphere of unbounded joy; and most of all in the genre's combination of rhythmic ostinato phrases with characteristic melodic motifs and strong cadential patterns.

Highlife is normally sung and the languages used contribute to its character. Some highlife musicians state that Fante serves best, but Twi, Ga, Ewe, Nzema, Yoruba, Igbo and other West African languages as well as English are also popular. The themes of highlife songs cover a wide range of human activity, from national affairs to domestic, from social and political topics to personal relationships. Highlife audiences, whether in night clubs, dance halls or popular theatres, are as attentive to its words as they are eager to move to its rhythms.

**High mass.** A MASS in which all sections except readings (i.e. Epistle and Gospel) are sung, whether in plainchant or polyphony.

**Higons, Richard.** *See* HYGONS, RICHARD.

**Higuchi, Ryūichi** (*b* Tokyo, 9 April 1946). Japanese musicologist. After earning the MA from Keiō University (1973), he studied with Dadelsen at Tübingen University, taking the doctorate (1979) with a dissertation on J.S. Bach's cantatas for funerals and other ceremonies. Returning to Tokyo, he lectured at Keiō and other universities, before being appointed to Meiji Gakuin University as associate professor (1989) and professor (1994). A specialist on Bach, he became an editorial member of the Neue Bach-Ausgabe in 1975. For his Bach studies he won the Kyoto Music Prize (1988), and the Tsuji Prize (1989). He has also been active as a choral conductor and a music critic.

MASAKATA KANAZAWA

**Hi-hat** [high-hat, high boy, choke cymbals, sock cymbals, Charleston machine]. Pair of pedal-operated CYMBALS. They are threaded horizontally onto a stand, the lower being fixed. Depression of the pedal lowers the upper cymbal so that the two are 'choked' together. They can also be struck with drumsticks or brushes, choked with various degrees of pressure and played with both hands to produce a wide range of cymbal sonorities. The hi-hat is an indispensable part of the DRUM KIT and is sometimes used in the orchestra. The earliest hi-hat appeared in drum catalogues in 1927. The earlier 'low boy', or 'low-sock' cymbal (1926), was identical to the hi-hat except that the cymbals were held only 30 cm above the floor and could thus only be operated with the foot.

□

**Hiil** [Khiil]. Mongolian fiddle. *See* HUUR and MONGOL MUSIC.

**Ḥijāzī, Salāma.** Egyptian singer. *See* EGYPT, §II, 2(vii) and 3.

**Hikmatov, Kudrat** (*b* 1955). Tajik composer. He studied composition at the Tashkent Conservatory with Kurbanov. His works have attracted attention through their ability to combine various aspects of Tajik national identity into a sumptuous musical language. A number of his works have been inspired by his growing interest in Tajik traditional arts ranging from miniature books to Sufi religious rites.

RAZIA SULTANOVA

**Hilaire.** *See* HYLAIRE.

**Hilarius.** Author of a PLAY OF DANIEL.

**Hilarius Pictavensis.** *See* HILARY OF POITIERS.

**Hilary of Poitiers** [Hilarius Pictavensis] (*b* Poitiers, *c*315; *d* Poitiers, *c*367). Latin theologian, scriptural exegete and hymn writer. Hilary, thought to be of distinguished family and education, was converted to Christianity in his early manhood and was made bishop of Poitiers around 350. Between 356 and 361 he was in exile in Asia Minor at the order of Emperor Constantius II as a result of his opposition to Arianism. Some scholars suggest that the Syriac hymnody of the time (most notably that of EPHREM SYRUS) may have inspired him to write his own hymns, thus turning one of the heretics' own propaganda weapons against them. Although there is early testimony (by St Jerome and Isidore of Seville) to the existence of an entire *Liber hymnorum* of indeterminate size, only three hymns, none of them wholly complete, now survive. These poems, *Ante saecula qui manes*, *Fefellit saevam* and *Adae carnis gloriosa* (?or *cernis gloriam*), are preserved in an 11th-century manuscript discovered by G.F. Gamurrini in 1884; neither melodies nor liturgical functions exist for them. Another hymn, *Hymnum dicat turba fratrum*, much more widely distributed (in ten manuscripts dating from between the 7th and 13th centuries), though ascribed to Hilary in some early manuscripts, has been rejected by recent scholarship; it is nonetheless of considerable age and poetic merit.

It is generally agreed that the excessive sophistication of the language, thought and poetic technique of Hilary's hymns accounts for their disappearance from or their failure to be accepted into liturgical use – in contrast to the hymns of the only slightly younger AMBROSE. Nothing is really known, however, about how, when and where Hilary's hymns were used in the early centuries. Hilary was the author of the first Latin psalm commentary, the *Tractatus super psalmos*, whose overall approach represents the typical allegorical manner of Origen. Its introductory 'Instructio psalmorum' provides a particularly thorough and scholarly summary of patristic Psalter exegesis.

**Hildebrand.** *See* HILDEBRANDT.

**Hildebrand** [Hildebrandt], **Johann** (*b* Pretzsch an der Elbe, June 1614; *d* Eilenburg, bur. 5 July 1684). German composer, organist and poet. He was organist of St Nikolai, Eilenburg, from 1637 until his death. The inclusion in his *Geistlicher Zeit-Vertreiber* of six numbers from Heinrich Schütz's settings of the Becker Psalter (1628) led Schütz, as he mentioned at the time, to postpone for a while his publication of an expanded version of his 1628 volume, which eventually appeared in 1661. By then Schütz had been reassured about the nature of the changes which Hildebrand had made 'to honour pure German diction'. Hildebrand's work as a poet, which was founded on the precept, among others, that 'noble music and poetry should be readily compatible', has scarcely won him the recognition he sought. Neumeister imputed to him a spurious ambition, suggesting that he had merely produced his versification of *Jesus Sirach* in 1662 so as to be accepted as a poet. His *Krieges-Angst-Seufftzer* (1645), which contains expressive laments, affords depressing and – at least in the context of cultural history – valuable evidence of the distress caused by the Thirty Years War. He probably wrote several other occasional works apart from the funeral piece of 1648 that has survived. He has been confused with Johann Heinrich Hildebrand, Kantor at Ohrdruf, and several manuscript works may be by either composer.

WORKS

Krieges-Angst-Seufftzer . . . bey itzigen grund-bösen Kriegerischen Zeiten, 1, 4vv, bc (Leipzig, 1645)
Hierauff schleust unsere im Herrn Ruhende, burial song, 4vv, bc (Dresden, 1648)
Geistlicher Zeit-Vertreiber, so da bestehet in funfftzig Psalmen und dergleichen Geistlichen Liedern, zum theil ... nebenst denen Melodeyen, selbst Poetisch gesetzt; theils mit Herrn Opitzens

Poetischen Psalmen, und andern schönen Geistreichen Liedern vermehret (Leipzig, 1656) [incl. works by H. Schütz, M. Siebenhaar and others], lost (wrongly incl. in RISM, B/VIII/1)

3 works attrib. Hildebrand in H. Springer and others, eds., *Miscellanea musicae bio-bibliographica*, iii (Leipzig, 1914–16), 25; further works attrib. 'J.H. Hildebrand', formerly St Michaelis, Lüneburg (see M. Seiffert, *SIMG*, ix, 1907–8, p.607): all possibly by Johann Heinrich Hildebrand (see R. Buchmayer, *BJb*, v, 1908, p.108)

GÜNTER THOMAS

**Hildebrand, Johann Heinrich.** German Kantor and possibly composer, pupil of Heinrich Bach and Christoph Bach, not identifiable with JOHANN HILDEBRAND.

**Hildebrandt** [Hildebrand]. Surname of two German organ builders and instrument makers, Zacharias (*b* Münsterberg [now Ziębice], 1688; *d* Dresden, 11 Oct 1757) and his son, Johann Gottfried *b* Freiberg, 1724 or 1725; *d* Sorau, 7 Nov 1775). Zacharias first trained as a joiner, but apparently became interested in organ building at an early age. He was apprenticed to Gottfried Silbermann for three years from 1713, and continued to work for him thereafter; as 'Orgel Macher' he was a co-signatory of the contract for the Silbermann organ in St Georgen, Rötha. He left Silbermann in 1722; a legal dispute between them was settled in 1724. J.S. Bach performed his own Cantata no.194 at the consecration of Hildebrandt's organ at Störmthal in 1723. From 1727 to 1731, Hildebrandt lived in Sangerhausen; he was appointed court organ builder to the Prince of Saxe-Weissenfels in 1730. He moved to Leipzig in 1734, or perhaps earlier. In *c*1739 he built a 'lute-harpsichord' for Bach, to the composer's specifications, with two rows of 8′ gut strings and one row of 4′ brass strings. In 1748 he succeeded Johann Scheibe as overseer of the Leipzig organs. From 1750 to 1754 he supervised the work on Silbermann's organ for the Catholic Hofkirche in Dresden, which Silbermann did not live to see completed. Zacharias Hildebrandt's largest organs were those in St Jakobi, Hettstedt (1741–9; two manuals, 31 stops; the case survives), St Wenzel, Naumburg an der Saale (1743–6; three manuals, 53 stops; extant), and the Dreikönigskirche in Dresden-Neustadt (1754–7; two manuals, 38 stops; completed after his death by his son). Other organs survive at Störmthal (from 1722), Hilbersdorf (from 1723), St Jacobi, Sangerhausen (from 1727) and St Georg, Sotterhausen (1730). Organs in the following places survive in rebuilt condition: Langhennersdorf (1717–22), Lengefeld (from 1725) and Goldbach (from 1755).

The effects of Hildebrandt's training under Silbermann are seen mainly in technical and structural aspects; in matters of tone he went his own way, and may well have had advice from Bach. Hildebrandt normally added to Silbermann's complement of stops, elements of the Hamburg Baroque organ (Rauschpfeife, Sesquialtera, Tertian, Scharf, Weitpfeife 8′, Blockflöte 4′, Waldflöte 2′, Dulzian 16′, Hautbois 8′, Schalmei 4′ in the manual, Nachthorn 2′, Posaune 32′ and Kornett 2′ in the pedal), as well as the string-tone stops favoured by Bach (Viola da gamba 8′, Fugara 4′, Violone 16′ and 8′ and Gemshorn 8′ and 4′). He also used richer mixture stops with their top pitches higher than Silbermann's, and he did not adopt Silbermann's characteristically broad mouth-to-circumference ratio of 2:7. Dähnert considered his organ in St Wenzel, Naumburg, 'one of the outstanding examples of late Baroque organ building'.

Zacharias's son Johann Gottfried assisted his father in Dresden-Neustadt and in Goldbach, 1754–7; his own most important organ was that of the Michaeliskirche, Hamburg (1762–7 and 1769; three manuals, 60 stops; *see* ORGAN, Table 27), described by Burney as 'the largest and most complete in Europe'.

HANS KLOTZ

**Hildebrandt, Johann.** *See* HILDEBRAND, JOHANN.

**Hildegard of Bingen** (*b* Bermersheim, nr Alzey, 1098; *d* Rupertsberg, nr Bingen, 17 Sept 1179). German Benedictine abbess, visionary, writer and composer. She is known for her literary, musical and scientific works, and for her religious and diplomatic activities. Her oeuvre includes recorded visions, medical and scientific works, hagiography and letters; also lyrical and dramatic poetry, which has survived with monophonic music.

She was born into the free nobility of Rheinhessen. When she was eight her parents, Hildebert and Mechthild of Bermersheim, promised her to the Church, and when she was 14 bound her over to the newly constructed Benedictine monastery at nearby Disibodenberg. She entered a stone cell (a 'tomb') with Jutta von Spanheim (1092–1136), who came from another powerful and wealthy local family. Their vows were received by Bishop Otto of Bamberg on All Saints' Day, 1112. Jutta instructed Hildegard in the Psalter, reading Latin and strict religious practices.

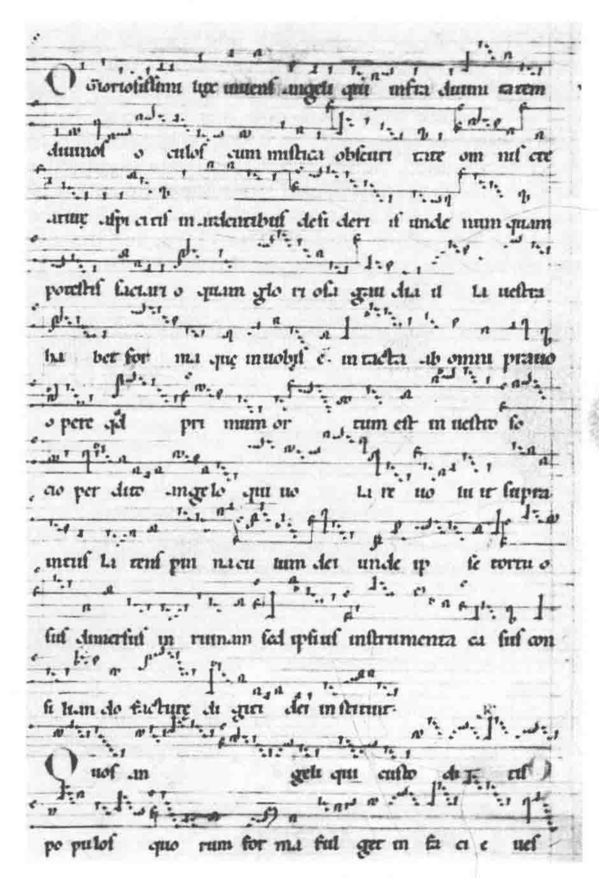
Although their contact with the outside world was via a single window, their isolation was not complete. Jutta corresponded with people of all social classes who, by way of letters, approached her for prophecies and spiritual instruction. The monk-priest Volmar, possibly from the monastery at Hirsau, apparently nurtured Hildegard's fundamental theological knowledge, providing access to sermons and treatises. The enclosure attracted other

*1. Hildegard with her amanuensis, Volmar: miniature from 'Scivias', completed 1151 (ex-D-WIl Hs 1)*

daughters from local noble families, expanding into a convent. After Jutta's death Hildegard, appointed 'prioress', became its leader but subject to the abbot, a role she fulfilled until about 1150 when the community had grown to about 20 members.

The convent's exclusivity and eccentric theological observances came under fire. Compelled by divine command, Hildegard sought to establish her own house at Rupertsberg, near Bingen, an endeavour unprecedented in her time. With endowments from the noble community the site was purchased in 1147, construction begun, and the move initiated in about 1150. In 1152 the Archbishop of Mainz issued founding documents. By 1158 Hildegard had secured complete financial independence from Disibodenberg, and, already under archiepiscopal protection, in 1163 she obtained protection from Emperor Friedrich Barbarossa who acknowledged her 'abbess'. When, in 1165, numbers at the convent had reached over 50, she established a daughter house with room for another 30 nuns at Eibingen, near Rüdesheim, where the Abbey of St Hildegard stands today.

She was famous for her prophecies and miracles. Later described as the 'Sybil of the Rhine' (1383), she was consulted by and held lengthy correspondences with popes, emperors and other secular and ecclesiastical leaders as well as lower members of the clergy and lay persons, and involved herself in politics and diplomacy at a time of immense political and ecclesiastical turmoil. Exceptionally for a woman, she undertook four preaching missions through Germany between 1160 and 1170. But above all, as spiritual mother and 'magistra', she guided her nuns by fortifying their commitment to the Virgin through the teaching of scripture and the Rule of St Benedict, and the discernment of the right path in monastic life.



In 1223 a protocol was drawn up for her possible canonization, but neither Pope Gregory IX (1227–41) nor Pope Innocent IV (1243–54) granted approval. Clement V (1305–14) and John XXII (1316–34) also hesitated, but in 1324 the Avignon papacy sanctioned her cult. In the 16th century she appears in the Roman martyriology of Baronius, and in 1940 her feast day was officially approved for all German dioceses; but these efforts have never resulted in a formal canonization. However, as Newman (1998) has pointed out, between 1198 and 1461 no Benedictine nun was canonized, with female sainthood shifting to the newer Dominican and Franciscan orders and the lay penitents associated with them.

From the age of five Hildegard experienced visions, and in 1141 her abbot gave her permission to record what she saw, with the aid of Volmar. The result, *Scivias*, which contains 14 lyric texts that later appeared with music, took ten years to write and comprised 26 revelations. Two works on natural science and medicine followed: *Physica* and *Causa et cure* (written between 1150 and 1160). Then came the *Liber vite meritorum* (1158–63) and the *Liber divinorum operum* (1163–73). The three visionary tomes have been described as a trilogy of apocalyptic, prophetic and symbolic writings. Her Lives of St Disibod (1170–72) and St Rupert (1172) and the *Explanatio* of the Rule of St Benedict round out her religious prose works.

Collection of Hildegard's musical settings of her poetry had begun by the early 1150s but the settings themselves may go back at least to the 1140s. The texts are laden with brilliant imagery and share the apocalyptic language of the visionary writings. They have some affinity with the poetry of Notker Balbulus (9th century) and are akin in richness and imaginative quality to those of Peter Abelard and Walter of Châtillon.

The two main notated sources, Dendermonde, Benedictine Abbey, MS 9 (*c*1163–1175) and the 'Riesenkodex', *D-WIl* 2 (*c*1180–90), preserve 77 songs in German neumes. Eight of the songs, all short antiphons, form part of a liturgy to St Ursula, so the total number is sometimes cited as 71. Collectively these songs are entitled *Symphonia armonie celestium revelationum* by all modern editors, although that designation does not appear in any of Hildegard's sources (Willimann). Of the songs, 43 are labelled 'antiphons' (fig.2), 18 'responses', seven 'sequences' and four 'hymns'; the remainder comprises a Kyrie, an alleluia and three undesignated items. Taken together they form a liturgical cycle, with some items bearing designations to feasts or classes of feast. Most feasts have an antiphon-respond pair. Some, especially the locally revered saints, have more: thus St Rupert has three antiphons and a sequence, St Disibod two antiphons, two responds and a sequence, St Ursula and her 11,000 virgins eight antiphons, two responds, hymn and sequence. The remaining sequences are to the Holy Spirit, the BVM, St Eucharius and St Maximinus.

The music is not drawn from plainchant and is in some respects highly individual. Indeed, hymns and sequences are nearly syllabic, while prolix responds are extravagantly complex, with elaborate melismas extending up to 75 notes; antiphons occupy a stylistic middle ground,

2. *'O gloriosissimi', antiphon from Hildegard of Bingen's 'Symphonia armonie celestium revelationum', c1163–1175 (Dendermonde Abbey, MS 9)*

alternating syllabic and melismatic styles. The responds are supplied with verse and repetenda, and occasionally also *Gloria Patri* using melodic material from the verse; some antiphons have 'EVOVAE' and the hymns 'Amen'. The sequences use poetic and melodic parallelism, but far from strictly.

The music of Hildegard is made up of a comparatively small number of elemental melodic patterns, which recur constantly under different melodic and modal conditions and are the common property of her poetic output. The patterns differ from the recurrent melodic 'timbres' (Aubry) of Adam of St Victor's work. While the latter are fixed phrases assembled in a 'patchwork quilt' manner akin to CENTONIZATION, Hildegard's formulae rather provide melodic 'matrices' with innumerable realizations. Highly decorative, the text and music of Hildegard's songs are intimately related and inseparable, as parallel syntaxes mirroring (and at times contradicting) one another, while unfolding within an idiosyncratic system of modes. On another level, the songs are meditations upon visionary texts, that in turn represent poetically condensed exegesis of complex theological issues, expressed at greater length in the prose trilogy of visions. Like all the writings received 'in visio' by the presence of the Living Light, ultimately the music's raison d'être lies in fostering *ruminatio* ('chewing over'), a method of penetrating the deeper spiritual meaning behind both words and music. As such, the songs are a special Hildegardian facet of contemplative medieval practice.

Hildegard also created a morality play, *Ordo virtutum*, in dramatic verse. This contains 82 melodies, many more nearly syllabic in setting than the liturgical songs. The earliest morality play by more than a century, it presents the battle for the human soul, Anima, between 16 personified Virtues and the Devil.

There are indications that at least some of the songs, and perhaps the play, were used in the liturgy at Rupertsberg, at Disibodenberg, in Trier and at the Cistercian monastery of Villers that received the Dendermonde manuscript as a gift in about 1175. Specifically, the responds to Mary, St Disibod and St Ursula would have been sung at Matins on the respective feast days. Some of the Ursula antiphons are indicated for Lauds, others (the Gospel antiphons) are suitable for Lauds or Vespers. In addition, as the antiphons are supplied with notated 'EVOVAE' psalm-tone cadence formulae (far more of these appear in Dendermonde than in the 'Riesenkodex'), they must have framed the recitation of psalms. The songs for the patron saints of Disibodenberg and the Trier monasteries might have been included in the liturgies there. The *Ordo* may have been performed in 1152, at the dedication of the church at Rupertsberg (Dronke, 1981).

The two musical manuscripts represent the song cycle in two states of development. Dendermonde, in its present fragmentary state, does not include the *Ordo*, but it is possible that the play may have been included at the beginning of the music section (Dronke, 1969–70), which contains 56 songs. The 'Riesenkodex' adds many items while excluding two short antiphons, and ends with the *Ordo*. Moreover, it shows the single cycle of Dendermonde reshaped into two by the separation of antiphons and responds from hymns, sequences and symphoniae, with the Kyrie in the middle. Thematically, both song collections are organized into eight hierarchically arranged groups, from God the Father to the BVM, then to Virgins, Widows, Innocents and finally the Church. Yet the detail of this arrangement differs. In the 'Riesenkodex' the items to the Holy Spirit (nos.24–8 in Pfau's edition) precede those for the Virgin Mary (8–23), and the items to St Ursula and her companions (60–65) come under the heading of 'Virgins' rather than 'Innocents'; the manuscript also has additional items, including all those for the Trier saints Matthew (50), Eucharius (52–3) and Maximinus (54), the item for St Boniface (51) and *O viridissima virga* (19).

Dating the songs remains problematic. Nearly half appear without melodies in prose contexts, and it is unclear which came first, the musical composition or the lyric poetry. A 'Miscellany' of homilies, letters and other materials by Hildegard (*D-WII* 2, ff.404–407*v*) includes 26 song texts (some with variants) but without their repetenda, doxologies, Amen or liturgical cues. These materials, which represent a different recension of the texts from the main song collection, possibly reflect rough transcriptions of the liturgical text, made at Rupertsberg, that Hildegard later revised to make them suitable for liturgical celebrations in other places (Newman, 1998). That is, the musical versions may have preceded these text versions. Or, they may represent transcriptions from an 'intermediary' song collection now lost (Berschin). *Scivias* (completed in 1151) culminates in 14 song texts, followed by a shorter version of the *Ordo*. It has been postulated that the song texts were incorporated at the

end of the book of visions, as a 'transcription of a celestial concert' (Newman, 1988) from individual (notated) exemplars that are now lost. Alternatively, they may have been set to music after the completion of *Scivias*. They have the same hierarchical arrangement as the notated sources, but on a smaller scale. Similarly, alternative scenarios have been proposed for the *Ordo* text. It may represent an early, unpolished sketch before music was added (Newman, 1988) or a later, abridged rendering (Dronke, 1981) of the play. All this suggests that the planning and fleshing-out of a liturgical cycle was a gradual process, and that Hildegard collected her songs into a systematic order over time, her last songs being incorporated posthumously into the cycle preserved in the 'Riesenkodex'. Newman has tentatively suggested a division into early, middle and late compositions: the 14 pieces in *Scivias* and all or part of the *Ordo* by 1151; the 26 of the 'Miscellany' from the late 1150s; and the text and music of the remaining pieces after the 1150s.

IAN D. BENT/MARIANNE PFAU

**Hiles, Henry** (*b* Shrewsbury, 31 Dec 1826; *d* Worthing, 20 Oct 1904). English organist, composer and teacher. He studied with his elder brother, the organist and composer John Hiles (1810–82), and served as organist in the provinces and London before moving in 1859 to Manchester as organist and the conductor of several local music societies. At Oxford he received the BMus degree in 1862 and the DMus in 1867. In 1876 he became lecturer in music at Owens College, Manchester, and in 1879 at Victoria University, for which in 1890 he organized a faculty of music; from 1893 he was professor of harmony at the Royal Manchester College of Music. He composed several services, cantatas and oratorios, an opera and an operetta, *War in the Household*, published a number of textbooks and edited the *Quarterly Musical Review* from 1885 to 1888; he also helped to promote what is now the Incorporated Society of Musicians.

BERNARR RAINBOW

**Hiley, David** (*b* Littleborough, 5 Sept 1947). English musicologist. He was educated at Magdalen College, Oxford (BA 1968), where he was taught by Bernard Rose, David Wulstan and Egon Wellesz, and at King's College London, from 1973, where he took the doctorate in 1981 with a dissertation on the liturgical music of Norman Sicily, and where his principal teachers were Ian Bent and Howard Mayer Brown. He was assistant music master at Eton College (1968–73) and lecturer at Royal Holloway College, University of London (1976–86) before he was appointed professor of musicology at the University of Regensburg in 1986. Hiley's chief research interests are plainchant, early polyphony and English music. He was secretary of the Plainsong and Medieval Music Society (1982–6) and edited the *Journal of the Plainsong and Mediaeval Music Society* (1978–90). From 1988 to 1997 he was chairman of the study group Cantus Planus of the IMS.

**Hill (i).** English family of organ builders.

(1) **William Hill** (*b* Spilsby, Lincs., 1789; *d* London, 19 Dec 1870). In 1815 he went to work with THOMAS ELLIOT in London, making his mark with the laying out of an organ for a difficult site in the Earl of Bridgewater's chapel

at Ashridge, Hertfordshire (1818). He married Mary, Elliot's daughter, in 1818, and in 1825 became Elliot's partner. The firm then became known as Elliot & Hill until the former's death in 1832. Thereafter Hill carried on the business under his own name (except in 1837–8, when he was in partnership with Frederick Davison, the firm being known as Hill & Davison until Davison left to form the rival firm of GRAY & DAVISON); in the mid-1840s the firm was renamed Hill & Co. Some ten years later Hill took his son (2) Thomas Hill into partnership, and the firm became Hill & Son.

William Hill's work falls into three main periods, the first of which extends from 1815 to 1838. The organs built by him during the first decade of this period were little distinguished from other contemporary English organs with their long manual compasses and circumscribed specifications. Towards the end of the 1820s Hill began to experiment with ways of increasing the size and scope of the English organ: manual compasses were extended below *G′*; large-scale double (16′) or unison (8′) pedal pipes became more common; duplication and larger pipe scales were tried; and he attempted to increase the power of the reeds. The most important essays were the huge organs for York Minster (1829–33, reconstructed by Hill in 1859; with extensive duplication and an eight-stop Pedal Organ including three ranks of 32′) and Birmingham Town Hall (1832–4; with fluework of enormous scale and such novel reeds as Posaune, Horn and Octave Clarion); in 1840 the world's first high-pressure solo reed, an Ophicleide on 30 cm of wind, was added to the latter. The construction of these instruments stimulated further invention: the Box Pallet to wind large pipes (*c*1828) and a machine to roll zinc for the first metal pipes of 32′ (*c*1830).

The mature work of Hill's second period (1838–*c*1858) is associated with a radical redesigning of the English organ, stimulated by a growing awareness of historic European schools of organ building, and a desire to provide an instrument suitable for the performance both of Bach and of the repertory of orchestral and choral transcriptions (*see* ORGAN, §VI, 3). The composer and organist Henry Gauntlett was Hill's most influential collaborator in the crucial years 1838–46. The result was the 'German system' organ (also termed by Gauntlett the 'Anglo-Lutheran or Protestant Organ', and, in its concert-hall version, the 'Concerto Organ') in building which Hill claimed that he was acting 'in the spirit of the old and most celebrated builders of Holland and Germany'. The manual choruses were extended to include 16′ tone and additional mixtures and mutations; a Pedal chorus of 16.16.8.4.III.16 or 16.8.16 was provided wherever possible with a compass of *C* to *d′* or *e′* ('required in the execution of the music of Sebastian Bach'); the Swell was redesigned as a full-compass division rather on the lines of a German Oberwerk; and manual compasses were standardized as *C* to *f‴*. There was usually a wide provision of novelty registers, for example the Wald Flute, Suabe Flute, Oboe Flute and Corno Flute; the Hohl Flute (paradoxically, and unlike the German Hohlflöte, a string), Salcional, Cone Gamba, Gemshorn, Violone and Echo Dulciana Cornet V are characteristic Hill registers which William Hill either adapted or introduced, and he was among the first English builders to use harmonic flutes and undulating ranks. There were more conservative features. The temperament was still, normally, unequal; the construction and scaling of the diapasons showed no radical departure from prevailing English practice; the Choir Organ remained a collection of mild accompanimental and solo voices; and tierce mixtures continued to be standard. Hill's organs almost invariably employed tracker action, though the size of some of the organs he was called upon to build provoked an interest in non-mechanical agencies: he is said to have collaborated with C.S. Barker in his early experiments with pneumatics, and he himself added pneumatic levers to the Great Organ action at Birmingham Town Hall in 1849 (he may have used them previously to strike the carillons in that instrument). Hill was the first English builder to dispense with manual blowing and substitute steam power (Royal Panopticon, 1853). Among his most important 'German system' instruments were: Christ Church, Newgate Street, London (1838); St Luke's, Cheetham Hill, Manchester (1840); St Peter upon Cornhill, London (1840); Great George Street Chapel, Liverpool (1841); Worcester Cathedral (1842); Edinburgh Music Hall (1843); Ashton-under-Lyne Parish Church (1845); Ely Cathedral (1850); and the Royal Panopticon, Leicester Square, London (1853).

By the late 1850s the character of Hill's organs was changing (possibly under the influence of his son, (2) Thomas Hill). Pipe metal was more substantial and of better quality, with the occasional use of spotted metal. Large scales, generous flues, regular nicking, and pressures which (as in the previous period) seldom exceeded 7·5 cm made for bright, strong-toned flue choruses. Reeds were still, usually, on the same pressure as the flues, and this, together with their large scales, ensured a colourful, rather free tone. Equal temperament was now always employed in new organs. Organ cases became less common, though the row of front pipes would usually be richly decorated, and panelling would complete the sides of the organ. Mixtures and mutations were not as lavishly provided as in the 1840s, the Swell would sometimes have more stops than the Great, and upperwork was seldom found in the Pedal divisions of any but the largest instruments. Yet Hill's organs of this period remain remarkably bright in tone and rich in character, and individual registers blend with one another superbly. Important commissions at this time included: St Albans Abbey (now Cathedral, 1860); the Ulster Hall, Belfast (1861); York Minster (1863; nave organ); St Andrew's Cathedral, Sydney (1866); and Melbourne Town Hall (1870).

It is difficult to form an adequate impression of William Hill's best work because so many of his organs have been destroyed or altered beyond recognition. Nonetheless, the instruments in Ashridge and Ulster Hall, and those at Christ's Hospital, Horsham (1830), St Mary-at-Hill, City of London (1848), Kidderminster Town Hall (1855) and St John's, Hyde Park Crescent, London (1865), are representative.

(2) **Thomas Hill** (*b* London, 8 Jan 1822; *d* London, 22 Oct 1893). Son of (1) William Hill. Hill & Son's work continued with little change in character following William Hill's death. The firm enjoyed considerable prestige, built many major organs (including the vast Sydney Town Hall organ – in many ways a culmination of the developments of the 1840s) and became perhaps slightly old-fashioned in outlook. Some modest progress was made along the lines laid down in William Hill's last years. A low pressure was still customary for the fluework

(7·5 cm at Sydney Town Hall) but it became usual to place chorus reeds on a higher pressure in the largest instruments (normally 12·5 cm) and even to provide an additional large open diapason on the same pressure. There was a slow extension of the use of strings, undulating registers and orchestral voices, and, as a result, Choir and Solo divisions became larger and were occasionally enclosed in a swell box. Large organs more commonly had mixed actions – tracker, pneumatic lever and tubular pneumatic – though tracker remained the norm until the 1880s. Electric action was first tried about 1890. Consoles became more elegant, with angled jambs and overhanging keys; it was not until Thomas Hill's last years that pneumatic pistons became usual for even the largest instruments.

Significant organs included Manchester Cathedral (1871), Worcester Cathedral (1874; transept organ), Adelaide Town Hall (1877), Cambridge Guildhall (1882), Lichfield Cathedral (1884), Westminster Abbey (1884), Sydney Town Hall (1886–90), King's College Chapel, Cambridge (1889), Birmingham Town Hall (1890), Queen's Hall, London (1893), and Peterborough Cathedral (1893). Apart from Sydney Town Hall, most of Thomas Hill's larger instruments have been either destroyed or rebuilt beyond recognition, although smaller organs survive in many churches.

(3) **Arthur George Hill** (*b* London, 12 Nov 1857; *d* London, 16 June 1923). Son of (2) Thomas Hill. He was educated at Westminster School and Cambridge, and took the degree of *docteur ès lettres* at the University of Lille with a dissertation on Christian art in Spain. He was an accomplished draughtsman, as evidenced in his two-volume *The Organ-Cases and Organs of the Middle Ages and Renaissance* (London, 1883–91/*R*) and in the many cases which he designed for organs built by the Hill firm. Among his designs should be mentioned the case for Sydney Town Hall with its 32′ front (1886), Chichester Cathedral (1888), Peterborough Cathedral (1904) and Beverley Minster (1916).

Hill was in partnership with his father and in 1893, on his father's death, became senior partner. During the next few years there was a marked development in the tonal character of the firm's organs, which now entered an 'Edwardian' phase. The former vigour and colourfulness diminished; flue choruses became more refined, reeds smoother, flutes a little bland; mixture work was less brilliant and pressures were slightly increased all round. Solo and Swell divisions became larger and Pedal registers were seldom of higher pitch than 8′. The firm's consoles, with solid ivory stop-knobs, ivory tell-tales, moulded key slips, and highly polished woodwork suggested a degree of opulence which earlier work had lacked. Yet by comparison with the work of many contemporary organ builders (e.g. Willis or Harrison) the balance and proportion of A.G. Hill's organs faithfully reflected the classical origins of the firm's tradition. The increasing use of tubular pneumatic action and the provision of pneumatic accessories marked a significant change, but as late as 1905 Hill maintained that tracker action was best for smaller instruments.

Among the firm's most important instruments built during A.G. Hill's direction are Middlesbrough Town Hall (1898), Eton College Chapel (1902), All Saints', Hove (1905), Selby Abbey (1909), Chester Cathedral (1910) and Beverley Minster (1916). All these survive, though only those at Middlesbrough and Hove are without significant alteration.

In 1916 the Hill firm was amalgamated with Norman & Beard (*see* HILL, NORMAN & BEARD).

NICHOLAS THISTLETHWAITE

**Hill (ii).** English firm of violin and bow makers, restorers and valuers. Joseph Hill (1715–84) was a pupil of Peter Wamsley in Piccadilly, London, before he established himself at the sign of the 'Violin' in Angel Court, Westminster, and in 1762 at the 'Harp and Flute' in Haymarket. At the latter address he made many violins, violas and especially cellos. His instruments were of all qualities; he was capable of refined and elegant workmanship, though more often there are signs of haste. The cellos are made on a good pattern with ample air-space, and have been praised. Of Joseph Hill's five sons the elder two were quite well known as violin makers. William Hill (1745–90), no doubt after assisting his father, opened his own shop in Poland Street and largely followed his father's patterns. By contrast, the first Lockey Hill (1756–1810) was a prolific maker mostly of inferior instruments, all rather scooped towards the edges and the cellos a little undersized.

Henry Lockey Hill (1774–1835), the son of Lockey Hill, is usually known as 'the second Lockey Hill'. Until about 1810 he worked for John Betts; as Betts was London's leading dealer at the time Hill would have seen many fine Italian instruments, learnt to appreciate the superiority of Stradivari, and certainly become well acquainted with Vincenzo Panormo. Hill's shop was in Brandon Road, Newington Causeway, Southwark, as is often recorded in pencil on the interior of his instruments. He made many violins and a fair number of cellos; the best of them show a high standard of workmanship and are among the finest of all English instruments, with superior tonal qualities and varnish similar to Panormo's. He was assisted by his elder son Joseph (*c*1805–1837), a talented craftsman.

William Ebsworth Hill (*b* 20 Oct 1817; *d* 2 April 1895), a son of the second Lockey Hill, was a highly respected craftsman and authority on old instruments. He made a few violins but was much more a specialist in restoration, in which his work was a turning-point. Before him in England all was butchery; after him, and especially under the supervision of his sons, came an era when thousands of the finest string instruments were saved by a combination of ingenuity and meticulous workmanship. At his shop in Wardour Street, Hill pioneered the techniques of restoration with a unique expertise.

The legacy of William Ebsworth Hill's experience and authority was developed by his four sons, William Henry (*b* 3 June 1857; *d* 1927), Arthur Frederick (*b* 25 Jan 1860; *d* 5 Feb 1939), Alfred Ebsworth (*b* Feb 1862; *d* 21 April 1940) and Walter Edgar (*b* 4 Nov 1871; *d* 27 April 1905). The firm moved from Wardour Street to 38 New Bond

Street, and then in 1895 to a new building at number 140 almost opposite. In addition, workshops were established at Hanwell in west London. No praise can be too high for the contribution of this unique firm to the history of the violin and its accessories. Their repair workshop, at first staffed by French craftsmen from Mirecourt and closely supervised by the brothers, repaired thousands of the finest instruments that now exist. The Hills's connoisseurship was unrivalled and was reflected in several publications which form the basis of knowledge of old string instruments. Short monographs on the 'Messiah' and 'Tuscan' Stradivari violins (1891) were followed in 1892 by a more substantial volume, a biography of Maggini. The first edition of the invaluable *Antonio Stradivari: his Life and Work* appeared in 1902 (2/1909/R) and *The Violin Makers of the Guarneri Family* in 1931. Alfred Ebsworth Hill was the world's leading expert on old violins. His memory for instruments was legendary, and his judgment concerning authenticity was unchallenged. His musical interests were extremely broad and included much research and documentation.

In addition to restoration work the Hill workshops produced fine new instruments, partly in the French tradition and perhaps never quite reflecting their intimate knowledge of the great Italians. Materials and workmanship were invariably the finest, and the firm also manufactured cases. Between 1939 and 1948 the firm fulfilled a long-standing wish of the Hill brothers to make a bequest to the British nation, presenting to the Ashmolean Museum in Oxford a number of exquisite violins, viols, bows, guitars and citterns, including the celebrated 'Messiah' Stradivari violin of 1716 (*see* STRADIVARI, fig.2).

The Hill bow workshop occupies a significant place in the history of craftsmanship. Although bows stamped with their brand had been sold since the mid-19th century, a workshop producing bows exclusively for the firm appears not to have been established until the 1890s. Among the early makers who supplied bows to the firm, James TUBBS and Samuel Allen stand out. Using the work of Allen as a point of departure, a team of bow makers (William C. Retford, William Napier and his son Frank, William Johnston, Sidney Yeoman and Charles Leggatt) developed a bow which combined exceptional craftsmanship with grace of line. The Hill bow not only set new standards for workshop-produced bows but also established a style, uniquely English, which has not been surpassed in consistency of quality. Most of the bows produced between 1920 and 1970 have a letter and two digit number stamped on the lower facet of the butt under the frog. These marks have often wrongly been thought to indicate the maker; the digits designate the year of manufacture, with the letter serving as a bench mark to coordinate the frog and stick. After 1900 the heads are invariably fitted with silver or gold facings. The frogs of many bows were set into a recessed track in the butt, a practice which has been adopted by many contemporary makers. The grading of the bows was largely determined by the quality of pernambuco used in each stick and reflected by the style and extent of the mountings. Production of the lower-grade bows seems to have been discontinued around 1950. Bows stamped in the 19th century usually carry the brand W.E. HILL, while the series of brands HILL, H. & S, W.E.H. & S and W.E. HILL & SONS was inaugurated in the 20th century.

The Hill traditions were maintained under the direction of (Albert) Phillips Hill (*b* 30 Sept 1883; *d* 25 March 1981) and his son Desmond (d'Artrey) Hill (*b* 5 Dec 1916) as well as Desmond Hill's sons Andrew Philip Hill (*b* 3 July 1942) and David Roderick Hill (*b* 28 Feb 1952). Phillips Hill continued to make instruments well into his 90s. In 1974 the firm moved its headquarters from London to Havenfields, an 18th-century house at Great Missenden, Buckinghamshire. The old firm ceased operations in 1992, but was succeeded by D.R. Hill & Son (still at Havenfields) and W.E. Hill (run by A.P. Hill at Aylesbury, Buckinghamshire).

Other members of the Hill family were distinguished in the same or related fields, but they were apparently unconnected with the firm. Henry Hill (1781–1839), a grandson of Joseph Hill, was an instrument maker (particularly of flutes and clarinets), music seller and publisher. He worked in partnership with TEBALDO MONZANI for many years, and a number of superbly finished ivory flutes with silver fittings survive to testify to his excellent craftsmanship. Another Henry Hill (*b* London, 2 July 1808; *d* London, 11 June 1856), a son of Henry Lockey Hill, was a leading viola player at the Royal Italian Opera and in Philharmonic Society and oratorio concerts in London, and a member of the Queen's Private Band. He made a name for himself particularly in chamber music, and was the viola player for the Beethoven Quartett Society (1845–52) and compiled the society's set of programmes, *Honor to Beethoven*, which placed quotations from English poetry alongside historical information on the quartets. He made the acquaintance of Berlioz and played the solo part in *Harold en Italie* for its first London performance, 7 February 1848. Berlioz, in *Les soirées de l'orchestre*, wrote of him and his incomparable instrument, which was by the English maker Barak Norman.

A Frederick Hill (*fl* ?1830–40; *d* ?Paris), who may have been related to this family, was a celebrated flautist associated with the Philharmonic Society.

CHARLES BEARE, ARTHUR F. HILL, JAAK LIIVOJA-LORIUS, CHRISTINA BASHFORD

**Hill, Alfred (Francis)** (*b* Melbourne, 16 Dec 1870; *d* Sydney, 30 Oct 1960). Australian composer and conductor. A leading figure in the first generation of Australian and New Zealand composers, he enjoyed considerable recognition. His father Charles, a hat maker and talented violinist born in Bristol in 1832, married Eliza Ann Hulbert in 1852. They emigrated to Australia in the year of their marriage and eventually settled in Wellington, where their home became a centre of intense musical activity. Alfred made rapid progress on the cornet, later turning to the violin and the viola, which became his principal instruments.

In 1885 the visiting Hungarian violin virtuoso, Ede Reményi, advised Alfred's father to send his talented son to the Leipzig Conservatory. From 1887 to 1891 Hill studied in Leipzig with Gustav Schreck (harmony) and Hans Sitt (violin), winning the Helbig prize for distinguished students before his graduation. Hauptmann and

Jadassohn's strict compositional system of remained with him throughout his career. While in Germany Hill played the violin in the Gewandhaus Orchestra under Carl Reinecke and distinguished guest conductors such as Brahms and Tchaikovsky. His diary contains pertinent analyses of the styles of leading string players such as Henri Petri and Joseph Joachim. His first compositions, including *Slumber-Song* and the 'Scotch' Sonata were published in Leipzig.

In 1892 he returned to New Zealand to teach and perform. He conducted the Wellington Orchestral Society until 1896 when tensions between himself and the players reached a climax following a public fracas over the visiting pianist, Antoni Katski (known as Antoine de Kontski). (Katski, who advertised himself as the only living pupil of Beethoven, indulged in sensational actions such as playing the piano from under a blanket.) Despite this episode, Hill required a fine reputation as a performer and composer. His cantata, *Hinemoa*(1896), though clothed in European harmonies, was the first work built around a Maori legend. A lifelong respect for Maori culture led to subsequent compositions such as the worldwide success, *Waiata poi* (a song made famous by Peter Dawson among others), *Waiata Maori*, the *Maori Rhapsody* and the String Quartet no.2.

After resigning from the Wellington Orchestral Society, Hill played briefly in the touring ensemble of his friend and supporter, Ovide Musin, until the company dissolved. He settled in Sydney where, in 1897, Hill married Sarah (Sadie) Brownhill Booth, a New Zealander. The next year he became the conductor of the Sydney Liedertafel. *Lady Dolly* (1900) began a series of light romantic operas that captured the taste of contemporary audiences. *Tapu*[Taboo] (1903) and A *Moorish Maid* (1905) followed. Hill's *Commemorative Ode*, conducted by the composer, opened the Christchurch International Exhibition of 1906–7. In 1914 he formed the short-lived Australian Opera League (Sydney) with Fritz Hart to encourage the composition of indigenous works. His *Giovanni, the Sculptor* and Hart's *Pierrette* were performed to general acclaim. He was appointed professor of harmony and composition at the New South Wales State Conservatorium in 1916, a post he held until 1934. Although he lived and worked in Australia, he continued to visit New Zealand to write film music (such as *Rewi's Last Stand*, 1939), give concerts and visit his family. His first marriage ended in 1921 and later that year he married Mirrie Irma Solomon, a former pupil who became a composer in her own right.

Hill developed strong interests in Australian Aboriginal and New Guinea music, and in Australian folksong, publishing a number of collections. His major compositions include *Joy of Life*, Symphony for Chorus and Orchestra (1941), *Welcome Overture* (1949) and the 'Australia' Symphony (1951). Regarded as 'the grand old man of Australian music', Hill constantly campaigned for the recognition of Australian composers. Concerts in his honour were performed in Sydney in 1950 and 1959. Essentially a miniaturist, he was at his most accomplished when writing for strings. His style remained anchored in the late 19th century, but exhibited a lyrical freshness particularly evident in the smaller-scale works.

WORKS
(*selective list*)

STAGE

The Whipping Boy (comic op, A. Adams), 1895; frags., Wellington, 1896

Lady Dolly (romantic comic op, M. Browne), 1898; Sydney, 31 March 1900

Tapu, or The Tale of a Maori Pah (romantic op, 2, Adams, rev. J.C. Williamson), 1902–3; Wellington, 16 Feb 1903

A Moorish Maid, or The Queen of the Riffs (comic op, 2, J.Y. Burch), 1905; Auckland, 26 June 1905

Giovanni, the Sculptor (romantic comic op, 3, H. Callan), 1913–14; Sydney, 3 Aug 1914

Teora: the Enchanted Flute (grand op, 1, Hill), 1913; Sydney, 23 March 1929

The Rajah of Shivapore (comic op, 2, D. Souter), 1913; Sydney, 15 Dec 1917

Auster (romantic op, 3, E. Congeau), 1919; concert perf., Sydney, 31 Aug 1922; staged, Melbourne, 1935

The Ship of Heaven (musical fantasy, 2, H. McCrae), 1923; frags., Sydney, 1923; fully staged, Sydney, 7 Oct 1933

The Pacific Flight

INSTRUMENTAL

Orch: Sym. no.1 'Maori', 1896–1900; Tpt Conc., 1915; Vn Conc., 1932; Va Conc., 1940; Pf Conc., 1941; Sym. no.2 'Joy of Life', 1941 [after Life, 1912: see SOLO VOCAL]; Hn Conc., 1947; The Moon's Gold Hn, orch/str (1951); Sym. no.3 'Australia', 1951; Sym. no.4 'Pursuit of Happiness', 1955; Sym. no.5 'Carnival', 1955; Sym. no.6 'Celic', 1956; Sym. no.7, e, 1956; Sym. no.8 'The Mind of Man', A, str, 1957; Sym. no.9 'Melodious', E, str, 1958; Sym. no.10, C, 1958; Sym. no.11, A, str, n.d.; Sym., a, n.d.; Sym. no.12 'The Four Nations', E♭, str, n.d.; many small tone poems, lyric pieces, arrs. of chbr/vocal pieces

Chbr and solo inst: Wind Septet, 1950; Sonata, b, vc, pf; 72 pf pieces, mostly miniatures; 6 sonatas, vn, pf; works for str qt

VOCAL

Choral: The New Jerusalem, 1892; Hinemoa (Maori legend, A. Adams), 1896; Tawhaki, 1897; Mass, E♭, 1931; many part songs

Solo: Life, E♭, 8 solo vv, pf, qnt, 1912; many songs, incl. Maori settings: Tangi, Waiata a roha, Waiata Maori, Waiata poi; Australian poetry settings

MSS in State Library, NSW

J.M. THOMSON

**Hill, David (Neil)** (*b* Carlisle, 13 May 1957). English organist and conductor. He was educated at Chetham's Hospital School, Manchester, and St John's College, Cambridge, where he was organ scholar. He also studied with Peter Hurford and Gillian Weir. Hill became sub-organist of Durham Cathedral in 1980 and master of the music at Westminster Cathedral in 1982. In 1988 he became organist and master of the music at Winchester Cathedral, and in 1992 artistic director of the Philharmonia Chorus. He has also conducted the Bournemouth SO, the Philharmonia Chorus and Orchestra and the BBC Singers, and is music director designate of the Bach Choir. Among his recordings, those of sacred choral music by Victoria and other composers of the Spanish Renaissance with Westminster Cathedral Choir have received particular critical acclaim. His choral repertory also includes

works by several 20th-century English composers, and he conducted Arvo Pärt's *Passio* in the 'Emerging Light' series of concerts at the South Bank in London.

IAN CARSON

**Hill, Edward Burlingame** (*b* Cambridge, MA, 9 Sept 1872; *d* Francetown, NH, 9 July 1960). American composer. His father was an accomplished lieder singer and a friend of the distinguished Boston music critic William F. Apthorp. While attending Harvard University, Hill pursued his interest in music and studied with John Knowles Paine. After graduation (1894) he spent two years in New York, where he studied the piano with Arthur Whiting; he also received lessons in composition from Widor in Paris in 1898 and took a course in orchestration from Chadwick at the New England Conservatory in 1902. He taught theory and the piano in Boston until 1908, when he accepted a post in the department of music at Harvard. There he was made full professor in 1928, and later chair of the department, a position he held until his retirement to New Hampshire in 1940. Among his students at Harvard were Leonard Bernstein, Elliott Carter, Virgil Thomson, Ross Lee Finney and Randall Thompson.

Hill's interest in French Impressionist music was reflected in his own compositions and in his book *Modern French Music* (Boston and New York, 1924). Material for the book originated in a series of lectures he gave in 1921 at the University of Strasbourg and at the Congrès d'Histoire et de l'Art at Lyons. His early compositions carry traces of MacDowell's influence, but contemporary critics found the mature style of the tone poem *Lilacs* (1927) evocative of French Impressionism. His style, although eclectic in this sense, had a highly individual stamp that featured clear details and specificity of structure. His later works tended towards more propulsive rhythms and simpler textures; in Jazz Studies for two pianos (1924–35) and the Piano Concertino (1931), he gently parodied the jazz idiom.

Hill was a member of the National Institute of Arts and Letters (elected 1916) and of the American Academy of Arts and Sciences and a Chevalier of the Légion d'honneur.

WORKS

CHARLES H. KAUFMAN

**Hill, Henry** (*b* 14 Oct 1781; *d* London, 23 Jan 1839). English music publisher, music seller and instrument maker. *See under* MONZANI, TEBALDO. *See also* HILL (ii).

**Hill, Jackson** (*b* Birmingham, AL, 23 May 1941). American composer and musicologist. He received his musical training at the University of North Carolina, Chapel Hill (BA 1963, MA 1966, PhD 1970), where his principal composition teacher was Roger Hannay; he also studied composition privately with Iain Hamilton, of Duke University. From 1968 he taught at Bucknell University, Lewisburg, Pennsylvania, where he was conductor of the school orchestra, 1969–79, and chair of the department of music, 1980–90; he was named Presidential Professor of Music in 1996. He was a visiting scholar at Exeter College, Oxford, in 1974–5, and a visiting fellow at Clare Hall, Cambridge, in 1982–3. Hill travelled to Japan on a Fulbright grant in 1977 to study Buddhist liturgical music in Kyoto; he has made a speciality of studying Japanese traditional music and has written several articles on the subject. He has won many composition awards.

Hill's musical style ranges from complex, often experimental procedures in his orchestral and chamber works to the harmonically conservative, utilitarian approach of his many sacred choral compositions. The major influences on his development as a composer have come from Renaissance polyphony and traditional Japanese music. He is the author of *The Harold E. Cook Collection of Musical Instruments: an Illustrated Catalogue* (Lewisburg, PA, 1975) and several scholarly articles on Japanese Buddhist and traditional music.

DON C. GILLESPIE

**Hill, John Walter** (*b* Chicago, 7 Dec 1942). American musicologist. He studied at the University of Chicago (AB 1963) under Howard Mayer Brown, Edward Lowinsky,

Leonard B. Meyer and H. Colin Slim, and received the MA (1966) and the PhD (1972) at Harvard; his influential professors included Nino Pirrotta and John M. Ward. Hill began his teaching career as an instructor at the University of Delaware (1970–71) and from 1971 to 1978 taught at the University of Pennsylvania. He joined the faculty at the University of Illinois in 1978 and was appointed professor in 1984. He served as editor-in-chief of the *Journal of the American Musicological Society*, 1984–6.

Hill's work focusses on Italian music of the 16th and 17th centuries. His research has ranged from an extensive study of the vocal music current in Rome around the turn of the 17th century to biographical and stylistic analyses of F.M. Veracini. Among his interests are source studies, performing practice and the social context of Italian Baroque musical life. He has also been active in developing computer applications for musicology, such as databases and computerized analyses for the texts of Vivaldi's arias.

PAULA MORGAN

**Hill, Karl** (*b* Idstein im Taunus, 9 May 1831; *d* Sachsenberg bei Schwerin, 12 Jan 1893). German baritone. He studied in Frankfurt, making his début in 1868 as Jacob (Méhul's *Joseph*) at Schwerin, where he was engaged until 1890. He sang Alberich in the first *Ring* cycle, at Bayreuth in 1876, and Klingsor in the first performance of *Parsifal* (1882). His repertory included the Dutchman and Hans Sachs as well as Mozart's Count Almaviva, Don Giovanni and Leporello. Signs of insanity forced him to retire from the opera house.

ELIZABETH FORBES

**Hill, Martyn** (*b* Rochester, 14 Sept 1944). English tenor. After being a choral scholar at King's College, Cambridge, he studied at the RCM (keyboard and voice) and with Audrey Langford. The first ten years of his career were mostly concerned with medieval and Renaissance music, often with David Munrow's consorts. After Munrow's death he moved on to the Baroque era and then eventually to the Romantic period, concentrating from the early 1980s on lieder (he contributed admirably to Graham Johnson's complete edition of Schubert song on CD) and 20th-century works while retaining his interest in Baroque repertory. This versatility has allowed him to deploy his well-groomed tenor and innate musicality through a wide range of music. In opera, he has sung Arbace in *Idomeneo* with Harnoncourt at Zürich and the title part in the same work at Glyndebourne (1985), for whom he also sang Belmonte (1988). For Scottish Opera he was Peter Quint (*The Turn of the Screw*, 1988). Other roles included Ferrando, Flamand (*Capriccio*) and Tom Rakewell. His lengthy discography encompasses, among others, Dowland, Purcell, Handel, Mozart, Beethoven, Cherubini, Holst, Finzi (*Dies natalis*, particularly suited to his voice and style), Britten and Holloway.

ALAN BLYTH

**Hill, Norman & Beard.** English firm of organ builders. It was founded in 1916 with the amalgamation of Wm. Hill & Son (*see* HILL (i)) and Norman & Beard Ltd of Norwich. Norman & Beard had been founded as 'E.W. Norman, Organ Builder, Diss' in about 1870. Ernest William Norman (1852–1927) had served a part-apprenticeship with J.W. Walker. After a few years he was joined in business by his brother, Herbert John Norman (1861–1936) and a premium apprentice, George Wales Beard. When Beard became a partner (*c*1886) the firm was known as 'Norman Bros. & Beard'. By the end of the century they had a purpose-built works in Norwich, and reputedly employed 300 men.

The firm's work was progressive. During the 1890s they sub-contracted for Robert Hope-Jones's Electric Organ Co., and when it was obliged to close in 1899 they acquired his electric action patents. H.J. Norman also developed an exhaust-pneumatic action which was extensively used by the firm throughout the first half of the 20th century (its first successful application was in 1888). Hope-Jones's tonal ideas had some influence on the firm and around 1900 they built a number of organs to his schemes. Their own characteristic instruments had something in common with Walker (broad, opaque diapasons and close-toned flutes) and even Willis (smooth, powerful reeds, on heavy pressures). The firm's output was considerable and included such instruments as St Catharine's College, Cambridge (1894), the five-manual organ for Norwich Cathedral (1899), the Royal College of Organists, London (1903), Winchester College Chapel (1907), Lancaster Town Hall (1909), the Usher Hall, Edinburgh (1914) and Johannesburg Town Hall (1915),

besides numerous church organs in East Anglia, the Midlands and southern England.

The amalgamation with Hill & Son (forced upon both firms by declining trade during World War I) led to the sale of the Norwich works. Norman & Beard moved to Hill's factory in York Road, Islington. For a time the two staffs worked alongside each other in uneasy co-existence, not helped by the brooding presence of Dr Hill who continued as director until shortly before his death in 1923, when John Christie acquired the business. Christie and H.J. Norman, assisted by his son Herbert La French Norman (*b* 1903) led the firm in a new direction.

Christie was keen to enter the growing market for theatre organs. The result was the 'Christie Unit Organ', built along similar lines to a Wurlitzer (*see* CINEMA ORGAN). The firm built a series of these extension organs during the inter-war years, including the Regal Cinema, Marble Arch, London, the Gaumont Theatre, Paris, and the Dome Concert Hall, Brighton (1936), which survives. Extension was also applied (more sparingly) to church organs. Tonally, these instruments avoided the worst extremes of the period and seldom lost sight of the importance of choruswork and blend. Much of Hill, Norman & Beard's work at this time was reconstruction. They electrified the Hill organs in Cambridge Guildhall (1925) and Peterborough Cathedral (1930) and built largely new instruments for Southwell Minster (1933) and Norwich Cathedral (1941). The Norwich instrument, with its 11-stop Positive and extensive use of mixture-work, showed the first signs of a move away from the Edwardian model which had dominated cathedral organ design for four decades.

In the years after World War II, under the direction of Herbert Norman, Mark Fairhead (tonal director) and later John Norman (*b* 1932), the firm became one of the principal supporters of the first phase of the organ reform movement in England. The rebuilding of the instrument in St John's College, Cambridge (1955), including the addition of a horizontal Trumpet (Trompeta real) and a wide-scaled Cornet, was significant, and was followed by a series of other new or rebuilt organs with electro-pneumatic action and neo-classical tonal schemes, including Llandaff Cathedral, Cardiff (1958), Hyde Park Chapel, Kensington, and Bradford Cathedral (1961), Emmanuel College, Cambridge (1964), Ellesmere College (1969), Gloucester Cathedral (1971), and St Mary's, Stafford (1974). Many of these instruments benefited from casework designed by Herbert Norman in a contemporary style.

Hill, Norman & Beard had built a small tracker instrument (with imported pipework) for Susi Jeans as early as 1936. Others followed, from the late 1950s onwards, culminating in the organs for the Royal Hospital Chapel, Chelsea (1978), and Radley College (1980). Under the Normans the firm was one of the first to use solid-state relays (1963), and after Herbert and John Norman's retirement in 1974 the new managing director, Frank Fowler, pioneered the application of memory and playback facilities to organ actions. The firm closed in 1998.

NICHOLAS THISTLETHWAITE

**Hill, Peter** (*b* Lyndhurst, 14 June 1948). English pianist and teacher. He took a degree in music at Oxford University and went on to study the piano with Cyril Smith and Nadia Boulanger at the RCM. In 1974 he made his recital début at London's Wigmore Hall. Alongside his Classical and 20th-century repertory, he is a constant champion of new music, having given the first performances of Nicholas Sackman's *Ellipsis* (1976), Howard Skempton's *Trace* (1980), Nigel Osborne's Sonata (1981) and Douglas Young's *Dreamlandscapes* (1984). His musical partnerships include the contemporary music ensemble Dreamtiger and duos with the violinist Peter Cropper, the pianist Benjamin Frith and the pianist and composer George Benjamin. In 1994 he completed a seven-CD cycle of the piano music of Messiaen, made with the composer's guidance. Hill was appointed lecturer at the University of Sheffield in 1976, becoming professor there in 1994. He has edited *The Messiaen Companion* (London, 1995).

JESSICA DUCHEN

**Hill, Richard S(ynyer)** (*b* Chicago, 25 Sept 1901; *d* Naples, FL, 7 Feb 1961). American librarian and musicologist. His early training was in Egyptology and psychology. In 1929 he went to Cornell for further study in psychology, but came under the influence of Otto Kinkeldey who had just become professor of musicology there. What had been Hill's recreation and private study was soon transformed into the vocation to which he became dedicated. In September 1939 he entered the music division of the Library of Congress and before long became head of its reference section.

The breadth of Hill's education sharpened a naturally keen and fertile mind which, allied to very wide sympathies, a vast knowledge of musical sources and phenomenal industry, equipped him well for his life's work. As reference librarian for over 20 years, Hill won an international reputation for the painstaking and very detailed replies he sent to inquirers. In 1943 he became editor of *Notes* (the journal of the Music Library Association of America) which had existed as an occasional bulletin of restricted circulation and interest. Hill proved to be an editor of genius, who could inspire a devoted team of collaborators. Initially at his own expense, Hill enlarged – and revolutionized – the scope of *Notes* until it exercised a unique influence in the world of music libraries and beyond. He saw the function of *Notes* as threefold: as a global record, based largely on the Library of Congress's intake, of current music, musical literature and discs; as a generous forum for the most significant critical reviews; and as a medium for presenting his own philosophy of music librarianship, which he believed should be a creative, seminal force reaching far beyond the traditional routine of conservation and administration. Hill's own regular contribution 'Notes for *Notes*' was the vehicle for many cogent and controversial ideas which provoked a lively reaction.

When in 1951 the International Association of Music Libraries elected its first president, Hill was the obvious choice for this office, which he held until 1955. He brought to it the qualities of energy, vision and strength of purpose which characterized all he did. In close collaboration with Vladimir Fédorov, the association's first secretary, he laid the foundations of its future expansion. He was especially concerned with the early planning for the International Inventory of Musical

Sources (*RISM*), both in Europe and in the USA, where he worked hard to establish the complex organization required to coordinate its rich but widely scattered holdings. Hill was a man of great generosity, modest and self-effacing by nature. He had a passion for truth and accuracy, and commanded a trenchant if occasionally tortuous style. An indefatigable reviewer, with an exceptional range of expert knowledge, he was impatient of slovenly work, muddled thinking and pretentiousness. He tempered his criticism with flashes of humour or a neat, ironic phrase.

ALEC HYATT KING

**Hill, Roger** (*d* 2 March 1674). English singer and composer. He and Edward Coleman both sang the part of Alphonso in Davenant's *The Siege of Rhodes* in 1656. In 1661 he was sworn in Gentleman of the Chapel Royal and served as such until his death. He may have been the 'Mr Hill' whom Pepys employed for a time 'to teach me to play on the Theorbo, but I do not like his play nor singing, and so I found a way to put him off' (Diary, 7 Nov 1661). John Playford printed seven songs by him, mainly in RISM 1669[5] and 1673[4]. One at least, *Poor Celia once was very fair*, maintained its popularity into the 18th century; and *Admit, thou darling of mine eyes*, is printed in a modern edition (MB, xxxiii, 1971).

IAN SPINK

**Hill, Stanley.** *See* GAY, NOEL.

**Hill, Ureli Corelli** (*b* ? Hartford, CT, 1802; *d* Paterson, NJ, 2 Sept 1875). American violinist and conductor, son of Uri K. Hill. In 1811 his parents separated and he went with his father. From 1828 to 1835 he was alternately leader and conductor of the New York Sacred Music Society. In 1835–7 he studied with Spohr at Kassel; after his return to New York he was president (1842–8) of the newly founded Philharmonic Society, which he conducted at its inaugural concert on 7 December 1842 and in seven further concerts during the first five seasons (including the first American performance of Beethoven's Ninth Symphony, on 20 May 1846). Meanwhile he edited *The New York Sacred Music Society's Collection of Church Music* (New York and Albany, 1843). In 1847 he moved to Cincinnati but after three years in Ohio river cities returned to the New York area as a violinist in the Philharmonic until 1873. Later business and artistic failures caused him to commit suicide.

ROBERT STEVENSON

**Hill, Uri** [Ureli] **K(eeler)** (*b* ?Rutland, VT, 1780; *d* Philadelphia, 9 Nov 1844). American music teacher and composer, father of Ureli Corelli Hill. From about 1800 to 1805 he lived at Northampton, Massachusetts, where he compiled his first collections of sacred pieces (1801) and of secular songs (1803). At Boston in 1805–10 he was organist at the Brattle Street Church and compiled another tune book, *The Sacred Minstrel* (1806). In 1810 he moved to New York, where he founded a Handelian Academy in 1814 (renamed the American Conservatorio, 1820) and compiled *The Handelian Repository* (1814) and *Solfeggio Americano . . . with a Wide Variety of Psalmody* (1820) for the pupils there. From about 1815 he engraved light music for the publisher Adam Geib, and from 1822 until his death taught in Philadelphia. Hill was most significant as a composer and arranger of tune books. However, in New York he advertised himself (18 October 1810) as the 'first performer on violin in America'.

ROBERT STEVENSON

**Hillanis** [Yllianis, de Yllanes, de Lannis, de Lyanas, de Aragonia], **Johannes** (*b* ?Gerona, *c*1460; *d* ?Spain, after 1517). Spanish singer and composer. An Augustinian canon from the monastery of S María del Olivo in the diocese of Gerona, he had joined the papal chapel by July

1492 (listed first as 'Jo. de Aragonia' then as 'Jo. de Lannis'). It is also possible that he was the singer identified by D'Accone as 'Giovanni degli Ans' and by Rifkin as 'Johannes de Glianas' who served at Florence Cathedral from April 1486 until June 1492. Hillanis remained in the papal choir for at least 25 years, receiving many benefices in Spain, and rising to the position of senior singer and dean of the College of Singers by 1517. He disappears from the records after then and it is possible that he was obliged to leave the choir and return to Spain because of his poor eyesight (he could not see the music in the choirbooks from which the choir performed).

The only extant work by Hillanis is a four-voice *Missa domenicalis* contained in a manuscript written for the use of the papal singers (*I-Rvat* C.S.49). The arms of Julius II appear on the first page of the mass and the work was probably written during his reign (1503–13). It is based on different Ordinary chants which are quoted and paraphrased mostly in the tenor, but without any of the elaborate canonic and contrapuntal devices to be seen in other masses of the late 15th and early 16th centuries.

**Hillbilly music.** A term used for COUNTRY MUSIC until at least World War II, and now used principally by scholars to describe the music during the years 1920–41 before it became nationally popular and commercial. 'Hillbilly' has been used from about 1900 to describe the backwoods inhabitants of the South, and originally had a pejorative connotation. It was first applied to rural music in 1925 when the producer Ralph Peer of Okeh Records named Al Hopkins's band the Hillbillies. Other early hillbilly performers included Charlie Poole and the North Carolina Ramblers, Gid Tanner and the Skillet Lickers, and Dr. Humphrey Bate and the Possum Hunters; the original Carter Family was one of the last groups so described. The term came to be applied to country music as a whole, although record catalogues did not make general use of it. Since the 1960s the term has been used to describe performers and styles adhering to pre-World War II rural or folklike sounds; it encompasses traditional songs, non-electric instruments, and rural imagery (e.g. in the performances of Roy Acuff, Grandpa Jones, and Wilma Lee and Stoney Cooper).

BILL C. MALONE/RONNIE PUGH

**Hillborg, (Per) Anders** (*b* Stockholm, 31 May 1954). Swedish composer. He studied counterpoint, composition and electronic music at the Royal College of Music in Stockholm with Bucht, Rosell, Mellnäs and Pär Lindgren (1976–82) and was also greatly influenced by Ferneyhough, a guest teacher there. Apart from a spell in 1990 as professor of composition in Malmö, Hillborg has been a fulltime freelance composer since 1982. A feature particularly characteristic of his music is microtonal harmony: in *Celestial Harmonics* each of the 17 solo passages has its own tuning (up to a semitone higher or lower than the norm), and in *Clang and Fury* the orchestra is divided into three sections, the largest of which is dominated by the brass section tuned at 440 Hz; one of the remaining sections is tuned at 449 Hz, the other at 431. He frequently sets aggressiveness and rawness against a modal sweetness, and there is often a drastic humour which easily tips over into tragedy. *Celestial Mechanics* and the Violin Concerto gained second prize at the UNESCO Composer Rostrum in 1992 and 1995 respectively. For the disc *Jag vill se min älskade komma från det vilda* ('I want to see my love come from the wilderness'), performed by the popular singer Eva Dahlgren, he was named Composer of the Year in Sweden.

ROLF HAGLUND

**Hille, Johann Georg** (*d* Glaucha, nr Halle, 1744). German organist and writer on music. His only known position

was as Kantor at St Georg, Glaucha, from 1732 (he should not be confused with the organist of the same name at the Johanniskirche in Leipzig, 1747–66). Hille was acquainted with J.S. Bach, whom he visited in Leipzig some time about 1739; Bach returned the visit to Hille in Glaucha early in 1740. Both trips are confirmed by a letter to Hille from Bach's cousin Johann Elias (see David and Mendel, eds.), who asked Hille to sell him as a gift for Anna Magdalena Bach a linnet which had been trained to sing beautifully and which Bach had admired during his stay with Hille. As a composer Hille has been credited with the chorales in *Einige neue und zur Zeit noch nicht durchgängig bekante Melodeyen zu dem neuen Cöthenischen Gesangbüchlein, dieselbe mit und ohne Generalbass gebrauchen zu können* (Glaucha, 1739); but Ruhnke has shown that some of the 18 melodies had appeared in other collections before 1739 without attribution to Hille, and that more likely he had only added a continuo part. His only work is a brief treatise, *Die uralte und bis auf den heutigen Tag noch fortdaurende musikalische Octaven und Quintenlast erleichtert* (Halle, 1740). It was reprinted among a series of articles meant to discuss why parallel octaves and 5ths were forbidden in music, commissioned by Lorenz Mizler and included in his *Musikalische Bibliothek*, ii/4. Hille's work, however, is not directly related to the question, but rather attempts to establish acoustic as well as musical reasons why parallel octaves and 5ths are permissible, as for example between middle or lower parts in full-voiced keyboard textures. Mizler apparently included the essay in order to condemn it. However, Hille's remarks are not totally erroneous, for he recognized a fact, stated earlier by thoroughbass theorists, for example J.D. Heinichen in *Der General-Bass in der Composition* (Dresden, 1728), that full-voiced realizations at the keyboard permitted and actually could not avoid parallels of these intervals.

GEORGE J. BUELOW

**Hillemacher, Lucien Joseph Edouard.** French composer, brother of PAUL JOSEPH GUILLAUME HILLEMACHER.

**Hillemacher, Paul Joseph Guillaume** (*b* Paris, 29 Nov 1852; *d* Versailles, 13 Aug 1933). French composer. He often worked in partnership with his brother, Lucien Joseph Edouard Hillemacher (*b* Paris, 10 June 1860; *d* Paris, 2 June 1909). The son of the painter Ernest Hillemacher, Paul won numerous prizes at the Paris Conservatoire (where he studied with Bazin), including second prize in the 1873 Prix de Rome and first prize in 1876 with the lyric scene *Judith*. During the next few years he published a number of piano pieces. Lucien, who studied with Massenet at the Conservatoire, also won several prizes, including second prize in the 1879 Prix de Rome and first prize in 1880 with the lyric scene *Fingal*. The brothers' collaboration began in 1879 with two songs, *Le dernier banquet* and *Barcarolle*, and flourished from 1881, when they adopted the pen name of Paul-Lucien Hillemacher. The partnership was chiefly noted for songs and dramatic works, a pattern established in 1882 with the delightful *Vingt mélodies* and the symphonic legend *Loreley*, which won the *prix de la ville de Paris*. One of their songs, *Ici-bas*, was mistakenly published as Debussy's. Their other compositions include oratorios and choral, orchestral, chamber and keyboard works. Apparently all compositional processes were shared; the music reveals no evident division of labour. The brothers also wrote *Charles Gounod … biographie critique* (Paris, 1905, 2/1925). After Lucien's death, Paul produced little, apart from a *tableau musical Fra Angelico* and some instrumental works.

WORKS

*unless otherwise stated, all works written jointly by Paul and Lucien Hillemacher, and all printed works published in Paris*

STAGE

Loreley (sym. legend, 3, E. Adenis), Paris, Châtelet, 1882 (1882)
St Mégrin (oc, 4, E. Dubreuil, Adenis, after Dumas: *Henri III et sa cour*), Brussels, Monnaie, 2 March 1886; vs (1886); excerpts, arr. G. Pierné, as Fantaisie concertante sur St Mégrin, 2 pf (1887); other arrs.
Une aventure d'Arlequin (oc, 1, L. Judicis), Brussels, Monnaie, 22 March 1888 (1888)
Héro et Léandre (incid music, E. Haraucourt), Paris, Chat-Noir, 24 Nov 1893
One for Two (pantomime, 1), London, Prince of Wales, 26 May 1894
Le régiment qui passe (oc, 1, M. Hennequin), Royan, 11 Sept 1894
Le Drac (drame lyrique, 3, L. Gallet, after G. Sand and P. Meurice), Ger. trans. as Der Flutgeist, Karlsruhe, 14 Nov 1896; 1st Fr. perf. Paris, 1942, vs (?1896)
Claudie (incid music, Sand), 1900
Orsola (drame lyrique, 3, P.B. Gheusi), Paris, Opéra, 16/21 May 1902 (1902)
Circé (poème lyrique, 3, Haraucourt), Paris, OC, 17 April 1907 (1907)

By P. Hillemacher: Judith (lyric scene, P. Alexandre [P. Delair]) (1876); Fra Angelico (tableau musical, 1, M. Vaucaire), Paris, OC, 10 June 1924 (1923); Le mystère enchanté (ballet pantomime); Midas (op, 2), mentioned in *SchmidlD*

VOCAL

Choral: La légende de Ste Geneviève (orat), 1886; La Passion (orat), 1887; Les pêcheurs de l'Adriatique (C. Brizeux), male vv, orch/pf (1887); others incl. works for female vv, children's vv
Songs: 20 mélodies (1882); 10 mélodies (1904); Solitudes, 15 Songs (Haraucourt) (1893); over 20 others pubd separately

By P. Hillemacher: 2 motets, chorus, org, no.2 with vn (1881); Poème de la nuit, 6 songs (Adenis), 1v, pf (1881); 4 mélodies (Fr., Eng. texts) (New York, 1921); others

Retraite, pf, orch (1885); La cinquantaine, orch suite (1895); F. Mendelssohn: 5 romances sans paroles, arr. orch (1882); Elégie, vn, vc, pf (1889); 3 pièces, vc, pf (1910); solos with pf acc. for vn, fl, F-tpt, hp; 20 pièces nouvelles, pf (1884); [10] Esquisses musicales, pf (1886); 3 valses, pf 4 hands (1884); other pf, org works

By P. Hillemacher: Suite dans le style ancien, vc (str, fl, ob, bn, 2 timp/tambourins)/pf (1919); 2 pièces nouvelles, vc, orch (1913); Villanelle archaïque, ob, pf (Paris, Brussels, 1926); Impromptu-rêverie, pf, op.5 (1874); Villanelle, XVIIIème siècle (1876); 15 pièces (1878); 3 pièces caractéristiques (1879); 2 pièces pittoresques (1920); other pf, org works; 40 leçons graduées de solfège, opt. pf (Paris, 1923)

JOHN TREVITT

**Hillemacher, Paul-Lucien.** Pen name used by PAUL JOSEPH GUILLAUME HILLEMACHER and Lucien Joseph Edouard Hillemacher.

**Hiller, Ferdinand (von)** (*b* Frankfurt, 24 Oct 1811; *d* Cologne, 11 May 1885). German conductor, composer and teacher. He was the son of a wealthy Jewish merchant and revealed an outstanding talent for music at a very

early age. His principal piano teacher was Alois Schmitt, in his day one of Frankfurt's most discriminating pianists. When he was ten Hiller played a concerto by Mozart at a public concert. Several important artists showed an interest in him, among them Spohr, Speyer, Moscheles and Mendelssohn who became Hiller's closest friend and on whose recommendation he went to Weimar to become one of Hummel's pupils (1825–7). During his stay there he met Goethe, played in concerts at court and at Goethe's home and composed various pieces of incidental music for the Weimar theatres and society. He also accompanied Hummel to Vienna to visit Beethoven on his deathbed. After returning to Frankfurt he continued to study and compose and made occasional concert tours. In 1828 he began a sojourn in Paris lasting almost seven years, during which he gave many concerts and received high praise for his skill as both a pianist and a composer; his success as an organ teacher at Choron's Institution Royale de Musique Classique et Religieuse earned him the name of 'le savant Hiller'.

With a genuine sympathy with their cause, he joined the group of musicians considered progressive at the time and frequently performed their works; some of them, such as Berlioz, Chopin and Liszt, became his close friends. The older generation of composers, including Cherubini, Halévy, Meyerbeer and Rossini, also gave him encouragement. In 1836 he deputized for Johann Nepomuk Schelble as conductor of the Cäcilienverein in Frankfurt and in the following year went to Italy, but his opera *Romilda*, performed in Milan, was not a success. In 1840 he interrupted his stay in Italy for the successful Leipzig presentation of his oratorio *Die Zerstörung Jerusalems*, in which he had Mendelssohn's support. On returning to Rome he made a study of Italy and its people, founded a choral society and, with the support of Baini, undertook research into early Italian polyphony. In 1842–3 he spent a fruitful year in Germany, passing much of his time in the company of Schwind, Gutzkow and in particular Mendelssohn; during this period his reputation as a musician continued to grow. He then replaced Mendelssohn as conductor of the Leipzig Gewandhaus Orchestra (1843–4), which led to a split between them.

In 1844 Hiller was active in Dresden where he founded a series of subscription concerts and composed two operas (like his next three, unsuccessful). His salon was the meeting place for Dresden's intellectual circle, and he enjoyed a close friendship with the Schumanns. He took part in discussions with Devrient and, being then of a liberal political disposition, with Bakunin and Ruge as well; he was virtually a confidant of Wagner whose advice he greatly valued. In 1847 a favourable offer attracted him to Düsseldorf, which had been without a significant musician since the departure of Mendelssohn a decade earlier. His own concerts and those promoted by the municipal authorities enabled him to raise the standard of music there, and he also participated in the city's political life.

From 1850 he was the city Kapellmeister in Cologne, leaving Schumann as his successor in Düsseldorf. He reorganized the music school after the Leipzig model and brought it to an exemplary standard, steadily increasing the number of pupils and attracting a staff of excellent teachers. He directed the Gürzenich concerts, which were held ten times annually, and with many prominent European artists presented music of the Classical and early Romantic repertories, especially that of Mendelssohn. Hiller also played an important role in organizing the Rhenish music festivals, many of whose performances he also conducted, and in addition to these activities made numerous concert tours with which he established his reputation throughout Europe. He was highly esteemed everywhere, particularly in the conservative circles towards which his musical outlook had gradually drifted, for his individuality both as conductor and pianist, and especially as a Mozart interpreter. As an adviser, judge and organizer of performing competitions long having had the support of critics, Hiller exercised considerable influence on music not merely in Germany but as far as Belgium and Holland. Although his rigid views later precipitated a certain amount of opposition from the conservatives as well as from the progressives, and despite difficulties in Cologne, he retained his position there until 1884 when a grave illness forced him to retire. He recommended his close friend Brahms and his pupil Bruch as his successors; Franz Wüllner finally received the appointment, however, and initiated his term in Cologne with concerts of works by Wagner, Liszt and Richard Strauss, all of whom Hiller had avoided. He was active to the end, and in his last year he was made a nobleman and awarded an honorary doctorate.

As a productive, versatile and cultured composer, Hiller occupied a prominent position among his contemporaries; however, Schumann recognized that 'despite mastery of formal techniques' (and occasional originality) his music on the whole 'lacked that triumphant power which we are unable to resist'. His best work is represented by the Piano Concerto op.69, the songs and some of the piano pieces, in particular the Sonata op.47 and the *Ghazèles*. His opera *Die Katakomben* also contains many inspired passages. As a writer associating closely with many leading figures of contemporary cultural life, Hiller displayed in his books and essays a brilliant and objective style; as a generous and benevolent teacher, he was later able to recognize without prejudice the achievements of Wagner and those of Liszt, with whom he had long been estranged as a result of certain hasty, adverse criticism. An indication of Hiller's pre-eminent position in musical life is given by his voluminous correspondence with composers, performers and publishers, which has yet been edited only partially.

WORKS

*printed works published in Leipzig unless otherwise stated*

OPERAS

*all published in vocal score*

Romilda (os, G. Rossi), Milan, Scala, 8 Jan 1839, selected pieces (Milan, *c*1839)

Der Traum in der Christnacht (3, C. Gollmick, after E. Raupach), Dresden, 9 April 1845 (*c*1845)

Konradin, der letzte Hohenstaufen (R. Reinick), Dresden, 13 Oct 1847

Der Advokat (komische Oper, 2, R.J. Benedix), Cologne, 21 Dec 1854

Die Katakomben (ernste Oper, 3, M. Hartmann), Wiesbaden, 15 Feb 1862 (Cologne, 1867)

Der Deserteur (komische Oper, 3, E. Pasqué), Cologne, 17 Feb 1865 (Mainz, 1865)

VOCAL

Die Zerstörung Jerusalems (orat, S. Steinheim), op.24, vs (1840)

Saul (orat, Hartmann), op.80, vs (Düsseldorf, 1858)

Works for solo vv, chorus, orch, incl. Ps xxv, op.60 (Mainz, 1854); Palmsonntagsmorgen, op.102 (?*c*1865); Ostermorgen (E. Geibel), op.134 (Bremen, 1868); Nala und Damajanti (S. Hasenclever), op.150 (London, 1872); Israels Siegesgesang, op.151 (1872);

Loreley, op.70 (?1873); Rebecca, op.182 (Cologne, 1878); Prinz Papagei (music to C. Görner's fairy tale), selected choruses and inst pieces, op.183 (1878); Gesang Heloisens und der Nonnen am Grabe Abelards, op.62 (?c1880); Ver sacrum (Die Gründung Roms) (L. Bischoff), op.75 (?1885); Zum neuen Jahr, op.167

Works for chorus, orch, incl. Gesang der Geister (J.W. von Goethe), op.36 (Berlin, 1847); Das Ständchen (J. Uhland), op.68 (Mainz, 1867); Es muss doch Frühling werden, op.136 (Mainz, 1868); Aus der Edda, op.107 (?c1870); Pfingsten, op.119 (?c1873); Bundeslied, op.174 (1876); Es fürchte die Götter das Menschengeschlecht (Goethe), op.193 (1881)

Works for solo vv, orch, incl. Christnacht, op.79 (?1865); Gudruns Klage, op.101; Frühlingsnacht, op.139 (Mainz, 1869)

Other works: c10 pieces, mixed vv, pf; c80 pieces, mixed/male/female vv unacc.; c12 songs, 4 or more solo vv, pf; c32 trios, 24 vocalises, 3 solo vv, pf; c60 duets, pf acc.; c150 lieder

REINHOLD SIETZ/MATTHIAS WIEGANDT

**Hiller, Friedrich Adam** (*b* Leipzig, *c*1767; *d* Königsberg [now Kaliningrad], 23 Nov 1812). German conductor, composer and tenor, son of JOHANN ADAM HILLER. The only one among his siblings to achieve a musical reputation beyond Leipzig, he was trained in music by his father and by 1783 had given successful performances of sacred and chamber music in Leipzig. In 1789 he made his stage début in Rostock as Romeo in *Romeo und Julie* (perhaps Georg Benda's setting). In the following year he was appointed director to a music society in Schwerin where his incidental music for the allegorical drama *La Biondetta* was enthusiastically received. When the Nationaltheater in Altona, near Hamburg, was completed (1796) he was summoned as music director of its carefully selected orchestra, and in 1799 took over the musical direction of the theatre in Königsberg. There, in summer 1812, he delivered lectures on music which showed him to be a thoughtful and well-educated man (*SchillingE*).

Hiller wrote several stage works, although only a few items survive. His vocal works closely resemble his father's, and his most important instrumental compositions, the string quartets, are described by Gerber as 'light and pleasant'.

WORKS

STAGE

*MSS lost unless otherwise stated*

La Biondetta (allegorical drama, 4, K.C. Engel), Schwerin, 14 July 1790, addl songs *B-Bc*, lib pubd

Adelstan und Röschen (operetta, 2, J.F. Schink), Güstrow, Rathaus, 6 Sept 1792, lib pubd

Allegorischer Prolog, Altona, 1797

Das Nixenreich (op, 3, H. Schmieder), int for Kauer: Das Donauweibchen, Altona, 1801, arias arr. pf (Hamburg, 1802)

Das Schmuckkästchen (Spl, 1, ?E. Jester), Königsberg, 1804

Die drei Sultane (Sultaninen) (Spl, 1, E. Bornschein), Königsberg, 1809

Hercus Monte (incid music), 1810

Friedrich von Schillers Manen (Festspiel, 1), 1812

ELLWOOD DERR

**Hiller, Johann Adam** (*b* Wendisch-Ossig, nr Görlitz, 25 Dec 1728; *d* Leipzig, 16 June 1804). German composer and writer on music.

1. Life. 2. Character. 3. Writings. 4. Music.

1. LIFE. His father, a schoolmaster and magistrate's clerk, died when Hiller was six; he was taught the rudiments of music by his father's successor, and in 1740 went to the Gymnasium in Görlitz. He had to leave in 1745 owing to lack of funds, and earned his living as a clerk until in 1746 he won a scholarship to the Kreuzschule in Dresden. There he took a keen part in the flourishing musical life of the city. He studied keyboard playing and thoroughbass with Gottfried August Homilius, and came to know and admire the works of Johann Adolf Hasse and C.H. Graun, whose *galant*manner became his musical ideal. Apart from his musical activities he already had wide-ranging intellectual interests. In 1751 he matriculated at Leipzig University to read law, and music temporarily became 'a companion in his leisure hours and a breadwinner' (Rochlitz). Hiller was at home on almost every instrument without excelling on any, and laid more importance on being an all-round ensemble player and a good singer. He played the flute and sang bass in Leipzig's principal concert undertaking, the Grosses Concert, and also wrote what were, apart from occasional youthful attempts at composition, his first works: half a dozen symphonies, church cantatas and German arias, according to his autobiography; a setting of C.F. Gellert's Singspiel *Das Orackel*, begun in 1754, was never completed. At the same time his literary bent showed itself with the publication in 1754 of his essay *Abhandlung über die Nachahmung der Natur in der Musik*. Also in that year, through the intervention of Gellert (whom he greatly admired), he obtained a position in Dresden as a steward to the young Count Brühl, with whom he returned to Leipzig four years later. During this period he became subject to bouts of depression (diagnosed, typically for the time, as hypochondria) accompanied by severe physical discomfort, which forced him to give up his post in 1760. But he composed various works, including the *Choralmelodien zu Gellerts geistlichen Oden und Liedern* (1761), and edited the anthology *Wöchentlicher musikalischer Zeitvertreib*. Count Brühl had provided him with a pension, but he drew it for only one year and then turned to earning his living with translations from French and English, mainly of historical works.

From 1762 Hiller played an increasingly active role in the musical life of Leipzig. First he was persuaded to mount a series of subscription concerts, which were so successful that the following year he was entrusted with the direction of the Grosse Concert-Gesellschaft (which had been suspended during the Seven Years War). He remained in this position until 1771, and set about raising the standard of the orchestra and providing more varied programmes, principally by introducing vocal music. This brought out very clearly his concern for the training of young musicians: the singers Corona Schröter and Gertrud Elisabeth Schmeling (later Mara) both received his support and became the chief attractions at his concerts. Soon afterwards he founded a song school to put Leipzig singing on a broader basis. In 1766 he began an enduring partnership with the poet Christian Felix Weisse which resulted in the establishment of a German national opera. At the request of the impresario H.G. Koch, he and Weisse first contributed to modifications of Johann Stanfuss's *Der Teufel ist los* and *Der lustige Schuster*, both of which had been based on English ballad operas by Charles Coffey; these enjoyed instant success. He later took French *opéra comique* as a model, often portraying the contrast between rural virtue and courtly artificiality. *Die Jagd*, first performed in 1770, proved to be the greatest and most enduring of his operas; his last work for Koch was *Die Jubelhochzeit* (1773).

In the 1760s Hiller also made a name for himself as editor of the *Wöchentliche Nachrichten*, for which he wrote most of the reports and essays. His song school, having begun with only a few boys, was expanded by the admission of pupils of both sexes, and eventually developed into a school of music and singing with three classes for the training of all-round musicians, choral singers and soloists. In 1775 Hiller founded the musical association called the 'Musikübende Gesellschaft', in which pupils of the school, professional musicians and amateurs worked together; these concerts gradually took the place of the Grosses Concert, which was dissolved in 1778. In addition he put on *concerts spirituels*during Lent, comprising performances of sacred music. In 1778 he also became musical director of the university church (the Paulinerkirche) and in 1783 of the Neukirche as well. But more important was his appointment in 1781 as conductor of the Gewandhaus concerts, which now assumed the central position in Leipzig's concert life. With his many duties, and the high esteem in which he was held as a man and a musician, Hiller was now the most prominent personality in Leipzig's music.

On the invitation of the Duke of Courland, he paid a visit to Mitau in 1781 and had a brilliant reception at the court. He resigned all his posts in Leipzig to accept the appointment of Kapellmeister to the duke in 1785. But he returned to Leipzig after only a year because of the insecure political situation at the Courland court. His former positions had all been filled in his absence, and with his large family (he had married in 1765 and had six children) he had difficulty in making ends meet. He organized concerts in Leipzig and Berlin, including performances of Handel's *Messiah*, and in 1787 took up the post of municipal Musikdirektor in Breslau, where his musical and administrative talents were again put to good use. Two years later he was recalled to Leipzig as Kantor of the Thomaskirche. A position at both a church and a school was new to him, but despite his advancing years he once again summoned his whole energy to carry out progressive plans for improving and extending the church's music and for the general and musical education of the school's pupils, for whom he had a close paternal concern – though his attempts at reform resulted in some difficulties with the rector of the Thomasschule. As a composer too his main attention was now turned to church music. In 1800, on the grounds of declining powers, he at first asked for a deputy, and shortly afterwards he resigned his post.

2. CHARACTER. Hiller was an able, experienced and imaginative composer, though not truly one of genius, a versatile and wide-ranging writer, a good pedagogue and a brilliant organizer. But the extent of his influence during his lifetime was above all the result of the passionate commitment he brought to all his activities. Everything he did was done out of personal conviction, and invariably with a sense of idealism. In his musical and literary work, as an administrator, conductor and teacher, his concern

was for the well-being of his fellow men; he felt a constant sense of responsibility – towards his pupils, the public, his fellow artists, the German people, even towards mankind at large. His activities were undertaken primarily for their own sake; in the preface to the *Anweisung zum musikalisch-zierlichen Gesange*, for example, he wrote that what German singing needed was 'an industrious and intelligent man who will devote himself to the laborious business of teaching more for its own sake than for any reward'. He was without personal ambition, and always ready to help others wherever he could, even beyond his means. He was altruistic, modest and unquarrelsome, but could fight fiercely when he came up against opposition, and without his energy his various great projects would have been impossible. He enjoyed universal esteem among his contemporaries. J.F. Reichardt, Friedrich Rochlitz and C.F.D. Schubart were unanimous in their recognition of his achievements: despite his artistic limitations, he was irreplaceable. And every appreciation of Hiller is characterized by admiration for him as a man – a 'friend worthy of the deepest respect', a 'friend of mankind'.

3. Writings. Hiller's character comes out clearly in his writings, which give expression to his strong sense of personal involvement. He wrote on aesthetic, historical, theoretical, critical and pedagogical matters, mostly in close connection with practical music. A complete synthesis is found in the *Wöchentliche Nachrichten*, the first specialized musical periodical in the modern sense, most of whose articles he wrote himself. Here too the sense of personal responsibility that was so typical of him is unmistakable. At the beginning, for instance, surveying the paper's contents (reports on performances and notable musicians, reviews of newly published music and musical books, and essays on every sort of topic), he emphasized that he had no desire to set himself up as a critic: but if one had to criticize, it must be only after intensive study of the work in question. If possible, reviews ought to be uncontroversial. In his own judgments on works and writings he 'endeavoured to be scrupulously impartial, and always looked for good qualities rather than faults'. Thus his reviews were invariably sympathetic, though not bland. The range of Hiller's abilities – his mastery of the theoretical and practical aspects of music coupled with his comprehensive literary knowledge – qualified him well as a critic. But he never gratuitously paraded his learning: he recorded his opinion factually and modestly. His condemnation of pretentious incompetence, however, was (like Schumann's) forthright and often sarcastic – again, with the moral objective of warning the public of poor works, and also, perhaps, of teaching the composer a timely lesson. Characteristics of his later writings already appear in the *Wöchentliche Nachrichten*: he was an ardent admirer of Hasse and unenthusiastic about J.S. Bach and Gluck; he championed the cause of German music as opposed to Italian and French; and he gave a sympathetic reception to progressive musical trends. Each issue of the journal ended with reports and essays on aesthetic, historical and contemporary topics, and translations of English and French articles on music (almost all of them from Hiller's own pen).

*Johann Adam Hiller: engraving*

In his writings on aesthetics, beginning with the *Abhandlung über die Nachahmung der Natur in der Musik* (1754), Hiller was at first under the sway of Batteux's doctrine of the imitation of nature, but he abandoned this position in *Über die Musik und deren Wirkungen* (1781), a translation of Chabanon's *Observations sur la musique*. Moreover, his extensive historical knowledge and general erudition are shown in the biographical collections *Anecdoten zur Lebensgeschichte grosser Regenten und berühmter Staatsmänner* and *Lebensbeschreibungen berühmter Musikgelehrten und Tonkünstler neuerer Zeit*. The latter contains as an appendix an autobiography whose factual tone typifies Hiller's modesty.

Hiller's writings on singing reveal an excellent teacher, well versed in both the theoretical and practical aspects of the subject. These didactic writings went hand in hand with his work in the concert life of Leipzig, and their long-term aim was to raise the standard of German singing, then at a low ebb. In skilfully coupling vocal technique with the teaching of intervals and rhythm, Hiller put his teaching of singing on a broad musical basis from the start; but he also emphasized the importance of an exact understanding of the words in respect of both form and content. A master of several languages himself, he recommended that a German singer should at least have a knowledge of Italian. His own fine feeling for languages is demonstrated in the numerous translations from English, French and Italian, and is especially impressive in his translations of Metastasio. Here, apart from sharply criticizing the translations already in use, he provided useful principles for opera translation in general, whose chief fault he named as the slavish adherence to rhyme.

As Kantor of the Thomaskirche he felt it incumbent on him to speculate on the nature of church music. True to the progressive attitude that he always maintained, he demanded that composers for the church should make reasonable and appropriate use of the 'new manner', and towards the close of the century this led him to the curious

notion of providing sacred German words to opera arias by Hasse, composed largely to Metastasian texts, in an attempt to keep alive the memory of his musical idol. These parodies were intended to inject new life into German cantata poetry, which in his opinion was poor in content and unsuited in form to composition.

As most of his writings show, Hiller was first and foremost a practical man. Through his initiative, planning and unremitting hard work he reorganized the whole of Leipzig's concert life. He brought together professional musicians and amateurs, singers and instrumentalists into an efficient homogeneous body, and his gift for inspiring his forces resulted in performances that were generally acknowledged for their quality and versatility. In every town he worked in, he brought about a revival of music. The careful way he went about planning, preparing and mounting large-scale performances is vividly described in his account of the Berlin *Messiah* in 1786. In accordance with contemporary taste he made his own arrangement of the score, reorchestrating it with extra wind instruments. He treated a number of other works similarly, including Mozart's Requiem.

4. MUSIC. In his analysis of *Die Jagd* in *Über die deutsche comische Oper* (1774), the young J.F. Reichardt summed up aptly Hiller's contribution to German opera: 'He knew French and Italian comic opera; he took from them what pleased him, rejected what was unfit, and created a form that was closer to Nature and to our language, but more especially one that was necessary owning to our wretched singers'. Reichardt further remarks on Hiller's unique handling of aria form and his superior powers of characterization. German audiences and critics agreed; during the decade after 1766 Hiller's operas competed with and often supplanted the best *opéras comiques* on most German stages, and several remained in repertories to the end of the century, by which time their modest musical dimensions stood in sharp contrast to prevailing styles everywhere in Germany. Their continued favour depended not just on a nationalistic sense of nostalgia and the direct appeal of his music, but also on the strength of Weisse's librettos as independent dramas (they were in fact occasionally performed without music).

Hiller worked all his operatic life within simple dimensions. In his arias and ensembles he observed a strict protocol of moderation. On the one hand, excess of vocal artifice was ruled out by the capabilities of his executants, and on the other, the moral temper of Weisse's texts did not allow the grotesque or exaggerated. Yet within these bounds the stock characters are artfully fleshed out by the expressive aptness of the music. Hiller was the first great practitioner of the operatic *Romanze* in Germany, and many of his numbers in this narrative genre became and remain virtual folksongs in German popular culture. While his other simple, multi-strophic lieder often deal in little more than homiletic asides, his more ambitious arias are always dramatically relevant. His ensembles, too, always reflect the dramatic situation, although they are modest in dimensions and very seldom advance the plot. The publication of Hiller's Singspiele in vocal scores was another new departure in Germany and demonstrates again Hiller's pedagogical concern. By publishing them in this way, as he wrote in various of his prefaces, he hoped to make his Singspiele accessible even to amateurs; indeed, he deliberately kept the vocal scores 'as thin as possible'. Later, however, in the foreword to the *Meisterstücke des italienischen Gesanges ... mit deutschen geistlichen Texten*, he turned about and advocated the use of a full score.

In his numerous song collections Hiller's principal concern was his declared aim of 'teaching the German people to sing'. Like the Singspiele, they contain simple folklike tunes alongside others that come close to arias. There are no popular favourites such as those in the Singspiele, however, partly no doubt on account of the wider public response to the theatre songs, but also because the lack of dramatic continuity brought with it a certain loss of conviction. This applies particularly to the children's songs, whose dry moralizing texts and didactic function had a cramping effect on the music.

Hiller's secular cantatas mostly follow Italian models, but occasionally the humanitarian ideals of the time come through in a hymnlike tone akin to that in the last vocal works of Mozart and Haydn. The church music, apart from a few early cantatas mentioned in Hiller's autobiography, begins only with his appointment as Thomaskantor. In Rochlitz's obituary, Hiller's early works are described as close to those of his teacher Homilius, while the later cantatas are assigned to the area of Hasse's influence. In his setting of Psalm c, however, Hiller succeeded in reconciling these opposing styles. The four-part texture of his chorale settings belongs to the aesthetic of the *Empfindsamkeit*. Of greater significance was the *Choral-Melodien-Buch* that Hiller edited, which remained in common use for decades in the churches of Saxony; fewer than 30 of the tunes are by Hiller himself, and the fact that the majority of the hymns date from the 16th and 17th centuries speaks for his strong historical sense. Much of Hiller's instrumental output (and indeed of the music of his early years as a whole) has been lost. As he said in his autobiography, he wrote little, on account of his inclination to vocal composition and also because of his respect for the music of J.C. Bach, Benda and Quantz. In both style and technique, his instrumental works are typical examples of the *Empfindsamkeit* of the time.

WORKS

*printed works published in Leipzig unless otherwise stated*

STAGE

*first performed Rannstädter Thore, Leipzig, unless otherwise stated*

Die verwandelten Weiber, oder Der Teufel ist los, erster Theil (comische Oper, 3, C.F. Weisse, after C. Coffey: *The Devil to Pay, or The Wives Metamorphos'd* and M.-J. Sedaine: *Le diable à quatre*), Leipzig, Quandt's Court, 28 May 1766, *D-Mbs*, *RUS-KAu*, vs (1770) [12 of 36 nos. by J.C. Standfuss]

Der lustige Schuster, oder Der Teufel ist los, zweyter Theil (comische Oper, 3, Weisse, after Coffey: *The Merry Cobler*), 1766, vs (1771) [32 of 39 numbers by Standfuss]

Lisuart und Dariolette, oder Die Frage und die Antwort (romantisch-comische Oper, 2, D. Schiebeler, after C.-S. Favart: *La fée Urgèle*), 25 Nov 1766; rev. in 3 acts, 7 Jan 1767, *B-Bc*, *D-Bsb*, *W*, *RUS-KAu*, *US-Wc*, vs (1768)

Lottchen am Hofe (comische Oper, 3, Weisse, after Favart: *Le caprice amoureux, ou Ninette à la cour*), 24 April 1767, *CH-Zz* (pts), *D-Bsb*, *Mbs*, *US-Wc*, vs (1769)

Die Muse (Nachspiel, 1, Schiebeler), 3 Oct 1767, *Bp*, vs (1771)

Die Liebe auf dem Lande (comische Oper, 3, Weisse, after Favart: *Annette et Lubin* [Acts 1, 3] and L. Anseaume: *La clochette* [Act 2]), 18 May 1768; *D-LEm*, *Rtt*, vs (1769)

Die Jagd (comische Oper, 3, Weisse, after C. Collé: *La partie de chasse de Henri IV* and Sedaine: *Le roi et le fermier*), Weimar, Kleines Schloss, 29 Jan 1770, *CH-Zz* (pts), *D-Bsb* (facs in GOB, i, 1985), *Dl*, *US-Wc*, vs (1771)

Der Dorfbalbier (comische Operette, 1, Weisse, after Sédaine: *Blaise le savetier*), 18 April 1771; rev. in 2 acts, 1 Aug 1771, *B-Bc*, vs (1771) [10 of 23 nos. by C.G. Neefe]

Der Aerndtekranz (comische Oper, 3, Weisse), April/May 1771, *A-Wn*, *D-Bsb*, *US-Wc*, vs (1772)
Der Krieg (comische Oper, 3, Weisse and C.W. Ramler, after C. Goldoni: *La guerra*). Berlin, Behrenstrasse, 17 Aug 1772, vs (1773)
Die Jubelhochzeit (comische Oper, 3 Weisse), Berlin, Behrenstrasse, 5 April 1773, *D-Dl*, vs (1773)
Poltis, oder Das gerettete Troja (Operetta, 3, G.S. Brunner and Magister Steinel), 1777, vs (1782)
Die kleine Ahrenleserinn (Operetta für Kinder, 1, Weisse), unperf., *A-Wn*, vs (1778)
Das Grab des Mufti, oder Die zwey Geizigen (comische Oper, 2, A.G. Meissner, after F. de Falbaire: *Les deux avares*), 17 Jan 1779, vs (1779)
Das Denkmal in Arkadien (ländliches Schauspiel für die Jugend mit untermischten Gesängen, 1, Weisse, after G. Keate: *The Monument in Arcadia*), lost

OTHER WORKS

Sacred: [22] Choralmelodien zu Gellerts geistlichen Oden und Liedern, 1v, bc (1761, rev. 2/1792 as 25 neue Choralmelodien, 4vv, bc), 45 ed. in Zahn; 50 geistliche Lieder für Kinder, 1v, kbd (1774); Geistliche Lieder einer vornehmen curländischen Dame, 1v, kbd (1780); 3 Melodien zu Wir glauben all an einen Gott, 4vv (1790); Herr Gott, dich loben wir (Ps c), 4vv, tpts, trbns, timp (1790); Religiöse Oden und Lieder, 1v, kbd (1790); Gesang zum Charfreytage (Ach, bis zum Tod am Kreuz hinab) (F.G. Klopstock), 4vv (1793); Vierstimmige Chor-Arien zum neuen Jahre … nebst 4 lateinischen Sanctus (1794); others, *A-Wgm*, *B-Bc*, *D-Bsb*, *Dl*, *LEm*, *Mbs*, *RUS-KAu*
Secular vocal: Lieder mit Melodien (1759); Melodien zu 6 Romanzen von Löwen (1760); Cantate auf die Ankunft der hohen Landesherrschaft, solo vv, chorus, orch (1765); Lieder für Kinder (1769), 4 ed. in Friedlaender; Lieder mit Melodien (1772); Der Greis, Mann und Jüngling (cant., Clodius) (1778); Horatii Carmen ad Aelium Lamium, solo vv, chorus, kbd (1778); Die Friedensfeyer oder Die unvermuthete Wiederkunft (Weisse) (1779); 11 songs in Vademecum für Liebhaber des Gesanges und Klaviers (1780); Cantaten und Arien verschiedener Dichter, 1v, kbd (1781); Sammlung der Lieder aus dem Kinderfreunde (1782); Letztes Opfer in einigen Liedermelodien der comischen Muse (1790), 1 ed. in Friedlaender; Aerntelied (Weisse) (1797); 32 songs in Melodien zum Mildheimischen Liederbuch (Gotha, 1799)
Inst: Loisir musical, contenant 2 sonates … et quelques pièces de galanterie, kbd (1762); 3 str qts (Brunswick, 1796); [50] Fugetten a 4, org (1791); others, *B-Bc*, *D-Bsb*, *SWl*
Numerous pieces in contemporary anthologies, incl. 5 lieder ed. in Zahn

COLLECTIONS AND EDITIONS
*some including works by Hiller*

Wöchentlicher musikalischer Zeitvertreib (1759–60); Sammlung kleiner Klavier- und Singstücke, i–iv (1774); Vierstimmige Motetten und Arien … von veischiedenen Komponisten, i–vi (1776–91), vol. vi as Vierstimmige lateinische und deutsche Chorgesänge, i; Sammlung der vorzüglichsten noch ungedruckten Arien und Duetten des deutschen Theaters, i–vi (1777–80); 6 italiänische Arien verschiedener Componisten (1778), [49] Lieder und Arien aus Sophiens Reise (1779); Italiänische Duetten, 2 S (1781)
Arien und Duetten des deutschen Theaters, i (1781); Duetten zur Beförderung des Studium des Gesanges (1781); Elisens geistliche Lieder (1783); Deutsche Arien und Duetten von verschiedenen Componisten, i (1785); Meisterstücke des italiänischen Gesanges … mit deutschen geistlichen Texten (1791); Allgemeines Choral-Melodien-Buch, 4vv, bc (1793), with appx (1793, also pubd separately, 1797), Nachtrag zum allgemeinen Choral-Melodienbuche, 4vv (1797), *c*25 pieces by Hiller, ed. in Zahn
Edns. and arrs.: G.B. Pergolesi: Stabat mater, kbd (1774), 4vv, insts (1776); G.F. Handel: Utrecht Te Deum (1780); J. Haydn: Passionsmusik des Stabat mater, kbd (1781); A.-E. Grétry: Zémire et Azor, kbd (1783); selections from G.F. Handel: Messiah (1789); W.A. Mozart: Requiem, with Ger. trans. (1791)

ANNA AMALIE ABERT/THOMAS BAUMAN

**Hiller, Lejaren (Arthur)** (*b* New York, 23 Feb 1924; *d* Buffalo, 26 Jan 1994). American composer. Renowned as an innovator in the field of computer music, he created much of importance in other genres as well. From his father, a photographer of lurid *tableaux-vivants*, Hiller absorbed a flamboyant theatricality that informs all his best work, especially the large body of mixed-media pieces at the core of his output. He started composing at an early age, and studied the piano, oboe, clarinet, and saxophone in his youth. An early passion for big-band jazz proved a lifelong influence. While pursuing three chemistry degrees at Princeton (PhD 1947), he studied composition with Sessions, who strongly urged him to take up a musical career, and with Babbitt. Upon graduation he found employment as a research chemist with the Dupont company in Waynesboro, VA, while at the same time composing his earliest major works (notably the imposing *Seven Artifacts*, 1948, rev. 1973, 1984), and receiving his first public performances.

Increasingly disenchanted with corporate culture, he sought refuge in academia, becoming a chemistry research associate at the University of Illinois in 1952. His work with computers there led to experiments (from 1955) in computer composition, ultimately resulting in the *ILLIAC Suite* (1957, later retitled String Quartet no.4) – the first work composed by means of a computer. In the ensuing storm Hiller took the MA in music (1958) and moved to the music department, where he established an electronic music studio. He documented his computer work in *Experimental Music* (1959).

The interloping 'scientist' encountered suspicion, hostility, and contempt from the musical world for many years, finding greater acceptance in the theatre, which provided him with a series of commissions while he remained virtually unheard on the concert stage. A breakthrough came with the 1966 phonograph recording *Computer Music from the University of Illinois* (Heliodor HS-25053), which for the first time brought Hiller's music to a wide audience. Shortly thereafter Cage asked him to collaborate on the multimedia extravaganza *HPSCHD* (1968), an immediate and resounding success. Also in 1968, Hiller left the University of Illinois for the State University of New York at Buffalo, where he held an endowed professorship of composition until his retirement. Together with Foss, he directed the university's Center of the Creative and Performing Arts, a nationally prominent new music ensemble. He devoted his sabbaticals to extended residencies in Poland, Malta and Brazil, from each of which he returned with musical souvenirs that he worked up into compositions. Declining powers of memory following a 1987 encephalitis attack left him unable to teach or compose after 1989.

A determined eclectic, Hiller was unusual in his generation for his willingness to combine the avant-garde and the ultra-traditional, a rare carrier of the torch for sonata form and fugue during the turbulent 1960s and 70s. The epic *Electronic Sonata*, for example, sets computer-synthesized sounds against *musique concrète* in place of the traditional key contrasts, while otherwise strictly observing 'textbook' sonata form. His algorithmic compositions typically resemble demonstrations, presenting extremes of stasis and chaos before resolving them into a sophisticated mixture. His theatre and mixed-media works similarly revel in the contrast of technical and stylistic extremes, while the chamber and piano music tends to focus on specific compositional techniques peculiar to each piece, such as the use of quarter-tones in the String Quartet no.5. Many of his finest works have received only one or two performances, and the full measure of his achievement has yet to be taken.

WORKS

STAGE AND MIXED MEDIA

A Dream Play (incid music, A. Strindberg), 1957; The Birds (incid music/musical comedy, W. Kerr, after Aristophanes), 1958, concert suite 1984; Blue is the Antecedent of It (elec theatre fantasy, J. Leckel), 1959; Cuthbert Bound (theatre piece, C. Newton), 4 actors, tape, 1960; Man with the Oboe (incid music, W. Smalley), 1962; A Triptych for Hieronymus (Smalley), actors, dancers, orch, tape, slides, film, 1966; An Avalanche (F. Parman), pitchman, prima donna, player pf, perc, tape, 1968; HPSCHD, 1–7 amp hpd, 1–51 tapes, 1968, collab. J. Cage; 3 Rituals, 2/4 perc, film, lights, 1969; Rage Over the Lost Beethoven (Parman), 1972 [uses Pf Sonata no.6/portions only of Pf Sonata no.6/any music], 1972; Midnight Carnival, principal tape, secondary tapes, urban environmental events, 1976; Ponteach (melodrama, after R. Rogers), nar, pf, 1977; Chang Fu, the Witch of Moon Mountain (incid music/op, Smalley), 1982; John Italus (11th-century melodrama, anon.), nar, 8 insts, 1989

OTHER WORKS

3 syms.: 1953; 1960; 1987–9, inc.
Other orch: 2 Short Pieces, 1941, 1942; Pf Conc., 1949; Suite, small orch, 1951; Time of the Heathen, suite, chbr orch, 1961; A Preview of Coming Attractions, 1975
Tape: Nightmare Music, 1961; 7 Elec Studies, 1963; Elec Sonata, 1976; 3 Compositions (text of no.3 by E. Dickinson), 1983; Expo '85, 1985, collab. C. Ames, J. Myhill
Inst and tape: Amplification, tape, jazz band, 1962; Machine Music, pf, perc, tape, 1964; Suite, 2 pf, tape, 1966; HPSCHD, 1968 [see STAGE AND MIXED MEDIA]; 3 Algorithms, inst ens, tape, 1968, 1972, assisted by R. Kumra, 1984; Computer Music, perc, tape, 1968, rev. (S, pic, perc, tape)/(S, pf), 1981, assisted by G.A. O'Conner; A Portfolio, various performers, tape, 1974; Malta, tuba, tape, 1975; Quadrilateral, pf, tape, 1981
6 pf sonatas, 1946, rev. 1968; 1947; 1950; 1950; 1961; 1972
Other pf: 7 Artifacts, 1948, rev. 1973, 1984; Children's Suite, 1949; Fantasy, 3 pf, 1951; 12-Tone Variations, 1954; 2 Theater Pieces, 1956; Scherzo, 1958; A Cenotaph, 2 pf, 1971; Staircase Tango, 1984
7 str qts: no.1, 1949; no.2, 1951; no.3, 1953; no.4 'ILLIAC Suite', 1957, assisted by L. Isaacson; no.5 'In Quarter-Tones', 1962; no.6, 1972; no.7, 1979
3 vn sonatas: 1949; 1955, arr. as Vc Sonata; 1970
Other inst: Pf Trio, 1947; Divertimento, chbr ens, 1959; 6 Easy Pieces, vn, pf, 1974; Persiflage, fl, ob, perc, 1977; Diabelskie skrzypce, str inst, hpd, 1978; An Apotheosis of Archaeopteryx, pic, berimbau, 1979; Minuet and Trio, 6 pfmrs, 1980; Tetrahedron, hpd, 1982; Fast and Slow, 4 sax, 1984; The Fox Trots Again, 8 insts, 1985; Metaphors, 4 gui, 1986
Vocal: Wordless Chorus, 1940; Jesse James (W.R. Benét), 4 solo vv, pf, 1950; 5 Appalachian Ballads, 1v, gui/kbd, 1958; Spoon River, Illinois (E.L. Masters), 2 nars, 6 insts, 1962; Computer Cant, S, tape, 10 perc, chbr ens, 1963, assisted by R. Baker

ANDREW STILLER

**Hiller, Wilfried** (*b* Weissenhorn, Swabia, 15 March 1941). German composer. He had piano and violin lessons at the Leopold Mozart Conservatory, Augsburg, before studying composition with Günter Bialas and percussion with Ludwig Porth and Hanns Hölzl at the Musikhochschule, Munich (1963–8). In 1963 he attended a course at Darmstadt, where he studied with Stockhausen and Boulez, and made Karl Hartmann's acquaintance. In 1968 he met Orff, who became one of his most important teachers. After performing as an orchestral percussionist, Hiller founded the concert series Musik Unserer Zeit (1968) and worked as an editor for Bavarian Radio (from 1971). In 1993 he joined the composition department at the Richard Strauss Conservatory, Munich. He also taught composition at the International Youth Festival, Bayreuth (1995–6). His awards include the Richard Strauss Prize, Munich (1968), the Förderpreis, Munich (1971), the Schwabinger arts prize (1978) and a Villa Massimo scholarship (1978). He became a member of the Bavarian Academy of Fine Arts in 1989.

Tonal relationships dominate Hiller's musical language; he often combines folk elements with complex compositional techniques. Percussion instruments play prominent roles in both solo (*Katalog für Schlagzeug I–V*, 1967–74) and orchestral works. His early compositions for the stage centre on individual characters in moments of crisis (*An diesem heutigen Tage*, 1973; *Ijob*, 1979). *Niobe* (1977) was inspired by a study of the tragedies of Sophocles and Aeschylus. In 1978 Hiller changed his focus to compositions for children. His collaborations with Michael Ende include dramatic settings of fables and fairy tales.

WORKS
(*selective list*)

Stage: An diesem heutigen Tage (6, E. Woska, after M. Stuart), 1973; Niobe (10, Woska and Hiller, after Aeschylus), 1977; Ijob (monodrama, 7, after M. Buber), 1979; 4 musikalische Fabeln (M. Ende), 1980–82; Der Goggolori (Bavarian tale, 8, Ende), 1982–3; Die Geschichte vom kleinen blauen Bergsee und dem alten Adler (H. Asmodi), 1994; Peter Pan (E. Kästner, after J.M. Barrie), 1996–7; 6 other stage works

Orch: Der Josa mit der Zauberfiedel (Woska, after Janosch), spkr, vn, small orch/(pf, perc), 1985; Chagall-Zyklus, cl, chbr orch, 1993; 7 other orch works

Vocal: Schulamit (Bible: *Song of Songs*, trans. M. Buber), S, B-Bar, spkr, boys vv, mixed chorus, orch, 1977–93; Traum vom verlorenen Paradies, T, a fl, pf/hp/gui 1977 [from Niobe]; Kinderliederbuch (Morgenstern), 1994; 3 other vocal works

Chbr and solo inst: Katalog I–V, perc, 1967–74; 2 Miniaturen für Kinder, pf, 1984; Lilith, vn, va, vc, db, pf, 1987; 10 other chbr works; 8 solo inst pieces

Principal publisher: Schott

ULLRICH SCHEIDELER

**Hilliard Ensemble.** British vocal ensemble. It was founded in 1973 by Paul Hillier (musical director), Paul Elliott and David James. Until Hillier's departure in the late 1980s its membership was flexible, and included at various times Errol Girdlestone, Leigh Nixon, Lena-Liis Kiesel, Ashley Stafford, Michael George, Rogers Covey-Crump, John Potter and Gordon Jones. In 1990 the ensemble stabilized into a quartet comprising James, Covey-Crump, Potter and Jones, with occasional guests. Formed for the performance of vocal chamber music of all periods, the Hilliard Ensemble has become best known for its concerts and recordings of medieval, Renaissance and early Baroque polyphony, and for championing contemporary music, particularly tonal and minimalist composers such as Arvo Pärt and Gavin Bryars. It has also encouraged younger performers and composers through workshops and masterclasses, and collaborated with the saxophonist Jan Garbarek in two influential crossover projects, *Officium* and *Mnemosyne*.

FABRICE FITCH

**Hillis, Margaret** (*b* Kokomo, IN, 1 Oct 1921; *d* Evanston, IL, 5 Feb 1998). American conductor. After graduating from Indiana University in 1947 she studied choral conducting at the Juilliard School of Music, 1947–9. Further study with Robert Shaw followed, and led to her becoming director of the American Concert Choir (1950). She taught choral conducting at the Juilliard School of Music, 1951–3, and the Union Theological Seminary, 1950–60. In 1954 she formed the American Choral Foundation which did much to promote choral groups and encourage higher standards of performance. She was appointed choral director of the Chicago Symphony Chorus in 1957, the Cleveland Orchestra (1969–71) and the San Francisco SO (1982–3). She conducted performances with the Santa Fe Opera (1958–9) and was music director of the Kenosha Civic Orchestra (1961–8), the Chicago Civic Orchestra (from 1967) and the Elgin SO

(from 1971). From 1968 to 1970 she directed the Department of Choral Activities at Northwestern University. Hillis's activities noticeably raised standards of choral singing in the USA. Her thorough preparation resulted in a large, unforced sound, with clear articulation of each part and remarkably idiomatic pronunciation; these qualities can be most clearly heard on Solti's recordings of Beethoven's Ninth and Haydn's *The Creation* and *The Seasons*.

RICHARD BERNAS

**Hill Smith, Marilyn** (*b* Carshalton, 9 Feb 1952). English soprano. She studied at the GSM under Arthur Reckless and Vilem Tausky, then gained widespread recognition touring the USA, Canada, Australasia and the UK in Gilbert and Sullivan operas, also performing principal roles in early French opera with the English Bach Festival. She made her operatic début with the ENO (1978) as Adele (*Die Fledermaus*), followed by principal roles with the Royal Opera, Scottish, Welsh and Canadian Opera, Lyric Opera of Singapore, New Sadler's Wells, D'Oyly Carte and the new Carl Rosa company. She has performed in opera, oratorio and in concert at many of the major European festivals including the BBC Proms, Aldeburgh, Paris, Athens and Cologne, and has made regular appearances on television and radio.

Hill Smith is adept at a wide variety of musical styles, and her award-winning recordings range from Rameau to Lehár. She is most acclaimed for her interpretation of operetta and has made a noted contribution to the recording of rare works by Johann Strauss II. Her voice is warm yet silver-toned with an innate intelligence of phrasing and clarity of diction. Max Schönherr was an enthusiastic admirer, while Mary Ellis deemed her ability to sing in true Viennese style 'a technique that is all but lost these days'.

PETER KEMP

**Hilmar, František (Matěj)** (*b* Nová Paka, Bohemia, 12 Sept 1803; *d* Kopidlno, Bohemia, 1 Oct 1881). Czech composer. He was taught music by the village schoolmaster and at the age of nine toured Bohemia and Germany (as far as Dresden) with a local amateur band, in which he played the flute. After holding several junior teaching posts, he was appointed teacher in Kopidlno (1838), where he remained, retiring in 1873. He was one of the earliest composers of the polka and his many polkas, written mostly between 1836 and 1850, became well known through their publication (in Prague, Leipzig and elsewhere) and contributed to the perception of the polka as a Czech national dance. His best known polka *Esmeralda* (1837), named after the Gypsy heroine of Victor Hugo's *Notre-Dame de Paris* (1831), won popularity abroad, from St Petersburg to New York; its title is commemorated in the name of the dancer in Smetana's *Bartered Bride*. Hilmar's 90 polkas dominate his output. Apart from other dances and marches, he wrote church music (four masses, two requiems), songs and choruses.

JOHN TYRRELL

**Hilton, John (i)** (*d* Cambridge, before 20 March 1609). English church musician and composer. In 1584 he was a countertenor at Lincoln Cathedral, a duty he may have performed since his promotion from a choristership there in January 1580; in 1593 he was paid 30s. for supervising the choristers in a production of two comedies. When he left Lincoln sometime between November 1593 and January 1594 to take up the post of organist at Trinity College, Cambridge, he was allowed to dispose of his house in the close as a reward for good service. In the document relating to his departure he is loosely referred to as organist, which suggests that for some time he may have been acting as deputy to the aging Thomas Butler.

On his arrival at Trinity he supervised the rebuilding of the organ and in 1594–5 set about providing materials for lute and viol music there, including, as the Senior Bursar's Account for 1594–5 shows, 'a sett of newe vialls'. On 3 June 1597 he supplicated for the MusB degree from the college, claiming to have spent seven years in the study and practice of music. The Ely episcopal records show that in 1604 he was living in the parish of St Sepulchre, Cambridge; they describe him as 'Mus.Bacc.'. The date of his death may be determined approximately from his probate inventory, dated 20 March 1609 (1608 old style). He owned, among other things, a pair of virginals, valued at 5s., and 'certein song-bookes'. The total value of his belongings amounted to no more than £13 13s. 4d.

Apart from one madrigal, *Fair Oriana, Beauty's Queen*, in Morley's *Triumphes of Oriana* (RISM 1601[16]) Hilton seems to have written no secular music. Of the liturgical music ascribed to 'John Hilton' it is difficult to say with certainty which is by him and which by his son: *Call to remembrance*, possibly his degree exercise, is ascribed in one source to 'John Hilton the Elder'; the *Te Deum* is by the younger Hilton (to whom all the other canticles may be ascribed on grounds of style). None of the other works can be attributed securely to one or the other. The liturgical music is listed under JOHN HILTON (ii).

For bibliography *see* HILTON, JOHN (ii).

PETER LE HURAY/IAN PAYNE

**Hilton, John (ii)** (*b* ?Cambridge, 1599; *d* Westminster, bur. 21 March 1657). English church musician and composer, son of JOHN HILTON (i). When taking the MusB from Trinity College, Cambridge, in 1626, he declared that he had been studying the science of music for ten years. In the following year he published his *Ayres or Fa La's for Three Voyces*, dedicating them 'to the Worshipfull William Heather, Doctor in Musicke'. He wrote 'My duty obliges me to offer you these unripe first fruits of my labours, being but a drop that I receiv'd from you, the fountain'. In 1628 he became organist and clerk of St Margaret's, Westminster. An elegy on his friend William Lawes, *Bound by the near conjunction of our souls*, is in the *Choice Psalmes* of William and Henry Lawes (1648).

In 1652 he published a collection of catches, rounds and canons for three and four voices, entitled *Catch that Catch Can*, dedicating it to his 'much-Honoured Friend, Mr Robert Coleman'. 12 of the canons and 30 of the other pieces are by him. The collection proved to be very popular: it was reprinted in 1658 and 1663; thereafter in different guises.

The *Ayres or Fa La's*, following Fellowes's and Kerman's dismissive remarks, have received little attention despite their appearance in an edition in 1844. They hardly deserve their neglect since many are attractive pieces, different rather than inferior to Morley's. Three more partsongs attributed to Hilton have been discovered among manuscript additions to a copy (in *US-Ws*) of Bennett's *Madrigalls* (London, 1599; Greer). Hilton's solo songs, particularly the dialogues, are perhaps more interesting. He was one of the earliest composers of dramatic dialogues in England (Smallman) and though none were printed in his lifetime it is clear that he was held in some regard. Similarly, the one song of his printed by Playford (*Well well, 'is true*, 1669[5], MB, xxxiii) gives a misleading impression both of his output and his ability. He appears to have been the original compiler of the manuscript Add.11608 (in *GB-Lbl*), and was responsible for entering more than half the contents, including the dialogues. Chan has linked this manuscript with others (*Lbl* Eg.2013 and *Ob* Don c.57), suggesting that they represent the repertory of a music society centred on Hilton, such as sprang up in London (or Westminster) during the 1640s. Add.11608 contains dialogues on the Judgment of Paris (*Rise, princely shepherd*) and biblical subjects such as Solomon (*When Israel's sweet singer slept*) and Job (*Amongst my children dares the fiend appear*), as well as settings of such famous poems as Sir Henry Wotton's *You meaner beauties of the night* and Donne's *Hymne to God the Father* (*Wilt thou forgive the sin where I begun?*), which may have been the setting Donne is known to have commissioned (for a selection see MB, xxxiii).

Of the church music ascribed to 'John Hilton' it is difficult to say with certainty which is by him and which by his father: the anthem *Call to remembrance* is ascribed in one source to 'John Hilton the Elder' and the *Te Deum* is by the younger Hilton (as, on grounds of style, may be the remaining service music); but all other pieces may be by either the father or the son, though as organist of a parish church there would have been less incentive for the latter to have written them. The consort music is more likely to be by the son, as most of it is in a later style, the fantasias adopting the treble-treble-bass combination and with it the lively idioms that characterize a younger generation of composers. A portrait of Hilton at the age of 50, by J. Caldwell, dated 30 September 1649, is now in the Faculty of Music, Oxford; it is reproduced in Spink (pl.4).

PETER LE HURAY/IAN SPINK

**Hilverding** [Helferting, Helwerding, Hilferding] **van Wewen, Franz (Anton Christoph)** (bap. Vienna, 17 Nov 1710; *d* Vienna, 30 May 1768). Austrian dancer, choreographer and impresario. He was a member of a large theatrical dynasty active in Vienna from at least the 1660s. His father, Johann Baptist Hilverding, had been an associate of the famous Hanswurst Josef Anton Stranitzky, and his elder brother Johann Peter Hilverding led various troupes of German actors, ending his career in Russia. Franz Hilverding's principal training – at the emperor's expense – was with the dancer Blondy in Paris during the mid-1730s. While there he probably witnessed performances of Fuzelier and Rameau's *opéra-ballet Les Indes galantes*, an entrée of which, *Le Turc généreux*, he later imitated in a pantomime ballet. Hilverding's sojourn in Paris almost certainly contributed significantly to his overall cultural education; his knowledge of literature and skill as a draughtsman and composer of music were thought unusual in a choreographer.

By 1737 he was engaged as a dancer at the Habsburg court, where he soon began composing ballets alongside Alexander and Franz Anton Phillebois. According to his pupil Gasparo Angiolini's account, the period of mourning after the death of Charles VI in 1740 allowed Hilverding time to reflect on reforms in the nature of theatrical dance. 'In 1742', he wrote, 'when the theatres of Vienna reopened ... in place of the *pas de deux* of Harlequins, of Pulcinellas, of Giangurgolos etc., he substituted the natural characters of threshers, colliers, Hungarian gypsies, Tyroleans, Moravians etc., and in each of these ballets there was represented a small action suited to the habits, customs and stations of the aforesaid personages.' Hilverding also banished the dancers' masks, and turned *la haute danse* to more expressive purposes. Though Arteaga mentions danced versions of plays by Racine, Crébillon and Voltaire, supposedly given around 1740, Hilverding's first documented choreographies date from 1742, and were mostly performed in conjunction

with Italian operas – notably Hasse's *Ipermestra* (1744) and Gluck's *Semiramide riconosciuta* (performed in the refurbished Burgtheater for the empress's birthday in 1748). Following the Viennese theatres' reorganization under court control in 1752, Hilverding was named choreographer for both the German Kärntnertor and French Burg theatres, with responsibility also for Italian operas; Joseph Starzer composed most of the ballet music. During some seasons Hilverding was assisted by guest choreographers such as Antoine Pitrot and Pierre Sodi, and on a more regular basis in the German theatre by Giuseppe Salomone.

In the Italian manner, Hilverding's ballets for *opere serie* were often unrelated to the main plot, but some were linked, as with the 'conflagration' in Adolfati's *La clemenza di Tito* (1753) and the dances in Gluck's *L'innocenza giustificata* (1755). It was Hilverding's independent pantomime ballets, however, that most impressed his contemporaries. Some of the mythological ballets, in particular (e.g. *Ariadne et Bacchus* and *Narcisse et la Nymphe d'Echo*, both 1754), ended tragically, with impressive, through-composed finales (judging by their music). The choreographer left no written account of his works or his aesthetics, but others did, and imitations of his ballets were widespread. With conscious reference to Aristotle's poetics, Angiolini described those pieces he witnessed as constituting 'complete pantomimic action[s] with a beginning, a middle and an end'. Starting in 1752, detailed reports on some of Hilverding's ballets appeared in the internationally circulating *Journal encyclopédique*, which also noted that he was equally gifted in comic and serious dancing. Additional information on his works is given in the 1757 *Répertoire* of Viennese theatre offerings, and in its manuscript continuation by Philipp Gumpenhuber. From the latter it is evident that Hilverding's strictures (including thorough integration of pantomime and dance) were enforced even after his departure, towards the end of 1758, for the Russian court at St Petersburg, where Starzer soon followed. There they revived some of their Viennese works and created several new pantomime ballets and ballets for Italian operas. Hilverding was succeeded in the Burgtheater by Angiolini, who over the next several years, in collaboration with Ranieri de' Calzabigi, produced a series of major dance dramas (to music by Gluck) informed by their knowledge of ancient pantomime. Hilverding worked alongside his former pupil following his return to Vienna in 1764, but in a more pastoral, allegorical vein. After the *Hoftrauer* for Emperor Franz Stephan (*d* 18 August 1765), Hilverding served briefly as the lessee of the Kärntnertortheater, but retired from active participation in the enterprise in 1767 on account of poor health. His successor as impresario, Giuseppe d'Afflisio, in that year inaugurated a new era of Viennese ballet by hiring the reformist choreographer (and rival of Angiolini) Jean-Georges Noverre.

BRUCE ALAN BROWN

**Hime.** English and Irish firm of music publishers and sellers. It was started before 1790 in Liverpool by the brothers Humphrey and Morris (or Maurice) Hime. In 1790 Morris Hime (*d* Jan 1828) moved to Dublin and established an extensive business in music and instruments which was active until about 1820, when the firm was discontinued. Humphrey Hime remained in business in Liverpool; in 1805 he took his son into partnership, and as Hime & Son the firm continued until 1879, when it was purchased by the music and instrument seller William Lea.

The Himes did the largest provincial trade in Britain at the end of the 18th century. As English copyright protection did not extend to Ireland, Morris Hime, in common with other Irish publishers, reprinted great numbers of English works, especially vocal items from operas; many of these were sent to England for sale at cheaper rates, an arrangement which was doubtless advantageous to his brother. Morris Hime's original publications were of lesser importance and included country dances and instrumental arrangements of Irish airs; he also ran a circulating music library. Hime & Son issued a great number of single-sheet editions, most of them songs. Humphrey Hime is also known to have composed a song, *Bo Peep, or Bridport and the French* (*c*1800).

**Hīmeni** [hīmene, īmene, imene]. A Polynesian adaptation of the word 'hymn' applied to Christian and secular repertory that share choral performance style. In Hawaii the term 'hīmeni' applies to songs not used for the hula; in Tahiti to indigenous but expanded multipart choral style; in the Cook Islands and Easter Islands to the adopted Tahitian genre. *See* Polynesia, §I, 2(ii).

BARBARA B. SMITH/AMY STILLMAN

**Himmel, Friedrich Heinrich** (*b* Treuenbrietzen, 20 Nov 1765; *d* Berlin, 8 June 1814). German composer.

1. Life. Together with F.L. Seidel he received his first instruction from Klaus, the organist in Treuenbrietzen. From 1785 he studied theology in Halle, but spent more of his time there at the piano than in the lecture hall. He was able to devote himself entirely to music from 1786; as a student of theology he applied for a post as army chaplain in Potsdam, and it may have been on this occasion that Friedrich Wilhelm II noticed his talent as a pianist. The king gave him a year's salary and permission to study with J.G. Naumann in Dresden. After Himmel's return from Dresden, his cantata *La danza* and oratorio *Isacco figura del redentore* were performed early in 1792; the king appointed him chamber composer and financed a journey to Italy, which Himmel probably began in spring 1793. In 1794 his pastorale *Il primo navigatore* was performed in the Teatro La Fenice in Venice, and on 12 January 1795 the opera *La morte di Semiramide*, which he had probably composed in Germany, was performed in Naples for the birthday of Ferdinand IV. Himmel travelled on to Sicily, but returned to Berlin when he was made royal Kapellmeister in place of J.F. Reichardt, who had fallen into disfavour. In spring 1795 the overture and several scenes from *Semiramide* were performed in Berlin. His cantata *Hessens Söhne und Preussens Töchter* for the wedding of Princess Auguste of Prussia and the Prince Elector of Hesse in February 1797 was followed closely by another performance of *Semiramide* and one of the cantata *Das Vertrauen auf Gott*, commissioned by the Duchess of Magdeburg-Schwerin.

Himmel's plan to revive German opera in Berlin in collaboration with the actor, theatre director and dramatist A.W. Iffland did not interest the court. Financial difficulties forced him to make a long journey to the courts of Russia, Denmark and Sweden beginning in July 1797, intending to settle his debts with the proceeds. His opera *Alessandro* was given its first performance in St Petersburg at the beginning of 1799. The journey, which was a financial and artistic success, appears to have ended in late autumn 1799; at all events, Himmel was back in Berlin in January 1800. *Semiramide* was performed again on 12 January, cut by one and a half hours but still considered by many to be too long. By February he was in Hamburg with his colleagues Reichardt and Righini, and from March to May 1800 was in Dresden with Naumann, to whose daughter he acted as godfather. The opera *Vasco da Gama*, which he had begun composing in Dresden, was performed on 12 January 1801 in Berlin; the rivalry with Reichardt's *Rosmonda*, which followed on 6 February 1801, led to a dispute similar to that between Piccinni's and Gluck's followers in Paris, with Himmel, as a representative of the neo-Neapolitan school, and Reichardt, as a defender of Gluck's principles, attacking each other, not without personal animosity. After further concert tours Himmel's Singspiel *Fanchon das Leyermädchen* (1804) achieved a triumphant, lasting success far exceeding that of the Liederspiel *Frohsinn und Schwärmerey* (1801) or the opera *Die Sylphen* (1806).

Himmel made further journeys to (among other places) Munich, where he applied for a job (according to Zenger, p.86), Leipzig and Rome, from which a false report of his death was sent, before returning to the Prussian court (then in residence at Königsberg). He later participated in a concert in Berlin (24 February 1811) and stayed in Carlsbad (letter of Goethe, 6 June 1811), and at the end of July he was again incorrectly reported dead; he was probably on his way to Vienna via Prague at the time. His last opera, *Der Kobold*, was performed in the Theater an der Wien in 1813 and again in Berlin on 23 March 1814. Ten weeks later Himmel died of dropsy.

Throughout his career Himmel enjoyed the favour of Friedrich Wilhelm II, his successor Friedrich Wilhelm III and the royal family (he was the piano instructor of Queen Luise), although his improprieties and requests for financial support often taxed the goodwill of the court. He was on friendly terms with Prince Louis Ferdinand, at whose residence he first met J.L. Dussek (later to be his close friend). The Privy Chamberlain Rietz, whose wife was the mistress of Friedrich Wilhelm II, was also an influential patron of Himmel at court. According to Ludwig Rellstab, in the 1790s Himmel was 'decidedly a representative of the modern age: elegantly dressed, lightly powdered, somewhat portly but very agile, red-cheeked, his delicate white hands covered with splendid rings'. Either his ability as a Kapellmeister was limited or it too often deteriorated under the influence of champagne; during the rehearsals of *Semiramide* in 1800, the director of the court theatre, von der Reck (see Odendahl), requested the king to remove this 'partly drunken and partly demented man' from the theatre, especially as his opera could be produced perfectly well without his assistance. Count Lindenau wrote (14 December 1797): 'The whole way of life of Kapellmeister Himmel in Potsdam was generally known, composed of debauchery and drinking, on top of which he was brutal and impertinent in the highest degree; only his intimacy with the Privy Chamberlain, with whom he was always together, could preserve his position'; but this judgment – at least in the last sentence – is greatly exaggerated and must be seen as an intrigue which failed in its purpose. After the death of Friedrich Wilhelm II, his mistress (the Privy Chamberlain's wife) was interned in Glogau (now Głogów) by Friedrich Wilhelm III; the letter's reference to the court circles that owed their influence to the late king's love affair was doubtless intended to lead to the dismissal of Himmel from court. Yet he retained favour with the new king, and whether he appeared in a drunken state at court festivities, requested help in financial difficulties or asked for an extension of his leave for even longer concert tours abroad, he could always rely on royal understanding and help.

2. Works. Apart from *Fanchon das Leyermädchen*, which was performed repeatedly in Berlin until 1853, Himmel's works were soon forgotten. Because they date from a time of great political, social and artistic change, it is hard to pass a fair historical judgment on them. His Italian operas are of the neo-Neapolitan school, whose modifications of the Metastasian opera he surpassed by adopting the melodrama, then very modern. Some of his German stage works are offshoots of Reichardt's Liederspiel (*Frohsinn und Schwärmerey*) or the Singspiel in the style of Hiller with influence from Italian *opera buffa* (*Fanchon*); on the other hand H.J. Moser and Bücken both saw *Die Sylphen* as a forerunner of Weber's *Der Freischütz* and a 'fully developed monument of Berlin early Romanticism'. Zelter's statement praising their 'genuinely modern style, in which the artistic character of the theatre of our age is contained *in nuce*' is surely more revealing about its author than about Himmel's stage works. Perhaps because modern criticism is often antagonistic to success with the public, the successful melodies

of *Fanchon* are dismissed for their 'pleasing quality, which occasionally sinks to banal flatness, with all the characteristics of the "popular hit", which is assured of success in advance' (*MGG1*), while the far less popular *Die Sylphen* is raised to the rank of a 'forerunner'. Perhaps E.T.A. Hoffmann's opinion of *Fanchon* is more accurate, although in 1814 he was anything but unprejudiced about this opera; he spoke of 'mawkish sentimentality, French immorality (otherwise known as good breeding) and insipid jokes' – it hardly corresponded to his ideas of musical theatre – but he saw the reasons for the work's great success partly in the historical situation, and partly in the 'genuinely charming music'.

Himmel's lieder also fall between styles; they are indebted to the aria melodies of the Italians, and yet are close to the ideal of the simple strophic lied of the Berlin school. Works such as the 'Wunderhorn' lieder op.27 or the cycle *Alexis und Ida* op.43 nevertheless deserve to be heard.

WORKS

DRAMATIC

Il primo navigatore (pastorale, A.S. Sograffi), Venice, Fenice, 1 March 1794, score and lib lost, frags. in *D-Mbs*

La morte di Semiramide [Sémiramis] (os, 2, ?P. Giovannini or A. di Benedetto, after Voltaire), Naples, S Carlo, 12 Jan 1795, *Bsb*, *Dl*

Alessandro (os, 2, F. Moretti), St Petersburg, Hermitage, Jan 1799, *Dl*

Vasco da Gama (os, 3, A. de Filistri), Berlin, Kgl, 12 Jan 1801, *Bsb*

Frohsinn und Schwärmerey (Liederspiel, 1, C.A. Herklots), Berlin, National, 9 March 1801, *Bsb*, *Mbs*

Fanchon das Leyermädchen (Spl, 3, A. von Kotzebue, after Fr. vaudeville), Berlin, National, 16 May 1804, *A-Wn*, *D-Bsb*; vs (Leipzig, ?1805), ov. (Offenbach, ?1811)

Die Sylphen (Zauberoper, 3, L. Robert [M. Levin], after C. Gozzi: *La donna serpente*), Berlin, National, 14 April 1806; (Mainz, n.d.), ov. as op.22 (Leipzig, 1807)

Der Kobold (Komische Oper, 4, after F.W. Gotter), Vienna, An der Wien, 22 May 1813, *Bsb*; vs (Vienna, n.d.)

LIEDER AND SONGS

Deutsche Lieder am Clavier (Zerbst, 1796); 16 deutsche Lieder, pf acc. (Zerbst, 1798); [6] Deutsche Lieder: ein Neujahrsgeschenk (Berlin, 1798); 6 romances françaises . . . de Florian (Hamburg, 1799); 6 deutsche Lieder, pf acc., op.5 (Brunswick, n.d.); 6 deutsche Lieder (C.A. Tiedge, L. Tieck) (Dresden, n.d.); 6 Lieder (H. Schmidt) (Vienna, n.d.); 3 Lieder (Schmidt) (Vienna, n.d.); 6 deutsche Lieder, acc. fl, vc, pf, op.13 (Leipzig, n.d.); 12 deutsche Lieder Kurlands Söhnen und Töchtern gewidmet, op.15 (Leipzig, n.d.); 6 Lieder Ihro Majestät der . . . Königin von Preussen, 10 March 1800 (n.p., ?1800); [13] Gesänge aus Tiedges Urania, op.18 (Amsterdam, *c*1800)

Die Blumen und der Schmetterling (K. Müchler), pf, vc ad lib (Leipzig, 1803); 6 romances . . . de Florian, acc. pf/harp (Leipzig, 1804); 12 deutsche und französische Lieder (Oranienburg, 1804); Weihnachts-Geschenk (Berlin, ?1805); 6 Gedichte aus dem Kyllenion, op.20 (Leipzig, 1807); 6 Lieder (J.W. von Goethe), op.21 (Leipzig, 1807); 12 alte deutsche Lieder des Knaben Wunderhorn, op.27 (Leipzig, 1808); 3 deutsche Lieder, acc. pf/gui (Bonn, ?1808); 3 deutsche Lieder (C. Reissig) (Vienna, *c*1809); 3 Gedichte (F. Brun), op.24 (Leipzig, 1809); 6 Lieder, acc. pf/gui (Offenbach, 1809)

6 Gedichte (Tiedge, A. Mahlmann, von Schenckendorff), op.31 (Leipzig, 1809); Bewustseyn (E. von der Recke, Tiedge), op.33 (Leipzig, 1809–10); 3 Lieder, op.36 (Leipzig, 1810); 3 Lieder (Tiedge, Müchler, Bürger) (Dresden, n.d.); Kriegslieder der Teutschen, op.21 (Breslau, 1813); 6 Lieder (Robert, A. Pichler, F. von Schiller), op.42 (Leipzig, 1813); 5 romances françoises, 1–3vv, op.44 (Leipzig, 1813); 3 Lieder (Eisenhard, Grass, Haugwitz), op.44 (Leipzig, 1813); Alexis und Ida: ein Schäferroman (Tiedge), op.43 (Leipzig, 1814); 3 deutsche Lieder . . . den deutschen Kriegern gewidmet (Berlin, 1814); 4 nouvelles romances (Paris, n.d.); Unsterblichkeit (Tiedge) (Hamburg, n.d.)

For pubns of single lieder (1794–1814) and modern edns, see *MGG1*

OTHER VOCAL

Orats, sacred cants.: Isacco figura del redentore (orat, P. Metastasio), Berlin, 14 March 1792, *D-Bsb*, *Dl*; Das Vertrauen auf Gott [Was betrübst du dich] (cant, H.J. Tode), 4vv, orch, Berlin, 9 March 1797, *Bsb**, *LEt*; Trauer-Cantate (Herklots), 4vv, orch, Berlin, 11 Dec 1797 (Hamburg, 1798), for funeral of Friedrich Wilhelm II; Vater unser (Du hast deine Säulen) (cant., Mahlmann), 4vv, orch, *A-Wgm*, vs (Leipzig, 1809–10); 2 cants., Heilig ist mein Beherrscher, Wenn Gott auch aufs Tiefste, vv, orch, *D-LEt*

Other sacred: 2 masses, 4 insts, *A-Wn*, *D-Bsb*; Das Lob Gottes (Singt dem Herrn) (A.G. Meissner), 4vv, insts, Berlin, 1804, *Bsb**; Te Deum, 4vv, orch, Berlin, 6 July 1798, *A-Wgm*; Vesper, Salve regina, 5 psalms, 4vv, insts, *D-Bsb* (some holograph); Psalmen Davids, vv, orch, *RUS-KAu*

Secular: La danza (cant., Metastasio), 2vv, orch, Berlin, 16 Feb 1792, ?lost; Hessens Söhne und Preussens Töchter (Wiesinger), Potsdam, 13 Feb 1797, *D-Bsb*; Musique champêtre (cant.), vv, orch, 14 July 1797 (Hamburg, 1797); 2 Festgesänge, 15 Oct 1808, 3 Aug 1811, *Bsb*; Die Wanderer (Wir nahen uns dem hehren Throne) (cant., Tiedge), 4vv, orch, 1811, *A-Wgm*, *D-Bsb**

INSTRUMENTAL

Orch: Sinfonia, F, ?lost; Pf Conc., D, op.25 (Leipzig, 1808); 2 pf concs. with small orch, *Dl*; 2 Marches, op.34 (Leipzig, 1810); fl conc., cited in *GerberNL*; Ov., op. posth. (Leipzig, n.d.), also attrib. F. Heine

Chbr: Grand sestetto, pf, 2 hn, 2 va, vc, op.18 (Leipzig, 1802); 2 qts, pf, vn, fl, vc, 1 pubd (Berlin, 1803), 1 in *Rp*; 14 sonatas, pf, vn, vc: 3 as op.16 (Leipzig, 1804), 3 as op.17, i (Leipzig, ?1803), 3 as [op.17], ii (Leipzig, 1803), 3 grandes sonates (Leipzig, 1801), Grande sonate, C (Munich, n.d.), 1 in *Mbs*; Grande sonate, fl, kbd, op.14 (Berlin, ?1802); Air des matelots varié, pf, vn/vc, op.15 (Leipzig, ?1803)

Pf: Grande sonate, 2 pf (Leipzig, 1801); Sonata, 4 hands, op.posth. (Berlin, n.d.); variations: 20 for hpd (Speyer, 1790), 12 on Marlborough s'en va-t-en guerre (Berlin, 1798), 6 on theme from Sémiramis (Leipzig, 1802), 12 variations sur un air connu (Offenbach, ?1809), 12 on Ich klage dir (Leipzig, ?1812), 4 . . . sur un air anglois (Leipzig, ?1812), Le petit matelot (Berlin, ?1814), 3 further sets, *Bsb*, *Dl*; ecossaises, polonaises, waltzes, minuets, marches and further single works (Leipzig, 1808–11; Oranienburg; Berlin)

GERHARD ALLROGGEN

**Hindemith, Paul** (*b* Hanau, nr Frankfurt, 16 Nov 1895; *d* Frankfurt, 28 Dec 1963). German composer, theorist, teacher, viola player and conductor. The foremost German composer of his generation, he was a figure central to both music composition and musical thought during the inter-war years.

1. Early life. Hindemith descended on his father's side from shopkeepers and craftsmen who had settled primarily in the small Silesian community of Jauer (now Jawor, Poland), where the family can be traced back to the 17th century, and on his mother's side from small farmers and shepherds in southern Lower Saxony. While no signs of musical interest can be found among the relatives of his mother, Maria Sophie Warnecke (1868–1949), his father, Robert Rudolf Emil Hindemith (1870–1915), came from a family of music lovers. Robert Rudolf supposedly ran away from home when his parents opposed his wish to become a musician; after arriving in Hesse, however, he became a painter and decorator. As he was never able to provide a secure income for his family, the Hindemiths were forced to move frequently. Paul spent three years of his childhood with his paternal grandfather in Naumburg. He was sincerely devoted to his mother, whom he is said to have resembled closely, even in similarity of gestures, and dedicated his principal theoretical work, the first volume (Theoretischer Teil, 1937) of *Unterweisung im Tonsatz* to her. In contrast, his relationship with his father was so negative that for a time, beginning in 1914, he severed all ties with him.

Robert Rudolf was intent that his three children should become professional musicians and subjected them to unrelenting musical training from early childhood. Paul, the eldest, learnt to play the violin, his sister Toni (1899–1966) the piano and his brother Rudolf (1900–74) the cello. Hindemith began to receive regular music lessons from local teachers in 1906. From 1907 he studied with the Swiss violinist Anna Hegner, who recognized his gifts and recommended him to her own teacher, Adolf Rebner. As leader of the Frankfurt Opera orchestra, first violinist in a string quartet that bore his name and teacher at the Hoch Conservatory, Rebner was one of the most respected musicians in Frankfurt. He arranged for Hindemith to have a free place at the Conservatory, where at first he concentrated exclusively on the violin. From an early age, he contributed to the family income by playing in public. Robert Rudolf took the children to Silesia where they played in villages as the Frankfurt Children's Trio, accompanied by their father on the zither. He also had to play at inns and dances, and in cinema, spa and operetta orchestras.

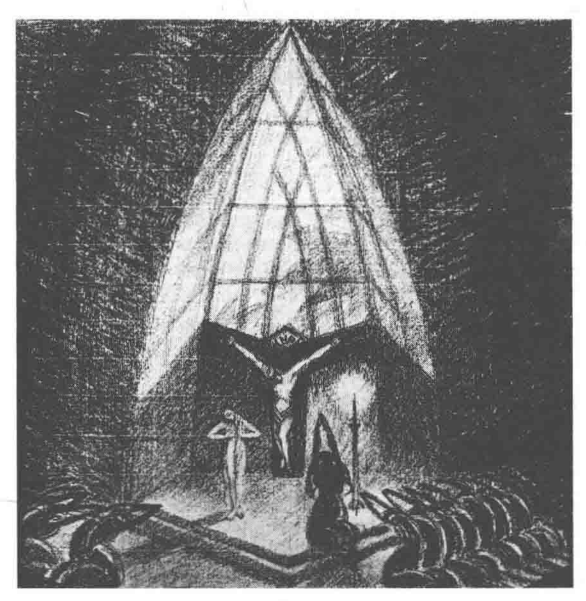
After numerous attempts to compose, Hindemith obtained grants and the support of wealthy Frankfurt families that enabled him to add composition study to his training at the Hoch Conservatory (from 1912–13). His first composition teacher was Arnold Mendelssohn, a great-nephew of Felix Mendelssohn and a composer of conservative cast, who had done much to revive German Protestant church music around the turn of the century. Hindemith held him in high esteem and warm regard and dedicated his *Kammermusik* no.5, op.36 no.4, to him in 1927. When Mendelssohn became ill, Hindemith became a pupil of Sekles, a modernist whose other pupils included Rudi Stephan, Hans Rosbaud, T.W. Adorno and Ottmar Gerster, among others.

While studying with Sekles, Hindemith wrote his opp.1–9, works that already exhibit considerable technical ability. Rather than following one particular compositional school, he adapted many varied influences, including the styles of Brahms, Dvořák, Tchaikovsky, Mahler and Reger. The *Drei Gesänge* op.9 for soprano and large orchestra (1917), his major work of this period, demonstrate a secure literary foundation in their selection of contemporary poetry by Ernst Wilhelm Lotz and Else Lasker-Schüler, and acknowledge the most up-to-date musical influences of Franz Schreker, Arnold Schoenberg and Richard Strauss. From early on, Hindemith composed in many genres: orchestral works, chamber works, songs with piano accompaniment and solo piano pieces; he even started an opera (*Der Vetter auf Besuch*), but did not finish it. None of these compositions were published at the time except the *Drei Stücke* for cello and piano op.8 (1917); when those that survived appeared after Hindemith's death, they astonished the musical world with their opulent, late Romantic harmonic language: the very style that Hindemith became famous for vehemently attacking during the 1920s.

In 1914 Hindemith joined the Frankfurt Opera Orchestra as a first violinist. He was promoted to deputy leader during the same year and to leader in 1917. In this position he rapidly made the acquaintance of some of the best conductors of the day, among them Willem Mengelberg, Wilhelm Furtwängler, Fritz Busch and Hermann Scherchen, men who would later champion his compositions. The principal conductor, Ludwig Rottenberg, conducted the German premières of operas by Debussy, Dukas and Bartók and promoted Schreker's operas above all. (Hindemith married his youngest daughter, Gertrud, in 1924.) In 1915 Hindemith became the second violinist in Rebner's string quartet. He also appeared as a violin soloist playing concertos by Haydn, Mozart, Beethoven and Mendelssohn. In 1923, after he had stopped playing the violin in public in favour of the viola, he took over the solo violin part in the German première of Stravinsky's *L'histoire du soldat*.

2. World War I and the early 1920s. Hindemith was called up for military service at the end of 1917 and in January 1918 joined his regiment (then stationed in Alsace but sent to Flanders the following summer). He was assigned to the regimental band, in which he played the bass drum. During the last months of the war, however, he was posted to the trenches as a sentry, surviving grenade attacks only by good luck, as his diary reveals. While in the army he formed a string quartet and

*1. Paul Hindemith (extreme left) with his soldiers' string quartet during World War I*



managed to continue composing (fig.1). Later he wrote of a particular incident that held decisive significance for him: playing Debussy's String Quartet at the very moment when the news of Debussy's death was announced on the radio.

> We did not play to the end. It was as if our playing had been robbed of the breath of life. But we realized for the first time that music is more than style, technique and the expression of powerful feelings. Music reached out beyond political boundaries, national hatred and the horrors of war. On no other occasion have I seen so clearly what direction music must take. (*Zeugnis in Bildern*, p.8)

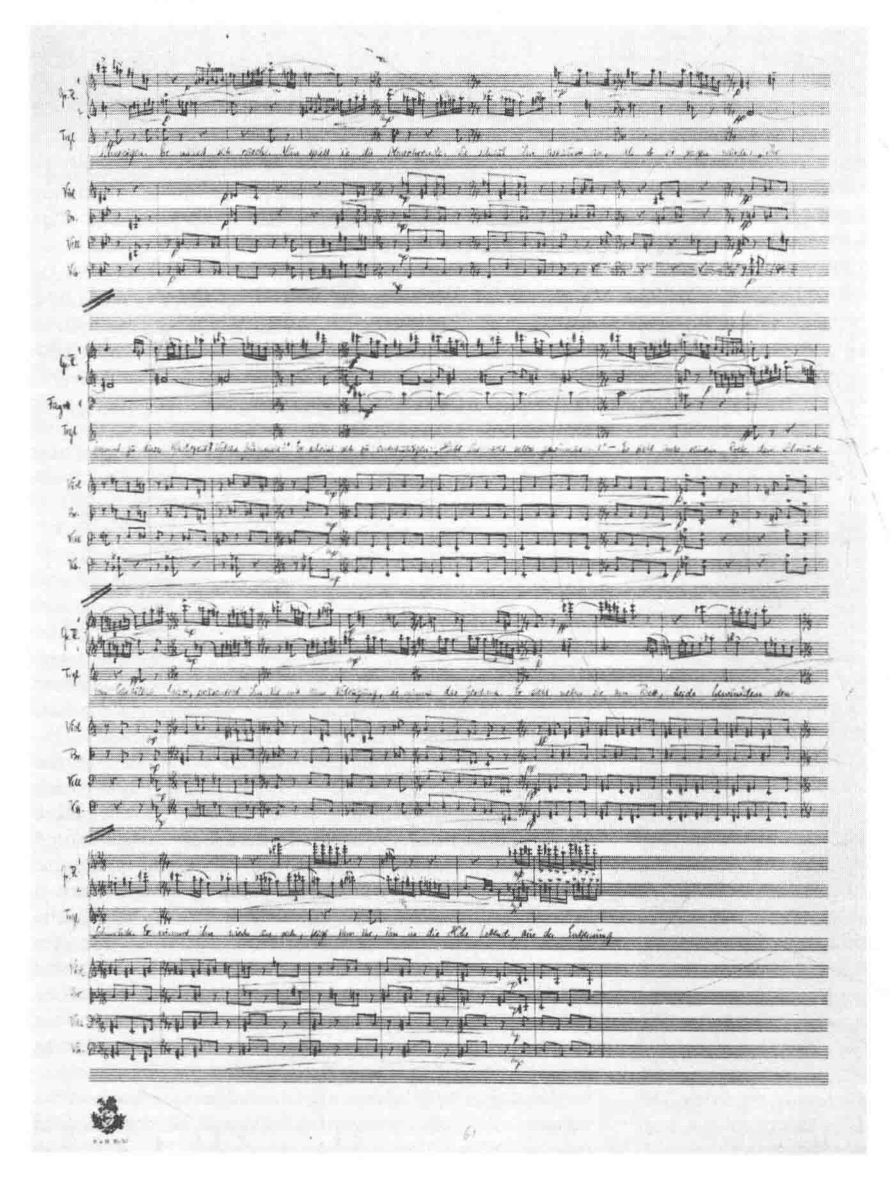
At the end of the war Hindemith returned to the Frankfurt Opera as leader, and to the Rebner Quartet, but, at his own request, as a viola player rather than a violinist. He therefore had the experience of playing the quartet repertory, including contemporary works such as Schoenberg's first and second quartets, from the perspective of both a second violinist and a viola player.

Despite his change of instrument, Hindemith now began to think of himself primarily as a composer. On 2 June 1919 he organized a 'composition evening' in Frankfurt, the programme of which consisted entirely of his own works. The event was so successful that B. Schott's Söhne, Mainz, offered to publish his music, remaining his sole publisher from then onwards. While Hindemith gained the benefit of Schott's influence and support, Schott gained a composer who was extraordinarily reliable in the planning of his works, who wrote in an exemplary hand, and who would become one of the most prolific and frequently performed composers of his generation.

Hindemith's new self-confidence as a composer released an unrivalled creative energy, and within a very short space of time he produced a huge quantity of new works: one-act operas, chamber music, piano music, vocal works, parodies, entertainment music and film scores. In them he severed all ties with his eclectic, late Romantic beginnings and developed a personal brand of Expressionism, audible in the one-act operas *Mörder, Hoffnung der Frauen* op.12 (1919), *Das Nusch-Nuschi* op.20 (1920) and *Sancta Susanna* op.21 (1921, fig.2), and the song cycles *Des Todes Tod* op.23*a* (1922) and *Die junge Magd* op.23 no.2 (1922). In these, Hindemith set texts by writers

*2. Stage design by Ludwig Sievert for the first production of 'Sancta Susanna', Opernhaus, Frankfurt, 1922 (Theatermuseum, Institut für Theaterwissenschaft der Universität Köln)*

whose work exemplified literary Expressionism (Oskar Kokoschka, August Stramm, Georg Trakl), and he intensified the expressive content of his music accordingly. He expanded his harmonic and tonal means to the very limits of tonality in the case of *Sancta Susanna*, and intensified the orchestral coloration, while elsewhere he stripped the musical fabric down to unadorned two-part textures. At the same time he counterbalanced the expressive tendencies towards intensification and dissolution by the use of regular formal designs: for example, the one-act opera *Mörder, Hoffnung der Frauen* is in sonata form while *Sancta Susanna* takes the form of a series of variations. He carried aspects of this style over into those chamber works which exemplified the Neue Sachlichkeit or 'new objectivity', such as the String Quartets no.3, op.16 (1920) and no.4, op.22 (1921), the *Kammermusik* no.1, op.24a (1922) and the song cycle *Das Marienleben* op.27 (1922–3). This evolutionary process (from Expressionism to Neue Sachlichkeit) is illustrated in the two versions of the Cello Sonata op.11 no.3: in the first version (1919), the middle movement (of three) bore the programmatic heading 'Im Schilf. Trauerzug und Bacchanale', referring to Walt Whitman's poem *When lilacs last in the door-yard bloom'd*; in the second version (1921), Hindemith eliminated the two outer movements and composed a new first movement to which he appended the original middle movement, now without its programmatic heading, thus changing the piece from programme music into absolute music. The fugato start of the newly composed movement, moreover, altered the significance of the original middle movement music: the many ostinato passages present therein no longer provided an illustration of the 'bacchantic' programme, but functioned as a motivic reduction of previously introduced material. The movement was transformed, therefore, into the style that was to be considered typical of Hindemith: purely musically motivated, elementally simple, 'objective' music-making. In the concentration on purely musical procedures the music also began to lose its late Romantic, harmonically plush opulence and sonority altogether. Hindemith now took to writing parts as independent lines; the Neue Sachlichkeit was thus identified stylistically with the assertion of a fundamentally linear, polyphonic musical idiom that seemed new in the context of the time. Formal coherence was no longer supported and articulated by motivic-thematic developmental processes, tonal functional harmony, or regular syntax, but rather by a rhythmically and metrically uniform structure or a sometimes supple, sometimes strict continuity of musical movement. In this continuity, musical procedures were reduced to their primary elements, such as a pulsing metre, often made particularly effective by means of irregular accents. The harmonic dimension is markedly dissonant in these works, to allow the often extremely individualized voices in the musical texture to stand out against each other. There are also directions to the players which makes explicit the priority that impetuous, almost reckless playing was to have over articulation, clear enunciation and beauty of sound: for example, 'Furious tempo. Wild. Beauty of sound is a secondary matter' (Sonata for solo viola op.25 no.1, 4th movement), or 'Disregard what you learnt in your piano lessons. Don't spend too much time considering whether to strike D# with the fourth or the sixth finger. Play this piece in a very wild manner, but always keep it very strict rhythmically, like a machine. Look on the piano here as an interesting kind of percussion instrument and treat accordingly' (Suite '1922' for piano, op.26, 5th movement).



In 1921, with the explosive double première of his one-act operas *Mörder, Hoffnung der Frauen* and *Das Nusch-Nuschi* (their provocative attitude towards sexuality created a scandal) and the first performance of the String Quartet no.3, Hindemith established himself as a composer to be watched. At first this new recognition did not diminish his activities as a performer. The Third Quartet was performed by an ensemble made up of Licco Amar (violin), Walter Caspar (violin), Hindemith (viola) and his brother Rudolf (cello), who was later replaced by Maurits Franck. The Amar Quartet, as it was known, became central to Hindemith's performing career during the 1920s. With his discovery in 1922 of the viola d'amore, Hindemith also began to explore and perform early music. In 1923, however, after negotiating with Schott for a guaranteed monthly income, he was able to leave the Frankfurt Opera orchestra. He became a member of the programme committee of the Donaueschingen Festival which, with him as its driving force, became one of the most important centres of contemporary music in the 1920s.

3. The 'new objectivity'. The dominant artistic trend of the 1920s was the so-called Neue Sachlichkeit. The term, coined by Gustav Friedrich Hartlaub originally in reference to the visual arts, refers to the simultaneous emergence of socio-political and artistic trends that emphasized the democratization of all areas of life. Neue Sachlichkeit thinking in music suggested that the style of a particular work should depend on the character and function chosen for it. Accordingly, Hindemith's instrumental music of the period is somewhat eclectic, drawing on a wide variety of styles. The *Kammermusiken* nos.2–7 (1924–7), a series of concertos for individual solo instruments and chamber orchestra, exhibit a range of influences from neo-Baroque forms and developmental procedures to parodies of military marches, and from lyrical, intense nocturnes to waltzes. The *Kammermusiken* have been compared to Bach's Brandenburg Concertos. Like them, they are scored for ensembles of solo instruments, in an individual and unmistakable combination in each work, and they demand high technical standards of concertante chamber-music playing. Hindemith uses all the notes of the chromatic scale, often even in the initial themes: the opening theme from *Kammermusik* no.6, for example, contains 11 different pitches. Hindemith transferred this concertante, soloistic technique to the standard orchestra in the Concerto for Orchestra (1925), a major work of the period, which Hans Engel judged to have 'struck the mist-clouds of late Romantic emotional doodling like a bolt of lightening' (see Bolín). He broke down the orchestral tutti into different groups of instruments, and gave the work a corresponding variety of types of form and texture. In the first movement, as in a Vivaldian concerto, a ritornello theme is articulated by a concertino of solo oboe, solo bassoon and solo violin. Moreover, Hindemith reinforced these neo-Baroque characteristics by the manner of his thematic invention and melodic *Fortspinnung*. In the second movement Hindemith used the same thematic material, but here it loses all its neo-Baroque traits in the context of a wholly modern, wild and stormy musical process without any formal precedents. In this way,

Hindemith made the choice of a specific musical style a matter of the composer's decision. His treatment of the harmonic and tonal events is comparably discriminatory. If the first movement is stamped by modally coloured diatonicism, in the second the greater textural density almost turns the aural and harmonic events into pure noise, but without any systematic abandonment of the tonic-relatedness of the harmonic processes.

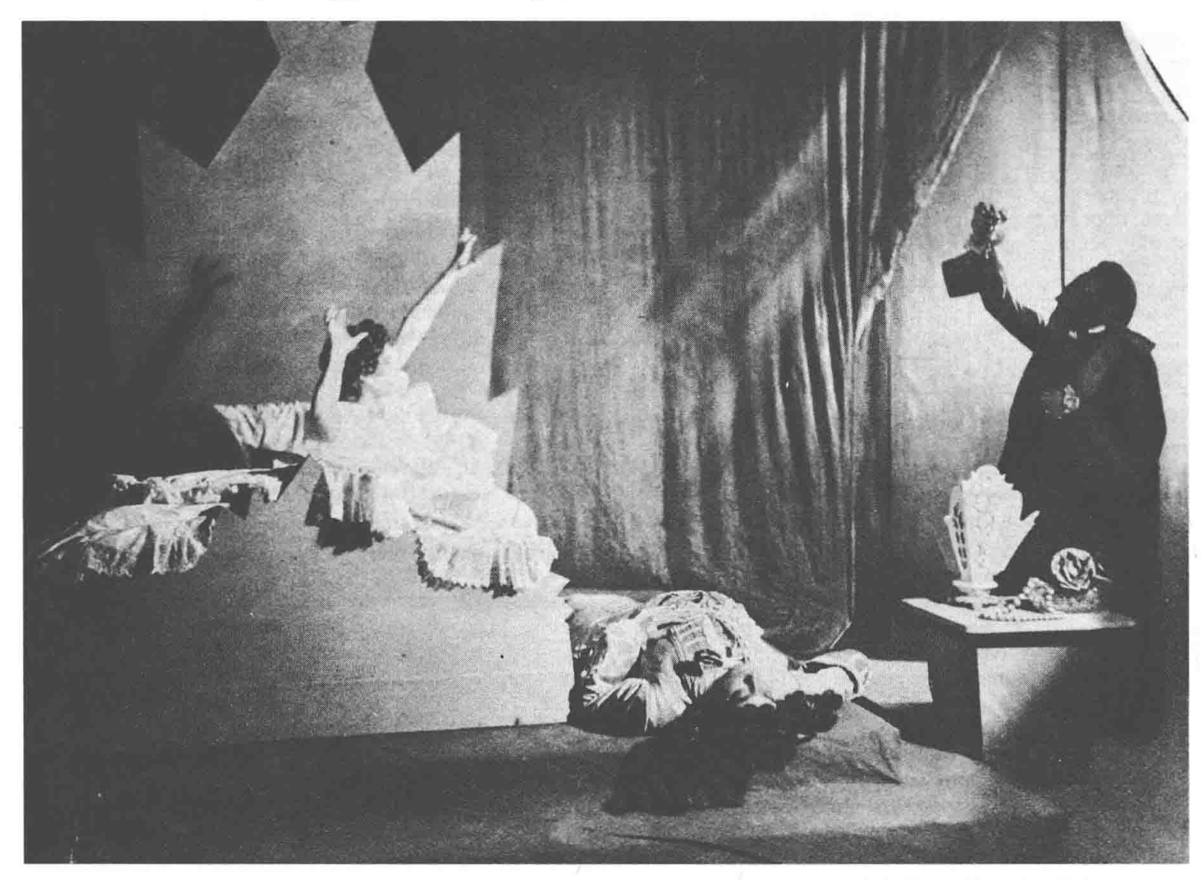
In vocal works the choice of style, marked by a predominant emphasis on absolute music, was to serve the interpretation of the text by subsuming its meaning into the fundamental structure. The unusual passacaglia form of the song 'Die Darstellung Mariä im Tempel' from *Das Marienleben*, for example, serves as a musical correlative to the grandiose structure of the temple. Such compositional priorities are also found throughout *Cardillac* op.39 (1925–6), Hindemith's first full-length opera, a work composed in discrete numbers that exhibit traditional variation, fugato, ostinato, passacaglia and aria forms (fig.3). As these structures were understood to express the meaning of the text, Hindemith was careful to ensure that they were plainly audible. The aural clarity of musical procedures also stressed the fabricated nature of the music, a characteristic that defined it as modern by distinguishing it from the perceived organicism of its models. The shrill sonorities and lurid contours of the music for *Cardillac*, composed for a large chamber orchestra, provide a counterpoint to the stage action rather than support or interpretation. For all its vividness, the effect is relatively sober and unemotional. With this differentiation between the sober, objective, apparently autonomous musical processes and the obsessed, driven actions of the goldsmith Cardillac, the epitome of a kind of Romantic artist, who regains possession of his works by murdering those who buy them (the plot comes from E.T.A. Hoffman's novella *Das Fräulein von Scuderi*), the opera is a major work of Neue Sachlichkeit.

Contemporary aesthetic views also influenced the performance style of the Amar Quartet. Judging by surviving recordings of the ensemble, motifs, themes and

*3. Autograph MS from the final scene, 'Pantomime', of Act 1 of Hindemith's opera 'Cardillac', composed 1926 (Paul-Hindemith-Institut, Frankfurt)*

thematic development took second place in their interpretations to larger structural concerns. While not adhering to any particular formula, their recital programming mixed lesser-known works of the past with contemporary quartets and they frequently reduced or enlarged the ensemble to perform rarely heard works for unusual combinations of instruments. Their repertory centred on contemporary material, including music by Bartók, Stravinsky, Schoenberg and Webern; they also gave the first performances of quartets by Kurt Weill, Philipp Jarnach, Ernst Krenek, Ernst Toch, Alois Hába and Hans Pfitzner, as well as Hindemith. Both his growing prestige as a viola player and the quartet's growing number of engagements helped Hindemith to secure additional performances for his music.

As a member of the programme committee of the Donaueschingen Festival (the event moved to Baden-Baden in 1927 and to Berlin for the final pre-war festival in 1930) Hindemith highlighted certain genres in each year's programmes and invited composers to write works along specified guidelines for performance at the festival. In 1925 *a cappella* music and the chamber concerto were featured; in 1926 music for mechanical instruments and music for wind received special attention; in 1927 the featured genres were film music and one-act opera; in 1928 they were organ music and the chamber cantata; in 1929 music for radio and teaching pieces were highlighted; and finally, in 1930, music composed specifically for gramophone recordings took centre stage. In this way, Hindemith focussed attention on the practical role of music, encouraging composers to return to composing for a given purpose and according to prescribed premises. He formulated this principle in 1927 as follows: 'The composer today should write only if he knows for what purpose he is writing. The days of composing only for the sake of composing are perhaps gone for ever.' (Paul Hindemith: Aufsätze-Vorträge-Reden, p.27)



In order to divert attention away from aspects of style and towards suitability of purpose, Hindemith composed a work in collaboration with his pupils Harald Genzmer and Oskar Sala and had it performed anonymously in Berlin in 1930. He also took advantage of festivals, especially in Baden-Baden, to improve general knowledge of contemporary music by inviting people involved in the amateur music movement to attend concerts. At the same time, he tried to interest composers in amateur music-making. These undertakings were allied to fundamental convictions expressed in his lectures, articles and the prefaces of his scores. Increasingly he felt a duty to the public, however anonymous or amorphous. As early as 1925 he acknowledged:

> I am firmly convinced that a big battle over new music will start in the next few years – the signs are already there. The need will be to prove whether or not the music of our day, including my own, is capable of survival. I of course believe firmly in it, but I also believe that the reproaches made against most modern music are only too well deserved. (Selected Letters of Paul Hindemith, p.38)

Changes in Hindemith's personal life also reflected his growing sense of responsibility. In 1924 he married Gertrud Rottenberg, who was descended on her mother's side from one of Frankfurt's most respected families. Her grandfather Franz Adickes had been a distinguished mayor of the city, and her uncle Alfred Hugenberg was one of the most influential newspaper publishers of the Weimar Republic. Gertrud had been trained as an actress and singer and was an enthusiastic amateur cellist, but extreme stage-fright had ended her plans for a career on the stage. After their marriage, she took a close interest in her husband's work, usually accompanying him on his journeys and writing letters on his behalf, particularly in later years. Hindemith dedicated many of his works to her and also wrote a number of songs and small pieces suited to her musical capabilities.

4. The Berlin years. In 1927 Hindemith was invited to teach composition at the Berlin Musikhochschule. His open-mindedness, curiosity and breadth of knowledge made him an ideal teacher. He tended to overburden and thus discourage his pupils, however, who, only a few years younger than himself, he otherwise treated as comrades. He soon arrived at the conclusion that composition, strictly speaking, could not be taught; only the craft of how to handle musical materials could be passed on. Unable to find suitable textbooks, he undertook research in music theory and acoustics, learning Latin and mathematics to facilitate the reading of old musical treatises. In addition, he took a close interest in media developments and was one of the first composers to offer courses in film music. He also assisted in the development of the trautonium and contributed to the work of the Hochschule's radio research department. He investigated the premises of a music written especially for radio and experimented with music for the gramophone, running recorded vocal and instrumental sounds at different speeds, mixing them and re-recording. At the same time, he explored the Hochschule's collection of old instruments, learnt to play them, and gave lessons to amateurs at the Volksmusikschule in the Berlin suburb of Neukölln for which he wrote a *Hör- und Spielschule*. In 1929 he left the Amar Quartet and founded a string trio with Josef Wolfstahl (later replaced by Szymon Goldberg) and Emanuel Feuermann.

Hindemith's music of the late 1920s, therefore, served extremely divergent functions. He wrote the simplest possible works for children and amateurs to play and produced music for public concerts that was generally less complicated and more circumscribed in its harmonic and tonal language. This latter type is best represented by the series of *Konzertmusiken* opp.48, 49 and 50 (1929–30). In the last movement of the *Konzertmusik* op.49, Hindemith quotes a German folksong for the first time in his career. These works led Hindemith to elaborate the musical material in a more planned and systematic way. He continued to use all the notes of the chromatic scale, as before, but melodically he distributed the total chromatic so as to create individual lines that were wholly diatonic. The modes, scales or scale-segments thus produced are subjected to constant change by inserted steps of a 2nd or by the local redefinition of individual steps within the scale. Hindemith's elaboration of the common fundamental of these different modes or scale-segments is all the more intensive. Combined with a greater plasticity in the shaping of melodic lines and a choric deployment of the orchestral resources, with an obvious preference for the brass, this leads to formal dispositions in the *Konzertmusiken* which are easy to discern and understand even though thay have no relation to any traditional models. *Neues vom Tage* (1928–9), an opera with a contemporary setting that echoes contemporary popular music, sums up the spirit and mood of the age, using parody to keep it at a distance.

*4. Closing scene of Act 1 of Hindemith's 'Cardillac', Staatsoper, Dresden, 1926, with Grete Merrem-Nikisch (the Lady), Ludwig Eybisch (the Cavalier) and, masked, Robert Burg as Cardillac*

The radical political developments of the late 1920s increasingly hampered Hindemith's work. Political differences had already led to a breach between Hindemith, on the one hand, and Brecht, Eisler and Weill, on the other, during preparations for the 1930 Neue Musik Berlin. When Hindemith refused to schedule a performance of Brecht and Eisler's *Die Massnahme*, a *Lehrstück* that takes a narrow party line, they accused him of censorship. At the same time Hindemith actively sought collaboration with Gottfried Benn, a poet regarded as Brecht's antithesis in every respect. Although Hindemith was not attracted to Benn's 'art for art's sake' aesthetic, he felt himself increasingly fostering a more emphatic understanding of art. The oratorio which Hindemith and Benn wrote together, *Das Unaufhörliche* (1931), was the first of Hindemith's works to introduce and express this change in direction.

5. 'The Hindemith case'. After the January 1933 election brought the National Socialists to power, Hindemith began urgently to question the relationship between art and society, and between artistic and non-artistic commitment. In April 1933 he learnt that half of his output had been branded as manifesting 'cultural Bolshevism' and was banned. His string trio could only be performed abroad, he was scarcely ever asked to appear in Germany and his Jewish colleagues at the Berlin Musikhochschule lost their jobs. Initially, he was not particularly worried, as he regarded the National Socialists' assumption of power to be a democratic change of government that would be short-lived and took it for granted that all those dismissed from their jobs would be reinstated as soon as a new party came to power.

As a composer, however, Hindemith reacted immediately. He began to write large numbers of songs on resigned, melancholy or despairing texts, setting them so that they gave an unmistakable sign of his withdrawal into a state of 'inner emigration'. (These remained unpublished and were discovered only after his death.) He also started to work on the opera *Mathis der Maler* (1933–5), writing his own libretto for the first time, and placing the problematic relationship of politics, power, art and personal responsibility into a historical setting. The subject of the opera is the artist Matthias Grünewald, the painter of the Isenheim Altarpiece, who is led by his sense of social responsibility to give up painting and join the peasants in their struggle against serfdom during the Peasants' War (1524–5). After being bitterly disappointed by them, Grünewald recognizes that he has betrayed the most precious thing in his existence, his art. In a visionary scene, art is restored to him as the obligation to paint. Although he cannot forget the experiences of suffering, nor his share of guilt, his memories add moral strength to his artistic expression. The final message, therefore, is that the artist who betrays his genuine gifts is socially irresponsible, however hard he tries to quiet his conscience through political activism.

Hindemith's work on the opera belongs within a context of events taking place in his own life. While

working on the scenario, and at Furtwängler's request, Hindemith composed the symphony *Mathis der Maler*, the first performance of which (Berlin, 12 March 1934) was an enormous success. Directly foreshadowing the music of the opera, the symphony not only quotes traditional melodies ('Es sungen drei Engel') and Gregorian chant ('Lauda Sion salvatorem') but also uses traditional structures such as sonata form. Moreover, certain harmonic and tonal developments carry over from one movement to the next and have a programmatic significance. The symphony's first movement (which is identical to the opera's prelude) has G as its tonic, but in the course of it the song 'Es sungen drei Engel' is introduced in D♭, which, a tritone away from G, represents in Hindemith's terms the most distant key from that of the movement's opening. The final movement develops ever more clearly in the direction of D♭, and the symphony ends in D♭ major with the chorale-like declamation of Alleluia. In the sense of an inner development, therefore, the harmonic and tonal development strives towards that which seemed the remotest of goals at first: the praise of God. Hindemith's elaboration of the harmonic and tonal relationships thus becomes steadily clearer and more unequivocal in a way that reflects the central idea of the opera. The triumph of the work, however, led the National Socialists to attack the composer in the press. Thinking for the first time of emigration, Hindemith hatched a politically naive plan with Furtwängler: Furtwängler was to publish an article about Hindemith, speak up for him at an audience with Adolf Hitler and give Hitler a letter inviting him to one of Hindemith's composition classes. The plan failed. After Furtwängler's article appeared ('Der Fall Hindemith', *Deutsche allgemeine Zeitung*, 25 November 1934), arousing huge interest, Joseph Goebbels, the propaganda minister, during a speech at the Berlin Palace of Sport, vilified Hindemith as a 'dud', a 'charlatan' and an 'atonal noise-maker'. Furtwängler resigned all his positions (he reconciled with the National Socialists in February 1935) and Hindemith took indefinite leave from his teaching position.

No longer believing that his 'case' would be reviewed, although he did nothing to hinder his friends' attempts to rehabilitate him, Hindemith secretly prepared to emigrate. He gave notice of his intention in works such as the Viola Concerto *Der Schwanendreher* (1935) and the Piano Sonata no.1 (1936). In the Viola Concerto, based on old German folksongs, he gave quotations to the solo viola that produce the following sequence of statements: 'Glück liegt in allen Gassen' (first movement); 'Nicht länger ich's ertrag', 'hab gar ein' schweren Tag' (second movement). Similarly, the First Piano Sonata refers to Friedrich Hölderlin's poem *Der Main*, which contains the lines '... doch nimmer vergess ich dich, so fern ich wandre, schöner Main!'

In April 1935, on the invitation of the Turkish government, Hindemith went to Ankara to act as an adviser on the organization of musical life in Turkey. His thoughts on the subject are included in his essay *Vorschläge für den Aufbau des türkischen Musiklebens*. He returned to Turkey in 1936 and 1937 to supervise the implementation of his ideas and to supplement them with new ones. In order to preserve his freedom to travel, he represented his work to the German authorities as being on behalf of German culture. At the same time, he helped Jewish musicians escape to Turkey.

In October 1936, after a performance of the Violin Sonata in E was greeted with what was interpreted as political enthusiasm, a ban was placed on all performances of Hindemith's works. In March 1937 he resigned from the Berlin Hochschule and travelled to the USA for the first time. He went there again in 1938 and 1939. The diary-like letters he wrote to his wife during these journeys illustrate his endeavours to orientate himself in the New World and to look for employment. In May 1938, while he was being denounced as a 'standard-bearer of musical decay' at the Entartete Musik exhibition in Düsseldorf, the world première of *Mathis der Maler* was acclaimed in Zürich; two months later the première of the ballet *Nobilissima visione* took place in London. That September Hindemith emigrated to Switzerland, settling in Bluche, a village in the Rhône valley above Sion. By 1939 he was surprisingly self-critical of his behaviour under the Nazis: 'I always see myself as the mouse who recklessly danced in front of the trap and even ventured inside; quite by chance, when it happened to be outside, the trap closed!' (Paul Hindemith: 'Das private Logbuch', p.357)

## 6. Work in music theory.

During the period in which Hindemith's music was outlawed, he had no performing engagements and did no teaching. He concentrated instead on composition and underpinned his creative endeavours with theoretical studies. He began work on *Unterweisung im Tonsatz* (translated into English as *The Craft of Musical Composition*) in 1935 and finished and published the first part (*Theoretischer Teil*) in 1937 (*see also* ANALYSIS, §II, 4). A second, revised edition appeared in 1940 and a fundamentally revised third edition was planned for the 1950s, but never appeared.

As a theory of musical material, *Unterweisung im Tonsatz* investigates aspects of pitch from an acoustic perspective and sets out theoretical principles governing the melodic and harmonic relationships of pitches. Hindemith takes two acoustic phenomena as his starting-point: the harmonic series and combination tones. From the harmonic series he derives a melodic series consisting of the 12 notes of the chromatic scale, arranged in the order of their diminishing degree of relationship to the first, given note (Series 1). Ex.1 shows this series in

Ex.1 Series 1

relation to C. From the combination tones he derives a series of intervals arranged in an order of increasing tension (Series 2; ex.2). Thus Series 1 and 2 identify and

Ex.2 Series 2

categorize the tonal relationships that occur in musical structures.

Hindemith refers to Series 2 as the basis of a 'classification of all chords', which he systematizes in a 'Table of Chord-Groups' comprising two main sections: A, chords not containing a tritone, and B, chords containing a tritone. These are further subdivided according to the position of the root and the size of constituent intervals in each specific construction (i.e. containing 2nds or 7ths, or not, and so on). *Harmonisches Gefälle* (translated as 'harmonic fluctuation' in the English edition) accounts

for changes in tension values across a sequence of chords. Hindemith calls a succession of roots supporting a harmonic interpretation a 'degree-progression'. In his view the primary technique of melodic construction is 'progression in 2nds', through which the most important notes of a two-dimensional structure achieve 'a smooth and convincing melodic outline'. Using the principle of 'the two-voice framework', Hindemith describes the inner logic of polyphonic composition, maintaining that the bass line and the next most important line form an immediately understandable two-part texture.

*Unterweisung im Tonsatz* is written as a critique of traditional theories of harmony and counterpoint, regarded by Hindemith as theories of historical style. Among the premises of traditional teaching methods that he criticizes are the primacy of the diatonic scale, the separation of harmony from melody and technical exercises from free composition, construction in 3rds as the exclusive principle of building chords and the concepts of invertibility, a chord's susceptibility to a variety of interpretations and alteration. The result of his invocation of acoustics and physical principles is an endorsement of the traditional, historically evolved tonal system, even though he did not recognize it as a historical entity liable to further change. He regarded the core elements of music theory – the nature of tonal relationships, for example – to be immutable, regardless of the extent to which they were understood. On the one hand he attempted to avoid writing a historical theory of style by making the fundamental facts of music correspond to the acoustic properties of pitch combinations, while, on the other, he was concerned with historical masterworks in which these general principles had been worked out. In the end, he demonstrated in an unmistakably apologetic argument that his principles held true for contemporary music as well as for music of earlier periods.

*Unterweisung im Tonsatz* both grew out of Hindemith's compositional practices and had an effect on them. In its original version, the book included an appendix in which he listed those of his own works that best illustrated the development of his theoretical views, even identifying some works that he intended to revise. (The appendix was eliminated from the second edition.) In the early stages of planning the book, he gained theoretical insight from his revision and reworking of songs from *Das Marienleben*. Above all, he rediscovered harmony as a means of musical expression. He had already, in the symphony *Mathis der Maler*, put harmonic and tonal relationships at the service of the work's central idea, elaborating them with appropriate clarity, and now he used more conventional types of chords and chordal progressions in harmonic writing governed by 4ths and open 5ths. While this development may have appeared to embody a return to convention, for him it represented a systematic expansion of compositional means. Subsequent works such as the Violin Concerto (1939), the Cello Concerto (1940) and the Symphony in E♭ (1940) have a markedly traditional character. The expansive, relatively conventional cadences in the Violin Concerto sound as fresh and new as if Hindemith had only just invented them.

Hindemith's examination and substantiation of music theory was expressly served by the series of sonatas for virtually every orchestral instrument that he began to compose in 1935, finally amounting to over 25 works. While these works, especially those composed in the 1930s, create the impression of a well-regulated and standardized compositional technique, thanks to the purest possible operation of the principles of the 'two-voice framework', 'harmonic fluctuation' and 'progression in 2nds', Hindemith gave each of them an individual formal structure. In every case, he tailored the music snugly to the character of the solo instrument so that the sonatas became portraits of the instruments themselves, the music being generated by the unique qualities of each individual timbre.

In the late 1930s, while writing the sonatas, Hindemith was also preparing to write another opera, conceived as a companion piece to *Mathis der Maler*. Centred on the life and work of the astronomer Johannes Kepler, the opera was to be called *Die Harmonie der Welt*. Although he had already established the theme of the work and the content of several individual scenes, as well as having undertaken thorough historical research, his emigration to the USA forced him to set the project aside.

7. Emigration to the USA. In February 1940, a few months after the outbreak of World War II, Hindemith left Switzerland for the USA. He did so reluctantly and only at the insistence of his friends, for his visits to that country during the previous three years had somewhat disillusioned him. Having listened to his own recordings of some of his viola works, he did not want to perform in public any longer as a viola player. He had been invited to teach, however, at SUNY, Buffalo, and Cornell University, Wells College and the Boston SO summer school at Tanglewood, and looked forward to returning to Switzerland and a peaceful Europe after a short period. Once in the USA, he succumbed to an uncharacteristic depression that did not abate until he received an invitation from Yale University to give a series of guest lectures, from which he hoped a more permanent arrangement would evolve. These were so successful that he was immediately offered a visiting professorship (winter semester, 1940–41), which he gladly accepted. He impressed his students at Tanglewood so much that some of them, including Norman Dello Joio, Lukas Foss and Harold Shapero, followed him to Yale.

Hindemith showed such commitment in his teaching that by January 1941 Yale made overtures to appoint him to a permanent post. The university wanted to link his position to a continuing reform of music studies, a situation that allowed Hindemith a great deal of freedom in designing his own courses. In addition to composition, he taught music theory, comprising of the history of theory, traditional theory and the elements discussed in *Unterweisung im Tonsatz*. His instruction in traditional theory gave rise to additional books, including *A Concentrated Course in Traditional Harmony* (1943) and *Elementary Training for Musicians* (1946). He also hoped to extract a book on composition in three or more parts from his courses on *Unterweisung im Tonsatz*, thus completing that work. After the publication of *Exercises in Two-Part Writing* (1939), however, he was unable to continue. *Unterweisung im Tonsatz*, therefore, is his only large-scale project to remain incomplete.

In addition to his courses on the history of music theory, Hindemith founded the Yale Collegium Musicum, through which he instituted historically informed performances of early music from Perotinus to J.S. Bach. The 12 concerts he gave with this ensemble (until 1953) were

so successful that some were repeated in New York. As well as preparing music for performances and directing rehearsals, Hindemith played instruments such as the fiddle, viol, viola d'amore and bassoon. Through these concerts he exercised a powerful influence on historically informed performing practice in the USA. His composition classes at Yale were also thought to be the best in the country at the time, although he refused to acknowledge that any of his pupils, except Foss, had any talent.

Hindemith's success as a teacher was matched by corresponding success as a composer. Virtually unknown in the USA in 1940, within a short period of time his music became more frequently performed than that of any other composer living in the country. He received many commissions and adapted his work to the conditions of American musical life and orchestral culture, though only to the extent that he had reacted to social conditions in the past. There is no mistaking the fact, therefore, that works such as the Cello Concerto (1940), the Symphony in E♭ (1940), the *Symphonic Metamorphosis after Themes by Carl Maria von Weber* (1943) and the *Symphonia serena* (1946), while written for the virtuosity and brilliance of the American symphony orchestra, still acknowledge a specifically German musical tradition. The finale of the Cello Concerto uses an old march; the Symphony in E♭, Hindemith's first four-movement symphony conceived as a piece of absolute music, is clearly indebted to Bruckner; the *Symphonic Metamorphosis* draws on whole works by Weber, not just themes as the title claims; and the second movement of the *Symphonia serena* paraphrases a Beethoven march (woo18).

The chamber works of this period exhibit significant structural complexity, while maintaining a largely relaxed temperament. The Sonata for two pianos (1942) boasts a double canon as its slow movement and an expansive triple fugue as its finale. Canonic and fugal devices, such as retrograde, are also featured in the String Quartets nos.6 (1943) and 7 (1945). Isorhythmic passages, reflecting Hindemith's preoccupation with early music, appear in the Sonata for alto horn and piano (1943), and the finale of the Piano Concerto (1945) is a variation movement on the medieval dance *Tre fontane*. He also wrote a series of smaller compositions to play at home with his wife and numerous songs on German, French and English poems (the majority of these remained unpublished during his lifetime). In 1940 he composed the first of his motets for voice and piano on texts from the Catholic liturgy for Christmas, according to the older liturgical order. By 1960 he had set all the relevant parts of Gospels for the Christmas season. He gave serious thought to writing an opera on an American subject, but abandoned the idea in light of the difficulty of getting such a work performed. He also did not want to involve himself in the problems of writing authentically American music or a genuinely American opera.

In 1942 Hindemith wrote his last piano work, *Ludus tonalis*, the introduction of which takes the form of a prelude that, turned 180 degrees, is the postlude as well. The main body of the work is a series of 12 three-part fugues representing every type of fugal structure: double and triple fugues, fugues in retrograde, inversion, augmentation and diminution, fugues that combine themes and canonic fugues. In addition, in between the fugues, which correspond to the pitch order of his Series 1, Hindemith inserted modulating free form interludes, each approaching the individuality of a character-piece. His intention was to show 'those who had not sunk beyond hope of rescue' what 'composition is'. He regarded the conquest of technical problems presented by such a piece as a moral victory and expected it to be misunderstood and a failure. In fact, the first edition sold out in three months.

Hindemith had originally imagined that he would be unable to compose in a foreign environment and was homesick for Germany, but it was while he was in the USA that he became known throughout the world. His success as a composer and teacher, as well as the feeling that he was needed and could contribute something useful to American musical life, helped him to grow away from his German origins and ties relatively painlessly, so that eventually he began to regard them as provincial.

8. The postwar years. Hindemith took American citizenship in January 1946 and bought a home in New Haven, Connecticut. The composition of his 'requiem "for those we love"', *When lilacs last in the door-yard bloom'd* (1946), on Walt Whitman's poem (which he originally thought of subtitling 'An American Requiem'), was both a testimony of gratitude to the country that had given him shelter and safety at the time of his emigration and also an expression of his reaction to the Holocaust. In the middle of the work he quotes the Jewish melody *Gaza*, from which he derives the most important themes of the piece. At the same time, he accommodates his music so closely to this melody, as if in identification, that it does not stand out as a quotation.

Hindemith reacted circumspectly to the numerous official and unofficial requests he received to return to Germany. He did not wish to disappoint his new American friends, nor to restructure his life again, and was also worried that returning émigrés would encounter concealed resentment. Furthermore, he distrusted the enthusiasm with which his music was celebrated in postwar Germany and was repelled by the behaviour of Germans who had deserted him in the National Socialist years but who now assured him that privately they had always stood by him and played his music in their homes. Despite these concerns, however, he wanted to see his family and some of his friends again. When the opportunity arose for his journey to Europe to be paid for through conducting engagements, he made his first return visit (April–September 1947). He conducted and gave lectures and courses in Italy, Great Britain, the Netherlands, Belgium, Austria and Switzerland, but visited Germany only for private, family reasons. On a later visit (1948–9) he undertook professional engagements in Germany at the request of the American military government.

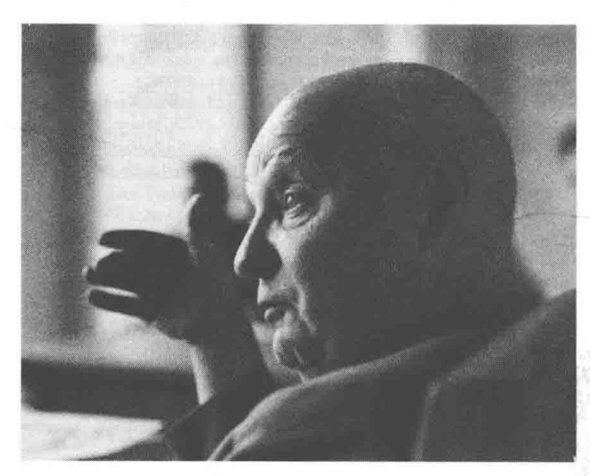
These European excursions changed Hindemith's musical concerns. First, the concerts he gave strengthened his interest in conducting. Although initially he directed only his own works or early music, he added Haydn and Mozart to his programmes in 1947, a decision that enhanced his success. Second, he observed that comparisons of his earlier works with those written during his American exile found his more recent compositions to lack the wildness and audacity of his earlier style. In 1949 he heard that New Music enthusiasts at the Darmstadt summer courses had dismissed his most recent compositions as 'old iron'. In response Hindemith commented, 'It is an honour to belong with the "old iron". Music history is full of old iron, and it was always more durable than new bullshit' (unpubd letter to Schott, 29 July 1949).

The new version of *Das Marienleben*, a project begun in 1935, was finally finished in 1948. Hindemith published the work with a lengthy preface in which he explained the principles of the revision and took issue with the music of the New German School: 'For all the appreciation with which one may well greet the technical innovations, for they are intended to make work easier, it is nevertheless advisable, in the term "new art", to lay less stress on the word "new" and emphasize the word "art" more'. This polemic marked the point at which Hindemith's influence on the next generation of composers began to decline.

The revision of *Das Marienleben* itself illustrated a new understanding of tonality. Greater discernible rationality in the harmonic-tonal processes was no longer an end in itself, nor was it the goal of the reworking, as appeared to be the case in the first phases of the revision (about 1935), but instead was a means to the end of tonal symbolism. Hindemith assigned tonal centres, now clearly and unambiguously presented as such, to the individuals and emotional spheres represented in Rilke's poetry. Thus harmonic-tonal relationships were seen as dependent upon their musical function; the composition identified the nature of the tonality, and it was recognized as the outcome of compositional decisions.

A peak in Hindemith's teaching career in the USA was his invitation to assume the Charles Eliot Norton Chair of Poetry at Harvard University (winter semester 1949–50), the principal responsibility of which was to deliver a series of lectures. He used the opportunity to work out his musical poetics, later published as *A Composer's World* (1952). Here, and in the revised edition that appeared in his own German translation in 1959, he broached almost every question of musical creativity: listening, inspiration, craftsmanship, musical material, interpretation and the composer's view of himself. He described himself as sceptical of progress and 'profoundly unmodern' and chose aesthetic criteria and musical comparisons from almost every era to illustrate his points. Free of illusions, he urged the teaching not of composition as an end in itself, but of 'comprehensive musicianship' ('composing is never a profession . . . it can hardly be regarded as a job which nourishes its proprietor'). He warned young composers: 'Be prepared for disrespect, boycott and slander, but nevertheless trust in the strength of your work'; at the same time he emphasized the importance of modesty and of not thinking of oneself, suggesting a focus on what could be given to others.

9. Return to Switzerland. The Norton lectures were a summation of Hindemith's years of teaching in America, both in content and in fact. In 1949 he received an invitation to take up a teaching position at the University of Zürich, an offer he accepted in light of his recent European tours and the prospect of more conducting engagements. At first he tried to alternate between New Haven and Zürich (1951–3), but when his workload became too heavy he resigned from Yale. He settled in Switzerland in 1953 and spent the rest of his life in Blonay, a village above Lake Geneva between Montreux and Vevey. He no longer brought the same intensity to his teaching; his courses, seen to include too much theory for composition pupils and too much practical musicianship for musicologists, failed to attract the best students. In some ways appearing to have given up, he supervised only two doctoral dissertations before teaching his last courses in 1957. These were dedicated to Gesualdo's madrigals and Schoenberg's string quartets. In the latter Hindemith conducted a fundamental critique of 12-note technique: 'What is art in this technique was already art beforehand, without it, and can continue to be so after it. The technique as such does not create any works of art.' (Neumeyer and Schubert, 1990, p.44)



As his enthusiasm for teaching waned, he turned all the more energetically to conducting, leaving himself increasingly little time to compose. He conducted in every musical centre in Europe, most notably in London, Vienna and Berlin, and also in provincial towns in Germany, Great Britain and Italy. In addition, he embarked on extensive tours of South America (1954) and Japan (1956). He directed his own music dutifully, rather than with any special eagerness, although his favourite music to conduct was that of Mozart, Bruckner and Reger. Nevertheless, he made a series of definitive recordings of his own works with the Philharmonia Orchestra and the only operas he conducted were his own.

Hindemith's compositions from the years following World War II show a preponderance of works for wind instruments, including concertos for the clarinet (1947), horn (1949) and trumpet and bassoon (1949–52), a concerto for woodwind and harp (1949), the Septet (1948), the Sinfonietta in E (1949–50) and the Symphony for Concert Band (1951). He also completed additions to the series of sonatas, began to revise earlier works and carried out projects that had long been planned. He finished a new version of *Cardillac* in 1952, transforming the original story of a criminal into an ambitious study of the artist in society; the changes incorporated an opera within the opera in the form of an excerpt from Lully's *Phaëton*. In 1954 he completed a new version of *Neues vom Tage*, instituting changes to the libretto that alleviated problems of casting and staging. After fundamental revision, the Clarinet Quintet op.30 (1923) was published for the first time in 1955. The reworking of the *Kammermusiken* nos.1 and 4, and the Concerto for Orchestra op.38 were less stringent.

In the same way that the symphony *Mathis der Maler* had anticipated the opera of the same name, Hindemith composed the symphony *Die Harmonie der Welt* (1951) to anticipate the opera on Kepler (completed in 1957). His conception of music as the well-proportioned ordering of tonal material, suggesting the overall order of the natural world and corresponding to the ancient world's idea of a cosmic harmony of the spheres, is reflected in the work. Music is not perceived here as a stimulus to the emotions or used as a means of expression, but rather transmits a sense of something better, more perfect, without naming it. What is seen on stage is, admittedly, the discord of Kepler's life and times. In 1940, however, Hindemith conveyed the ideas behind the work as follows:

> The spiritual and intellectual content of the work . . . should centre on the search for harmony in all things of life and the world, and on the loneliness of him who finds it. The nonharmony of the events of the time and of his fellow-men will serve to demonstrate the seminal quality of artistic and scientific thoughts and actions; despite comets, wars, ecclesiastical schisms, sickness and change of emperors, a great idea will blossom and grow taller than all other wild and noisy life. (Hindemith-Jb, xxvi, 1997, p.205)

10. Late works. In 1957, after he had finished *Die Harmonie der Welt* and retired from teaching in Zürich, Hindemith's compositional style underwent a change accompanied by a broadening of his music-theoretical

*5. Paul Hindemith, 1957*

thinking and reflected in changes made to his concert repertory. He now understood the concept of 'total tonality' (*Gesamttonalität*) as the harmonic basis of a work, and placed 'the key and chord relationships and the sequence in which they appear' at the centre of his thinking on music theory, acknowledging:

> There is essentially no difference whether I control the melodic-harmonic material with the aid of church modes, major and minor scales, main and subsidiary tonal functions or predetermined series of rows from the chromatic 12-note scale. The substance of the music that can be heard and understood intuitively will be affected, admittedly, according to the individual nature of each of those organizational principles, and from the technical point of view each of them has not the same harmonic-melodic potential. (Paul Hindemith: *Aufsätze-Vorträge-Reden*, pp.298–9)

Tonality, therefore, was seen as one means of organization among others; the way in which a composer used it could vary according to the purpose he wished the piece to serve. It would make sense, for example, to bring out the simplest tonal relationships in works intended for educational use, and to suppress all immediately comprehensible tonal relationships in more demanding chamber music. Tonality resulted in the measures taken to serve a particular compositional purpose (and atonality, in his view, was therefore created when tonal relationships were presented in only the most complex circumstances).

This theoretical broadening was matched by an increase in the styles, techniques and materials used by Hindemith in his compositions. In the works of these years, he acknowledged generic norms, such as the motet and the madrigal, and made references to music by other composers. In the 1920s he had been inclined to allude to early music in terms of musical style, but now he was drawn more to the aesthetic importance and historical worth of old genres. To him the motet represented the oldest and most demanding genre of sacred vocal music, the madrigal that of secular vocal music. The one-act opera *The Long Christmas Dinner* (1960–61), after Thornton Wilder, uses an English Christmas carol; the *Pittsburgh Symphony* (1958) quotes a folksong, a Pete Seeger song and Webern's Symphony op.21; the cantata *Mainzer Umzug* (1962), on a text by Carl Zuckmayer, includes traditional Shrove Tuesday music used in Mainz; the Organ Concerto (1962–3) refers to the Whitsun hymn *Veni Creator Spiritus* and the *L'homme armé* melody; and the Mass for mixed *a cappella* chorus (1963), Hindemith's last work, uses fauxbourdon, isorhythm and *Figurenlehre*. Some of these works also exhibit a confrontation with newer compositional developments, such as serial technique. Hindemith used specially constructed 12-note themes in the Sonata for bass tuba and piano (1955), and an 8-note row in the last movement of the *Pittsburgh Symphony*. However, he used such techniques not so much for the sake of achieving an egaliterian chromaticism that would result in atonality as rather in order to give themes a motivic and intervallic unity. Nearly all the works end with pure triads, representing the state of complete relaxation of musical tension implicit in the theory of *harmonisches Gefälle*.

In a comparable way, Hindemith's programming mixed 20th-century music and early music (in which he performed when period instruments were needed), as well as combining solo vocal, choral, chamber and orchestral repertory. He wanted the music he composed or performed to establish and demonstrate a substantial unity overriding differences of genre, period or style, without having to emphasize this by arranging or interpreting the music in a special way. The totality of music, as Stravinsky called the immeasurably rich musical tradition, had to prove itself without violence amid the otherness of historical remoteness, unfamiliarity or modernity.

11. Posthumous reputation. When Hindemith died unexpectedly in Frankfurt on 28 December 1963, the general public recognized him as one of the most respected musicians of the time. In compositional circles, however, he had lost all influence on the next generation: his theoretical ideas had played no part in the development of specifically modern music since the mid-century and his compositions were not used as models. His polemics against the New Music, which had grown even more intense towards the end of his life, had ceased to provoke counter-arguments, and his music was considered taboo by the avant garde. Even as the music of the New German School was criticized in the political climate of the late 1960s, tonality and traditional genres rediscovered in the 1970s, polystylistic influences re-emerged in the music of the 1980s and postmodern ideals appeared in the music of the 1990s, Hindemith's output was not accorded any fresh relevance, despite obvious affinities between these developments and his musical aesthetics.

In spite of this neglect, Hindemith studies began to flourish. A Hindemith Foundation was established after the death of his wife in 1968 and under its auspices the first volume of a complete edition of his work appeared (1975). Continued work on that edition, as well as the publication of his correspondence and biographical documents and drawings, substantially altered the familiar image of Hindemith by revealing his early works for the first time, and by making accessible withdrawn works, different versions of the same works and genres such as the songs and parodies. In 1971 the *Hindemith-Jahrbuch* became the forum of Hindemith research, testifying to varied and intense interest in his work. Attention on a wider front developed only after the celebrations for the centenary of his birth in 1995.

Hindemith thought of himself first and foremost as a musician. He believed that it was the composer's duty to preserve the cohesion of musical life in all its component parts. Such a goal was bound to appear illusory against the tendency towards fragmentation into specialist subdivisions that surrounded him during his later years. The diversity of his life's work, however, together with the

seeming paradoxes that co-exist among his creative and scholarly ideas, attests the fundamental connections that hold all the parts together: his intense preoccupation with the whole history of music and his declaration that 'Only a coward retreats into history'; his musically progressive attitude adopted against the backdrop of conservatism; his emphasis on musical craftsmanship combined with a recognition that craftsmanship alone can never produce a valid work of art; his intensive educational work and his conviction that in the end composition cannot be taught; and his defence of musical autonomy combined with his admonition to compose for a purpose.

## WORKS

Edition: *P. Hindemith: Sämtliche Werke*, ed. K. von Fischer and L. Finscher (Mainz, 1975–)

### STAGE

| op. | |
|---|---|
| — | Der Vetter auf Besuch (Singspiel, W. Busch), 1912–13, frag., lost |
| 12 | Mörder, Hoffnung der Frauen (op, 1, O. Kokoschka), 1919, cond. F. Busch, Stuttgart, Landestheater, 4 June 1921 |
| 20 | Das Nusch-Nuschi (op, 1, F. Blei), 1920, cond. Busch, Stuttgart, Landestheater, 4 June 1921, final scene rev. 1924; dance suite, orch, 1921 |
| 21 | Sancta Susanna (op, 1, A. Stramm), 1921, cond. L. Rottenberg, Frankfurt, Opernhaus, 26 March 1922 |
| 28 | Der Dämon (Tanzpantomime, 2 scenes, M. Krell), 1922, cond. J. Rosenstock, Darmstadt, Landestheater, 1 Dec 1923; suite, small orch, 1923 |
| — | Tuttifäntchen (Weihnachtsmärchen, 3 scenes, H. Michel and F. Becker), 1922, cond. W. Beck, Darmstadt, 13 Dec 1922; orch suite |
| 39 | Cardillac (op, 3, F. Lion, after E.T.A. Hoffman: *Das Fräulein von Scuderi*), 1925–6, cond. Busch, Dresden, Staatsoper, 9 Nov 1926, rev. 1952 (4, Hindemith, after Lion), cond. V. Reinshagen, Zürich, Stadttheater, 20 June 1952 |
| 45a | Hin und zurück (sketch, 1, M. Schiffer), 1927, cond. E. Mehlich, Baden-Baden, 17 July 1927 |
| — | Neues vom Tage (lustige op, 3 pts, Schiffer), 1928–9, cond. O. Klemperer, Berlin, Kroll Oper, 8 June 1929, rev. 1953–4 (lustige Oper, 2, Hindemith, after Schiffer), cond. Hindemith, Naples, 7 April 1954; Concert Ov., orch, 1929 |
| — | Lehrstück (music-theatre work, B. Brecht), 1929, cond. A. Dressel and E. Wolff, Baden-Baden, 28 July 1929 |
| — | Kinderoper, ?1930, frag., lost |
| — | Wir bauen eine Stadt (Spiel für Kinder, R. Seitz), 1930, cond. A. Curth, Berlin, 21 June 1930; arr. Klavierstücke, 1931 |
| — | Mathis der Maler (op, 7 scenes, Hindemith), 1933–5, cond. R. Denzler, Zürich, Stadttheater, 28 May 1938 |
| — | Nobilissima visione (Tanzlegende, 6 scenes, Hindemith and L. Massine), 1938, cond. Hindemith, London, CG, 21 July 1938, reorchd 1939; suite, orch, 1938 |
| — | Hérodiade (Orchester-Rezitation, S. Mallarmé), 1944, Washington DC, 30 Oct 1944 |
| — | Die Harmonie der Welt (op, 5, Hindemith), 1956–7, cond. Hindemith, Munich, Prinzregententheater, 11 Aug 1957 |
| — | Das lange Weihnachtsmahl [The Long Christmas Dinner] (op, 1, T. Wilder, Ger. trans. Hindemith), 1960–61, cond. Hindemith, Mannheim, Nationaltheater, 17 Dec 1961 |

### OTHER DRAMATIC

Incid music (for puppet plays by F.G. von Pocci, unless otherwise stated): Das Glück ist blind, pf, ?1915; Kasperls Heldentaten, vc, ?1915; Kasperl unter den Wilden, toy tpt, E♭-tpt, vc, triangle, ?1915; Lohengrin (puppet play, F. Huch), pf, ?1915; Die Zaubergeige, 1916: duet, 1v, pf, vc; Zwischenakt Musik zu einer grotesken Oper, va, 2 fl, str, ?1922, frag.

Film scores: In Sturm und Eis (Im Kampf mit dem Berg), orch/(vn, pf), 1921; Vormittagsspuk, mechanical pf, 1928, lost; Musik zu einem abstrakten Fischinger-Film, str trio, 1931, lost; Musik zu einern Trickfilm, pf, 1931, lost; Reklamefilm Clermont de Fouet, str trio, 1931, lost; Filmmusik zu einem Fischinger-Film, vn, 1932, lost; see also MECHANICAL AND ELECTRO-ACOUSTIC

Radio plays: Der Lindberghflug (Brecht), 1929, collab. K. Weill, cond. H. Scherchen, Baden-Baden, 27 July 1929; Sabinchen (R. Seitz), 1930, cond. M. Albrecht, Berlin, 19 June 1930

### ORCHESTRAL

| | |
|---|---|
| 3 | Cello Concerto, E♭, 1915–16 |
| 4 | Lustige Sinfonietta, d, small orch, 1916 |
| — | Rag Time (wohltemperiert), 1921 |
| 24a | Kammermusik no.1, small orch, 1922, rev. |
| 29 | Klaviermusik mit Orchester, pf left hand, orch, 1923 |
| 36/1 | Kammermusik no.2, pf, 12 insts, 1924 |
| 36/2 | Kammermusik no.3, vc, 10 insts, 1925 |
| 36/3 | Kammermusik no.4, vn, chbr orch, 1925, rev. |
| 38 | Concerto for Orchestra, 1925, last movt reorchd 1958 |
| 41 | Konzertmusik, wind, 1926 |
| 36/4 | Kammermusik no.5, va, chbr orch, 1927, rev. 1930 |
| 46/1 | Kammermusik no.6, va d'amore, chbr orch, 1927 |
| 46/2 | Kammermusik no.7, org, chbr orch, 1927 |
| 48 | Konzertmusik, va, chbr orch, 1929–30, rev. 1930 |
| 49 | Konzertmusik, brass, hp, pf, 1930 |
| 50 | Konzertmusik, brass, str, 1930 |
| — | Philharmonisches Konzert, variations, 1932 |
| — | Symphony 'Mathis der Maler', 1933–4 |
| — | Der Schwanendreher, conc., va, small orch, 1935 [based on old folksongs], rev. 1936 |
| — | Trauermusik, va/vn/vc, str, 1936 |
| — | Symphonische Tänze, 1937 |
| — | Violin Concerto, 1939 |
| — | Cello Concerto, 1940 |
| — | Symphony, E♭, 1940 |
| — | Theme and Variations 'The Four Temperaments', pf, str, 1940, also ballet (choreog. G. Balanchine), 1946 |
| — | Poor Lazarus and the Rich Man, Virginian ballad, 1941, frag. |
| — | Amor und Psyche (Farnesina), ballet ov., 1943 |
| — | Symphonic Metamorphosis after Themes by Carl Maria von Weber, 1943 |
| — | Piano Concerto, 1945 |
| — | Symphonia serena, 1946 |
| — | Clarinet Concerto, 1947 |
| — | Concerto, tpt, bn, str, 1949–52 |
| — | Concerto, ww, hp, orch, 1949 |
| — | Horn Concerto, 1949 |
| — | Sinfonietta, E, 1949–50 |
| — | Symphony, B♭, concert band, 1951 |
| — | Symphony 'Die Harmonie der Welt', 1951 |
| — | Pittsburgh Symphony, 1958 |
| — | Marsch über den alten Schweizerton, 1960 |
| — | Organ Concerto, 1962–3 |

### CHORAL

*with orchestra*

| | |
|---|---|
| — | Das Unaufhörliche (orat, G. Benn), S, T, Bar, B, mixed chorus, children's chorus, orch, org, 1931 |
| — | When lilacs last in the door-yard bloom'd [Als Flieder jüngst mir im Garten blüht] (requiem, W. Whitman, Ger. trans. Hindemith), Mez, Bar, mixed chorus, orch, org, 1946 |
| — | Apparebit repentina dies (medieval poems), mixed chorus, brass, 1947 |
| — | Ite angeli veloces (cant., P. Claudel, Ger. trans. Hindemith), A, T, mixed chorus, audience, orch, 1953–5: Chant de triomphe du roi David; Custos quid de nocte; Cantique de l'espérance |
| — | Mainzer Umzug (C. Zuckmayer), S, T, Bar, mixed chorus, orch, 1962- |

**Hindustani music.** The classical music of north India. *See* INDIA, SUBCONTINENT OF.

**Hine, William** (*b* Brightwell, Oxon., 1687; *d* Gloucester, 28 Aug 1730). English organist and composer. He became a chorister of Magdalen College, Oxford, in 1694 and in 1705 was appointed a clerk. He was removed from his place in the same year, when he went to London and studied under Jeremiah Clarke (i). In 1707 he became deputy to Stephen Jeffries, organist of Gloucester Cathedral, and in 1710 was promised the succession to the next vacancy, which occurred on Jeffries's death in 1713. Shortly afterwards Hine married Alicia, daughter of Abraham Rudhall of Gloucester, the famous bellfounder. Samuel Arnold (*Cathedral Music*, iii, London, 1790, 226) reported that Hine was a fine singer who performed 'elegantly in a feigned Voice, and was esteemed an excellent Teacher of singing'. His wife survived him and lived until 28 June 1735. Both were interred in the eastern ambulatory of the cloisters, where a tablet to their memory states that the dean and chapter had voluntarily increased Hine's stipend in consideration of his deserts; the Latin inscription of this tablet is reproduced by West.

Philip Hayes presented a portrait of Hine (his father's instructor) to the Music School, Oxford. It was no doubt this association between Hine and the Hayes family that misled Eitner into recording a second William Hine and assigning to him some of the biographical details that

properly belong to William Hayes. In 1731 Hine's widow published, by subscription, *Harmonia sacra Glocestriensis, or Select Anthems for 1, 2 and 3 Voices, and a Te Deum and Jubilate, Together with a Voluntary for the Organ* (Voluntary ed. in RRMBE, vi, 1969). The *Te Deum* is by Henry Hall, but the other compositions are by Hine.

W.H. HUSK/SIMON HEIGHES

**Hines, Earl (Kenneth)** [Earl Fatha, Fatha] (*b* Duquesne, PA, 28 Dec 1903; *d* Oakland, CA, 22 April 1983). American jazz pianist and bandleader. He studied the trumpet briefly with his father, took his first piano lessons with his mother, and later studied with other teachers in Pittsburgh. He first played professionally in 1918, accompanying the singer Lois Deppe, with whom he later made his first recordings; his earnings allowed him to study with two local pianists.

Hines moved to Chicago in 1923. He played with Carroll Dickerson's orchestra at the Entertainer's Club (*c*1925), on a 42-week tour to the West Coast and Canada (1925–6) and back in Chicago at the Sunset Club. During this last engagement Hines and his fellow sideman Louis Armstrong doubled as members of Erskine Tate's Vendome Theater Orchestra. In 1927 Hines became director of Dickerson's group under Armstrong's nominal leadership and at the end of the year he joined Jimmie Noone's band at the Apex Club. In 1928 Hines recorded several titles with Noone, including *Apex Blues* (1928, Voc.), and made a series of influential recordings with Armstrong, among them the highly original trumpet and piano duet *Weather Bird* (1928, OK); he also recorded a group of solos for QRS.

On his 25th birthday Hines inaugurated his own band at the Grand Terrace in Chicago, where he played for ten years; the band became known through nationwide tours and, from 1934, radio broadcasts. Until 1947 he continued to lead big bands, featuring such important figures as Billy Eckstine, Sarah Vaughan, Charlie Parker, Dizzy Gillespie and many others. From 1948 to 1951 Hines played with Armstrong's All Stars and afterwards worked with small groups led by himself and others, attracting critical notice in the mid-1960s for his solo, trio and quartet playing. He led his own small band into the 1980s, and continued to perform regularly in the USA and abroad until the weekend before his death.

One of a small number of black American pianists whose playing shaped the history of jazz, Hines was an ensemble pianist from the beginning of his career (unlike many earlier pianists, primarily soloists who adapted to ensemble playing). Many pianists of the time, particularly in the Midwest, had largely eliminated ragtime influence from their right-hand techniques, preferring a sparse linear approach to the thicker texture of ragtime and integrating the piano with the ensemble. Hines's version of this, present in nascent form in his earliest recordings, is often called 'trumpet style': clearly articulated melody without ragtime figuration, often played in octaves, and tremolo approximating wind vibrato. The left-hand technique of the period was similar among pianists of otherwise widely divergent styles – a single note, octave or 10th on the strong beats of the bar, with a chord, usually centred *c′*, on the weak beats; the result was an explicit statement of the pulse. Hines, using 10ths a great deal, took this common technique as a point of departure, interrupting its regularity to play off-beat accents and to contradict or all but dissolve the metre. These qualities were already apparent in his early performances with Armstrong, as shown by his famous break in *Skip the gutter* (1928, OK). Into the 1930s he extended this device to produce solos of great textural variety; his playing was also characterized by the use of arpeggios through several octaves, intermittent silences and constant attention to line – features impersonal enough, taken in isolation, to point out new directions to a generation of pianists.

Hines's ability to change his style but retain his identity as a pianist undoubtedly conditioned his attitudes as a bandleader. Over two decades he led innovative jazz groups, and he was among the few musicians of his generation to appreciate the new features of bop, which he introduced into his band through the presence of bop musicians.

JAMES DAPOGNY/R

**Hines** [Heinz], **Jerome (Albert Link)** (*b* Hollywood, CA, 8 Nov 1921). American bass and composer. He studied chemistry, mathematics and physics at the University of California while being trained as a singer by Gennaro Curci. His début at the San Francisco Opera (as Monterone in *Rigoletto*, 1941) led to offers from various American orchestras and the New Orleans Opera, which decided him to concentrate on singing. In 1946 he won the Caruso Award, which included a début at the Metropolitan Opera (the Sergeant in *Boris Godunov*). The following years brought operatic appearances in Rio de Janeiro, Buenos Aires and Mexico City, and concerts with Toscanini (recording of the *Missa solemnis*, 1953). His performances at the Glyndebourne and Edinburgh festivals (1953) as Nick Shadow and in Munich (1954) as Don Giovanni established his European reputation, which was confirmed in 1958 when he made his La Scala début as Handel's Hercules and sang Gurnemanz at Bayreuth. Subsequent Bayreuth appearances included King Mark and Wotan (*Die Walküre*). In 1962 he sang Boris Godunov at the Bol′shoy. Hines's huge voice and solid technique enabled him to perform a wide repertory, most of which he sang at the Metropolitan over 41 seasons. His careful preparation of the historical and psychological aspects of each role led to especially vivid projections of such parts as Boris Godunov and Philip II (*Don Carlos*). His many operatic recordings include Banquo (*Macbeth*) and Heinrich der Vogler (*Lohengrin*). He has published a number

of papers on mathematics, two excellent books about his art, *Great Singers on Great Singing* (Garden City, NY, 1982) and *The Four Voices of Man* (New York, 1997), and an autobiography, *This is my Story, this is my Song* (Westwood, NJ, 1968); he has composed *I am the Way*, an opera on the life of Christ (1969, Philadelphia), which has been performed in a number of American cities.

RICHARD BERNAS

**Hingeston** [Hingston], **John** (*b* York, *c*1606; bur. London, 17 Dec 1683). English organist, composer and viol player. He was the son of Thomas Hingeston, vicar-choral of York Minster and rector of St Lawrence, York. His name appears in two lists of York Minster choristers dating from 1618–19. On 17 March 1620 he was hired by the Yorkshire nobleman Francis Clifford, 4th Earl of Cumberland, to play 'upon the organs'. Within a year he had joined the Clifford household and was formally apprenticed to the earl in August 1621. A month later he was sent to London to study with Orlando Gibbons, returning to Yorkshire some time before February 1625. He remained in the Clifford household until 1645.

Hingeston's career flourished during the Commonwealth period. He is listed in Playford's *Musicall Banquet* (RISM 1651[6]) as one of nine 'excellent and able masters' for the organ and virginal. He became organist to Oliver Cromwell shortly after the establishment of the protectoral household in April 1654, and was placed in charge of 'his Highness Musique', a band of eight musicians and two boys. In February 1657 he petitioned the Council for the Advancement of Musick, seeking the incorporation of a college with powers to regulate the practice of music and the reappropriation of funds enjoyed by royal musicians under Charles I. At the Restoration he was appointed as a viol player in the King's Private Musick and Keeper of His Majesty's Wind Instruments. He also became warden and deputy marshall of the revived Westminster Corporation of Music. At his death his pupils included his nephew Peter Hingeston, John Blagrave and Henry Purcell.

*John Hingeston: portrait by an unknown artist, c1660 (Faculty of Music, Oxford)*

Hingeston's works deserve to be better known. His consort music for viols and violins is mainly preserved in a set of partbooks (*GB-Ob* Mus.Sch.D.205–11) that he presented to the Oxford Music School between 1661 and 1682, and in a related autograph organbook (*Ob* Mus.Sch.E.382) acquired by the university some time after his death. 26 of the fantasia-suites contained in these sources are modelled on the three-movement sets of Coprario, William Lawes and John Jenkins. *Mr. Hingston's Consort* comprises three four-movement dance suites (pavin–almande–corant–saraband), identical in form to Locke's *Little Consort* (dated 1651 in an autograph score in *GB-Lbl* Add 17801), and the fantasia-suites for two basses are similar in style to Locke's duos of 1652. The fantasias and airs for three bass viols, which probably date from Hingeston's employment in the Private Musick, are unusual in their scoring for three equal instruments. He wrote the fantasia-suites and multi-movement dance suites for cornetts and sackbuts for the Protectorate court. Most of his wind music is in an incomplete set of partbooks (*Lv*) dating from the Commonwealth period and bound with Cromwell's personal coat of arms.

WORKS

2 anthems: Blessed be the Lord my strength, Withdraw not thy mercy, music lost, words in J. Clifford, *The Divine Services and Anthems* (London, 2/1664)
172 dances, cornetts, sackbuts, *GB-Lv* (2 sackbut pts only)
27 fantasia-suites, *Ob*: 9 for vn, b viol, org; 6 for 2 vn, b viol, org; 4 for 2 b viols; 2 for 5 viols (2 tr, 2 t, b, org); 1 for vn, b viol, org (org pt only); 1 for vn, b viol, pedal hpd/org (org pt only); 2 for 3 viols (tr, t, b), org (1 inc., org pt only); 1 for 2 viols (tr, b); 1 for 2 cornetts, sackbut, org
2 fantasia-suites, cornetts, sackbuts, *Lv* (2 sackbut pts only)
1 fantasia-suite, cornett, sackbut, org, *Lv* (sackbut pt only), *Ob*
36 fantasia-almande pairs, *Ob*: 8 for 4 viols/vns (2 tr, 2 b), org; 8 for 3 viols (tr, t, b), org; 8 for 3 viols (2 tr, b), org; 6 for 3 viols (tr, 2 b), org (org pt only); 3 for 6 viols (2 tr, 2 t, 2 b), org; 2 for 5 viols (2 tr, 2 t, b), org; 1 for 2 tr, 2 b, org (org pt only)
18 fantasias and airs (incl. 2 settings of the same almande), 3 b viols, *Lbl*
1 fantasia, 3 viols (2 tr, b), org, *Ob*
1 set of divisions, b viol, *Lcm*
Mr Hingston's Consort, tr and b viols, virginal/org, *BEcr* (b pt only)
Voluntary, org, *Och*

LYNN HULSE

**Hinner, Philipp Joseph** (*b* Wetzlar, 1754; *d* after 1805). German harpist and composer, active in France. He went to Paris at an early age and in 1769 appeared as a harpist at the Concert Spirituel. He studied the harp with Francesco Petrini and by the end of 1775 (according to Coüard-Luys) his reputation had earned him the office of harpist in ordinary to Queen Marie Antoinette. After a

brief stay in Naples (1777–8) he went to London, where he was advertised as a 'celebrated Performer on the Harp from the Court of France' at all 12 Bach-Abel Concerts in 1781, and became acclaimed as a sensitive player of adagios. He returned to Paris in 1783 and remained active there as a virtuoso and composer until 1805.

Hinner was one of the two harpists named by Forkel as 'extraordinary artists' (*Musikalischer Almanach 1783, 1784*). He composed numerous pieces for the harp (printed in Paris and London *c*1780–94), including sonatas with violin (opp.5–7, 9), duets for two harps (opp.1, 3, 8, 10), accompaniments to *ariettes* by various composers (opp.4, 11) and variations. He also composed two comic operas: *La fausse délicatesse* (1776) and *Les trois inconnues* (1783).

HANS J. ZINGEL/R

**Hinners.** American firm of organ builders. It was founded in Pekin, Illinois, in 1879 by John L. Hinners (*b* Wheeling, WV, 11 Aug 1846; *d* Pekin, IL, 24 Aug 1906) for the manufacture of reed organs. Hinners had previously worked as a foreman for Mason & Hamlin. J.J. Fink became his partner for a short time in 1881, and in 1886 he was joined by U.J. Albertsen, the name changing to Hinners & Albertsen. Around 1890 they began making pipe organs, the first recorded instrument being installed in 1892 in the German Evangelical Church of Huntingburg, Indiana. In 1902 the firm incorporated under the name of Hinners Organ Co., with John Hinners, his son Arthur, Jacob A. Roelf and Heilo J. Rust as principals. Arthur Hinners (*d* 1955) became director of the firm on the death of his father. Although the company's output was considerable, and 97 employees are recorded for 1921, Hinners was content to build small organs for small churches, many of them pre-designed and sold via catalogues. Tracker-action organs continued to be produced in quantity long after other firms had abandoned this type of mechanism; the largest organ was a 25-stop instrument in St Paul's, Pekin. Damaged by the Depression, Hinners ceased building pipe organs in 1936, but continued to make reed organs under the direction of Louis C. Moschel until the firm was dissolved in 1942.

BARBARA OWEN

**Hinrichs, Gustav** (*b* Ludwigslust, 10 Dec 1850; *d* Mountain Lake, NJ, 26 March 1942). American conductor, impresario and composer of German birth. He studied first with his father and later in Hamburg with Marxsen. He began conducting at the age of 15 and five years later moved to San Francisco, where he taught and conducted the Fabbri Opera. In 1885 he became assistant to Theodore Thomas in New York as director of the American Opera Company. After its failure he established his own company in Philadelphia in 1888, and during the ten seasons of its existence conducted the American premières of Mascagni's *Cavalleria rusticana* (1891) and *L'amico Fritz* (1892), Bizet's *Les pêcheurs de perles* (1893) and Puccini's *Manon Lescaut* (1894). He also directed his own opera, *Onti-Ora*, at its première on 28 July 1890. Hinrichs was later active in New York, where he taught and conducted at the National Conservatory and at Columbia University (1895–1906); he conducted at the Metropolitan Opera during the 1899–1900 and 1903–4 seasons. He seems to have retired by 1910. His other compositions include a symphonic suite and some vocal works, none of which was published. He was married to the soprano Katherine Fleming.

BRUCE CARR

**Hinrichsen.** *See* PETERS.

**Hinsz** [Hinsch, Hins, Hintz, etc.], **Albert Anthoni** (*b* Hamburg, 1704; *d* 1785). Dutch organ builder of German birth. He moved to Groningen in 1728 to establish an independent organ building business. In 1729 he completed the rebuilding of the *Rugpositief* of the organ at the Martinikerk begun by F.C. Schnitger the elder, who had died. Hinsz married Schnitger's widow in 1732, and merged Schnitger's business in Zwolle with the one in Groningen.

In total Hinsz built 24 new organs in 55 years and repaired and rebuilt many others. He earned a high reputation during his lifetime. His organs fall into three categories: firstly, two-manual and independent Pedal organs of about 30 stops, with a *Rugpositief*, and with Pedal towers on each side of the *Hoofdwerk* case and a fake *Borstwerk*. This type displays the influence of such Schnitger instruments as those in the Grote Kerk, Zwolle, and the organ in the Pepergasthuiskerk, Groningen (now in Peize), with its independent pedal department and a fake *Borstwerk* with façade pipes incorporated between the *Hoofdwerk* case portion and the case foundation. Instances include Leens (1734); Bovenkerk, Kampen (1743, three manuals and pull-down pedals; a real *Borstwerk* and independent Pedal were added in 1789 by F.C. Schnitger the younger and H.H. Freytag); Almelo (1754); Midwolda (1772); Harlingen (1776); Bolsward (1785) and Uithuizermeeden (1785). The second type have two manuals with *Hoofdwerk* and *Rugwerk* and pull-down pedals of about 20 stops; of the third type are one-manual organs of eight to 13 stops with pull-down pedals. He also built a number of chamber organs.

By 1749 Hinsz's main competitor in Friesland, Johan Mich(a)el Schwartsburg [Swartzburg], had died, giving him a near-monopoly on the supply of new organs in the province. At this time Hinsz made changes to the design of his instruments. He introduced the labial Cornet (first at Almelo, 1754), often at 16′ pitch, and the Tierce mixture; he added a Woudfluit 2′ to the *Hoofdwerk* and, in the Dutch tradition, added a Baarpijp to the same department to accompany the Vox Humana. He removed the Quint or Sifflet 1–1/2′ and Scherp from the *Rugwerk*, and pedal mixtures; he replaced the Quintadena 16′ of the Great with a Bourdon 16′ and extended the manual compass from its usual *C–c‴* to *C–d‴* or *f‴*. Whenever space and money allowed, instruments were adapted from the old choir pitch (*Chorton*) to the increasingly popular lower chamber pitch (*Cammerton*, about *a′* = *415*) and

near-equal temperament (probably a 1/6-comma tuning) was used (for the first time in the Buitenkerk, Kampen, 1754).

After Hinsz's death his business was carried on by his stepson F.C. Schnitger the younger, who shortly afterwards entered into a partnership with H.H. Freytag. Hinsz's influence was considerable; his pupils included case maker Lambertus van Dam (1744–1820), Albert van Gruisen (*c*1741–1824), who both worked mainly in Friesland, and Matthijs Hanssen Hardorff (*d* 1802) of Leeuwarden. Hinsz's significance lies above all in the way in which he built upon and refined the achievement of F.C. Schnitger the elder, both in terms of organ appearance (far more elaborate case work with softer and rounded lines) and of sound.

**Hintz** [Hinsch], **Ewaldt** (*b* Danzig [now Gdańsk]; *d* after *c*1666). German organist and composer. He was a pupil of Froberger. About 1656 he was organist to the Danish court, and he was Paul Siefert's successor as organist of St Marien, Danzig, from about 1660 to about 1666. His only extant work, an elaborate organ chorale, *Allein zu dir, Herr Jesu Christ*, is found in the Pelplin Tablature (*PL-PE*) among a group of compositions intabulated about 1680. Only the name Ewaldt is given in the tablature, and the piece has been published under this name twice (AMP, ii, 1964, facs. repr., and CEKM, x/1, 1965); Klaus Beckmann has since plausibly identified 'Ewaldt' with Hintz and published the chorale again (*Anton Neunhaber und Ewaldt Hintz: drei Choralbearbeitungen*, Wiesbaden, 1974). More reliable, however, is the edition by J. Erdman (*Utwory organowe z tabulatury pelplińskiej* [Organ works from the Pelplin Tabulature], Warsaw, 1981). Judging by its style Hintz was influenced by the north German school of organist composers.

JERZY GOŁOS

**Hintze, Jacob** (*b* Bernau, 4 Sept 1622; *d* Berlin, 5 May 1702). German music editor and composer. He moved to Spandau as a boy when, because of the Thirty Years War, his father became a town musician there, and from 1638 to 1640 he was a pupil of the Berlin town musician Paul Nieressen. After studying for three further years at Spandau he spent five years travelling, which took him to Stettin, Elbing and Danzig, to Wehlau and Königsberg, where he studied with Johann Weichmann, to Insterburg, where he worked for about two years, and as far as Lithuania, Livonia and Sweden. After the peace treaty of 1648 he returned to Spandau by way of Denmark, Rügen and Pomerania and worked briefly with his father. In 1649 he was working at Küstrin, in 1650 in Berlin and from 1651 to 1659 in Stettin. On 1 August 1659 he succeeded Nieressen as town musician in Berlin and remained there until his death, which resulted from a stroke after he had for long suffered from palsy. His funeral oration was given on 14 May 1702 by P.J. Spener.

After the death of Johannes Crüger in 1663, the publisher Christoph Runge commissioned Hintze to issue further editions of the successful songbook *Praxis pietatis melica* which Crüger had initiated, and he supervised the 12th to the 28th editions (1666–98) of this book. The 12th edition is prefaced by a Latin panegyric by Crüger that shows how highly he valued Hintze as a 'musicus peritissimus et amicus singularis'. Hintze appended to the same edition his own *65 geistreiche epistolische Lieder*, 56 of whose texts are verses by Martin Opitz published in 1624. They can be performed either as four-part pieces or as songs for one voice and continuo: one book gives the melody and the bass (which is figured), a second the alto and tenor parts. In 1695 Hintze published an independent edition of them in which, as the title-page makes clear, the possible ways of performing them are still more varied. No research has yet been done on the modifications that Hintze made in his capacity as editor in the many other editions of the *Praxis pietatis melica*: only after such research will it be possible to assess his achievement properly.

EDITIONS

Praxis pietatis melica (Berlin, 12/1666) [incl. 65 geistreiche epistolische Lieder by Hintze, also pubd separately (Berlin, 1695) and with rev. scoring (Dresden and Leipzig, 1695); 2 ed. in Winterfeld; several, ed. *ZahnM*

Praxis pietatis melica (Berlin, 13/1667) [incl. the 65 lieder as nos.642–706]

Praxis pietatis melica (Berlin, 24/1690) [incl. enlarged edn of J. Heermann: Evangelien]

Praxis pietatis melica (Berlin, 28/1698) [with 122 songs by Hintze]

ADAM ADRIO

**Hintze Manuscript** (*US-NH* 21.h.59). *See* SOURCES OF KEYBOARD MUSIC TO 1660, §2(iii).

**Hip hop.** A collective term for black American urban art forms that emerged in the late 1970s; it is also applied specifically to a style of music that uses spoken rhyme (RAP) over a rhythmic background mainly characterized by the manipulation of pre-existing recordings. Reputedly, the term was first used by the Bronx rapper, Lovebug Starsky, and came to denote the lifestyle, fashions and cultural expressions of the Bronx, New York City, during the mid-1970s. Activities covered by the term included graffiti art and 'breaking', a competitive acrobatic style of dance largely popularized by young Latinos. Music was central to the movement, and was created almost entirely by DJs; the first hip hop DJ was the Jamaican-born Kool Herc, followed by Grandmaster Flash, Afrika Bambaataa,

Grandwizard Theodore, Charlie Chase, Baby D, Jazzy Jay, Red Alert and many others.

Sound systems were set up in parks, schools and abandoned buildings in the Bronx, and, following Jamaican traditions, Kool Herc added MCs to his DJ sets, playing short sections of percussion from funk records by artists such as James Brown and Rufus Thomas. Following this lead, Afrika Bambaataa and Grandmaster Flash added eclecticism and technical innovation. Through the inventiveness of Cowboy, Grandmaster Caz and Starsky, Herc's addition of MCs progressed into the form of cadenced spoken rhymes now known as rapping. When hip hop was finally recognized by the mainstream record industry in 1979, rappers became predominant. Many rap artists still consider hip hop to be a more authentic description of a way of life that extends beyond professionalism and specialization.

DAVID TOOP

**Hipkins, Alfred (James)** (*b* London, 17 June 1826; *d* London, 3 June 1903). English writer on musical instruments. Apprenticed as a piano tuner at Broadwood when he was 14, he remained there for the rest of his life. His formal musical training was minimal yet he became a pioneer in the revival of early keyboard instruments, performing Bach's Chromatic Fantasia and Fugue on the clavichord, and some of the Goldberg Variations on the harpsichord before the Musical Association in 1886. His research on the acoustics of struck strings is reported in the *Proceedings of the Royal Society* (1884–5), and extensive work on the standardization of pitch and on equal temperament was formative in their general adoption. A prolific contributor to *Grove1*, Hipkins also wrote major articles on pitch and the piano for the classic ninth edition of the *Encyclopaedia Britannica* (1875–89). Reprinted in succeeding editions, these essays were of seminal influence: widely read and frequently quarried, not always accurately and rarely with acknowledgment, by subsequent writers until well into the 20th century. *A Description and History of the Pianoforte* (London, 1896, 3/1929/*R*), consolidated his reputation as a leading, if somewhat anglophile, authority on the subject. The beautifully produced *Musical Instruments: Historic, Rare and Unique* (Edinburgh, 1888, 3/1945) demonstrates a wider, and arguably even more significant scholarship, as it includes examples from India, China, Japan and South Africa. This was followed by a preface to C.R. Day's *The Music and Musical Instruments of Southern India and the Deccan* (London and New York, 1891/*R*); the preface has been acclaimed by Ki Mantle Hood as a landmark in ethnomusicology.

CYRIL EHRLICH

**Hirano, Kenji** (*b* Tokyo, 1 April 1929; *d* Tokyo, 1 Sept 1992). Japanese musicologist. He read Japanese music history and literature at the University of Tokyo (BA 1953, MA 1955), and studied privately various genres including noh theatre, *nagauta* and *sōkyoku* (*koto* music). After teaching at Kansai University, Osaka (assistant 1958, lecturer 1960, associate professor 1963), he returned to Tokyo to teach at Dokkyo University (associate professor 1969, full professor 1970). Subsequently he taught at the Tokyo National University of Fine Arts and the University of Tokyo. Based on his training in Japanese philology, Hirano's research contributed to the rediscovery of forgotten traditions, the placement of Japanese musics in wider contexts by comparing Japanese genres with similar Asian traditions, the description and analysis of complete repertories and the introduction of experiments and reconstructions into historical research. He made much of the connection between research and sound recording; as a result, many of his writings have accompanying sound discs. The most important scholar of Japanese music of his generation, his work exerted an influence both in Japan and beyond, and publications such as *Nihon koten ongaku bunken kaidai* (1987), *Iwanami kōza Nihon no ongaku, Ajia no ongaku* (1988–9) and *Nihon ongaku daijiten* (1989) are considered among the most reliable Japanese music research tools.

YOSIHIKO TOKUMARU

**Hirao, Kishio** (*b* Tokyo, 8 July 1907; *d* Tokyo, 15 Dec 1953). Japanese composer. He studied medicine and then German literature at Keiō University, from which he graduated in 1930; at the same time he studied music theory with Ryūtaro Hirota and Tetsu Ōnuma. In 1931 he went to study in Paris at the Schola Cantorum and then, from its foundation, the Ecole César Franck, where he remained a composition student until 1936. He returned to Japan and won the prizes offered by the New SO in 1937, for *Kodai sanka*, and 1938, for *Sumida-gawa*. In 1940 his String Quartet won a prize sponsored by the Japan Composers' League, establishing his position as a composer of instrumental music. After World War II he became a leader of musical activities in Tokyo as

composition professor at the Kunitachi Music School (later Music College) from 1947 and as chairman of the Japanese Society for Contemporary Music from 1949. His music shows the influence of modern French music in its modal tendency and preference for woodwind, while he was searching for a characteristically Japanese harmonic and melodic system. He favoured chamber music, often in classical sonata form.

MASAKATA KANAZAWA

**Hirmologion** [hirmologium]. *See* HEIRMOLOGION.

**Hirokami, Jun'ichi** (*b* Kanagawa, 5 May 1958). Japanese conductor. He studied at the Tokyo College of Music, and after graduating in 1983 became an assistant conductor of the Nagoya PO. In 1984 he won first prize at the first Kirill Kondrashin International Conducting Competition in Amsterdam. One of the jurors was Ashkenazy, who was so impressed with Hirokami that he engaged him as the conductor of his Japanese tour in 1985. In the next few years Hirokami was invited to conduct leading orchestras throughout the world, including the French National Orchestra, the Berlin Radio SO, Montreal SO, Israel PO, the Concertgebouw Orchestra, Vienna SO, the LSO and the RPO. In 1989 he made his début at the Sydney Opera House with *Un ballo in maschera*. In 1991 he became principal conductor of the Norrköping SO, where he added many contemporary Swedish works to his repertory. In 1995 he was appointed principal conductor of the Japan PO. Hirokami's conducting, in a repertory ranging from Handel to contemporary music, is characterized by colourful lyricism, dynamic rhythm and a strong sense of drama. Among his recordings are orchestral works by Borodin, Atterberg and Linde.

MASAKATA KANAZAWA

**Hirose, Ryōhei** (*b* Hakodate, Hokkaido, 17 July 1930). Japanese composer. He studied harmony and piano with Hidetake Tsutsui (from 1947), with Ikenouchi (from 1953) and at the Tokyo National University of Fine Arts and Music with Ikenouchi and Yashiro (1955–62). After this period he took a serious interest in Japanese instruments, from which arose a series of compositions. The very tense and dramatic style found in these is evident also in his pieces for European instruments of the early 1970s. In 1971–2 and 1973 he made visits to India, and these brought him to a 'pan-Asian' style often influenced by Indian ragas and drone techniques. At the same time he continued to write for Japanese instruments; his Shakuhachi Concerto won an Otaka Prize in 1976. In 1977 Hirose became a professor at the Kyoto Municipal University of the Arts; he has continued to compose prolifically. He displayed an interest in the recorder in the 1970s and the viol in the 1990s; in a series of works for flute orchestra beginning in 1979 he has exploited the flute's inherent abilities. His experimentation with tone colours is apparent in *Enbu* (1985), where Indian sitar and Japanese shamisen combine with electronic sounds, and in *Kotohogi* (1995), where he contrasts groups of koto, shamisen and shakuhachi. Further information is given in K. Hori, ed.: *Nihon no sakkyoku nijusseiki* ('Japanese compositions in the 20th century', Tokyo, 1999), 217–19.

MASAKATA KANAZAWA

**Hirsau, William of.** *See* WILHELM OF HIRSAU.

**Hirsch, Abraham** (*b* 1815; *d* 1900). Swedish publisher, music dealer and printer. He began his career as an apprentice in Östergrens bok-och musikhandel in Stockholm in 1829. The history of the Östergren shop went back as far as 1802 when Pär Aron Borg started selling music from his home in Stockholm, thus founding the firm that was to become one of Sweden's largest and most long-lived music publishing houses. By 1804 Borg, in partnership with Ulrik Emanuel Mannerhjerta, had opened a music shop. This was taken over by Gustaf Adolf Östergren (1791–1825) who not only sold music and instruments but was also a publisher. After Östergren died, the business passed through various hands until 1831, when Abraham Hirsch, at the age of 17, took over the daily management. In 1837 he bought the business and a year later he acquired a lithographic printing press and continued to expand. In 1842 Hirsch bought the

stock of Albert Wilhelm Möller, an earlier employee of Östergren's who had left in 1831 to set up his own business. It was not until this year that Hirsch finally changed the name of the firm from Östergrens to Hirsch musikhandel. In 1874 he sold his shop to Julius Bagge and from 1884 the publishing firm was run by Hirsch's son Otto. Both shop and stock were eventually taken over by Gehrmans.

Hirsch published works mainly by Swedish contemporary composers, including light music for piano, sonatas and chamber music, songs and male-voice quartets, but also arrangements of symphonies and operas. The growth of his stock is recorded in more than a dozen printed catalogues and in his plate numbers, which proceed in orderly succession to 2659 (1915). He also published two important music periodicals: *Stockholms musiktidning* and *Ny tidning för musik*. Hirsch was one of the initiators of the Swedish publishers' association (1843) and in 1853 he established a pension fund for Swedish music and book dealers.

VESLEMÖY HEINTZ

**Hirsch, Leonard** (*b* Dublin, 19 Dec 1902; *d* Bristol, 4 Jan 1995). Irish violinist. He studied with Adolf Brodsky at the Royal Manchester College of Music (1919–27), and became a principal and soloist with the Hallé Orchestra under Harty, who occasionally appeared as pianist with the quartet Hirsch formed in 1925. He was leader of the BBC Empire Orchestra from 1937 until it was disbanded in 1939. A pioneer of wartime concerts in air-raid shelters, he sometimes gave three concerts during an evening's raid, and was also a member of the wartime RAF SO, with which he toured the USA. He formed a new Hirsch Quartet in 1944, and was the leader of the Philharmonia Orchestra from its formation in 1945 until 1949; he also led the Sinfonia of London, and in 1961 formed the Hirsch Chamber Players, which he directed. A professor of the violin at the RCM (and an honorary Fellow), his work with young musicians became increasingly important from 1948 when he began a close association with the National Youth Orchestra of Great Britain. He was the first music director of the BBC Training Orchestra at Bristol (1966–9) and in 1964 became chief music consultant for Hertfordshire, training and conducting a county youth orchestra that also performed in London and abroad.

S.M. NELSON

**Hirsch, Paul (Adolf)** (*b* Frankfurt, 24 Feb 1881; *d* Cambridge, 23 Nov 1951). British collector of German origin. Hirsch's name is perpetuated by the great music library which he began to assemble in 1896 and took to Cambridge when he left Germany 40 years later. He devoted all the energy and leisure that he could spare from his work as an industrialist to extending the range and depth of the collection. He added to it extensively in Cambridge, where the books were deposited in the University Library, and continued to enrich it with gifts even after he had sold it to the British Museum in 1946 for £120,000.

As a practical musician (who played the violin and viola well) and a highly cultivated man, Hirsch fully understood the needs of both performer and musicologist. Being also a great bibliophile, he built up his music library on the widest possible basis, to a total of some 18,000 items. While he paid special attention to early editions of Mozart, Haydn and Beethoven, his collecting began with incunabula and early theoretical works and went on through the great names of four centuries of music and musical literature, in most European countries. Hirsch also amassed as much secondary material as he could.

Hirsch was generous in giving scholars access to his books, and from 1922 to 1945 issued the 'first series' of the publications of his library. It comprised a dozen of the rarities in it, ranging from Caza's *Tractato vulgare de canto figurato* (1492) edited by Johannes Wolf, to the edition of Mozart's last ten quartets edited by Einstein. (A full list is given in the article on Hirsch in *Grove5*.) The 'second series' comprised the four volumes of the catalogue mentioned above.

Hirsch's own writings were not numerous but they were all the product of discriminating judgment, keen observation and a finely analytical mind. Those which appeared after 1936 bear witness to his admirable command of English.

WRITINGS

'Ein unbekanntes Lied von W.A. Mozart', *Die Musik*, v (1905–6), 164–5 [on *Beim Aussug in das Feld* K552]
*Katalog einer Mozart-Bibliothek: zu W.A. Mozarts 150. Geburtstag, 27. Januar 1906* (Frankfurt, 1906)
*Goethe und die Musik: Auswahl von Schriften Goethes und seines Kreises sowie von Kompositionen seiner Zeit* (Frankfurt, 1920)
'Musik-Bibliophilie: aus den Erfahrungen eines Musik-Sammlers', *Von Büchern und Menschen: Festschrift Fedor von Zobeltitz*, ed. C. Hofer (Weimar, 1927), 247–54

ALEC HYATT KING

**Hirschbach, Herrmann** (*b* Berlin, 29 Feb 1812; *d* Leipzig, 1888). German composer and critic. He initially studied medicine, but from the age of 20 devoted himself to music, studying the violin and composition. The first public performance of his works came in 1839 with a set of string quartets, which were subsequently published as his op.1 under the title *Lebensbilder in einem Cyclus von Quartetten*. Further string quartets followed, as well as several quintets and a septet and octet, which gained Hirschbach a reputation as a composer of chamber music.

He also wrote four symphonies and five overtures, many of which have descriptive titles, and which were arranged and published as piano pieces. In about 1842 Hirschbach moved to Leipzig, where he soon established himself as an acute but somewhat acerbic critic. He contributed articles to the *Neue Zeitschrift für Musik*, among other journals, and Schumann, who had praised Hirschbach's *Lebensbilder*, offered him his support. Hirschbach's string quartets and critical writings are still occasionally mentioned, though his other works are now forgotten.

WORKS

Orch: 4 syms., op.4, op.46, 'Lebenskämpfe', op.47, 'Erinnerung an die Alpen', op.27, 'Fausts Spaziergang'; 5 ovs., op.3 'Festive', op.28, op.36, 'Goetz von Berlichingen', 'Hamlet', 'Julius Caesar'

Chbr: 3 str qts, op.1, 'Lebensbilder in einem Cyclus von Quartetten' (Berlin, 1841); other str qts, opp.29, 30, 31, 32, 33, 34, 35, 37, 38, 42, 43, 49; qnts, 2 vn, 2 va, vc, opp.2 and 39; qnts, 2 vn, va, 2 vc, opp.44 and 50; 2 qnts, vn, va, vc, cl hn, opp.40 and 48; septet, vn, va, vc, db, cl, bn, hn, op.5; octet, vn, va, vc, db, fl, cl, bn, hn, op.26

**Hirtenlied** (Ger.: 'shepherd song'). *See* WEIHNACHTSLIED.

**His** (Ger.). B♯. *See* PITCH NOMENCLATURE.

**Hisis** (Ger.). B𝄪. *See* PITCH NOMENCLATURE.

**Hislop, Joseph** (*b* Edinburgh, 5 April 1884; *d* Upper Largo, Fife, 6 May 1977). Scottish tenor. He studied with Gillis Bratt in Stockholm, making his début there as Faust at the Swedish Royal Opera (12 September 1914). After five years in Scandinavia he spent a season in Italy at the S Carlo, Naples, before making his Covent Garden début on 14 May 1920 in *La bohème*, eliciting the commendation 'my ideal Rodolfo' from Puccini. He appeared in Chicago (1920–21) and at the Manhattan Opera House in New York (1921) and then joined Antonio Scotti's US tour. In 1923 he sang at La Fenice in Venice and the Regio in Turin, and became the first British tenor to take a leading role at La Scala (Edgardo in *Lucia di Lammermoor*). At the Colón (1925) and the Opéra-Comique he impressed by his convincing acting and vocal style. He appeared in a film, *The Loves of Robert Burns* (directed by Herbert Wilcox), and made over 120 records for HMV and Pathé, which cover most of his repertory and include notable accounts of his Edgardo and Faust. He retired in 1937. In a new career in teaching at Stockholm, his pupils included Birgit Nilsson and Jussi Björling. From 1947 he was artistic adviser at Covent Garden and then Sadler's Wells, and he later taught at the GSM.

**Hispaniola.** *See* DOMINICAN REPUBLIC and HAITI.

**Historia.** In the late Middle Ages 'historia' designated the antiphons and responsories of the Divine Office for an entire day; this use of the term was no doubt derived from the close relationship between these chants and the readings of the Office, which were mostly from stories of the lives of saints. In the period of the Lutheran Reformation *historia* (Ger. *Historie*) often designated a biblical story, and from the 16th century to the 18th in Protestant Germany (and to a lesser extent in other areas) any musical setting of a biblical story could be denoted by the term. The most frequently used subject of musical *historiae* was the Passion story; others often used were the stories of Easter and Christmas. A principal composer of this genre was Heinrich Schütz, whose *historiae* are close in conception to the oratorio. The Lutheran *historia* of the 16th and 17th centuries is a particularly important forerunner of the ORATORIO in German. In the 20th century German composers for the Lutheran liturgy such as Hugo Distler revived the *historia*, emphasizing the Christmas and Easter stories.

**Historical Research Center.** *See under* MUSIC EDUCATORS NATIONAL CONFERENCE.

**Historic Brass Society.** Organization founded in New York in 1988 to promote scholarly research on brass instruments and their music. It has held symposia in the USA and other countries. It publishes a newsletter, the *Historic Brass Society Journal* and, in association with Pendragon Press, the Bucina series of monographs. The articles in these publications reflect the wide range of interests of its members, and demonstate the relationship between scholarship and performance. Scholars and performers who have been closely associated with the society include Stewart Carter, Brucy Dickey, Trevor Herbert, Herbert Heyde, Thomas Hiebert, Thomas Huenber, Keith Polk, Don Smithers, Jeffrey Snedeker and Edward H. Tarr.

JEFFREY NUSSBAUM

**Historiography.** Music historiography is the writing of music history. Its study reveals the changing attitudes to music of the past as shown in writings about music (*see also* MUSICOLOGY, §II, 1).

1. INTRODUCTION. Since its origins in the 18th century, the writing of formal music history has been shaped by the more venerable dynastic and national historiographies that established the historical approach as the 'most universal and encompassing and the highest of all sciences' (Schlegel). Thus music history, like the histories of all the arts, shares essential tasks and subject areas with general history, among them the critical examination of sources, chronological narrative, periodization, change and causality, and biography. Nevertheless, because works of art are their central subject matter, the histories of the arts differ crucially from other historical disciplines. Apart from philological topics such as dating, transmission, attributions and editions, the approach to general historiographical problems is inevitably conditioned by the aesthetic views of the art historian. Moreover, critical judgments about works have even more weight in the areas specific to the arts: the elucidation of style (whether that of an individual artist or of a school or a period) and structure, and, when the problem is broached, meaning. The very definition of such categories as style (without which periodization and change cannot be conceptualized) and structure is conditioned by aesthetic priorities. Even philology, especially in the absence of (seemingly) incontrovertible source evidence, relies on aesthetics when judgments about the artistic properties of works must fill that gap.

A highly significant consequence of the work-orientation of art histories has been the question of autonomy, which extends from general historiographical areas to those specific to the arts. Because musical works, for example, possess uniquely musical material, does it follow that music (1) develops according to its own laws and (2) is understood phenomenologically, or is it so highly conditioned by the greater cultural processes to which it undeniably belongs that (1) explanations of its development should not emphasize its autonomy and (2) formal explication is incomplete and insufficient? In all its phases music historiography has encompassed both approaches, supported by the often competing philosophies of history to which every music historian consciously or unconsciously subscribes.

2. MUSIC-HISTORICAL THINKING BEFORE 'MUSIC HISTORY'. Centuries before antiquarian and historical perspectives began to motivate an interest in early music for its own sake, medieval and Renaissance writing on music was informed by a view of the musical past. That view depended in large part on an uncritical acceptance of ancient legend and chronicle, biblical authority and theological doctrine; thus it was not a historical view in any modern sense of the word. Nevertheless, in speculative and practical theory and in aesthetic polemics, the foundations for music historiography were already being laid. The past – transmitted by classical and Christian theorists – was used both to defend current practice and to legitimize innovation. Less frequently the past, notably the recent past, was found wanting. The declaration of an 'ars nove musice' by Jehan des Murs in 1321 and the attack on it by Jacobus de Liège (*Speculum musice*, before 1330) anticipated not only the early 17th-century controversy about the 'seconda pratica' but also the general historiographical problem of periodization and the definition and critical evaluation of music perceived to be new. In Tinctoris's pronouncement that 'there does not exist a single piece of music, composed within the last 40 years, that is regarded by the learned as worth hearing' (*Liber de arte contrapuncti*, 1477), the distinction between older and newer music is purely evaluative; technical and stylistic criteria are not part of his argument. Tinctoris's implied rejection of antique and Christian scholastic theory, and his explicit projection of individual composers – Ockeghem, Regis, Busnoys and others – into the story of music's development, represent an early stage of a gradual change in perspective that established music as a subject for humanistic study and biography as fundamental for the development of music historiography (*see* BIOGRAPHY). The composers Tinctoris favoured were Franco-Flemish; in his *Proportionale musices* (*c*1472–5) he preferred French 'singing' to English 'shouting' while conceding the English their status as the 'fount and origin' of a 'new art'. This perception of national styles goes back to Plato's *Republic* and Athenaeus's *Deipnosophistae*, and looks forward to 18th-century theories of national styles, Herder's and Rousseau's philosophies of history (the national-linguistic basis for individual paths of development) and the writing of national music histories.

Tinctoris, like later proponents of the new, was not entirely dismissive of the old, especially the very old; his introduction to *Proportionale musices* celebrates the distant and recent past in music and music theory. Other humanist theorists increasingly relied on antique thought rather than on Christian doctrine. Both the advocates of the great stylistic innovations of the second half of the 16th century (e.g. Vicentino, *L'antica musica ridotta alla moderna prattica*, 1555; Galilei, *Dialogo della musica antica et della moderna*, 1581) and the defenders of ancient music and the more recent polyphonic music that was already considered to constitute (without the term being used) a 'classic' style (*L'Artusi, overo Delle imperfettioni della moderna musica*, 1600) drew on Greek theory to suppport their positions. But the Christian theory of the divine origin of music maintained itself into the early 18th century and posed a problem for authors who emphasized musical development: how could something God-given be made better by man? Calvisius maintained a balance implicit in the title of the historical section of his *Exercitationes musicae duae* (1600), 'De origine et progressu musices': he acknowledged the divine perfection of the original music, song; credited a man, Jubal, with the invention of a less perfect vocal music; and, like Tinctoris, associated the progress of the previous century with great composers, among them Josquin and Lassus. Calvisius's notion of progress was, however, a pre-Enlightenment one; it was theologically grounded in the Platonic-Christian tradition that viewed *musica humana* as an inferior anticipation of the perfection of the music of the spheres to be revealed upon human salvation.

Both Calvisius, who criticized Pope John XXII for his campaign against elaborate polyphonic liturgical music, and Praetorius, who wrote a 'Historische Beschreibung der alten politischen und weltlichen Musik' in *Syntagma musicum* (1614–18), were Protestants, and their focus on progress and secular national tradition reflected broader Protestant attempts to legitimize the Reformation through the idea of historical development. Catholic writers on music, notably Mersenne (*Harmonie universelle*, 1636–7), clung to established orthodoxy; the sensual aspect of music was minimized, its divine character emphasized, and ancient music was discussed in greater detail than that of the recent past. For Mersenne the history of music

was still 'divine history'. Yet not long after the publication of the *Harmonie* another Catholic writer, the German Kircher, took a more comprehensive view, anticipating the universal-historical approach of the 18th century: within the musical curiosities and legends in the *Musurgia universalis* (1650) are discussions of music in Old Testament times, folk music and the secular music of the Mediterranean world.

The music-historical literature of the century after 1650 displays the same kinds of internal contradictions that arose in the late 15th century. Printz (*Historische Beschreibung der edelen Sing- und Kling-Kunst*, 1690) did not disavow divine origin, but also stressed the sounds of nature and the role of human reason and passion in the development of music. His influential chapter on 'the most famous musicians' contains biographical sketches in chronological order in which the cultural functions of music are also discussed. The chronology begins with the mythical Jubal, but the emphasis rests on contemporary musicians. Bontempi (*Historia musica*, 1695) perpetuated the scholastic approach to music as a mathematical discipline in his comparative discussion of ancient and modern music. The Bonnet-Bourdelot *Histoire de la musique* (1715) combines elements of scholasticism with a nationalist perspective that, in the context of the 'querelle des anciens et des modernes', argues for the superiority of contemporary French music over Italian. The end of the century witnessed the gradual disappearance of the belief in divine origins, an increasing acceptance of the validity of secular music, and a strengthening interest in source studies (especially historical treatises on early music and theory, which were cited at length). Chronological narratives were often based on excerpts from earlier literature that, like Printz's, discussed individual composers and the role of music in daily life (e.g. Walther, *Musicalisches Lexicon*, 1732). Mattheson's negative review of Bontempi's *Historia* and his admonition that the accuracy of secondary sources should not be taken for granted (*Der vollkommene Capellmeister*, 1739, chap.22) reveal the influence of a nascent critical empiricism and positivism fostered by the burgeoning natural sciences, all of which were crucial to the development of modern historiography.

3. TOPICS OF MUSIC HISTORIOGRAPHY SINCE *c*1750.

*(i) Progress and historicism.* The strongest impetus to music historiography was, however, the old question of progress in music, which became more acute in the intellectual climate of the Enlightenment and as an offshoot of the 'querelle'. This controversy, which began in France in the late 17th century, centred on a debate about the superiority of classical over contemporary literature but was soon extended to the other arts. In music it helped trigger the 'querelle des Bouffons,' the long-running 18th-century argument about the relative merits of contemporary Italian and French music. As late as 1780, when La Borde's *Essai sur la musique ancienne et moderne* (the most important French music history of its time) was published, the dispute shaped historical thinking in France. The ancient-modern dispute was the primary context for the development of an enlightened 'philosophy of history' (a term coined by Voltaire) which ushered in the age of true historical thinking and was in large part defined by the notion of progress.

Because the idea of progress depends on the more basic idea of change, theories of progress were developed in conjunction with theories of historical process, the motor of change. The advocates of recent and contemporary culture grounded their arguments for progress on evolutionary development according to natural law. This view – abstract and metaphysical – shares the mechanism of the 'divine plan' of history, but is not based on theology and allows for human activity and perfectibility. The process of history – the advancement of reason through the different phases of civilization – is universal, embracing all humankind. An understanding and appreciation of the present and any earlier period can be obtained only through a consideration of the human race's entire progress. This notion promoted the encyclopedic approach and universal history, and, in the literature on music, strengthened the century-old tradition of locating music's origins and tracing its earlier phases (*see* §3(iv) below). A crucial difference can be discerned, however, in the rising interest in the music of the past for its own sake, and not only for the ways in which it led to the present state. This shift in perception, which spawned historicism, arose virtually simultaneously with the idea of progress and became its strongest competitor in the 19th and 20th centuries.

The belief in progress underlies several of the most important late 18th-century music histories, yet their authors – Burney (*A General History of Music*, 1776–89), Hawkins (*A General History of the Science and Practice of Music*, 1776) and Forkel (*Allgemeine Geschichte der Musik*, 1788–1801) – all celebrated past achievements and the significance of music in earlier cultures, and recognized that progress had limitations and was not inevitable. Hawkins took a progressive stance in his critique of William Temple, who saw in Greek music (and poetry and visual arts) an absolute standard of beauty that could never be surpassed. How were such views possible, asked Hawkins, in an age that gave birth to a Byrd, a Palestrina or a Shakespeare? Yet on the basis of his retrospective aesthetic preferences Hawkins championed *stile antico* church music and opposed post-1600 instrumental music and Italian opera, while acknowledging the merits of Corelli and Handel. Moreover, in his attack on Addison's relativistic argument that English opera should exclude Italian-style recitative because it was foreign to English culture, Hawkins embraced the absolutist, ahistorical aesthetic categories that he rejected in Temple's work. Burney, whose three volumes on 'the present state of music' in continental Europe (1771–3) are the most detailed (and valorizing) discussion of contemporary music culture before the 19th century, deemphasized the liturgical tradition in favour of secular genres, notably Italian opera. He rejected the idealization of classical cultures and (like Mattheson) criticized the authority enjoyed by ancient and medieval music theorists and, by implication, the practice of heavy citation of older literature. But Burney, whose popularizing history is full of the value judgments more usually found in music journalism, did find fault with the state of his preferred genre after 1760.

Neither Hawkins nor Burney appears to have thought deeply about the conceptual bases for their views, but Forkel, whose position as music director at Göttingen University brought him into the sphere of the so-called Göttingen Historical School, was very conscious of the aesthetic and historical problems surrounding the question of artistic progress and undecided about his own

stance (see 'Versuch einer Metaphysik der Tonkunst' in volume i of his *Geschichte*). He shared Hawkins's and Burney's interest in the contemporary situation (but devoted hundreds of pages to ancient Greece); his primary concern was Lutheran church music and its decline after J.S. Bach, the first 'classic' composer. Bach's sacred and secular music represented the culmination of a long historical process; Forkel's recommendations for church music reform foreshadowed the general concern for contemporary music on the part of such 19th-century German historians as Marx and Brendel, and Spitta's more narrowly focussed effort to rejuvenate Protestant music ('Die Wiederbelebung protestantischer Kirchenmusik auf geschichtlicher Grundlage', 1892). Similar efforts were made on behalf of Catholic church music in the German-speaking lands, France and Italy.

Forkel was less confident about the evaluation of earlier music. In his commentary on Hawkins's critique of the aesthetic absolutism of Temple (*Musikalisch-kritische Bibliothek*, 1778–9), he sided with Hawkins, conceding that the primitive cultures preceding ancient Greece and Rome had their own sense of beauty and order, and acknowledging that 'not just a few believe that there could be a music that is very different from ours, but still not less beautiful, perhaps even more beautiful and perfect'. Yet he stressed the difficulty in judging the music of the very distant past because the 'entirely differing intervallic relationships between the older and more recent scales [*Tonleiter*]' prevented adequate aesthetic evaluation and, hence, secure conclusions about progress. Faced with this problem, Forkel resorted to enlightened absolutist thinking, universal history and the traditional glorification of antiquity: preclassical cultures do not derive their values from the 'natural law of artistic beauty and order' which links Greek 'high culture' with that of the present day. Antique music must be 'perfect' on the same basis as other antique arts – poetry and drama, architecture and sculpture – which are not as difficult to decipher and comprehend.

The progress of European music history was, then, the unfolding of new manifestations of the already perfect. Yet Forkel did not endorse the idea of continuous necessary evolutionary progress, which would have contradicted his pessimism about the contemporary situation. The 'fall' of music after Bach was the last phase of a tripartite process of origin, development and decay posited by numerous historical theories developed in the 18th century (Vico, Bacon, Rousseau, Herder) and modified in the 19th and 20th centuries. These theories are described in historiographical literature variously as organic or biological, or in terms of life-cycles (youth, maturity, old age). Progress depends on the beginning of a new cycle. Although Hawkins maintained little hope for a new beginning, he incorporated this scheme into his writing and may have influenced Forkel, who approved of Hawkins's work. Another influence has been seen in Winckelmann's four-part theory set forth in his epoch-making *Geschichte der Kunst des Altertums* (1764), in which a period of differentiation (*Veränderung*) precedes the fall. Forkel's discussion of the many forms of perfection in music since classial antiquity reflects this perspective. But Winckelmann viewed development as autonomous; his concern, foreshadowing style history, was with the 'essence of art', which can always regenerate itself. Forkel's pessimism stemmed from his critique of the totality of contemporary culture in light of his absolutist aesthetic ideal. In an age of decline he found little to look forward to: his organic historical view was irreconcilable with his cautious belief in progress.

In the wake of the French Revolution and Restoration, 18th-century historical thinking was challenged by a rise in scepticism about progress *per se* and an increasing reverence for an idealized past that was often stimulated by religious and nationalistic perspectives. These tendencies strengthened the appeal of historicism, an important aspect of which is a view of the past as equal or superior to the present. Historicism developed as an alternative to Enlightenment teleology as the basis for a philosophy of history. In the histories of the arts it promoted the abandonment of an absolute standard of beauty and a consciousness of the validity of sharply divergent artistic forms and styles over the course of history. Thus aesthetic relativism developed concurrently with historicism, and both tendencies supported the growing positivistic-empirical emphases of music historiography that coincided with the gradual establishment of music history as an academic discipline. Although the length of the discussion of progress and process in this article might suggest the contrary, historicism (which requires less explication and did not take as many different forms) was the single most important impetus to the development of music historiography in the 19th century. Apart from biographers, who devoted roughly equal attention to recent and distant composers, most music historians concentrated on the music of the past, which was generally understood to have concluded with Bach. (This view conflicts somewhat with the widespread idea that 'new' music began in 1600; *see* §3(iv) below.) This emphasis fostered the development of research techniques that are the basis for the positivistic-empirical aspects of modern historical musicology, and also motivated the introduction of monographic studies and articles on narrowly focussed topics (notation, sources, genres, styles etc.) in a limited time span along with traditional universal histories. Both developments allowed for more thorough and rigorous treatment of subject matter than had been imaginable earlier.

A preference for religious music often accompanied the historicist rejection of continual progress and its frequent de-emphasis of universal history, historical process and contemporary music. Martini championed Palestrina, while Gerbert was primarily concerned with the historical relationship between the Roman Catholic liturgy and music. Winterfeld adopted their idea of a 'holy music' in Christian Europe before 1600. A clear indication of Winterfeld's historicism is his appreciation of the modes, which differed both from Forkel's admitted lack of understanding (as well as his view of the development of modern scale systems) and from his contemporary Kiesewetter's view that the modes represented a preliminary stage in the development of the tonal system.

Nationalistic historicism treated folk and religious music, and recent secular art music, especially opera, as equally valid elements of national tradition, while some countries, notably Austria and Germany, in line with German Romantic musical aesthetics, attributed their cultural superiority to their recent instrumental music. Such thinking underlay the writing of national music histories all over Europe. It had acute political implications in Germany and Italy – which until well after 1850 were unified cultures (despite Catholic-Protestant divisions and

tensions in Germany) but not unified states – and in countries such as Russia, where a native 'art' music tradition was in its formative stages in the early 19th century. It was also important in those central European areas (Hungary, Poland and the future Czechoslovakia) which could claim a longer tradition but whose 'high' culture and political life had been dominated by their German, Austrian and Russian neighbours.

Nationalism, universal-historical views and support for the legitimacy of secular music of the present and the past went hand in hand with a continuing belief in progress. Kiesewetter, whose absorption of late 18th-century ideas of progress – contemporary music was cause for 'great happiness' – is felt throughout his influential *Geschichte der europäisch-abendländischen oder unsrer heutigen Musik* (1834), devoted an entire book to secular music before 1600 (*Schicksale und Beschaffenheit des weltlichen Gesanges ... bis zur ... den Anfängen der Oper*, 1841), in which he rebuked those historians who denigrated secular music while asserting that the Italian madrigal was superior to Renaissance liturgical genres with respect to expression and harmonic practice. This was, for its time, a radical reinterpretation of 16th-century music and a critique of a historicism so extreme that it rejected relativism and assumed an absolutist pre-1600 religious aesthetic. (The validity of sacred music with elaborate instrumental accompaniment was a subject of much debate.) Winterfeld was not the probable target, because his book was published in the same year as Kiesewetter's, but Kiesewetter certainly knew Gerbert's and Martini's books as well as more recent work along the same lines, such as Thibaut's *Über Reinheit der Tonkunst* (1825). Nevertheless, Kiesewetter was certainly one of the founders of music historicism; his aesthetic relativism (which, like Winterfeld's, began with Christian Europe – both viewed Greek music as incapable of development) allowed him to achieve a synthesis between perspectives that were often mutually exclusive.

Fétis, the leading 19th-century French-speaking music historian, followed in the 18th-century tradition of a belief in progress with limits. Influenced by the liberal universal-historical approach of Jules Michelet, he relinquished Enlightenment ideas about natural law and abstract reason but also avoided the metaphysics of German idealism. Fétis did not dismiss the importance of human reason, but his emphasis on sentiment, imagination and inspiration, as well as mystical and religious motivations, all bespeak the Romantic historical view originating in the late 18th century with thinkers like Rousseau and Herder. Fétis stressed the particularity and validity of each phase in the historical process, yet, like his 18th-century counterparts, he had reservations about the most progressive music of his own time and suggested a return to 18th-century artistic values. On the other hand, Fétis did not entirely abandon the mechanistic conception of progress, while acknowledging that it was neither continuous nor inevitable. Unlike the universal schemes of the Enlightenment, however, process seemed to operate through 'music creating itself, developing itself, and changing itself by virtue of various principles which are unfolded ... and discovered periodically, by men of genius' (*Biographie universelle*, 1873 edn). Thus Fétis was one of the first proponents of the idea of autonomy, in sharp contrast to the universal thinking of his predecessors. The idea of autonomous development also underlies Parry's *The Evolution of the Art of Music* (first published as *The Art of Music*, 1893), which was conceived in a British intellectual climate dominated by Darwin and Spencer. A strong evolutionary view led him to assert the 'primitiveness' of medieval chant (a characterization Fétis had reserved for some music prior to classical Greece); predicated on natural-scientific theory, his philosophy of history and personal aesthetics were immune to the arguments of historicism and the weight of evidence brought forward in editions and performances of historical music.

In Germany, Hegel was the thinker we most closely associate with the idea of progress in the 19th century: the metaphysical idealism, the dialectical method, the belief that human history is primarily that of the advance of human consciousness and the human spirit, and the liberal nationalism underlying his philosophy of history had an enormous impact on German intellectual life as a whole, and on German historiography in particular. Marx and Brendel are the music historians most often linked to Hegelianism; Brendel explicitly identified himself with the philosopher. Both historians were idealists, stressing the potential of music to present philosophical ideas (the '*Idee*') and the role of critical (self-)consciousness on the part of composers and listeners. On the basis of their teleological perspectives, both emphasized the music of the present and recent past as the highest embodiment of the great advances of the human spirit; the year 1600 was not the end of a great age but the first foreshadowing of later greatness. Both viewed the music of the past before Viennese Classicism with a critical eye; Handel and Bach were notable exceptions – Marx distinguished between Handel's oratorios and the *St Matthew* Passion on the one hand, and Graun's *Tod Jesu* on the other: the higher aesthetic and spiritual values embodied in the music of the former composers ensured its relevance for a spiritually more advanced age that favoured a philosophical 'Kunstreligion' over religion itself.

Yet the paths that Marx and Brendel staked out for further progress diverged. Brendel pinned his hopes for the music of the future on Wagner; Marx rejected the music drama (as did Schumann, whose criticism was also motivated by a theory of progress that is less self-consciously derived from a philosophy of history) and, despite his interest in German opera and church music, viewed Beethovenian instrumental music as holding the greatest promise. (Hegel himself admired Rossini's operas and Bach's *St Matthew* Passion, and, retaining a Kantian hierarchy of the arts, criticized the increasing emphasis on instrumental music that, in his view, could not embody the ideas claimed for it by Marx.) Ambros has also been linked to Hegel on the basis of his references to the Hegelian art historian Karl Schnasse and his critique of Kiesewetter's linear evolutionary thinking. Ambros detected an irreconcilable contradiction between Kiesewetter's perception that Handel and Bach represented a culmination, and his conclusion that the present day was the highest point in musical development. It has been suggested that Ambros subscribed to a dialectical perspective (which could easily accommodate Kiesewetter's conclusions), but the greatest single influence on Ambros was undoubtedly Jakob Burkhardt's cultural-historical approach, which rejected idealism while drawing on Herderian-Hegelian propositions about the unified nature of all cultural phenomena in a particular 'Zeitgeist'.

*(ii) Formalism, autonomy and racialism.* Neither Ambros, nor Marx, nor Brendel rigorously applied the dialectical method (Brendel came closest), nor did they make use of Hegel's division (in his published lectures on aesthetics) of the entire history of the arts into three great periods: pre-antique 'symbolic', antique 'classic' and Christian 'romantic'. The theory of dialectical progress, in Marxist reinterpretations, had its greatest impact on the music historiography of the Soviet Union and in Eastern Europe after World War II. Marxist-Leninist-Stalinist historians replaced Hegelian idealism with a materialist perspective in which socio-economic conditions, defined primarily by class divisions and the ownership of the means of production, constitute a 'structure' that supports and to a large degree determines a cultural 'superstructure'. Human consciousness and its cultural products develop in relation to dialectical process in the structure (see §3(iv) below); hence the art of any particular historical period embodies those conditions and, as a result of the nature of its relation to them, has a distinct class character. In its most reductive form Marxist historiography denies the possibility of autonomous development in the arts and formalist interpretations of art works; after the official rejection of Stalinism some historians (in musicology, Lissa in Poland, Knepler in East Germany) accepted the idea of 'semi-autonomy'. This concept retains the paradigms of dialectics and structure–superstructure, yet is less rigid in its view of the inevitability and character of progress, and grants more independence and self-determination to the superstructure. (For a post-1989 Marxist critique of Marxist musicology see Knepler's article 'Geschichtsschreibung' in *MGG2*). The East German musicologist Brockhaus, in his foreword to *Europäische Musikgeschichte* (1983), proposed a series of laws ('*Gesetzmässigkeiten*' – the term predates Marxism and is still used by non-Marxist historians) consisting of 'dialectical unities' that embrace 'continuity and discontinuity in music history', 'evolutionary and revolutionary change' in the historical process, 'necessity and coincidence'. He also posited a second group of laws that govern the internal process of music history within general history: 'relativity, causality, conditionality, and determinism'. Brockhaus broadened the theory of *Wiederspiegelung* (reflection) first developed as 'intonation' by Soviet scholars (B. Asaf'yev, *Muzikal'naya forma kak protsess* and *Intonatsiya*, 1930–47); it is no longer limited to 'the occasionally possible case of a direct relationship between things social and things musical', but also reflects composers' feeling and thinking, including their ideas about immanent musical processes. This shift made possible a more refined discussion of formal elements in the arts and their semi-autonomous development, and allowed for a more balanced view of such historical factors as 'pure' aesthetics and religion. (A clear measure of the increasing sophistication of Marxist musicology – some might see it as an erosion – emerges through a comparison of the judicious treatment of Bach's religious music and the religious culture of his time in the GDR in 1985 with their neglect in 1950. It is striking that not only East German musicologists but also Blume de-emphasized Bach's liturgical music and projected him as a child of the Enlightenment.)

As post-Stalinist Marxist musicology refined its methods, it moved in the direction taken by the handful of Western European musicologists (e.g. Boehmer, who often criticized the formalism of 'bourgeois musicology') in a less deterministic Marxist-Hegelian tradition identified with the critical social theory and hermeneutics of the Frankfurt School. Their leading representative, Adorno, wrote no formal music history, but his music criticism and sociology were historically orientated, based on the dialectical method and permeated by his preoccupation with the problem and possibility of progress in the music of the 19th and 20th centuries. Adorno's materialism is predicated on the raw materials of music itself: in this respect music was fully autonomous. However, in Adorno's dialectical take on *Geistesgeschichte*, music, whether through a composer's conscious stance towards the musical material or seemingly by its very nature, it embodies the tendencies and processes of its time. From this perspective Adorno polemicized against Stravinsky and championed Schoenberg, despite the latter's political conservatism, as the progressive composer *par excellence* in the 20th century ('Zur gesellschaftlichen Lage der Musik', 1932). For most of its history Marxist musicology, in line with the conservatism of Marxist aesthetics, regarded the musical avant garde in its diverse forms as symptomatic of the decadence and decay of late capitalist societies (Schneerson, 1952, Ger. trans. of Russ. orig.; Meyer, 1952). This reactionary, formalistic and elitist music did not advance the cause of socialism; socially 'useful' contemporary music must preserve the progressive aspects of the 'bourgeois heritage' in music and reinterpret them to achieve a new synthesis. (In the Soviet Union a re-evaluation of Stravinsky that stressed his Russianness and use of folk material did follow his visit to Moscow in 1962; Schoenberg was partially rehabilitated in East Germany after a series of concerts and lectures in 1977, the centennial of his birth.)

German National Socialist musicology shared the aesthetic conservatism and opposition to the avant garde of its Marxist counterpart; unlike Marxism's emphasis on class, the Nazi critique was predicated on the association of such music with Jewishness (Schoenberg) or some other racial or cultural form of non-Germanness, including the cultural bolshevism that was often linked with Jewishness. All these 'decadent' and 'diseased' tendencies were seen to be undermining Aryan culture; progress in contemporary music depended on the purification of German music from within and the spread of its influence abroad (cultural imperialism went hand in hand with military aggression). The thesis of a foreign and Semitic threat to the undeniable superiority of German music was not a Nazi invention; it went back to Wagner and had gained considerable strength in ultra-nationalistic circles well before 1932. Along the way it had been bolstered by the development of pseudo-scientific racial and 'Volk' theories (the latter a perversion of a tradition extending back to Herder), of which Moser was a leading advocate. Influenced by Houston Stewart Chamberlain, Moser (Die Entstehung des Dur-Gedankens: ein kulturgeschichtliches Problem', *SIMG*, xv, 1913–14) argued for a Germanic origin of the modern scales that he contrasted favourably with the 'Latinic' church modes he associated with Italy and France. In his *Geschichte der deutschen Musik* (1920) the declaration that only German music, with its Nordic roots, could produce simple and 'healthy' four-bar phrases and strong rhythms demonstrates a pre-Nazi confluence of racial and 'volkstümlich' perspectives.

Race, 'Volk' and anti-Semitism were the driving forces of the National Socialist music historiography. In 1932 the newly created Staatliches Institut für deutsche Musikforschung became the centre for musicological 'Gleichschaltung'; some music histories published before 1932 were revised to accommodate new ideological imperatives, and Nazi music historians not only emphasized the greatness of German national tradition (this was neither new nor extraordinary) but also asserted the pre-Christian Teutonic basis of this tradition, thereby minimizing the significance of sacred music and foreign influence, notably from France and Italy. (Mersmann's *Eine deutsche Musikgeschichte* (1934) was criticized for its discussion of non-German contributions to German music.) In books on German music and in comparative studies such as Bücken's *Musik der Nationen* (1937), Nazi musicologists argued for German superiority and took pains to distinguish between German and Jewish music, devoting many studies to Jewish music itself. Blume's *Das Rasseproblem in der Musik* (1939) stands out for its critique of the crudest forms of racialist music historiography and its systematic attempt to legitimize National Socialist musicology scientifically.

*(iii) Process and causality.* Apart from those instances in which 20th-century ideologies dictated a belief in progress, music historiography of the later 19th century and after was less interested in broad problems of causality and process than before; when it engaged such questions, it was less inclined to consider them from a teleological perspective. Historical development, the term implying change with some kind of continuity and causality about which theories can be built, was not discounted, but historicism and positivism discouraged the academic scholar (a scientist) from culturally based or idealistic philosophies of history, and from making broad value judgments about aesthetic issues – notably about the music of the past – that underlie theories of progress. (On the other hand, the strength of historicism and the conservative aesthetics associated with it fostered the widespread antagonism in historical musicology to avant-garde 20th-century music.) In their place various kinds of cyclic theories were advanced, some of which were stimulated by Heinrich Wölffin's art-historical study *Renaissance und Barock* (1888). Wölfflin, whose emphasis on technical discussion of formal elements provided an influential model for the concept of style in music historiography, argued for the spiritual and stylistic unity of Renaissance and antique art. Thus cyclic development unfolds on the basis of periodically surfacing historical continuities rather than continual progressive change. In each period the different cultural spheres (the arts, philosophy, religion) display 'parallel' paths of non-autonomous development (see §3(iv) below). In this vein, Schering proposed a cyclicism based on two different forms of musical symbolism – conceptual and emotional – that succeeded each other in line with broader cultural patterns (e.g. the conceptual symbolism of Bach's age giving way to the emotional symbolism of Romanticism). The concept of symbol was favoured in the early 20th century by non-formalist aestheticians and some historians (such as Erwin Panofsky in the visual arts) subscribing to a hermeneutic and intellectual-cultural-historical approach ('*Geistesgeschichte*'), as championed by Wilhelm Dilthey, in opposition to positivism and theories of autonomous development.

Schering's symbol is a broadly conceived category that accommodates the full range of musical elements and techniques, styles and genres developed through musical history, and also constitutes an aesthetic theory that is the basis for a discussion of work content. Other prominent cyclical theories are more 'scientific'; they advance narrow, 'objective' categories derived from the style-critical approach to periodization, such as melodic unity or diversity as described by Mersmann (1921, pp.67–78), and polyphonic texture as proposed by Moser (1938) and Lorenz (1928); the latter's work reflects the influence of his father's general historical theory of generations (O. Lorenz, 1886). Such criteria are more precise than Schering's symbol, but they are far too limited to accomplish their task and, as Gurlitt argued (1918–19, pp.571–87), should not be applied to humanistic studies. Gurlitt made a detailed critique of the life-cycle theory, which could support both optimistic and pessimistic forecasts. In Spengler's *Der Untergang des Abendlandes* (1918–22) this theory received an influential and pessimistic reworking. Gurlitt argued that determinations of growth and decay in the histories of the arts can be based only on aesthetic judgments and are therefore incommensurable with the scientific claims of the theory. In order to avoid this problem, and also to offer an alternative to positivism, Gurlitt proposed a non-evolutionary division of music history into six epochs on the basis of rhythmic practices; he chose rhythm because it is the 'most primal' musical element, preceding even sonority. In and of itself, this choice is also very narrowly focussed, as is Schering's less systematically worked-out view of musical development on the basis of sonority – the primary material for musical symbolism. Both authors' emphasis on immanent musical material is at first suggestive of autonomous stylistic development (see §3(v) below) as advanced by Riemann (1904–13 and 1908) and Adler, whose theoretical writings criticize autonomy but whose practical method applies it (1911 and 1919). However, Gurlitt and his teacher, Schering, opposed autonomy on the grounds that it was positivistic; they interpreted style changes as expressions of artistic preferences (Gurlitt's 'Kunstwollen') that arose within general culture and were conditioned by individual and social psychology. Schering suggested that 'style history', which was rapidly becoming entrenched as the leading method, should be replaced by 'symbol history' in order to reinforce the linkage between formal and cultural historical elements.

Thus despite the widespread disavowal of progress in mainstream musicology, the question of process, while less burning than before, still remained controversial. Indeed, the tensions between scientific positivism and humanistic cultural theory that framed the debate also defined the parameters of the discussion of periodization, the problem which about 1900 replaced (while subsuming) that of development and progress as central to music historiography.

*(iv) Periodization.* Ambros saw a necessary and decisive step towards a rigorous music historiography in Kiesewetter's division of music history into epochs. He had reservations about Kiesewetter's criteria – epochs were named after the composers whose innovations and influence were definitive for their period – yet the very presence of a periodization based on a single theory about historical process provided an 'order and coherence' that he found lacking in Forkel's chronology. In fact, Forkel

did propose in his essay on metaphysics a tripartite universal-historical scheme in which the development of verbal language is connected to progress from primitive *ur* musics consisting of mere sonority and rhythm to differentiated forms based on the development of scales and counterpoint in antiquity and the modern world. But the conceptual and chronological looseness and broadness of this partitioning limit its usefulness, and it hardly figures in Forkel's narrative, while the pluralistic approach to periodization (different criteria for different historical periods) only exacerbates these problems. Hawkins did not even attempt to impose order: his chapters are simply numbered, and the two volumes lack descriptive subtitles; the decision to begin the second one about 1600 does, however, reflect his sense of large-scale historical division that was often adopted.

Periodization runs counter to a philosophy of history like Forkel's, which is based on a theory of progress driven by the continuity of natural law and is coupled with an absolutist aesthetic. On the other hand, the historicist emphasis on the particularity of different phases in historical development – which does not necessarily exclude progress – as well as the pragmatic need for 'comprehensibility' (Ambros), helps explain the increasing preoccupation with periodization. But periodization could replace process as the primary concern only after theories of development had been consolidated, for the criteria for the historical divisions had been derived from such theories or, in the earlier phases of music historiography, were relics of medieval thinking. The latter, represented by such authors as Calvisius, Printz, Marpurg and Martini, who combine divine and biblical history with periods based on dynastic and great historical figures (often not musicians), may be glimpsed in Bonnet's seven divisions: (1) Divine Origin to the Flood, (2) Flood to David and Solomon, (3) Solomon to Pythagoras, (4) Socrates to Christ, (5) Christ to Gregory, (6) Gregory to St Dunstan, (7) 1000–1600. Burney retained elements of this approach, but in the first volume of his *General History* eliminated biblical chronology and introduced immanent-musical criteria (e.g. the 'Invention of Counterpoint and the State of Music, from the Time of Guido') that figure even more prominently in vol.ii (which includes a chapter on genres), that begins in the middle of the 16th century with a chapter tracing the 'progress of music in England' from the reign of Henry VIII to the death of Queen Elizabeth. Burney also devoted chapters organized by century to the music of France, Germany and Italy (the Netherlands School awaited its 19th-century discovery), thus achieving a synthesis reflective of his universal-historical approach.

Periodization theories fall into three groups: those based on immanent-musical criteria, those based on general history and those based on cultural history and the histories of literature, the visual arts and architecture. 18th-century schemes made some use of the first and depended heavily on the second; the influence of the third, which has proven to be the strongest, was first felt in the later 19th century. The term 'Renaissance' (Michelet, 1855, and Burckhardt, 1860) was introduced into music historiography in the 1880s, followed shortly thereafter by the adoption of such terms as 'Baroque' (Wöllflin, 1888) and 'Romantic' and 'Classical'. The last two had been used by critics and aestheticians in music and the other arts since the late 18th century: in his music history Köstlin (1875) had designated composers of the 18th and 19th centuries as 'Classiker' and 'Romantiker', but he did not apply the term to epochs. Wöllflin's work was especially influential because it combined a cultural-historical approach with an emphasis on style-critical analysis, thus fulfilling the imperatives of the strongest historiographical currents of the time. The attractiveness of cultural-historical designations gave rise to terminology for smaller temporal and geographical sub-periods, such as 16th-century 'mannerism' and 'Empfindsamkeit'. Terms applied to very recent and contemporary music, such as 'Impressionism' and '*verismo*' were often taken over from criticism, just as 'classicism' and 'romanticism' had been earlier.

The broadest general-historical divisions have had the greatest influence: since the advent of humanism the ternary division – antiquity, a middle age and a new or modern time – has permeated Western historical thinking in all areas. The chronological determination of the beginning of the third period has been a long-standing problem that has also been felt in music historiography. In Schering's explicit application of the division – 'Altertum', 'Mittelalter' and 'Neue Zeit' (1914) – the 'new time' is placed within the general-historical 'Early Modern Europe', that orignates within the confessional and national Reformation and the style-historical Renaissance. Yet since the 18th century historians subscribing to diverse historical theories have favoured the year 1600 as the watershed. Even Ambros, who celebrated the new impulses of Renaissance culture, viewed its music as the final stage of a historical development beginning with liturgical chant.

The conceptual problem of the 'new' and the 'modern' is heightened by the fact that these terms were used in reference to time spans of considerably different length. Schering subdivided his third period into a 'newer' and then a 'newest' time beginning in 1790, the advent of Romanticism. (Moser replaced this in the fifth edition of his *Geschichte der deutschen Musik* with a single third period containing subsections.) This represents a late stage in a series of adjustments that usually pushed the beginning of the 'new' forwards, and reflects not only broad historical thinking but a view of the changing contemporary scene. The 'new music' (Bekker, 1919; Einstein, 1926) of the 20th century replaces that of the early 19th century (and that of earlier ones, such as the *Nuove musiche* of the 17th). Another problem in the concept of the new is especially acute in its application to 20th-century music: some historians have conflated the term with a post-Romantic modern period (Adler); others have differentiated between a 'modern' period lasting from 1890 to 1914 and the 'new' music thereafter (Danuser, 1984, on the basis of compositional technique). 'New' has been used in the purely chronological sense that encompasses all the music of the new century, or has been reserved for music with progressive or avant-garde tendencies (Morgan, 1991). The recent plethora of 'neos-' and 'posts' and combinations thereof applied to cultural-historical epochal names (e.g. 'Neo-Post-Romanticism') – which are themselves anything but fixed in their meaning – demonstrates the continuing dependence on such terminology but promises no clarification of the problems inherent in its use.

Music historiography has also drawn on general-historical periodizations based on centuries and the

particular phases of national histories that are often coupled with dynastic and religious histories and social and political movements. The impact of the latter is strongest in non-autonomous historiographical literature and in monographs devoted to the music of a particular nation. The former, reflected in chapters of general histories and textbooks and in single volumes, is convenient but as mechanistic as the theories of generations or cycles with which it is sometimes combined (Lorenz). And if undertaken seriously it requires subdivision based on fundamental style changes (e.g. the 18th century), or clarifications such as Dahlhaus's discourse (*Die Musik des 19. Jahrhunderts*, 1980) on the beginning (1814) and conclusion (1914) of this century and his justification of the title. For good reason there have been few attempts to establish a periodization primarily on the basis of the century, although the standard Italian history of the mid-20th century, *Storia della musica* (1936) by Andrea Della Corte and Guido Pannain, and Jules Combarieu's *Histoire de la musique des origines au début du XXe siècle* (1946–60) make extensive use of such divisions. Handschin (1948) pleaded for the objectivity of the 'century' (he explicitly opposed both the subjective nature of the genius and the cultural-historical paradigms), which he arbitrarily associated with autonomous development, and for its 'economy of view'. Neither argument is convincing. Marxist musicology derives its musical periodization from its own theory of general-historical development; immanent-musical titles are acceptable for subsections, but the larger periods are still based on the structure-giving socio-economic phases (Margraf, 1984). Wiora's history (1961) represents a 20th-century (non-Marxist) reworking of the universal-historical approach that avoids the notion of continual progress: the music cultures of the first three divisions have not been replaced or decayed; they survive, albeit in altered forms due to cultural assimilation. Wiora defined four 'World-Periods': (1) primeval and prehistoric, (2) the high cultures of classical antiquity and the Orient, (3) that of Western music, with its 'special nature' (the development of notation, the idea of the autonomous work, greater diversity and change – not aesthetic superiority) and (4) that of global culture in an industrial-technological age. Wiora's work was influenced by ethnomusicological perspectives, including a critique of the Eurocentrism of historical musicology.

Immanent-musical designations for historical periods were used extensively by Fétis and Ambros (indeed, although the latter was associated with cultural history, Renaissance is his only cultural-historical volume title). Even the great-men epochs of Kiesewetter imply autonomy, as he recognized, for such divisions emphasize the genius's transformation of musical material rather than the cultural-historical spirit of the time imprinting itself on him. In the style-critical histories of Adler and Riemann, genre, style and compositional-technical procedures are the dominant criteria for periodization. Riemann named some chapters within larger divisions by composer, although, in light of such period designations as 'Epoch of the Figured Bass', he is often regarded as the leading exponent of 'music history without names'. Not a single composer's name appears in Adler's table of contents, nor does a cultural-historical designation; this absence implies policy set by him for the various authors who contributed material. Composers are named in the body of the text and their achievements are duly noted, yet the sense that they found themselves in a particular period and in a phase of historical development that had their own dynamic emerges again and again, as in this summary about the lied in the 19th century: 'Thus the Lied takes a course of development in the nineteenth century from Schubert over Mendelssohn [and], finds in Schumann a new design, enriches itself from the contemporary operas of a Wagner'.

Immanent-musical section titles have the advantage of precision, but this narrow specificity limits their usefulness. For instance, Riemann's 'Epoch of the Figured Bass' hardly does justice to the variety of techniques and styles it is supposed to encompass. A cultural-historical period name like 'Baroque' is broad and rich with associations, but it is vague and not inherently linked to a particular style or genre. Thus it is understandable that the questions of its origin, maturity and passing (ternary thinking is often applied to the subdivision of style-periods), and its applicability to all the national, functional and generic styles of any given time span, have been vigorously debated throughout the 20th century. A *locus classicus* is 'Das Renaissanceproblem in der Musik' (Besseler, 1966), which addresses the question of the 14th- or 15th-century origins of the Renaissance, in view of the earlier century's status as the fount of the literary and artistic rebirth on the one hand and, on the other, the influential idea of the 'Ars Nova' (Wolf, Riemann) as a separate style-period distinct from both the Middle Ages and the Renaissance. Both Besseler and Fischer argued for the earlier date. (An immanent-musical periodization in which the entire span of polyphonic music until 1600 is viewed as a large-scale unity can deal with the problem at the more detailed level of the subsection.)

The style-critical arguments advanced for such determinations hinge in part on a more general historiographical question: does a new period begin when distinctly new stylistic features first appear (Schering, 1914), or only when they have become predominant (Blume, 1974). Historians have also debated which aspects of style are crucial in bringing about changes sufficiently broad and deep to necessitate the determination of a new period, and whether they represent evolutionary developments or revolutionary transformations (Reese and Lowinsky respectively on the Renaissance; see Owens, 1990–1). Opinions on the latter question may be conditioned by broader historiographical perspectives (and aesthetic prejudices), as for example in the treatment of Greek music. The first of Adler's three style-periods begins with four liturgical chant traditions – Western, Byzantine, Russian and Jewish; it is followed by two timespans, *c*1000–1600 and 1600–1880, and a fourth section, 'Die Moderne', is organized by country, not styles. Directly preceding the first section is a brief discussion of the principles underlying the periodization of 'Western' music; before that are chapters on the music of primitive ('Natur') and oriental peoples and antiquity. Adler, like some other historians, excluded the music of classical Greece from his history of Western music but included eastern Mediterranean and Russian religious music; the Judeo-Christian heritage apparently had greater meaning for him than the pagan Greek one. Schering recognized the continuities between eastern and western Mediterranean liturgical chant; his first period ends about 500; the systematization of monastic hours, and the rationalization and institutionalization of 'Gregorian chant' mark the

beginning of the second period. Ambros criticized the disparagement and neglect of Greek music in earlier music histories (Kiesewetter omitted it altogether) and, although the divisions of his narrative do not emphasize explicit temporal-stylistic continuities, the very length of his discussion – made possible by the advances in empirical knowledge – underscores his view that 'no period of Western music has been able to avoid the influence of the ancient world', that is of the Greeks.

Despite the problems connected with all these approaches, periodization has always been an axiom of music historiography. We might expect that the establishment of style-criticism as the prevailing methodology would have led to a predominant use of immanent-musical terms, but the resonance of cultural-historical designations has proved stronger (albeit in conjunction with the others), notably in their application to large historical spans. Even Riemann, the fervent opponent of *Geistesgeschichte*, could not resist the suggestiveness of 'Renaissance' in his history, and it is difficult to imagine any alternatives that could supplant such cultural-epochal designations. Fortified by their style-critical underpinnings, they possess too much historical meaning.

*(v) Culture, style and work.* Burney explained why he abandoned his original intention of writing an autonomous music history: 'I found ancient Music so intimately connected with Poetry, Mythology, Government, Manners, and Science in general, that wholly to separate it from them, seemed to me like taking a single figure out of a group, in an historical picture; or a single character out of a drama, of which the propriety depends upon the dialoge and the incidents' (introduction to *A General History of Music*, i). Universal-historical and encyclopedic perspectives underlie the holistic approach of great general histories of the mid-18th century. The urge to share the fruits of empirical research and provide a picture of music history in its entirety – ancient theory and notation, instruments, institutions, composers' lives and their music – may have forced Hawkins and Forkel to leave their histories incomplete. The discussion of music largely concentrated on style, although the term is used relatively infrequently; specific compositions were considered more as embodiments of style – a paradox in that the works are seen as historical facts from which style can be constructed – than as individual works with unique structural and expressive contents; early music was described in more technical detail than the (supposedly) more familiar contemporary music which is discussed primarily in evaluative terms. In either case the commentary was very brief. More attention was given to explanation of the origins of individual works – institutional contexts such as the church or theatre, service to an aristocratic employer, commissions, personal entrepreneurship. This emphasis, which recurs in the 19th and 20th centuries, rested on the historicist assumption that the essence of something can be explained by its origins.

A century later both Ambros and Fétis were unable to finish their histories (Ambros's was completed by colleagues). The material to cover had swollen enormously and both historians, like most of their contemporaries, wrote considerably more about style than their predecessors had done, while retaining their commitment to the totality of music history. On the other hand, they wrote less about cultural and intellectual history, which is hard to reconcile with Ambros's identification in the literature on music historiography as a practioner of *Geistesgeschichte*. Ambros wrote evocative romanticizing introductory chapters to the large-scale divisions of his volumes, but when he discussed the music of the various 'schools' he emphasized immanent-musical considerations, with an occasional passing reference to a 'Geist der Zeit' that can be glimpsed in the stylistic properties of a particular composition. Although, in 19th-century histories, individual works are often discussed in greater detail than before (the influence of long discussions of new works in music journals may be felt here; *see* CRITICISM, §II, 1), the focus is still on the style of a composer or a school, not on the individual work.

Thus 20th-century style-critical approaches may be viewed as a formalization of a well-established orientation. The term 'style' now found its way into book titles, period designations and journal articles; cultural history receded even further in style-orientated general histories of music, although it remained strong in biography and figured prominently in studies devoted to religious music and opera, and in national, regional and municipal music histories. As a consequence of the mass of material that had been accumulated and the development of academic specializations, the one-author encyclopedic approach that survived into the 19th century gave way to multi-author histories and histories of specific topics such as aesthetics, theory and organology. The focus on style in general music histories may have been motivated by pragmatic as well as conceptual considerations: there was simply too much data, and choices had to be made.

'Style' was extremely useful. It was (or claimed to be) objective and scientific; it provided the language for a discussion of individual works in inherently musical terms, yet still differed crucially from non-historical 'theoretical' analysis; it made possible a comparative critical approach. Moreover, it was equally applicable to all historical periods and genres; it could support either a teleological view of historical development or a relativistic one; it could even buttress a 'Zeitgeist' approach or the hermeneutic explication of an individual work. Although 'style' was conceived as a value-free idea, it served National Socialist musicology in determining the racial and folk basis of national and ethnic styles and their relative merits. The emergence of historical musicology as a mature discipline and the development of the concept of style are inextricable. 'Style' was the basis for the multi-volume histories (*Handbuch der Musikgeschichte*, *(New) Oxford History of Music*), single-volume period histories (Reese, Bukofzer), genre studies and the works part of life-and-works biographies that have, until recently, defined the field. And 'style' has also been the basis for articles and books devoted to single works.

Yet 'style' has been criticized. Despite its flexibility, the major impact of its tendency towards autonomy has been to dissociate musical historiography from general historiography, and with that music from culture, while its formalism has de-emphasized questions of meaning and function. As discussed earlier, in German musicology before the Nazi period historians in the hermeneutic tradition acknowledged this danger; Schering (1936), while recognizing its achievements, perceived that the concept of style fails to explain adequately the phenomenon of style change and also argued that a critical method designed to determine stylistic common denominators cannot do justice to the unique structures and meanings

of individual masterworks. His alternative, the symbol criticism that related music designs to emotional and conceptual mental images, was fruitful, although reductive, with respect to Bach's vocal music, but untenable in its primary application, Beethoven's instrumental music, for which he discovered hidden verbal programmes that Beethoven supposedly suppressed. The derisive reception of Schering's work in the 1930s and the race and style focus of National Socialist musicology discouraged the development of this young tradition of hermeneutic historical theories and work criticism.

In postwar West Germany and Austria this situation did not change; autonomous style history provided a safe alternative to National Socialist musicology and to the Marxist methodologies of East Germany and the socialist bloc that made any kind of cultural theory and hermeneutics suspect. In this intellectual context the grandly conceived philological-positivistic projects of the postwar years were launched (and in some cases revived) throughout Western Europe: new critical editions of the 'great' composers and historical repertories; thematic catalogues, RISM and RILM, and manuscript studies that made important advances in method and technique and significant contributions and corrections to matters of chronology and transmission, authenticity and compositional process. In the USA and Canada, where émigré musicologists shared the perspectives of their European colleagues, philology helped support the rapid growth of the discipline, presenting virtually unlimited possibilities for dissertations and publications. It also provided a haven to non-Marxist Soviet-bloc musicologists who concentrated on such areas rather than pursuing politically sensitive topics such as meaning and historical causality.

But from the very beginning the limitations of these emphases were recognized, and the field did not entirely lose its breadth: even autonomous style-criticism is less purely positivistic than source studies and editions; Blume's important style-period articles in *MGG* and, to a greater extent, Lang's *Music in Western Civilization* (1941) retained cultural-historical approaches; and traditional 'bourgeois' topics such as philosophy and aesthetics or historical music theory (the latter also favoured by non-Marxist scholars in the socialist countries) retained their appeal. The problems of periodization and style change were also actively pursued – not so much in terms of broad historical causalities but rather with respect to questions of narrowly defined chronological and regional stylistic transmission and influence. And at round-tables and special sessions of musicological conferences (e.g. 'Musicology Today', *IMSCR XI: Copenhagen 1972*) Western musicologists regularly engaged in polemical debates with their neighbours to the East about historical causality and determinism, progress, formalism, and the social character and content of music.

One of the principal Western participants in the disputes of the 1960s and 70s was Dahlhaus, who developed his own historical method – the most self-consciously articulated one in the post-war era (*Grundlagen der Musikgeschichte*, 1977) – in significant degree as a response to Marxist (including Adornoesque) critiques of autonomous historical process and formal work analysis. Influenced by the post-Diltheyian hermeneutics of Hans Gadamer and H.R. Jauss, Dahlhaus also rejected style criticism and history in their pure forms, but dismissed the results of sociological criticism as 'verbal analogy' that disregards aesthetic and immanent-musical essences. Consequently, music history – if, as Dahlhaus believed, music history should be principally a history of works – is 'hardly realizable' as social history (in both Marxist and non-Marxist versions); Dahlhaus was especially critical of the reductive 'totality' and teleology of the Marxist view. On the other hand, he conceded that traditional *Geistesgeschichte*, the only established alternative to both Marxism and autonomy, with its assumptions about parallel cross-cultural development and its very claim to be able to understand the unified spirit of past epochs, was no longer tenable.

Dahlhaus advocated a 'pluralistic' structural history which attempts to come to terms with the totality of a historical period without succumbing to the errors of cultural history or reductive causal theories. Such structures, which are grafted onto traditional periods (e.g. the Renaissance or the 19th century), possess an inner stability and coherence – Dahlhaus referred to Burckhardt's 'conditions' upon which the idea of the Renaissance could be advanced – that allow for divergence and opposition, and for the 'non-contemporaneity of the contemporaneous' within the period. (The idea of non-contemporaneity acknowledges stylistic diversity and makes possible the structuralist de-emphasis of historical process within a fixed time frame.) Comprising the structures are 'systems of systems' based on the 'ideal types' that the historian, who cannot in fact write a total history, chooses as most representative of the period under investigation. These types consist of a 'framework of categories' that are grouped around works representing ideal types. Dahlhaus chose 19th-century Central European instrumental music to exemplify a structure. It may be condensed into three fields in which correlations and overlaps are evident: (1) general cultural orientation and aesthetics – the principles of cultural education (*Bildung*), aesthetic autonomy and genius; (2) institutions – the dialectics of the concert: aesthetic autonomy and *Bildung* as opposed to market and commodity; and (3) style and repertory – the emancipation of instrumental music, the weakening of genre traditions, musical poetics versus virtuosity, the formation of a canonic repertory and the problems of progress and originality.

Dahlhaus stressed that the principle of aesthetic autonomy represents a historical circumstance (and thus should not be mistaken for an – or his own – idealistic historical approach), and this explains the striking omission of any general-historical categories, including ideological ones such as nationalism or republicanism before 1848, which are, after all, intellectual movements that had an impact on musical thought. Dahlhaus was well aware of this omission, and his discussions of the German cultural middle class, music criticism and historiography do not exclude such considerations. Nevertheless, they are tertiary categories that do not qualify as ideal types; they partially determine the secondary ones represented in the structure and relate, if at all, only by verbal analogy to the primary one. Dahlhaus's comments on aesthetic autonomy have an ironic twist, because his work-orientated history and his hermeneutic method have been generally regarded as idealist. His choice of period to illustrate the method is revealing in this regard; the autonomous works of the core (Austro-Germanic) instrumental repertories of this time and place may be seen as his meta-ideal type for all music. Critics of his book on

the 19th century have objected to the ideal-type method, claiming that his overly narrow focus on this repertory makes it impossible to present a balanced picture of the total structure and reflects *a priori* aesthetic views that have nationalistic underpinnings. Dahlhaus believed that the 'aesthetic presence' (or future influence) of historical works must be considered in selecting ideal types; a history of 18th-century music predicated on the immediate stylistic and functional (e.g. performance, publication) significance of a particular repertory could legitimately omit a discussion of J.S. Bach's cantatas. Their essence as autonomous works, a status that they did not gain for more than a century, has guaranteed their survival and their legitimacy as a subject of music history. Work-autonomy does not imply, however, pure analytical formalism; historical understanding is incomplete without a consideration of those elements of the structure that impinge on the work. Apart from strictly musical categories such as genre and form, they are, nonetheless, for the most part limited to aesthetic and philosophical issues, whereby a piece of music may embody aesthetic principles that function in other areas of the arts, but parallels between individual works in different media are scrupulously avoided. The role of the composer is a difficult problem for Dahlhaus, as the twists and turns of his two-part discussion of the *Eroica* Symphony (*Ludwig van Beethoven und seine Zeit*, 1987) demonstrate: on the one hand, the symphony cannot be understood without an awareness of Beethoven's political views, his attitude towards Napoleon and his own self-image; on the other hand, the discussion of its contents omits any consideration of their embodiment in its style, structure and aesthetic essence.

*(vi) The 'new musicology'.* In the late 1970s some prominent American scholars began to call for new initiatives to counter (or balance) positivism and formalism; Kerman's historically informed criticism and Treitler's critically inclined historiography paved the way for the 'new musicology' of the 90s (*see* MUSICOLOGY, §IV, 8). Kerman's is a work-orientated style-critical approach in which abstract aesthetic questions and cultural factors play a subordinate role; his influence lies less in his development of new critical strategies than in the alternative he provided to purely structural analysis. Treitler's opposition to 'a history in which aesthetics and hermeneutics play no significant part' (*Music and the Historical Imagination*, 1989) echoes that of Dahlhaus, and his reflections on methodology – among the most fully developed in English-language musicology – cover much the same ground. However, Treitler criticizes Dahlhaus's assumption that the musical work, as an 'abstract text' and 'ideal type' with a 'real' and 'precise meaning', is the basis for music history. In his arguments that the work is (1) not fixed and determinate in an ideal state and (2) only one thread in a complex cultural pattern, Treitler anticipated the direction of the most recent major developments in largely American historical musicology, which have established paradigms of international significance: the introduction of 'structural' and 'post-structural' critical perspectives from linguistics and the literary disciplines and their combination with a hermeneutics variously derived from Adornoesque social theory, gender studies and criticism, as well as reception theory and history (which has been established in German musicology since the 1960s). Furthermore, social history and anthropological and ethnomusicological methodologies have also been influential.

As this array suggests, the historiography of the 'new musicology' is not monolithic; if any unifying factors may be discerned, they are the critique of autonomous history, purely formal analysis and aesthetic idealism. Cultural-historical approaches range from fairly traditional ones that reflect German *Geistesgeschichte* in its Dahlhausian reworking to 'post-objective historical approaches' of a post-Diltheyian hermeneutics that underlies what Tomlinson calls a 'Historiography of Others'. Works – particularly great canonic works – are still the primary focus in much of this literature; reception history represents a cautious approach that studies criticism rather than practising it, while operating within a cultural-historical context; determinations of immanent-musical manifestations of gender identity and social consciousness, or of specific parallels between musical and literary works, have been criticized for being as 'essentializing' as the findings of traditional style criticism or 'hard' analysis.

Some of the most influential criticism (Abbate, Newcombe) emphasizes formal (narrative) and phenomenological aspects of music; its hermeneutic basis is not a historical one. This work is historiographical only in the limited sense that it begins with the premise that musical works are the subject of music history. A work orientation also underlies the establishment since the 1970s of historical performing practice as an important sub-discipline. Performing practice is not intrinsically 'new-musicological' in the sense that it operates with critical methodologies, yet it has been applied to reception history (performance as a category of reception). Although performing practice research, especially in its earlier stages, often sought to determine an authentic performance style that alone can render compositional intent, more refined work has, in line with performance as reception history, recognized the historically determined authenticity (within limits) of varied and opposing interpretative traditions. Both forms of reception history have been applied to a critique of the idealistic work concept; the hermeneutic argument that our understanding of a work is dependent on verbal and performance interpretations that have become part of that work's history is a powerful and influential one.

Despite its methodological prominence, the focus on the work, and on the related but hardly identical idea of the musical canon, has also been under attack in recent thinking on historiography. In addition to the objections discussed above, critics of the work approach (see de Brito, 1997) object that the concept legitimately may be applied only to a very limited span in Western music history and, moreover, only to the Western tradition. Furthermore, the narrow focus on the work de-emphasizes the complex of cultural processes in which music is conceived and performed – 'the work-concept is not a necessary category within musical production' (Goehr, 1992, p.114). This critique has been countered (Strohm, 1997) with the argument that it is a misleading, inaccurate 'theory reduction' to brand traditional music historiography as only a history of works; music historians still address the topics which they are now criticized for ignoring. Resembling primarily American academic opposition to the literary canon (in part motivated by curricular concerns), the critique of the canon of works by predominantly male, Caucasian European and American

composers that has been established by predominantly male, Caucasian European and American performers, scholars and critics rejects the aesthetic and social (e.g. ethnic, class and gender) biases inherent in it, and even questions the very validity of the idea of a Western 'art' music. While the acceptance by historical musicology of repertories such as jazz and rock has significantly extended the range of musics deemed worthy of scholarly investigation (and thereby of becoming a part of formal music history), and the strength of feminist studies has forced the re-evaluation of known music and the discovery of forgotten repertories by women composers, the canon as a structure remains firmly anchored.

As early as the 1970s Dahlhaus voiced concerns about the disappearance of the historical method from musicology and its replacement by purely systematic approaches and non-historical critical methodologies. Similar concerns underlay the often bitter controversies of the 1990s about methodology, in which the various parties (including theorists) sometimes overlooked – at least when engaged in polemic – the fact that many different kinds of scholarship are valid and necessary to sustain the vitality of the discipline. There is no doubt that the 'new musicology' has enriched the field, and although its methodology and vocabulary might seem unrecognizable to a previous generation of scholars, it still makes use of traditional concepts such as style, historical periodization and formal analysis. These research areas have retained their vigour independent of any association with the recent trends, as have source studies and edition-making, and their future does not seem to be in jeopardy.

It has legitimately been asked if the 'new musicology' is really so new. In one respect music historiography since the last decades of the 20th century has been remarkably innovative in the questions it has posed and the kind of answers it has sought. But music historiography has always relied on its neighbouring disciplines, and in this regard, indeed, nothing has changed. Historical musicology has always been only a semi-autonomous discipline: (1) by its very nature as a sub-field of history, (2) because the materials of music are non-semantic and its forms and images are less tied to representations of material reality than those of the visual arts before the 20th century, and (3) because music – its composition, performance and reception – is undeniably a part of general culture. As a consequence of the second circumstance, non-formalist historians concerned with the problem of musical meaning have little choice but to borrow from critical methods in the visual arts and letters. The third circumstance represents the challenge that has stimulated traditional cultural-historical approaches as well as the most innovative work of recent decades. A discipline that does not renew itself stagnates; this most recent renewal promises to maintain the continuing vigour of music history, while preserving and strengthening the humanistic basis of its historiography.

GLENN STANLEY

**Hita, Antonio Rodríguez de.** *See* RODRÍGUEZ DE HITA, ANTONIO.

**Hita, Arcipreste de.** *See* ARCIPRESTE DE HITA.

**Hitchcock.** English family of spinet and harpsichord makers. A complete and accurate study of the members of the family is still to be completed, but it is generally accepted that three are identifiable: Thomas Hitchcock the elder (*d* before Feb 1700), a freeman of the Haberdashers' Company; his son Thomas Hitchcock the younger (*b c*1685; *d* after 1733), who was apprenticed to Benjamin Slade from 1700 for eight years and was made a freeman of the Haberdashers' Company in 1715; and John (*d* 13 Nov 1774). The latter was probably a son of Thomas Hitchcock the younger; his name is first encountered (according to James) in the list of subscribers to a work by Boyce printed in 1743. In 1750 he was also made a member of the Haberdashers' Company. Boalch lists a total of 53 surviving bentside spinets by this family.

The two earliest dated instruments, one of *c* 1660 and the other of 1664, must be treated with caution so far as their dates are concerned (they could in fact be case numbers), but if they are genuine, then Thomas Hitchcock the elder was probably the first to make spinets in England. The Boalch list indicates that John Hitchcock may have been making such instruments right up to the year of his death.

These spinets invariably have a compass of five octaves, *G′–g‴*. Most have ivory naturals and ebony sharps, although some of the earlier instruments have skunktail sharps (a sandwich of ebony–ivory–ebony). The cases are of plain walnut with in some cases a double-curved bentside, and in others a single curve. Invariably the lid hinges are of engraved brass.

In addition to the surviving spinets, there are two extant harpsichords. The first, and by far the better known, is a double-manual instrument dating from about 1725. Although it has often been suggested that this is the earliest surviving two-manual English instrument, it must now be conceded that the Tisseran harpsichord of 1700 (Bate Collection, Oxford) is the oldest, though Tisseran may have been a Huguenot in origin. It is clear from surviving documents that other English makers (such as John Player) were making double-manual harpsichords by at least 1712. Nevertheless, the Hitchcock harpsichord contains many of the elements of earlier English harpsichords (including a short scale), whilst at the same time displaying most of the features that were to become characteristic of the harpsichords of the great English makers of the period from 1729 until the end of the century.

The second surviving Hitchcock harpsichord is by John, but is not dated. The workbooks of Thomas Green (see Sheldrick) record in 1769 the tuning of a harpsichord for Guvernor Thickness (possibly Philip Thicknesse, 1719–90) of Datchworth Green. The entry reads '2 Unisons Tho Hitchcock fecit 1766'. Green also encountered one of John Hitchcock's instruments in 1772. The laconic entry in Green's book states: 'Jno Hitchcock – bad', though what exactly was 'bad' is not made clear.

The members of the Hitchcock family numbered their instruments sequentially and signed them, occasionally also dating them. Those few which are both dated and numbered to some extent help to identify members of the family with the instruments they made: the spinet dated 1703 with serial number below 54 and others dated earlier were probably by Thomas Hitchcock the elder (though this should be treated with caution); those numbered 1007 to 1425 are probably by Thomas Hitchcock the younger; and those from 1519 to the end of the series, 2018, are by John. Because of confusion in the case of the earlier instruments, it is possible that during the period 1700–15 (the year that the younger Thomas obtained his freedom from the Haberdashers' Company) there was a fourth, as yet unknown, member of the family who may have built the instruments with the serial numbers 471 and 511.

CHARLES MOULD

**Hitchcock, H(ugh) Wiley** (*b* Detroit, 28 Sept 1923). American musicologist. He attended Dartmouth College (BA 1944) and the University of Michigan (MM 1948). He studied in Paris with Boulanger before resuming graduate study at the University of Michigan (PhD 1954). He taught at Michigan (1950–61) and was professor of music at Hunter College, CUNY (1961–71). In 1971 he became professor of music and founder-director of the Institute for Studies in American Music at Brooklyn College, CUNY; in 1980 he was named Distinguished Professor, CUNY. He retired in 1993. He was among the first group of Getty scholars at the J. Paul Getty Center for Art History and the Humanities (1985–6). In 1994 he was made an honorary member of the AMS, and in 1995 Chevalier of the Ordre des Arts et des Lettres.

Hitchcock has made significant contributions to the study of 17th-century French and Italian music and music in the USA. His research on the vocal and instrumental music of Charpentier led to editions of the music as well as the preparation of a catalogue raisonné, *Les oeuvres de Marc-Antoine Charpentier* (1982), and the book *Marc-Antoine Charpentier* (1990). His edition of Caccini's *Le nuove musiche* (1970) includes a detailed study and an

annotated translation of the original preface. Among his publications on American music are a study of Ives (1977) and an important survey, *Music in the United States* (1969), in which he develops the idea of a distinction between vernacular and cultivated traditions in American music, particularly in the period from 1820 to 1920. He was president of the Music Library Association (1966–7), of the Charles Ives Society (1973–93) and of the AMS (1990–92). He acted as adviser on American music for the sixth edition of *The New Grove* and was co-editor of *The New Grove Dictionary of American Music*; he was also editor of the series Recent Researches in American Music (1976–94).

PAULA MORGAN

**Hitch-pin.** The metal pin which secures the strings at the end opposite to the WREST PINS. On the grand piano the hitch-pins are at the end furthest from the player; their position on other pianos varies according to structural factors.

**Hittite music.** *See* ANATOLIA.

**Hitzenauer** [Hisnauius], **Christoph** [Johann] (*b* Braunau am Inn; *fl* 1580–87). German composer, music theorist and schoolmaster of Austrian birth. From an entry in the accounts of the Stuttgart church administration dated 15 November 1580 it appears that he was converted to the Protestant faith while a member of the Jesuit college in Vienna and that he made his way to Stuttgart with an introduction from the Protestant authorities in Austria. In Stuttgart he received a grant to study for one year from Duke Ludwig of Württemberg and matriculated at Tübingen. In the autumn of 1581 he became a Kantor at Lauingen, near Ulm, and in 1582 a schoolmaster at the town's grammar school, which, as a 'Gymnasium illustre' (or rectorial school), was not just an ordinary grammar school, but one at which theologians and lawyers also received their training. In his *Perfacilis, brevis, et expedita ratio componendi symphonias, concentusque musicos* (Lauingen, 1585) he described how he taught singing and helped the more gifted pupils with their composition. His name appears in the town accounts at Lauingen from 1581 until Whitsun 1587; in later years he is referred to as an 'old schoolmaster' on half pay. Curiously, the accounts refer to him alternatively as Christoph and Johann, yet both names undoubtedly refer to the same man (see Seitz). Only one piece by him survives and that incomplete: the six-part *Ach treuer Gott, mein Not erkennen tue* (in *D-Rp*). His *Ausserlesene sehr liebliche geistliche Gesäng mit drey Stimmen gantz artlich componiert* (Lauingen, 1585) is lost, and the *Zway newe teutsche Liedlein* attributed to him in Eitner and *MGG1* was in fact dedicated to him by Jakob Paix. His *Ratio componendi*, which he designated as his first work, relies for its content partly on what he had learnt from other musicians and partly on what after prolonged observation he had established for himself. His subject is *musica poetica*, though he began with a résumé of the elements of *musica pratica*. So as not to confuse the student he kept to the eight traditional modes and, without mentioning Glarean, referred to the modern practice of observing four new ones too. He discussed four sorts of counterpoint, 'simplex', 'coloratus' and 'floridus' and also 'syncopatus', which, however, he considered suitable only for short passages within a piece. As his examples he chose three motets by Lassus.

WILFRIED BRENNECKE

**Hitzler, Daniel** (*b* Heidenheim an der Brenz, Württemberg, 26 Sept 1576; *d* Strasbourg, 6 Sept 1635). German editor and music theorist. After attending the Protestant seminary schools at Blaubeuren and Bebenhausen he studied theology, Hebrew, astronomy and music at Tübingen University from 1595; he graduated in 1597. He deputized as court chaplain in Stuttgart in 1598–9 and from 1600 taught at the ducal 'Stipendium' at Tübingen. He became a deacon at Waiblingen in 1603, when he also brought the Reformation to the Benedictine monastery at Reichenbach an der Murg, and he was the first Protestant pastor there until he became pastor at Freudenstadt in May 1608; in 1609 he became pastor and special superintendent at Güglingen. In June 1611 he was appointed superintendent, preacher, inspector, and teacher of theology at the Protestant school for the nobility at Linz. It was there in 1612 that he engaged in the theological controversy with Kepler that led to the latter's excommunication from the Protestant church by the Württemberg consistory in 1619. From 1613 to 1615 he was inspector of alms and from 1616 superintendent of the library at Linz. His own arrangement, according to Württemberg models, of the Linz liturgy, *Christliche Kirchen Agenda*, was published anonymously at Tübingen in 1617. During the period when Upper Austria was a pawn of Bavaria, Hitzler was imprisoned in the castle at Linz in 1621–2 because of his alleged support of the 'Bohemian confederation'. After his release he had to give up all his ecclesiastical offices and in October 1624 left Linz as a religious refugee. After working for a short time as Kantor at the Protestant church at Peuerbach, Upper Austria, and staying briefly at Regensburg and Esslingen, he became pastor and special superintendent at Kirchheim unter Teck in 1625; from the same year he was general superintendent and, until 1630, abbot of the monastery at Bebenhausen. He was now an important member of the Württemberg clerical hierarchy and in 1632 reached its summit when he became general superintendent at Stuttgart. In September 1634 he fled before the advancing imperial army by way of Kehl to Strasbourg, where he died without having obtained further public office.

Hitzler wrote occasional poems in Latin, theological works and funeral orations and improved the texts of Protestant hymns. However, he achieved far-reaching importance only as a music theorist and editor of hymnbooks. His 13-syllable solmization for singing instruction, which he wrote in about 1615 and took from Flemish and German models (Hubert Waelrant and Sethus Calvisius respectively), had an obvious influence on Nikolaus Gengenbach and Otto Gibel, and even as late at 1717 Mattheson expressed approval of his basic musical method. Laurentius Erhard passed on the repertory of congregational hymns used by the Protestants in Linz by his use of Hitzler's collection of hymns in his publication of 1659.

OTHMAR WESSELY

**Hlobil, Emil** (*b* Veselí nad Lužnicí, 11 Oct 1901; *d* Prague, 25 Jan 1987). Czech composer and teacher. After studying philosophy at Prague University (1920–24) and composition with Křička at the Prague Conservatory (1920–23), he attended Suk's masterclasses (1924–5, 1927–30). He taught in Prague at the women teachers' institute (1930–41), then at the conservatory, and in 1958 was appointed professor of composition at the Academy of Musical Arts; he remained at this post until his retirement in 1971. Throughout the postwar period Hlobil held high-ranking positions in various organizations, among them the composers' union, the Czech Music Fund and the Union for Copyright Protection. Between 1925 and the year of his death he composed over 100 works. At first a follower of the Czech impressionism of Suk and Novák, he turned his attention to newer trends before World War II. During the German occupation he evolved a synthesis of techniques introduced during the 1920s and 30s, while at the same time his music came to express more intense nationalist feelings, notably in the symphonic fresco *Tryzna mučedníkům* ('Dirge for the Martyrs'). After the war he simplifed both the form and expression of his work.

WORKS

*(selective list)*

Stage (librettos by Hlobil): Anna Karenina (op, 3, after L.N. Tolstoy), op.60, 1963, České Budějovice, 16 April 1972; Měšťák šlechticem (op, 3, after Molière: *Le bourgeois gentilhomme*), op.68, 1965, Liberec, 20 Sept 1986; Kráska a zvíre (ballet, 3), op.96, 1976; Král Václav IV. [King Wenceslas IV] (op, 5, after Arnost Dvořák), op.107, 1981, unperf.

**Hnilička, Alois** (*b* Ústí nad Orlicí, 15 March 1858; *d* Prague, 14 Jan 1939). Czech music historian. His grandfather, František Hnilička (1790–1848), and his father, Alois Hnilička (1826–1909), were distinguished local musicians. After graduating from Prague University in 1882 he worked as a lawyer but his interest in music led him to the study and collection of Czech music from the middle of the 18th century onwards. His pioneering work in this field, though now mostly superseded by later research, helped to save many minor Czech composers from oblivion. His studies of the area of Chrudimsko are one of the earliest attempts at documenting local music history in Czechoslovakia.

JOHN TYRRELL

**Ho(un), Fred** (*b* Palo Alto, CA, 10 Aug 1957). Chinese-American composer and social activist. He studied sociology at Harvard University (BA 1979), but received no formal training in music. While a saxophonist in his high school band, he became familiar with the music of John Coltrane, Archie Shepp and Charles Mingus. During the early 1970s he was inspired by the revolutionary ideas of Marxism, Malcolm X and Mao Zedong. In 1981 he moved to New York, where he developed a career as a composer, performer and social activist.

One of the pioneers of the Asian American movement, Ho has written many works calling for social change, and celebrating the struggle of oppressed peoples in the USA and the Third World. His study of Chinese traditional music, Japanese folksong and poetry, Philippine *kulintang* music and Korean percussion music has enabled him to use these styles to represent the commonalities of Asian Pacific American and black American experiences. His works are often characterized by a synthesis of diverse musical elements; these different components are borrowed from African, Latin, reggae, Chinese, Korean, Philippine, Middle Eastern and Japanese traditions. In 1988 he was the first Asian American to receive the Duke Ellington Distinguished Artist Lifetime Achievement Award from the Black Musicians Conference.

**Hoberecht, John Lewis.** *See* HOEBERECHTS, JOHN LEWIS.

**Hoboe** (Ger.). *See* OBOE.

**Hoboken, Anthony van** (*b* Rotterdam, 23 March 1887; *d* Zürich, 1 Nov 1983). Dutch collector and bibliographer. While training as an engineer in Delft, he also received his early education in music from Anton B.H. Verhey, and in 1911 attended the Hoch Conservatory at Frankfurt where he studied harmony with Bernhard Sekles and composition with Ivan Knorr. From 1925 to 1934 Hoboken was a pupil of Heinrich Schenker in Vienna, and was much influenced by his ideas. It was Schenker who induced him to establish the famous Archiv für Photogramme musikalischer Meister-Handschriften (the 'Meister-Archiv') in the music department of the National Library in Vienna. It comprises a large quantity of photographic copies of the autographs of works by great composers, from Bach to Brahms. Its value to scholars has been much enhanced by the loss of some of the originals during World War II.

From 1919 onwards Hoboken began to build up systematically his private collection of first and early editions. The collection now ranges from Frescobaldi, Froberger, Purcell, and J.S. and C.P.E. Bach, through all the great names of Classical and Romantic music up to Brahms and also includes a wealth of early theory and literature. Conceived as a complement to the 'Meister-Archiv', it has been accessible to scholars as an invaluable source of textual information. The collection was acquired by the Österreichische Nationalbibliothek in 1974; it amounted to some 5000 items at that time.

Its core consists of over 1000 first and early editions of Joseph Haydn in whom Hoboken took a keen interest. Because he realized how serious was the total lack of a thematic catalogue for this composer, he devoted himself for over 30 years to supplying one. The first volume, devoted to the instrumental works, was criticized for lack of information about manuscript sources. Nevertheless,

Hoboken's protracted study established the corpus of Haydn's huge output, dealt with the problem of arrangements and supposititious works and generally brought order and identity to a vast area where much confusion, contention and uncertainty reigned for 150 years. All future Haydn scholarship will be in Hoboken's debt. He achieved for Haydn what Köchel did for Mozart, and this too in a generation of vastly higher bibliographical standards that had to be applied to a more prolific composer whose music could not possibly be presented in one single chronological order.

His services to scholarship have been widely recognized. In 1932 he was awarded the Grosse Silberne Ehrenzeichen for services to the Austrian Republic, and was co-opted on to the board of the Gesellschaft der Musikfreunde. Princeton University created him a member of the advisory council of the department of music in 1950. He received honorary doctorates from the universities of Kiel (1957), Utrecht (1958) and Mainz (1979) and was created an Officer of the Order of Orange-Nassau in 1959.

ALEC HYATT KING/JOOST VAN GEMERT

**Hobrecht, Jacob.** *See* OBRECHT, JACOB.

**Hoch, Francesco** (*b* Lugano, 14 Feb 1943). Swiss composer. He studied at the Milan Conservatory (1968–72) where his teachers included Donatoni, with Bussotti in Padua (1967) and with Stockhausen and Ligeti at Darmstadt (1970). He has conducted research at the Italian National Radio (RAI) phonology studio in Milan and was a founding member of OGGImusica, the Lugano association for contemporary music (from 1977). His compositions, all of which can be considered avant-garde works, may be grouped into the following stylistic periods: 'indeterminacy' (1968–70), 'polydirectional research' (1970–75), 'variable-ostinato' (1980–83), 'the time of dissolution' (1983–5), 'silence' (1985–8), 'posthumous works' (1989–93) and 'critique of the pitiless present' (1994–8). His *Riflessioni sulla natura di alcuni vocaboli* for chamber orchestra won first prize at the Angelicum International Composition Competition in Milan in 1975.

CARLO PICCARDI

**Hochberg, Hans Heinrich XIV,** Bolko Graf von (*b* Schloss Fürstenstein [now Książ Castle], Silesia, 23 Jan 1843; *d* Salzbrunn, 1 Dec 1926). German theatre director and composer. The younger son of Prince von Pless, he was intended for a career in the diplomatic service. He studied law and political science in Bonn and Berlin and spent two years at the Prussian Embassy in St Petersburg (1867–9) before returning home to pursue musical studies. His Singspiel *Claudine von Villa Bella* (after Goethe) was performed at Schwerin in 1864, followed at Hanover in 1876 by a Romantic opera, *Die Falkensteiner* (revised as *Der Wärwolf*, 1881, Dresden). After this he turned to composing instrumental works and songs. In 1878 he founded the Silesian music festivals held in Görlitz, which he continued to assist until 1925. He was appointed successor to Hulsen as director of the Berlin Königliche Schauspiele in 1886. He retired suddenly from this post in December 1902, officially from overwork, though in fact as a result of a legal disagreement over the libretto to Richard Strauss's *Feuersnot*, of which Wilhelm II disapproved on moral grounds.

Hochberg also wrote (under the pseudonym J.H. Franz) three symphonies, a piano concerto, chamber music (three string quartets, a piano quartet and two piano trios), many solo and ensemble songs and choral pieces. Although he did not contribute anything original as a composer, he exerted considerable influence as founder of the Silesian music festivals and especially as director of the Berlin theatre. He reorganized the opera, attracting

important conductors such as Joseph Sucher, Felix Weingartner, Carl Muck and Strauss and thus raising the standards of musical performance. As he did not pander to popular taste, he also broadened the repertory and established a continuing place for Wagner's works. His youngest son, Gottfried von Hochberg (*b* Rohnstock, 29 Jan 1882; *d* Bayreuth, 18 June 1929), published several songs and choral works in 1925 and 1926.

GAYNOR G. JONES

**Hochbrucker** [Hochprugger]. German family of instrument makers and musicians.

(1) **Jakob Hochbrucker** (*b* Mindelheim, *c*1673; *d* Donauwörth, 28 May 1763). Maker of lutes, violas and harps. Son of Georg Hochbrucker, a violin maker in Augsburg around 1670, he lived in Donauwörth in Bavaria. He is chiefly remembered as the inventor of the pedal harp, in which a skilfully thought-out mechanism, initially based on five (later seven) pedals, made it possible to raise simultaneously by a semitone all the strings of the same name from E♭ upwards.

(2) **Simon Hochbrucker** (*b* Donauwörth, 1699; *d* *c*1750). Harpist, son of (1) Jakob Hochbrucker. He introduced his father's innovation to a wider public both in central Europe and further afield; his recital tours took him to Vienna (1729), Leipzig and Brussels (1739), Brunswick (1750) and Paris. His performances in Paris were so successful that the pedal harp soon became the fashionable instrument of the time.

(3) **Coelestin** [Franz Christian] **Hochbrucker** (*b* Tagmersheim, nr Donauwörth, 10 Jan 1727; *d* Vienna, 23 April 1805). Organist, composer and harpist, nephew of (2) Simon Hochbrucker. He was ordained priest in 1752 and spent his life in Munich and the Benedictine abbey of Weihenstephan, near Freising. Apparently all his compositions are lost, including the biblical Schuldrama, *Die Juden in der Gefangenschaft des Manassa*, presented by students at Freising in 1774. He also composed six sonatas for harp op.1 (Paris, *c*1771), and several masses and other sacred works.

(4) **Johann Baptist Hochbrucker** (*b* Donauwörth, 27 June 1732; *d* Saint-Servan, 29 July 1812). Harpist and composer, brother of (2) Simon Hochbrucker. The most famous member of the family, he won great renown as a harp teacher, virtuoso and composer among the most fashionable circles of Paris. He was living there at least by 1760, when he performed his own compositions at the Concert Spirituel; he was employed by Cardinal Louis de Rohan and perhaps Queen Marie Antoinette, although Leopold Mozart felt it necessary to warn Wolfgang of Hochbrucker's bad reputation and dissolute life (letter of February 1778). In 1792 he emigrated to London, where he had given concerts during a visit in 1779. His compositions, published in Paris and London, were among the first to exploit the harp's sonorous resources, and include the harp sonatas opp.1, 6 and 22 (some with violin accompaniment; one ed. F. Vernillat, Paris, 1969), duos for two harps op.9, divertissements op.10 and harp accompaniments to *ariettes* by other composers opp.2–4.

**Hochreiter, Joseph Balthasar** (*b* *c*1668; *d* Salzburg, 14 Dec 1731). Austrian composer. According to Hochreiter himself, one of his ancestors (perhaps his father) had been a treble at the monastery in Lambach in about 1650, had learnt to play the organ, and from 1662 had been employed (possibly as organist) there; he had also completed an important music inventory. Hochreiter himself was organist at the abbey at Lambach in Upper Austria from 1696 to 1721; he also trained the choirboys and some organists there, and set down his experiences in the manuscript *Praecepta quaedam observanda, quae pro emolumento bonae musices maxime proderunt, dummo observentur* (*c*1710, *A-LA*). He was at that time a close friend of Stephan Hieber, organist at the monastery in Kremsmünster (Upper Austria); he dedicated a mass to the abbot of that monastery in 1705 for the abbot's nameday. In the same year he dedicated the *Missa ad multos annos* and the *Missa genethliaca* to Abbot Maximilian Pagl of Lambach, for his birthday and for his installation. In 1721 he relinquished his post in favour of the composer Maximilian Röll and, on the recommendation of Abbot Pagl, became cathedral organist at Salzburg and organist to the prince-archbishop; he held that office until his death. His name is not mentioned in the *Necrologium* of Lambach, so he could not have been in holy orders. From his compositions Hochreiter emerges as a skilful contrapuntist, and his vigorous orchestration is striking. In so far as conclusions can be drawn about his teaching activity from his vocal music, he must have been an outstanding choir trainer. In his masses he follows the grand polychoral style of the 17th century, still practised in Rome.

OTHMAR WESSELY

**Hocket** (Lat. *hoquetus*, *(h)oketus*, *(h)ochetus*; from Fr. *hoquet*, Old Fr. *hoquet*, *hoket*, *ocquet*, etc., related to English hickock, hicket, hiccup, and similar onomatopoeic word formations in Celtic, Breton, Dutch etc., meaning bump, knock, shock, hitch, hiccup; attempts at etymological derivation from the Arabic must be regarded as unsuccessful). The medieval term for a contrapuntal technique of manipulating silence as a precise mensural value in the 13th and 14th centuries. It occurs in a single voice or, most commonly, in two or more voices, which display the dovetailing of sounds and silences by means of the staggered arrangement of rests; a 'mutual stop-and-go device' (F.Ll. Harrison). Medieval authors (see below) mentioned the existence of this practice in popular music.

One of the many significant stylistic changes brought about by Perotinus in the emergent art of measured polyphony was his cultivation of rhythms more spacious and measured than those which prevailed in the relatively fast, running dupla of the discant sections presumed to be by Leoninus, in which the tenors were laid out in irregular groups of simple longs. Corollaries of this change were the appearance of double longs, which could now be assigned to the tenor notes of discant passages; the greater foursquareness of phrases; the recognition of silence as an intrinsic measurable component of polyphony, potentially equivalent to sound as an element of counterpoint; the consequent change in meaning of the little stroke known as *tactus* (also referred to as *divisio*) from a symbol simply denoting the end of a phrase (i.e. a brief, mensurally insignificant *suspirium*) to a measurable rest (*pausa*); the emergence of the first tenor patterns (consisting of four-beat phrases); and the awareness that the voice parts of a polyphonic complex, whose phrases were now delimited by precise rests, did not need to coincide in their phrase articulation, but could be made to overlap (see ex.1). Further refinements of this technique were the curtailment of some of the phrases in one or more parts by means of rests (ex.2*a*) and the free addition or insertion of rests (ex.2*b–d*). The irregularity of such phrases or phrase elements, often no more than single notes set off by rests, exemplifies what medieval writers called imperfect modes.

The earliest known definitions of the hocket are given – about three-quarters of a century after the appearance of the technique – by three contemporary writers: Franco of Cologne, Lambertus and the so-called St Emmeram Anonymous (1279). The last named presents us with the fullest and most illuminating description:

> Hocketing is produced either by cutting off sound or without such truncation. In the latter case such passages may or may not have text. If they do, they will conform to one of the modes, such as the 1st, 2nd or 3rd, or will observe the compatibility of one mode with another, or with several, and the alternation of groups of notes with rests will proceed subtly from here and there; sometimes one may encounter cases of truncation, but they are rare. When there is no text, the alternation of the voices is the same, but more frequent and also with more truncations. Hockets involving truncations may be composed over a tenor laid out according to one or several of the modes, or without any tenor, i.e. fundament. If such truncations are founded on a tenor, this will be without text, except in some suitable cases in motets, for example in *Povre secors* [*D-BAs* 36, *F-MO* 31, *Pn* 13251, 54] and others like it. … In hockets not based on a modal tenor we encounter irregular and unpatterned conformations of longs, *breves* and also *semibreves*, either each kind grouped separately or all mixed together; thus they are seldom, if ever, reducible to any kind of equivalence fitting one of the modal species.

**Ex.1**(**a**) Organum triplum. *Quindenis gradibus*; *I-Fl* Plut.29.1 f.28*v*

(**b**) Conductus, Peritonus: *Dum sigillum*; *I-Fl* Plut.29.1, f.345*v*

(**c**) Organum, *Exiit sermo*: *I-Fl* Plut.29.1, f.102*v*

This last type, he pointed out somewhat later, occurs 'in aliquibus conductis sine tenore proprio hoquetatis' ('in some conducti [i.e. the caudas of conducti of which he gave an example] with hockets without the appropriate tenor' [i.e. without a patterned cantus firmus, which are foreign to the nature of conducti], though he added still later that some modern hockets based on a Gregorian tenor were also irregular. In the course of his description of *cantus truncatus* (polyphony with truncations) he distinguished between perfect and imperfect *hoquetatio*; in the latter, only one of the voice parts exhibits truncations and there is therefore no interlacing of voices. He also differentiated between compositions in which hocketing is continuous and those in which it occurs occasionally; in other words, the term *hoquetus* designates both a technique of composition and a piece completely written in this manner (Sowa, 97ff; Yudkin, 224–6).

The emphasis placed by the above writer on a proper mensural foundation indicates that the principal use of *hoquetus* was in cantus firmus polyphony, where, except for the increasingly old-fashioned organal style, the tenor made the precise measurement of all elements mandatory. Occasional hocket passages also occur in caudas of conducti. The proposition that hocketing preceded the rise of *musica mensurata* (see Dalglish) is based on earlier medieval reports of extravagant performances of monophony, which, in view of the hocket's essential need of strict coordination, have no apparent relevance.

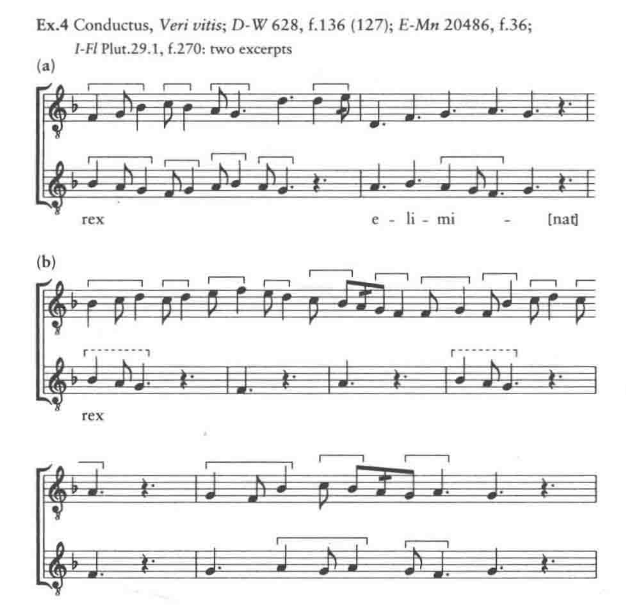
Obviously, this writer's 'hocket without truncations' refers to the technique illustrated by ex.1 (which is closely related to the device known as VOICE-EXCHANGE). Such overlapping of phrases can indeed be found in *musica cum littera* (motets, especially 'peripheral' motets and the so-called isoperiodic motets composed in England in the 13th and 14th centuries) as well as in its historical predecessor, *musica sine littera* (in the discant passages of organum duplum, triplum and quadruplum, and in clausulas). The writer's statement that hockets with truncations (*per resecationem*) generally have no text, 'except in some suitable cases in motets', is particularly revealing. In such cases, which are indeed quite rare in 13th-century motets, they sometimes tend to function as suitable rhetorical ornaments (e.g. exclamations). But primarily they occur in passages in discant style without text, or as independent untexted hocket compositions. The latter therefore constitute the earliest known instrumental (non-verbal) polyphony: music that, by definition and unlike many clausulas, was not intended to be equipped with poetry. Such pieces, which can, of course, also be performed vocally, are preserved in *D-BAs* (nos.102–8, one of which the word *viellatoris* identifies specifically as instrumental, at least in origin), in *F-Pn* lat.11411, no.3, and in *F-MO 5* (3 is a version of *D-BAs* 106, while *F-MO* 2, 64, 128 and *E-Mn* 71 are versions or concordances of *D-BAs* 104). A 14th-century specimen is Machaut's *Hoquetus David*, in which the part above the tenor is designated *hoquetus*. That many more such compositions, now lost, must have been written can be inferred from the reference in the treatise by Jacobus of Liège to 'hoketos ... duplices, contraduplices, triplices et quadruplices' (*Coussemakers*, i, 429*a*). Only one four-part (vocal) hocket is known; it is the final section of a Gloria trope composed in England in the late 13th century (*see* BURGATE, R. DE).

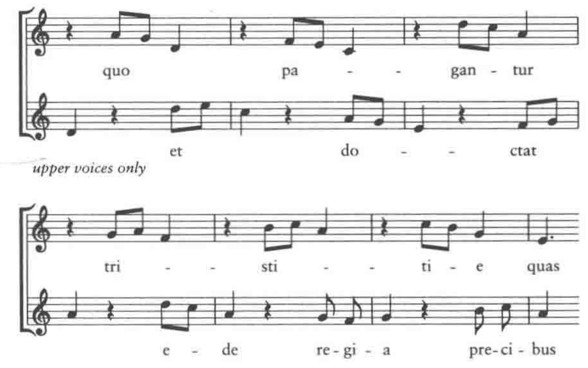
The use of hocket as an exclamatory or pictorially descriptive device disappears from the motet in the late 13th century, and in the 14th century is found occasionally in chansons, in Italian ballatas and in chaces and cacce. Melismatic endings (or sectional endings) of secular compositions at times also exhibit hocket technique in a manner first manifested in some 13th-century conductus caudas. A motet like *F-MO* 294, on the other hand, shows that the earliest device to emphasize the new strophic structure of 14th-century motets was the isorhythmic recurrence not only of phrase endings, but of hocket passages. From the 1320s onwards hockets occur in many 14th-century motets. Thus an Italian writer of a mid-century Latin treatise mentioned 'uchetti' particularly as a feature of motets. Their function now was to serve as structural ornaments, placing in relief the tectonic design generated by the tenor.

In general, medieval writers confined their definitions of hocket to the technique of truncation, which according to Franco (CSM, xviii, 77) is synonymous with hocket. Odington described it as a species of polyphony with or without text, known as truncated music, 'in which ... one is silent while another sings' (CSM, xiv, 140 and 144). The comments of most later writers (e.g. Pseudo-Tunstede, Coussemakers, iv, 296) are derivative and largely recapitulate Franco and Odington, whose definition has also been adopted by modern musicology. Only Johannes de Grocheo, however, reported an apparent popularization

Ex.3 *GB-Onc* 362, f.85*v*; *GB-Lbl* Add.24198, f.1*v*: two excerpts



of hocketing, which as a polyphonic device properly belonged to the exalted sphere of *ars musica*:



Anyone who wants to make a two-part hocket arrangement, i.e. for a first and second singer, must divide the song or tune which is to be so arranged and apportion it accordingly to each. Such strains can end with bits of appropriate addition, as long as their mensuration is not interfered with. For in this way one overlaps the other in the manner of roof tiles, and thus they will cut each other off continually.

This is a relatively simple procedure that presumably required no notation for its convivial performance. A rather sophisticated example, in which each portion is ultimately reduced to the tiniest dimensions, is furnished by the two lowest voices of a fragmentarily preserved four-part English motet of the early 14th century (ex.3). This example also demonstrates the quasi-variational function hocketing occasionally fulfilled. Instances of such treatment can already be found in caudas of conducti of the early 13th century, in which hocket technique is at times applied to the melodic substance of preceding

Ex.4 Conductus, *Veri vitis*; *D-W* 628, f.136 (127); *E-Mn* 20486, f.36; *I-Fl* Plut.29.1, f.270: two excerpts

sections (ex.4). The 'peripheral' motets of about 1300 tended to assume some of the functions and certain stylistic features of the moribund conductus, and similar, though far more elaborate variation hockets occur in some of them (e.g. *F-MO* 311 and the English motet preserved in *MO* 323–4).

The effect of hocketing is known from areas other than western Europe and from times other than the Middle Ages. Thus hocket-like techniques have been described in African music, and silences are certainly prominent in some contemporary composers' works, such as those of Webern, Feldman, Babbitt and Cage. Yet, the conceptual matrix from which these phenomena arise is quite different from the medieval idea of silence as a contrapuntal value. In modern composers' works hocket-like effects are the result of concern with texture or colour, while non-Western 'hocketing' generally results either from the necessity of allocating portions of a melody or of a complex sound pattern (as in the gamelan music of Bali) to more than one instrument because of limitations of range, or from the social partiality for rapid and colourful antiphonal interchange.

That particular result of hocketing of course also delighted the medieval West: witness the use of such terms as 'merry hockets' ('hoketi lascivi', Lefferts, 104) and the procedure described by Johannes de Grocheo. The latter, who often reported on the music of his time in terms of its human environment, mentioned that youths and temperamental people were particularly fond of *hoquetus* 'propter sui mobilitatem et velocitatem'. It is this 'jazzy' quality that usually caused hockets to be composed in the smallest available note values (cf Lefferts, 104, 174–6). Since by the later 13th century *semibreves* and *breves* had become equivalent in duration to the *breves* and *longs* of earlier times, the 5th-mode tenors of some hockets of the mid-13th century were evidently later rewritten in the 2nd mode, with the result that in many cases hocket passages in the upper voices, originally involving *breves* and *longs*, now used *semibreves* and *breves* (cf *D-BAs* 104 and 106; Reckow, i, 61; Sowa, 100–04; Yudkin, 230–36). The 'jazzy' quality of hockets occasionally prompted ecclesiastical disapproval, such as that in the bull of Pope John XXII (1324–5), in which he accused the musicians of his time of endless abuses, one of which was that 'melodias hoquetis intersecant' ('they cut the melodies apart with hockets'). Nonetheless, the hocket did not die out until *c*1400, when the rise of new compositional concepts caused it to become old-fashioned and inappropriate. It is interesting that some of the latest compositions

to exhibit hocket technique are strictly liturgical: mass movements, especially certain isorhythmic compositions in the Old Hall Manuscript. Ultimately, in works written in the early years of the 15th century by composers both in Italy and under Italian influence (e.g. Ciconia, Cesaris, Grenon; Du Fay's *Gloria ad modum tube*) the practice transformed itself into imitative antiphony (ex.5).

ERNEST H. SANDERS

**Höckh, Carl** (*b* Ebersdorf, 22 Jan 1707; *d* Zerbst, 25 Nov 1773). German violinist and composer. He was the son of Christoph and Magdalena Höckh. As a child he was instructed in the violin by his father and in singing by the schoolmaster Ferdinand Dorfmüller. When he was 15 he went to Pruck to study with Michael Schade, then the city musician. From Pruck he entered the Franz Paul Graf Weilli regiment as oboist and spent the next two years in the military, stationed at Temesvár and Orsova. When the regiment moved to Siebenburgen, Höckh was mustered out and began his travels through Poland in the company of several other aspiring musicians, the violinist Franz Benda, the flautist Georg Zarth and Wilhelm Weidner, horn and viola player. In his autobiography, Benda gave a delightful account of the adventures and activities of this group during their travels. They reached Warsaw and entered the service of the governor, Sukascheffski, Höckh as horn player and second violin. Benda later moved to the court of Crown Prince Friedrich of Prussia; he declined the offer of a position at Zerbst and recommended Höckh instead, and as a result Höckh moved to Zerbst as director in 1734. In this capacity he established a lasting reputation as an excellent violinist and teacher. He played some of his own violin concertos in Berlin in 1750 and 1751, and was acclaimed for his beautiful tone and style. Many students who later achieved prominence on their own were attracted to Höckh as a teacher, among them F.W. Rust, J.G. Seyffarth and J.W. Hertel.

Höckh's most important works are those for violin. He was strongly influenced by Benda's playing and most of his writing demands a highly developed and thoroughly idiomatic violin technique incorporating double stops and bowings more advanced than usually encountered in violin literature of this period. Höckh's musical style derives from earlier Baroque tradition, but to this basis he added a quality of intimate expression which has led some to regard him as an early representative of the German romantic style. He stands with Benda, Johann Georg Pisendel and Leopold Mozart as one of the founders of the German school of violin playing.

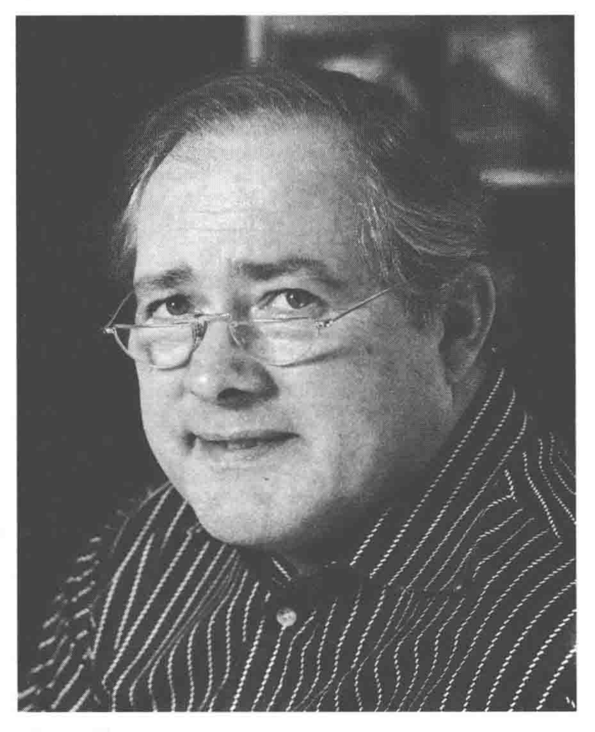
DOUGLAS A. LEE

**Hockland, Robert.** *See* OKELAND, ROBERT.

**Hoddinott, Alun** (*b* Bargoed, Glam., 11 Aug 1929). Welsh composer. He started to play the violin at an early age and became a founder-member of the National Youth Orchestra of Wales (as a viola player) in 1946. He graduated from University College, Cardiff, in 1949 and also studied privately in London with Arthur Benjamin. In 1951 he was appointed a lecturer at the Welsh College of Music and Drama in Cardiff, winning the Walford Davies prize for composition in 1953 and the Bax Society prize in 1957. He returned to the college as lecturer in music in 1959. After being awarded the DMus in 1960 he consolidated his position as one of the leading British composers of his generation and in 1967 became professor of music at Cardiff. In the same year he founded (with John Ogdon) the Cardiff Festival of 20th Century Music, which transformed the musical life of south Wales by bringing some of the world's greatest composers, notably Britten and Messiaen, to work in a new and stimulating environment. He retired from the university in 1987 (having established the largest music department in Britain) and from the festival in 1989, in order to devote himself to composition. He was appointed CBE in 1981.

Hoddinott composed prolifically during his teenage years, and several of his works (mostly orchestral and instrumental) were performed and broadcast while he was still a student at Cardiff. Although most were subsequently withdrawn, a notable exception was the Concerto for clarinet and strings op.3, which went on to attract national critical attention when first publicly performed by Gervase de Peyer and the Hallé Orchestra under Barbirolli at the 1954 Cheltenham Festival; two

years later a performance at the Proms in London, conducted by Sargent, followed. As a student Hoddinott attended every Cheltenham Festival from 1947 onwards; there he met and was able to discuss his early works with such distinguished composers as Vaughan Williams, Moeran, Britten, Tippett, Searle, Fricker and Rawsthorne. He was particularly drawn to the latter, who became a major influence on his musical style and outlook.



The style of the fluently exuberant early Clarinet Concerto is neo-classical in a general sense (shades of Walton and Rawsthorne rubbing shoulders with Hindemith), but the work proved to be Hoddinott's last in this vein. He quickly developed a more individual language whose expressiveness was characterized by dark, brooding colours and intense, often violent emotions. A fascination with nocturnal imagery is first seen in the orchestral *Nocturne* op.5 and in parts of the densely textured First Symphony of 1955. The influence of Bartók contributed much to Hoddinott's music at that stage in terms of both the increasingly chromatic melodic language and the colouristic orchestral textures. From a remarkably early stage, however, Hoddinott was to evolve a personal voice which fully assimilated any strong influences.

Hoddinott was particularly conscious that, he not being a pianist, his music did not derive from the Austro-Germanic sonata tradition but rather from the forms and textures of the Italian Baroque (his heritage as a violinist). The works of his early maturity accordingly display a fascination with meticulous structural organization in which tonality provides localized energy as opposed to goal-driven direction. Hoddinott followed Bartók once again in favouring arch-like structures in which a strongly propelled dramatic curve governs the unfolding of the movement as a whole. His music is built by means of continuous evolution rather than the conflict of ideas, and this led him to explore the musical palindrome as a device to extend such continuity within a wider framework. In fast music this went hand in hand with bristling rhythmic energy and a love of march-like patterns, while in slow music it encouraged a flow of densely chromatic lyricism. Such concentration on the detailed ordering of the notes themselves soon led Hoddinott to an interest in serial construction. His approach, however, never involved the Schoenbergian abandonment of tonality, which remains a cohesive force throughout Hoddinott's output. He developed an individual use of the technique in which the 'row' could consist of up to 18 notes in intertwining patterns, acting as a flexible resource for tonal, harmonic and melodic organization.

The evolution of this style can be effectively traced from the Second Symphony (1962) to the trilogy represented by the Third, Fourth and Fifth symphonies (1968, 1969, 1973), in which Hoddinott's refining of language and structure is matched by a simultaneous widening and sophistication of the orchestral palette, particularly in terms of divided-string sonority and exotic percussion colouring. The principal orchestral works of the 1960s which mark out this path include the compellingly designed *Variants* and the atmospheric *Night Music* (both from 1966) and the flamboyantly decorative *Fioriture* of 1968. These led naturally to works triggered by visual or poetic imagery, of which '*. . . the sun, the great luminary of the universe*' (1970), *Landscapes* (1975), *Sinfonia fidei* (1977), '*the heaventree of stars*' (1980) and *Lanternes des morts* (1981) are the finest examples. These works reveal a progressively stronger sense of melodic and harmonic warmth which constitute a distinctly romantic streak in Hoddinott's expression that culminated in the Sixth Symphony (1984). It was perhaps no coincidence that this process evolved over a decade (1972–81) in which he was mostly occupied with the composition of five varied operas.

Those written on the grandest scale ranged from the South Sea island melodrama *The Beach of Falesá* (1970–74, based on R.L. Stevenson) to Myfanwy Piper's ingenious adaptation of Thomas Hardy's *The Trumpet Major* (1980–81). Two of the operas were one-acters conceived specially for television, while the most enduring of the five is the delightful children's opera *What the old man does is always right* (1977) after a Hans Christian Andersen tale (adapted by Myfanwy Piper and brilliantly designed by John Piper), featuring a characteristically larger-than-life role for Geraint Evans (who also created parts in three of the other operas). Hoddinott's partnership with Piper began when she chose the poems for *A Contemplation upon Flowers* (1976), and led to the choral cantata derived from Flaubert's story *La légende de Saint Julien l'hospitalier* in 1987. Another collaboration, on an adaptation of Balzac's *Le colonel Chabert*, got no further than the libretto, and Hoddinott's next opera was ironically not commissioned until Piper's death in 1997. This was a project inspired by the determination of the miners of Tower Colliery in south Wales to buy for themselves the last working mine in the once-thriving coalfield and to preserve their livelihood against the prospect of government closure. In the first staging (1999) of what is virtually a documentary opera the bass Robert Lloyd vividly created the gently charismatic colliery leader Tyrone O'Sullivan in the presence of the hero himself.

During the 1990s Hoddinott consolidated his work in most genres and in particular devoted much time to

*Alun Hoddinott, 1979*

writing chamber works and song cycles for gifted young Welsh artists; in these virtuosity for its own sake is eschewed in favour of a spare and concentrated idiom which places its greatest emphasis on clarity of content and expression. Major works from the same period include a scena *Noctis equi* for the cellist Rostropovich (1989) and the Ninth Symphony (*A Vision of Eternity*), which sets three poems by Blake and Shelley for the soprano Gwyneth Jones (1992). With the Tenth Symphony in 1999 Hoddinott returned to abstract symphonic writing and demonstrated an impressive ability to renew the fabric of his language from within.

GERAINT LEWIS

**Hodeir, André** (*b* Paris, 22 Jan 1921). French jazz musician, composer and writer. At the Paris Conservatoire (1942–8) he was a pupil of Jacques de La Presle, Simone Plé-Caussade, Dufourcq and Messiaen, and won *premiers prix* in harmony (1944), counterpoint and fugue (1947) and music history (1947). He began his career in jazz music as a violinist (under the name of Claude Laurence) in the Ekyan Sextet (1942–4), and was later (1954–60) musical director of the Jazz Group of Paris, which appeared at several festivals (Donaueschingen, 1957; Cannes, 1958; Hamburg, 1959) and made many records. He was also editor of the journals *Jazz-hot* (1947–50) and *Panorama instrumental* (1973–4). In summer 1976 he was visiting professor at Harvard University.

Hodeir's compositions include pieces for various jazz groups (*Evanescence*, *Oblique*, *Cagoules*), works incorporating jazz features in a French avant-garde style (e.g. *Anna Livia Plurabelle*, a setting for two singers and 23 instruments of a passage from *Finnegans Wake*) and numerous film scores. His writings are devoted mainly to jazz, especially its formal problems and the relationship between composing and improvisation. The bold ideas he has expounded on contemporary art music have inevitably aroused controversy. In particular, his polemical book *La musique depuis Debussy* amazed many for its treatment of several composers (Schoenberg, Stravinsky, Messiaen, Boulez) who are praised for their advances but finally damned as conservatives. He was a member of the Académie Charles Cros (1948–55) and president of the Académie du Jazz, Paris (1954–9).

CHRISTIANE SPIETH-WEISSENBACHER

**Hodemont** [Hoedemont], **Léonard (Collet) de** (*b* Liège, *c*1575; *d* Liège, Aug 1636). Flemish composer. He studied music at Liège Cathedral where he is listed as a senior *duodenus* from 1589 to 1593. On 19 May 1595 the chapter awarded him a grant to continue his studies at the Pédagogie du Lys at Leuven University. By 15 October 1610 he was succentor of the collegiate church of St Pierre, Liège, and had become a priest. On 28 February 1612 he became a canon at Liège Cathedral and was promoted to canon of St Materne, Liège, on 16 January 1616. He spent four years adapting melodies for the carillon of the cathedral, and in 1620 he established the plan for the new carillon at the collegiate church of Ste Croix, Liège. On 26 October 1619 he was appointed *maître de chant* at the cathedral and, as the account books suggest, carried out his duties from the start with great zeal. The musical repertory then ranged from large-scale works in 8, 12 and 16 parts to modern works for one, two or three solo voices and continuo. An orchestra of two cornetts, two bassoons, bass viol and two organs, augmented by violins and lute, was also available. Hodemont was one of those ordered to revise the *Officium defunctorum* of the Liège Breviary, the new version of which appeared in 1623. The canons tried to temper the musical zeal of their *maître de chant*. He twice (in 1622 and 1625) gave in his notice to the chapter, who refused it, but he was eventually dismissed on 25 February 1633. The last three years of his life passed quietly.

In his two works for eight voices Hodemont spurned a division into two choirs in order to maintain a continuous polyphonic flow, lightened by occasional silences in some of the voices. He showed great contrapuntal skill, but the broad declamation and Italianate embellishments of the *Sacri concentus* (in which the voices are accompanied by an ad lib violin) and particularly the melodic charm and supple elegance of the Italian villanellas are still more notable. The *Sacri concentus* is the earliest music known to have been printed at Liège. Hodemont's personality and works were important for church music in Liège in the 17th century: in particular they influenced his godson Lambert Pietkin, and Henry Du Mont, who studied at Liège.

WORKS

Armonica recreatione: villanelli, 3vv, bc (Antwerp, 1625); 1 ed. in suppl. to Lefèbvre
Sacri concentus, 1–5vv, vn, bc (org) (Liège, 1630)
Piece in 1667[6]
Salve regina, 8vv; Laetare, 8vv: in Grand livre de choeur de Saint-Lambert, *B-Lc*
3 Ecce panis angelorum, in 2[me] livre de choeur de Saint-Lambert, *Lc*, only bc extant
Motets, 5vv; Masses, 5–6vv: lost; cited in Daris, ii
14 librorum antiphonarium de Sancti Lamberti, 1629; 26 livres de musique, 1633: lost, cited in account books of St Lambert

JOSÉ QUITIN

**Hodges, Edward** (*b* Bristol, 20 July 1796; *d* Clifton, Bristol, 1 Sept 1867). English church musician, composer and essayist. Except for a few lessons as a youth, Hodges was self-taught. His first appointments were as organist at St James's (1819–38) and St Nicholas's (1821–38), Bristol. From the beginning of his career, he composed service music and published articles on church music and organ design. He was an early advocate for independent pedal divisions well before they were usual in British organs.

Hoping for a cathedral appointment, Hodges took the MusD at Cambridge in July 1825 under John Clarke-Whitfeld; however, his nonconformist religious background militated against his ambitions, in spite of his degree and his reputation among his colleagues. Accordingly, after the death of his first wife in 1835 he sought a post abroad. In September 1838 he became organist of St James's Cathedral, Toronto, but the unsettled political and economic situation in Canada prompted him to remove to New York that November. In January 1839 he was appointed organist of Trinity Parish, serving first at St John's Chapel and then at Trinity Church when its new edifice was completed in 1846. Hodges remained there until 1858, when illness forced him to take a leave of absence. He travelled to England to convalesce; he returned to New York a year later but was still unable to resume his duties at Trinity. Widowed a second time in 1861 and in declining health, Hodges resigned the post in 1863 and returned to Bristol where he spent his remaining years.

Although Hodges lived most of his life in Britain and always considered himself an Englishman, his influence was strongest on American church music. He published numerous periodical articles and served as contributing editor of the *New York Musical World* during 1856–7. Although his compilation, the *Trinity Collection of Church Music* (Boston, 1864), was edited for publication by Samuel Parkman Tuckerman, most of Hodges's own compositions remained in manuscript during his lifetime. After his death, his children published some individual pieces and a volume of service music, *The Kyries, Chants and Tunes Composed by Edward Hodges* (London, 1891). The anthems, varying in length from a few pages to several movements, are Hodges's most interesting works. Although they are in Handelian style, typical of the period, they show a distinctive command of counterpoint and fugue and occasional flashes of daring harmonic originality.

Two of the four children who survived Edward Hodges were also active in music, FAUSTINA HASSE HODGES and J(ohn) Sebastian B(ach) Hodges (*b* Bristol, 12 Jan 1830; *d* Baltimore, 1 May 1915), who composed some 100

hymn tunes and compiled a collection of music for use with the 1892 Episcopal *Hymnal*. Rector of St Paul's Church, Baltimore, for 35 years, he founded and fostered one of America's earliest boy-choir schools.

WORKS

The following list is almost certainly incomplete. Major collections of documents and music are held by *US-Wc* and the Organ Historical Society Archives at *US-PRw*. Manuscripts of 17 anthems, one service, a string quartet and an arrangement from Purcell are in *GB-BRp*.

ANTHEMS

Funeral Anthem for George III, 1820; It is a good thing, 1821; Beatitudes, 1821–2; Two anthems for Christmas, 1821–2; Without controversy, great is the mystery, 1821; Ps cxi, 1822; When the son of man, 1822; Blessed be the Lord, 1822; Ps xvi, 1822; Ps cl, 1824 (London, 1825, 1886); Ps cxxxvi, 1824 (London, 1825); The dead praise not Thee, 1825; Know ye not, 1827; In the beginning, 1827; Thus saith the Lord, 1829; How hath the Lord, 1830; Let the king live forever, 1831; He that dwelleth, 1832; The race is not to the swift, 1832; Ps cxiv, 1833 (London, 1889); Ps cxxxvi, 1836; Hear this, all ye people, 1837; Hear this, ye people, 1841; Anthem for Easter Day, 1841; I heard a voice, 1843; I heard a voice, 1848 (London, ?1886); Ps cxxxiv, 1851 (Boston, 1896); This is a true saying, 1852; I heard a voice, 1853; Ps cxxii, 1855 (New York, 1866; London, 1888); O Lord, how manifold, 1856; Lord of the worlds (Boston, 1883); miscellaneous adaptations and arrangements from various composers

SERVICE MUSIC

Services: C, 1820; D, 1822; C, 1824 (London, 1825; New York, 1863; London, 1886); F, 1827 (London, ?1875); D, 1840 (London, 1886); G, ?1840 (New York, 1858); Funeral Service, 1841; A, ?1841 (New York, 1841); F, 1843 (New York, 1859; London, 1886); E, 1846 (New York, 1855; London, ?1886); F, 1848 (London, ?1886) [Miscellaneous chants, hymn tunes and individual movements, composed from as early as 1818, as well as adaptations and arrangements from various composers

SECULAR VOCAL AND INSTRUMENTAL

Org prelude in c♯, 1820; 5 organ fugues, 1820–22; Birthday Ode, 1821; str qt, 1825; Bateman and Margaret, or the Fair Maid of Clifton, 1827; Faustina's Gavotte (Cincinnati, 1892)

JOHN OGASAPIAN

**Hodges, Faustina Hasse** (*b* Malmesbury, 7 Aug 1822; *d* Philadelphia, 4 Feb 1895). English organist and composer. (She was named after the famous 18th-century opera singer Faustina Bordoni, who married the composer Johann Adolf Hasse.) The daughter of the organist EDWARD HODGES, she followed his example and became a professional musician in New York and Philadelphia. She was a 'professor' of organ, piano and singing at Emma Willard's Troy Seminary for Girls, New York, in 1852 and, in the late 1870s, she became a church organist in Philadelphia. She began composing in the 1850s and her works include several keyboard pieces, a few sacred songs and about 25 drawing-room songs. Some works were a commercial success, the most famous being the songs *Dreams* (Boston, 1859) and *The Rose Bush* (1859) and a sacred duet *Suffer Little Children.* (Ebel claimed that she had sales of over 100,000 for *The Rose Bush*). Hodges skilfully assimilated both Italian and German styles in her more cultivated songs, making them popular light recital pieces for opera singers such as Adelaide Phillipps in the 19th century and Alma Gluck in the early 1900s. She edited some of her father's works and published them in 1891 with her own hymn tunes.

JUDITH TICK

**Hodges, Johnny** [Hodge, John(ny); Hodge, Cornelius; Jeep; Rabbit] (*b* Cambridge, MA, 25 July 1907; *d* New York, 11 May 1970). American jazz alto and soprano saxophonist. He played the drums and the piano before taking up the saxophone at about the age of 14, beginning on the soprano and later specializing on the alto instrument. Originally self-taught, he later received some instruction from Sidney Bechet. During the 1920s Boston served as his base, but at weekends he travelled to New York, where he succeeded Bechet in Willie 'the Lion' Smith's quartet at the Rhythm Club (around 1924), performed with Bechet at the Club Basha in Harlem (1925) and joined Chick Webb (1926).

In May 1928 Hodges became a member of Duke Ellington's orchestra, and he remained a mainstay of this group for the next 40 years. From his first recording session with Ellington in 1928 he revealed considerable authority and technical mastery, playing with a broad, sweeping tone and producing impressive florid runs; in the opinion of many, he soon became Ellington's most valuable soloist. Besides making hundreds of recordings with Ellington's orchestra, from 1937 he also led a small studio group drawn from the band, usually consisting of seven pieces, which made its own commercially successful series of recordings; these included such masterpieces as *Jeep's Blues*, *Hodge Podge*, *The Jeep is Jumpin'* and *Wanderlust* (all 1938, Voc./OK), all of which were written by Hodges in collaboration with Ellington. During this time he was much in demand by other musicians, taking part in classic sessions led by Lionel Hampton and by Teddy Wilson, and performing on both alto and soprano saxophone at Benny Goodman's concert at Carnegie Hall in 1938.

By 1941 Hodges was becoming best known for his earthy blues playing and for his sensuous ballad interpretations, opposing sides of his art exemplified by two recordings made in that year, *Things ain't what they used to be* and *Passion Flower* (both Bb). From this time on he concentrated exclusively on the alto saxophone, on which instrument he regularly won the popularity polls in *Down Beat*, *Metronome* as well as *Esquire* magazines. He also

collaborated on Ellington's best-selling song *I'm beginning to see the light* (1944, Vic.).

In March 1951 Hodges left Ellington to form his own small band, along with his fellow black American sidemen Lawrence Brown and Sonny Greer. The group's first recording session in that year produced a hit record, *Castle Rock* (Clef). Hodges disbanded his group in spring 1955 and rejoined Ellington's orchestra in August of that year; apart from a few brief periods he stayed with Ellington for the remainder of his life. He worked with Ellington's close associate Billy Strayhorn in spring 1958, and in 1961 toured Europe with other band members as the Ellington Giants. He continued to record in a variety of contexts under his own name, issuing a series of albums with Wild Bill Davis, two with Earl Hines and even one with the dance-band leader Lawrence Welk. Ellington and Strayhorn continued to write arrangements, such as the lush *Isfahan* movement from the *Far East Suite* (1966, RCA), to display Hodges's particular talents. A collection of Hodges's own compositions was published as *Sax Originals* (New York, 1945, 2/1972).

Hodges won the admiration of generations of saxophonists for his exceptional command of the sound and expressive nuances possible on his instrument. Ben Webster learnt much from him when he played in Ellington's saxophone section around 1940, and even John Coltrane, who appeared in Hodges's small group in 1953–4, listed Hodges among his favourite players. In his later years Hodges used fewer and fewer notes, remaining close to the melody in ballad performances and improvising relatively simple riffs on a blues. The power of his playing derived from the majesty of his sound, his endless vocabulary of expressive ornaments and the soulfulness of his melodic ideas. He generated a great deal of swing in these numbers, and built effectively from one chorus to the next. He is usually ranked with Benny Carter and Willie Smith among the outstanding alto saxophonists of the swing period.

LEWIS PORTER

**Hodgson** [Hudgson, Hudson; née Dyer], **Mary** (*b* ?London, bap. 26 Dec 1673; *d* after 1718). English soprano. She was a leading singer on the London stage and in concerts from 1693 to 1706. Probably the daughter of the dancing-master Benjamin Dyer, she married the actor John Hodgson on 16 May 1692, two weeks after singing in the première of Purcell's *The Fairy Queen*. Purcell's song 'Though you make no return to my passion' in *The Maid's Last Prayer* (February 1693) is shown as sung by her under her maiden and married names in different sources. Mrs Hodgson sang in a revival of Purcell's *The Prophetess* and in the second part of *The Comical History of Don Quixote*. With her husband, she joined the breakaway Betterton company in 1695 and subsequently sang music by Eccles in *Macbeth*, *The Rape of Europa* and *The Loves of Mars and Venus*. Congreve praised her performance as Juno in the Eccles setting of his *Judgment of Paris* (1701). Her career appears to have ended in 1706 but there were benefit performances for her up to 1719.

OLIVE BALDWIN, THELMA WILSON

**Hodzyats'ky** [Godzyats'ky], **Vitaly Oleksiyovych** (*b* Kiev, 29 Dec 1936). Ukrainian composer. He received his first music lessons at home and while at school took private lessons in piano and theory. He entered the Kiev Conservatory in 1956 and in 1961 graduated from the composition class of Lyatoshyns'ky, who played a major part in his creative development. After teaching music theory in Vinnytsya (1961–3), Hodzyats'ky returned to Kiev where he taught in children's music schools. His interest in Stravinsky's work began in 1960 and in 1962, like several of his Ukrainian contemporaries, he started to experiment with 12-tone composition spurred on by Hrabovs'ky's translations of theoretical works by Jelineck and Krenek. During this period, the music of Webern, Varèse, Boulez, Stockhausen and Schaeffer also played a decisive role in the formation of Hodzyats'ky's style; in 1963 he wrote two piano works which bear witness to this development – *Rozlyvy ploshchyn* ('Ruptures of Flatness') and the collection of miniatures *Avtohrafy* ('Autographs'). In these pieces, Hodzyats'ky's aggressive athleticism, rhythmic elasticity and emotional intensity are combined to resplendent effect. The four electronic studies of 1964 – *Nyuansi* ('Nuances'), *Emansipirovanniy chemodan* ('The Emancipated Suitcase'), *Realizatsiya 29/1* and *Antifortepiano* – possess a wit and hilarity rarely associated with the genre; the sounds used range in source from the inside of a piano to kitchen utensils. These were the first pieces for electronic means by a Ukrainian composer and among the first composed in the Soviet Union. Since then he has worked slowly but steadily, producing works of originality, from the 1974 Piano Sonata to the 1990 reworking of *Stabilis* for chamber orchestra. Although greater emphasis was placed on longer lines, emotional stablity and attractive colouring as his art matured, he never abandoned his modernist aesthetic.

VIRKO BALEY

**Hoeberechts** [Hoberecht], **John Lewis** (*b* ?Austrian Netherlands, *c*1760; *d* ?London, *c*1820). Pianist and composer active in England. The earliest date of publication of Hoeberechts's music suggests that he was active in London by about 1786. Whether he was born there or, as Fétis suggested (*FétisB*), came from the Austrian Netherlands is uncertain, but as a teacher of the newly fashionable piano he clearly received some encouragement to produce a steady stream of piano pieces from then up to about 1815. This amounts to incidental pieces, some based on popular tunes, 'overtures' for piano or harpsichord, some 30 sonatas (mostly with an accompaniment for violin) and two trios for piano, violin and cello. His music shows a fluent *galant* style, notable for its chromatic colouring in melody and harmony and for its idiomatic, often blatantly exhibitionist, piano writing. He also composed a small amount of vocal music and a piece for military band.

WORKS
*all published in London*

*c*30 sonatas, pf/hpd, most with vn: opp.1 (*c*1786), 3–4 (*c*1790), 7–12 (*c*1795–9), 14–16 (*c*1805)

Other vocal and pf works pubd singly

OWAIN EDWARDS

**Hoedemont, Léonard de.** *See* HODEMONT, LÉONARD DE.

**Hoedown.** A term first used in the mid-19th century for vigorous African American dances or imitations thereof, possibly similar to clog dances, jigs or reels. It has been applied generally to duple-metre folkdances and square-dances performed by whites in the USA and Britain, or to the parties where they are performed. *See also* BREAKDOWN.

**Høeg, Carsten** (*b* Ålborg, 15 Nov 1896; *d* Copenhagen, 4 April 1961). Danish classicist and musicologist. He began to study at the University of Copenhagen in 1917 and displayed a keen interest in music, especially in the Byzantine theoretical treatises on music. He also studied linguistics and French in Paris (1920). From 1926 until his death he was professor of classics at the University of Copenhagen. His growing interest in the study of Byzantine music led him to invite H.J.W. Tillyard and Egon Wellesz to Copenhagen (July 1931) for a conference and to plan coordination of effort in this field. As a result of this meeting Monumenta Musicae Byzantinae was established; the first volumes in the series were published in 1935, including Høeg's *La notation ekphonétique* which remains a classic. During the war Høeg was active in the organization of the resistance movement in Denmark and was an editor of the underground press. He was subsequently president of the Union Académique Internationale (1953–5) and of the Conseil International de la Philosophie et des Sciences Humaines attached to UNESCO (1955–9).

Høeg investigated a number of aspects of Byzantine music besides the ekphonetic notation, particularly the heirmologion and the notation of Old Slavonic music manuscripts. He was an able organizer and inspiring teacher; in Copenhagen he founded an important centre for studies of Byzantine music which is one of the focal points for research and publications in this field.

MILOŠ VELIMIROVIĆ

**Hoenderdos, Margriet** (*b* Stantpoort, 6 May 1952). Dutch composer. After studying the piano at the Zwolle Conservatory, she entered the Sweelinck Conservatory in Amsterdam, where she studied composition with Ton de Leeuw. She graduated in 1985, winning the Composition Prize. Her works are characterized by a rigorous methodological approach rarely encountered in contemporary Dutch music. Hers is a radical research into the essence of sound. For example, in *Lex inertiae* no.2 for solo viola, the left hand has little to do while the right hand concentrates on various techniques. The relationships between various aspects of sound determine the structure of her works. Central to *Es verjüngt sich nach unten*, a piano solo for the right hand, is the relationship between tempo and density. Although she does not let emotions or experiences influence her compositions, her music is not abstract, but vital, colourful and even obstinate. Since the early 1990s her exclusion of non-musical factors is also reflected in her titles, which are simply the month and year in which they were written. Hoenderdos sometimes collaborates with other artists, and has written music for productions by De Daders, an Amsterdam-based mime theatre group.

HELEN METZELAAR

**Hoepner** [Höpner], **Stephan** (*b* Penzlin, nr Neubrandenburg, *c*1580; *d* Frankfurt an der Oder, 22 Aug 1628). German composer. He is recorded as having matriculated at the University of Frankfurt an der Oder in the summer term of 1600. In the music faculty he became the favourite pupil of Bartholomäus Gesius, who was also Kantor of the Marienkirche at Frankfurt. In 1605 Gesius helped Hoepner to obtain the post of Kantor at his own birthplace, Müncheberg, where the pastor was his brother Jacob, in whose honour Hoepner composed his first published work (1606). After Gesius's death in the plague that ravaged Frankfurt in 1613, Hoepner took steps to obtain his post at the Marienkirche and dedicated to the city council his most important publication, the *Newe deutsche und lateinische geistliche Lieder* of 1614. After passing the required tests he indeed received the appointment on 1 August that year and held it until his death. As well as 15 German and 11 Latin songs, the volume of 1614 includes a three-part *St Matthew Passion* and some wedding and funeral songs. Nearly all of Hoepner's other published music consists of occasional works, including three wedding pieces, eight funeral hymns and six congratulatory songs. They are obviously accomplished works and sufficiently general in character for them not to have been consigned to oblivion after only one performance. One of the last is the *Echo gratulatoria* of 1622, celebrating the graduation of the son of Friedrich Hartmann, the Frankfurt printer who published 11 of Hoepner's works. No detailed study has yet been made of the style of Hoepner's music, but it is unlikely to be very dissimilar from that of his master Gesius, who was, however, doubtless superior to him.

WORKS

*all printed works published in Frankfurt an der Oder*

Gratulatorium musicum in honorem Dn. Jacobi Gesii, 5vv (1606)
3 geistliche Gesänge in Kirchen auf Ostern, Pfingsten und Himmelfahrt, 8vv (1610)
Newe [15] deutsche und [11] lateinische geistliche Lieder, auf Jahr- und Dankfeste . . . nebenst dem Actu vom Leiden und Sterben unsers Erlösers . . . Jesu Christi, 4–8, 12vv (1614, 2/1616)
3 geistliche Gesänge zu den hochzeitlichen Ehrenfreuden Joachimi Schaumen auf Geigen, 6vv (1614)
Der Lobgesang Simeons . . . zu dem . . . Begräbnis der Frauen . . . Albini, 6vv (1615)
Cantio lugubris in obitum . . . Dn. Emanuelis Bachn, 8vv (1615)
Trost Gesang auf das ... Begräbnis der ... Frauen Mattaei Cunonis, 5vv (1615)

FRITZ FELDMANN/DOROTHEA SCHRÖDER

**Hoerburger, Felix** (*b* Munich, 9 Dec 1916; *d* 3 Feb 1997). German musicologist and ethnomusicologist. He studied composition at the Munich Musikhochschule and then comparative musicology at the University of Munich, completing his dissertation in 1941 on the music of the Ungoni of East Africa; his 1963 *Habilitationsschrift*, published 1994, was a study of the instrumental dance music of Albanians in Kosovo and Macedonia. His academic career began and concluded in Regensburg: he served there as a research assistant in musicology, 1947–68, and after two years at the University of Erlangen, he returned to Regensburg and assumed a position as lecturer (1970) and professor (1971), retiring for health reasons in the early 1980s.

Two related themes dominate Hoerburger's research and publications: folk dance and instrumental folk music, especially that used to accompany dance. He pursued these interests on local and regional levels, for example, in Bavaria, where his studies on genres with shifting metres, especially the *Zwiefach*, remain classics. He was one of the first dance scholars to examine iconographic materials and to explore the diverse forms of dance notation. Drawing upon the comparative perspectives of post-World War II German ethnomusicology, he also concerned himself with the global distribution of instrumental forms, especially the combination of double-reed instruments and drums in outdoor performances. In the 1950s and 60s he worked closely with colleagues in Eastern Europe, and his research from this period provides detailed documentation of rural folk music in the early decades of the Cold War.

Methodologically, he based his research on extensive fieldwork and intensive organological studies, as well as on documentary film. Geographically, his publications include virtually every part of the world, with particular concentrations in southern Germany, southeastern Europe, Afghanistan, Tibet and the Middle Eastern and Mediterranean regions. Hoerburger's major contribution was to establish methods and theories for studying folk music as distinct from the text-dominated approaches to folk song. Through their incorporation of diverse cultural and historical contexts his publications have become models for the interdisciplinary and comparative study of folk music.

PHILIP V. BOHLMAN

**Hoérée, Arthur (Charles Ernest)** (*b* St Gilles, Brussels, 16 April 1897; *d* Paris, 3 June 1986). Belgian composer, critic and musicologist. He was the great-grandson of Jacobus Hoérée (1773–1859), *maître de chapelle* at St Walburge, Oudennarde. He studied the organ and music theory at the Brussels Conservatory (1908–12) and at the Institut Musical in Anderlecht (1914–16), then attended the Ecole Polytechnique in Brussels (1916–19) from which he graduated as a qualified engineer. At the same time he continued his musical studies, and in 1919 he settled in Paris where he completed his training at the Conservatoire (1919–26) with Paul Vidal (fugue and composition), Vincent d'Indy (conducting), Joseph Baggers (percussion) and Eugène Gigout (organ). In 1922 he won the Prix Halphen with his *Heures claires*, performed by the soprano Régine de Lormoy (who was later to become his wife) and in 1923 his *Pastorale et danse* for string quartet was awarded the Prix Lepaulle. He published his first article in 1918 and began his long association with the *Revue Musicale* in 1922; he wrote 400 articles for this journal until 1949. He also wrote extensively for *Comoedia* (200 articles) and *Le Mois*. For all three publications he also served as film critic from 1936 to 1946. He published about a thousand articles on aesthetics, analysis and music history and he also wrote numerous entries for music dictionaries. Drawing on a rich vocabulary, his prose is notable for its critical acumen and its stylistic clarity and precision.

He conducted his Septet at the Zürich ISCM Festival in 1926 and the same year he was appointed cultural attaché to the International Institute for Intellectual Cooperation at the League of Nations. With his background in mathematics and engineering, he was a natural choice to work with Edward Dent and Felix Weingartner on a proposal for an international standard pitch of 435 Hz. He toured extensively as a lecturer and also as an accompanist for his wife. From 1929 he produced music programmes for French Radio. He composed some 40 film scores, of which nine were written in collaboration with Honegger between 1934 and 1952. In these scores Hoérée used all the available techniques of sound recording, and revealed himself as a resourceful inventor of new acoustical effects. In addition, he became a film technician, working as an editor at the Paramount studios in St Maurice. In 1950 he became professor of orchestration at the Ecole Normale de Musique in Paris. From 1958 to 1968 he taught artistic culture at the Centre de Formation Professionelle of French Radio and in 1972 he was appointed to the Musicological Institute at the Sorbonne, where he worked until 1980. In 1978 he was elected to the Académie Royale de Belgique.

His compositions, produced mostly during the inter-war years, are in the post-Impressionist vein of much French music of the period. Influenced to some extent by the formal rigour and tonal sobriety of neo-classicism, his works also experiment with polytonality, modality, and even, on rare occasions, atonality. His instrumentation is clear, delicate and sometimes witty. He exploited the natural resonance of chords and his music is particularly rich in its rhythmic variety, often showing the influence of jazz, which he played.

WORKS

Stage: Crève-Coeur le magicien (conte lyrique), 1961;
Incid. music: Liberté (T. Bernard), 1937; Tout est bien qui finit bien (W. Shakespeare), 1943; Sous le Burnous blanc (J. d'Ansennes), 1945; Le Major Cravachon (E. Labiche), 1945; Gog et Magog (A. Vidalie), 1948; Richard III (Shakespeare, A. Obey), 1950; La Conjuration de Fiesque (F. Schiller), 1950; La Flamme et les cendres, 1950; Les Bouffons (R. **Hoeven** [Hoffen, Houen, Houven, Hoven, Howen], **Carl van der** [Hauf, Carolus von der; Hofen, Carolus von der] (*b* Nuremberg, 1580; *d* Salzburg, 5 May 1661). German composer and organist. He was taught music by either Hans Leo Hassler or his brother Kaspar. In 1606 the Hassler brothers recommended him for a position at the court of Count Georg von Zollern at Hechingen. He probably remained there until 1609, though he may have been retained at least in name until 1611. In 1609 he was appointed chamber organist at the Salzburg court. From 1611 until his death he was court organist. He composed both sacred vocal and keyboard music. Some of the vocal works are in the Venetian style (much practised in south Germany), with two antiphonal choirs.

WORKS

SACRED VOCAL

2 motets, 8, 10vv, 1615[2]; 1 ed. C.G. Rayner (New York, 1976)
Mass, 6vv; Communion for Feast of Corpus Christi, 5vv: *A-Sd*

KEYBOARD

Motet, 1617[24] (org intabulation)
1 ricercare, 2 toccatas, *D-Mbs*; 1 ricercare, *I-Tn*; ed. in CEKM, xl (1976)

**Hof, Nickel von.** *See* DECIUS, NIKOLAUS.

**Hofacker, Andreas.** *See* THEOBALDUS.

**Hofen, Carolus von der.** *See* HOEVEN, CARL VAN DER.

**Hofer** [Hoffer], **Andreas** (*b* Reichenhall [now Bad Reichenhall], 1629; *d* Salzburg, 25 Feb 1684). Austrian composer. He attended the Benedictine University at Salzburg and then served as organist at St Lambrecht Abbey in Styria from 1651 to 1653. In 1654 he was appointed vice-Kapellmeister at the court of the Prince-Archbishop of Salzburg and in 1679 was promoted to Kapellmeister, a position he held until his death. From 1666 until his death he was also Kapellmeister at Salzburg Cathedral. His pieces for solo voice suggest the influence of Monteverdi and other Italian composers who cultivated monodic music, whereas some of his larger works reflect the so-called 'colossal' style, as seen in the *Missa Salisburgensis* (formerly attributed to Benevoli, now Biber; see Hintermaier, Jaksch and Chafe).

MIRIAM W. BARNDT-WEBB

**Hofer, Josepha.** German soprano. *See* WEBER family, (3).

**Høffding, (Niels) Finn** (*b* Copenhagen, 10 March 1899; *d* Copenhagen, 3 March 1997). Danish composer and teacher. He began his music studies partly at the University of Copenhagen and partly as a private pupil of Jeppesen for harmony and counterpoint. From 1922 to 1923 he studied with Joseph Marx in Vienna, where he came into contact with the Schoenberg circle. After his return from Vienna, he became a student of Thomas Laub. Initially, however, he drew his strongest inspiration from the late works of Nielsen, whom he admired both as an artist and as a person, and from those trends in European music most closely related to Nielsen's modernism. The performance of Stravinsky's *Petrushka* in Copenhagen in 1925, for example, left its mark in the motoric quality of

Høffding's music from this period. Likewise, the 1927 ISCM Festival in Frankfurt was a crucial event in his development as a musician: he attended Furtwängler's performance of Nielsen's Fifth Symphony, and also heard Weill's music for *Mahagonny*. The 1920s saw the composition of Høffding's first major works, the Symphonies nos.1–3, the choral work *Karlsvognen*, the *Kammermusik* for soprano, oboe and piano, and the operas *Kejserens nye klaeder* and *Kilderejsen*.

In the years around 1930 Høffding became involved in educational and popularizing work, which remained an important part of his contribution to Danish musical life. He derived important new inspiration in this direction both from his study and collaboration with Hakon Andersen and from his encounter with Fritz Jöde's movement following the Frankfurt festival. In 1931 he and Jørgen Bentzon founded the Københavns Folkemusikskole, which resulted in a movement for popular music schools throughout the country. The following year he was appointed teacher of theory and composition at the Copenhagen Conservatory, where he became professor in 1949 and later director (1954–5). Høffding's music in the 1930s was predominantly for teaching purposes, including the cantatas *Ein Musikus wollt fröhlich sein* and *Das Eisenbahngleichnis*, and the school opera *Pasteur*. His influential *Harmonielaere* also dates from this period. Throughout Høffding's career choral arrangements and songs occupied a central role. In his instrumental music, however, Høffding began around 1940 to concentrate his large-scale symphonic pieces into dense single-movement structures. The resulting series of four symphonic fantasias is among his most important achievements. The first, entitled *Evolution*, highlights the process of motivic transformation that Høffding developed alongside his pupil and close contemporary Vagn Holmboe. The second, *Det er ganske vist*, is based on a story by H.C. Andersen, but is even more rigorous in its motivic integrity (a pair of interlocked minor 3rds is its basis), while the final two, *Vår-Höst* and *The Arsenal at Springfield*, are more expansive both in scope and thematic material.

Høffding held many administrative and honorary offices in Denmark; he initiated the music commission of the Ministry of Culture (1957), and was a board member of the Dansk Komponistforening, Det Unge Tonekunstnerselskab (honorary member 1969), Samfundet til Udgivelse af Dansk Musik, De Danske Folkemusikerskoler and Koda, as well as chairman of the Dansk Musikpaedagogisk Forening (1929–39, honorary member 1947) and consultant for Danish Radio from 1963. In 1937 he was awarded the Ancer'ske Legat, and in 1956 and 1958 the Carl Nielsen Prize.

WORKS
(*selective list*)

OPERAS

Kejserens nye klaeder (Høffding, after H.C. Andersen), op.8, Copenhagen, Royal Theatre, 1926

Kilderejsen (V. Andersen, after L. Holberg), op.16, Copenhagen, Royal Theatre, 1931, rev. 1942

Festens hellige gave (Singspiel, Høffding, after K. Rasmussen), 1985, ?inc.

NIELS MARTIN JENSEN/DANIEL M. GRIMLEY

**Hoffen, Carl van der.** *See* HOEVEN, CARL VAN DER.

**Hoffer, Andreas.** *See* HOFER, ANDREAS.

**Höffer, Paul** (*b* Barmen, 21 Dec 1895; *d* Berlin, 31 Aug 1949). German composer and teacher. He studied the piano with Walter Georgii and composition with Franz Bölsche at the Cologne Conservatory. In 1920 he began studies in composition with Schreker at the Berlin Hochschule für Musik, and so began a lifelong association with that institution. In 1923 he was appointed to teach the piano at the Hochschule and in 1930 to teach composition and theory; he was made professor in 1933. With Rufer he founded the Internationales Musikinstitut in Berlin in 1945. From 1948 until his death he was director of the Berlin Hochschule.

An exact contemporary of Hindemith, Höffer followed his colleague in furthering the cause of *Gebrauchsmusik*, composing three musical plays for children, *Spielstücke* for various instruments and numerous choral works. Similarly, in his orchestral and instrumental music, he was influenced by the general trend in Germany towards recreating Baroque models in contemporary terms. Although Höffer's modernist First Symphony (1926) occasioned some critical discussion, his music from the 1920s received relatively little attention and remained unpublished. This situation changed during the last years of the Weimar Republic, when Höffer consciously simplified his style in order to attract a wider public. His relationship with the Nazi regime, however, was equivocal. He was active in arranging numerous folk melodies and providing music for public occasions, such as the cantata *Olympischer Schwur*, performed at the 1936 Berlin Olympic Games. In addition, such accessible works as the *Sinfonie der grossen Stadt* (1937), inspired, he said, by the 'inner experience of a multitude of impressions and moods of the great city of Berlin', and the oratorio *Der reiche Tag* (1938) enjoyed frequent performances during the period. Despite this, Höffer was criticized for his opera *Der falsche Waldemar* (1934) which was subsequently banned, and political pressure during the war drove him to a peiod of silence from 1942 to 1944.

WORKS
(*selective list*)

Dramatic: Borgia, op, 1931; Der falsche Waldemar (op, 3, Höffer, after W. Alexis), 1933–4, perf. 1934; Des Lebens und des Todes Reigen (incid music, W. Schulz), 1935; Tanz um Liebe und Tod, ballet, 1937, perf. 1939; Jedermann (incid music, H. von Hofmannsthal), 1946; music for 6 radio plays incl. musical plays for children

Orch: Ouvertüre, op.4; Sinfonische Musik, op.5; Pf Conc. no.1; Sym. no.1, op.16; Conc. grosso, op.18, org, orch; Vn Conc., op.19; Vc Conc., op.20; Tanzmusik für Rundfunk, op.21; Festliches Vorspiel, op.22; Partita, op.24, 2 str orch; Kleine akademische Festmusik, op.37a; Sinfonische Musik, op.37b; Heitere Suite, op.37c; Frühlingsspiel, 1934; Musik der Bewegungen, school orch, 1935; Intrada zur Totenfeier, 1935; Altdeutsche Suite, 1936; Instrument-Stück, 1936; 3 Volkstänze, 1936; Sinfonie der grossen Stadt, 1937; Berliner Festmusik I, II, 1937; Festliche Ouvertüre, wind orch, 1937; Fliegermusik, wind orch, 1937; Pf Conc. no.2; Heitere Bläsersinfonie, 1940; Sinfonische Variationen über ein Bass von Bach, 1940; Heitere Ouvertüre, 1941; 4 deutsche Liedtänze, 1941; 4 sinfonische Zwischenspiele, 1944; Serenade, str orch, 1944; Ob Conc., 1946

CHARLOTTE ERWIN/ERIK LEVI

**Höffgen, Marga** (*b* Mülheim an der Ruhr, 26 April 1921). German contralto. After study at the Berlin Hochschule für Musik and with Weissenborn she gave her first public concert in Berlin in 1952. The following year she sang in Bach's *St Matthew Passion* under Karajan in Vienna. Her first and for some years her only operatic roles were Erda in the *Ring*, which she sang for the first time on the stage at Covent Garden in 1959, and the First Norn. She sang Erda for the first time at Bayreuth in 1960, and also sang the part in Vienna, Buenos Aires and elsewhere. She recorded roles in *Parsifal*, *Die Meistersinger* and *Die*

*Zauberflöte*. Her first love, however, was the concert platform. Her expressive, beautifully focussed contralto, perhaps heard to best advantage in Karajan's 1954 recording of the B minor Mass, was particularly associated with the music of Bach and Wagner.

PETER BRANSCOMBE

**Hoffhaimer, Paul.** *See* HOFHAIMER, PAUL.

**Höffler, Konrad** (*b* Nuremberg, bap. 30 Jan 1647; *d* in or before 1705). German viol player and composer. He was a pupil of Gabriel Schütz in Nuremberg at the same time as J.P. Krieger, and his first appointment was at the Bayreuth court, where Krieger had become organist. In July 1673 Margrave Johann Friedrich of Ansbach sent his director of music J.W. Franck to Bayreuth to engage musicians for his court. After coming to an agreement with Franck, Höffler took up a post as court musician at Ansbach on 29 August 1673. He gave in his notice, however, on 28 March 1676 because the promise that Franck had made him had not been kept. In a list of 8 August 1676 his name appears among the musicians at the Halle court. After the duke's death in 1680, his successor transferred the Hofkapelle to Weissenfels, where Höffler enjoyed an important and respected position among his colleagues and in the town.

As a composer Höffler is known only by *Primitiae Chelicae, oder Musicalische Erstlinge. In 12. durch unterschiedliche Tone eingetheilte Suiten Viola di gamba solo samt ihrer Basi, nach der jetzt florirenden Instrumental-Arth eingerichtet* (Nuremberg, 1695; edns in EDM, lxvii, 1973). In his preface he emphasized that he had felt free not to hold fast to the rules of fugal composition. The 12 gamba suites, all in different major and minor keys, follow the then usual order of movements allemande–courante–sarabande–gigue. The improvisatory technique reflects a notably high degree of virtuosity. The dances in each suite adhere essentially to the variation principle.

LINI HÜBSCH-PFLEGER

**Hoffman, E(lisha) A(lbright)** (*b* Orwigsburg, PA, 7 May 1839; *d* Chicago, 1929). American writer and composer of gospel hymns. He was the author of the Salvation Army hymn *Are You Washed in the Blood of the Lamb? See* GOSPEL MUSIC, §I, 1(ii).

**Hoffman** [Hoffmann, Hofman, Hofmann], **François-Benoît(-Henri)** (*b* Nancy, 11 July 1760; *d* Passy, nr Paris, 25 April 1828). French librettist, critic and playwright. After winning the Nancy Académie's poetry prize in 1784, he decided to follow a literary career in Paris. The patronage of Megret de Serilly, *trésorier général de la guerre*, helped him to achieve his first major public success: *Phèdre*, set by Lemoyne in 1786, was given its première at Fontainebleau. After a trip to Italy in 1787, Hoffman and Lemoyne collaborated again: *Nephté* was praised for its dramatic integrity, although it did not remain in the repertory long. The two fell out. Hoffman offered his next libretto, *Adrien*, first to Cherubini (who declined it, but accepted the next, *Médée*) and then to Méhul, who became his favourite partner during the 1790s.

In 1789–90 Hoffman had the first of many disagreements with theatres. He opposed the Opéra's wish to add what he felt were unsuitable *divertissements* to *Nephté*, and threatened to press for legislation to force recognition of authors' rights to maintain control over their published works. Although he won on both points, it proved a Pyrrhic victory, for, partly in retaliation, the Opéra rejected the *Médée* libretto in 1790. The same strength of character is clear in his public declarations during the 1792 *Adrien* controversy. Exceptionally for the time of the Revolution, few of his works had a clear political message (even *Callias* is more patriotic than partisan). More typical are his librettos for Méhul, Solié and Dalayrac, which range from the *chevaleresque* to *comédie héroïque*, bourgeois comedy, satire and *drame*. In spite of the great variety of subjects, they all show Hoffman's attention to character development, well-constructed plot, finely paced dramatic action and finesse in language (with, however, a tendency to verbosity).

In 1797 Hoffman became the editor and principal writer of the periodical *Le menteur*, in which, with a fine sense of irony, he ridiculed, often by outlandish praise, current literary fashions and those who misused political power (with the result that it was soon banned). During the Consulate, he continued to champion the author's cause: active in the Société des Auteurs Dramatiques, he became its Opéra-Comique representative. His librettos thereafter tended more to the genre's comic and sentimental sides, and he collaborated successfully with Isouard, whose light, italianate musical style well matched the slight dramatic requirements of the text.

In the autumn of 1807 Hoffman virtually retired from the theatre (the two operas produced after this date were written earlier) and joined the *Journal de l'empire* as a literary critic. Although his insistence on upholding certain traditional principles of style made him unsympathetic to some of the early French Romantics, he was respected for his independence and thoroughness. After his death he was remembered as one who appreciated that a work for the Opéra-Comique was not merely a play with music added. As the writer of his obituary noted, 'The majority of Hoffman's works are distinguished by a perfect understanding of the stage and by ingenious schemes to introduce situations suitable for musical effects. Few dramatists have known so well the method and structure of verses for vocal pieces'.

WRITINGS

*Phèdre* (tragédie lyrique, after Euripides and J. Racine), Lemoyne, 1786; *Nephté* (tragédie lyrique, after T. Corneille: *Camma*), Lemoyne, 1789; *Euphrosine, ou Le tyran corrigé* (comédie mise en musique), Méhul, 1790; *Adrien, empereur de Rome* (opéra, after P. Metastasio), Méhul, 1790–91 and 1799; *Stratonice* (comédie héroïque, after *De Dei Syria* [attrib. Lucian] and T. Corneille: *Antiochus*), Méhul, 1792; *Le jeune sage et le vieux fou* (comédie mêlée de musique), Méhul, 1793

M. ELIZABETH C. BARTLET

**Hoffman, Gustav.** *See* GRABEN-HOFFMAN, GUSTAV.

**Hoffman, Richard** (*b* Manchester, 24 May 1831; *d* Mount Kisco, NY, 17 Aug 1909). American pianist, teacher and composer of English birth. He was trained primarily by his father, who had studied with Hummel and Kalkbrenner; reports of study with Liszt, Moscheles and Rubinstein are inaccurate. Emigrating to the USA in 1847, he began a 50-year association with the New York Philharmonic Society on November 27, playing Mendelssohn's G minor Concerto. In the early 1850s he performed with Jenny Lind during her American tour; he also performed two-piano works with Gottschalk. A prominent New York pianist, Hoffman was known for his sight-reading ability and for his technique, precision and clarity of phrasing. His repertory included J.S. Bach, Beethoven, Brahms, Chopin and Mendelssohn.

Hoffman wrote over 100 original pieces and transcriptions for the piano, as well as a few songs and church pieces. The piano works are typical of the genteel tradition at its best, including the charming *La Gazelle* (1858), the lively *Dixiana* (1861), the moving *In Memoriam L.M.G.[ottschalk]* (1869) and the Cuban dance, *Chi-Ci Pipi Nini* (1872). Hoffman's wife published his memoirs, *Some Musical Recollections of Fifty Years* (1910), adding a biographical sketch and reprinting his essay 'How to Stimulate Thought and Imagination in a Pupil' (1895). The latter shows him as a serious teacher, calling for appropriate nuance and expression as well as technique. Gottschalk, who dedicated *Le Banjo* to Hoffman, described his friend as 'a conscientious artist, a perfect musician'.

WORKS
(*selective list*)

*all works for piano published in New York unless otherwise stated*

Souvenir de Trovatore (de Verdi) (1856); La Gazelle, andante élégant (Mainz, 1858); Caprice de Concert, sur les motifs de Favorita, Huguenots et Traviata (1860); Dixiana, Caprice on the Popular Negro Minstrel's Melody 'Dixie's Land' (Boston, 1861), ed. J. Gillespie, *Nineteenth-Century American Piano Music* (1978); Ten Minutes with Mozart, transcr. from *Don Giovanni* (1862); Solitude pensée fugitive (1863); Rigoletto, fantaisie caprice (1864); Crispino e La Comare, 3 caprice de concert (1866); Impromptu (1867); Sonata bouffe (1869)

In Memoriam, L.M.G. (1870), ed. M. Hinson, *Piano Music in Nineteenth-Century America* (Chapel Hill, NC, 1975); Chi-Ci Pipi Nini, Cuban dance (1872), ed. E. Gold, *The Bicentennial Collection of American Keyboard Music* (Melville, NY, 1975); Tarantelle (1872); Barcarolle (1876); Beyond, rêverie, op.86 (1885); Spinning Song, op.100 (1889); Scherzo di Bravura, op.101 (1890)

CHARLES S. WILHITE

**Hoffmann.** Czech family of music publishers.

(1) **Jan Hoffmann** (*b* Prague, 14 Feb 1814; *d* Prague, 1 Oct 1849). From 1828 to 1833 he was apprenticed to Marco Berra, under whom he worked until 1838 and whose daughter he married. In 1838 he set up a shop for *objets d'art*, engravings, maps and music; he expanded it to include a piano store, also selling strings and lending music. Probably from 1841 he had his own music printing and publishing firm. Jointly with Berra he published 50 compositions; on his own he issued some 2300 publications including numerous solo vocal, choral and piano works by Czech composers of the revivalist period (e.g. Tomášek, František Škroup and his brother Jan Nepomuk Škroup, Alois Jelen and Jan Martinovský). In the collection *Sammlung der National-Polka* he published Czech dances by F.M. Hilmar, Joseph Labitzky, Josef Liehmann and others. Apart from the Prague firm he had a branch in Leipzig.

After financial difficulties he sold his business, on 7 May 1844, transferring all his existing publishing contracts to his main creditor, the publisher Hofmeister in Leipzig. It has not been reliably ascertained when he took up publishing again. After his death his wife Emilie, née Berra, took over the firm.

(2) **Emilie Hoffmannová** (*b* Prague, 28 Aug 1816; *d* Prague, 6 July 1882). Wife of (1) Jan Hoffmann and daughter of the music publisher Marco Berra. After her husband's death she carried on his business from October 1849 to October 1879 under the name Hoffmannová Vdova. She continued publishing works by Czech composers (e.g. Bendl, Václav Horák, Krov and especially the prolific Zvonař) and expanded the firm to include a concert agency; she passed the business to her son Jaromír in October 1879.

(3) **Jaromír Hoffmann** (*b* Prague, 7 June 1847; *d* Prague, 5 Feb 1918). Son of (1) Jan Hoffmann and (2) Emilie Hoffmannová. From 1864 until his death he was manager of Hoffmannová Vdova, which he took over

from his mother in October 1879. Under him the firm took on nationalist overtones. Among the works he published were Smetana's Andante and the Concert Fantasia on Czech National Songs (both in 1886) and the second edition of Smetana's Marches from the Year 1848 (1884), Foerster's collection *The Catholic Organist* (1858), some works by Rozkošný and a series of contemporary salon music pieces. He expanded his trade by buying the older Prague music publishing firms Christoph & Kuhé, Fleischer, Schindler and Veit (whose scores he transferred to his own catalogue without indicating their original publishers), thus increasing his output to 4800 numbers. He continued to use the name Hoffmannová Vdova with his own name added to it.

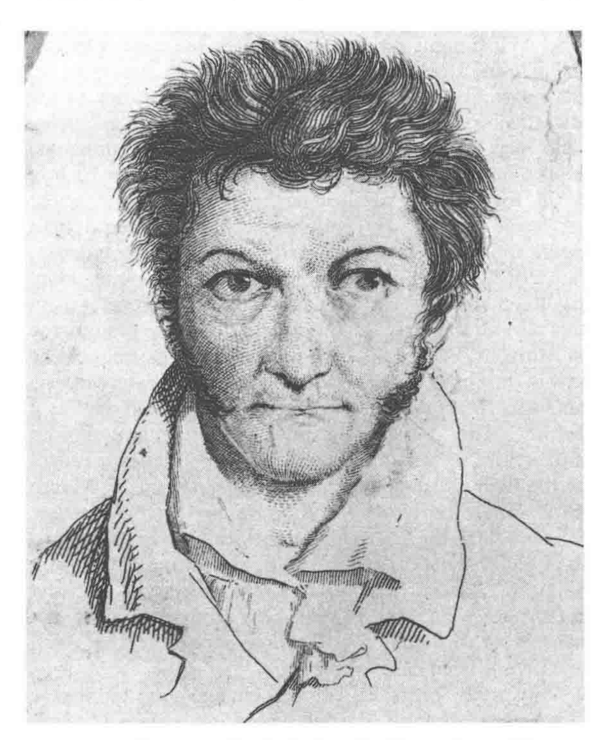
ZDENĚK CULKA

**Hoffmann, Bruno** (*b* Stuttgart, 15 Sept 1913; *d* Stuttgart, 11 April 1991). German player and maker of the musical glasses. Having studied the piano, the organ and singing, he specialized from 1929 in the musical glasses. He constructed a chromatic instrument with a compass of four octaves and developed an impressive technique in playing on it (*see* MUSICAL GLASSES, fig.3). He became known as a soloist in the 1930s, and was first heard in London on 9 March 1938 in the London Museum (then in Lancaster House, St James's), where, with Geoffrey Gilbert, Frederick Riddle, Leon Goossens and James Whitehead, he gave a memorable performance of Mozart's Quintet for armonica, flute, viola, oboe and cello (K617). Hoffmann was heard again in London in the 1960s, and in many other cities all over the world. He commanded a tone which was both sweet and powerful and of extraordinary resonance; his repertory included, besides Mozart's quintet and solo Adagio (K356), other 18th-century music, and some works of his own composition. He called the instrument 'glass harp'.

ALEC HYATT KING



**Hoffmann, Ede** [Eduard]. *See* REMÉNYI, EDE.

**Hoffmann, E(rnst) T(heodor) A(madeus)** [Ernst Theodor Willhelm] (*b* Königsberg [now Kaliningrad], 24 Jan 1776; *d* Berlin, 25 June 1822). German writer and composer. His fantastic tales epitomize the Romantic fascination with the supernatural and the expressively distorted or exaggerated. As a critic, he placed his sharp mind at the service of a consistent (if partial) view of Romanticism and wrote vivid and forceful reviews of the music of his time. His work as a composer, which he himself regarded highly, has been neglected but shows a certain verve and originality. He was also a gifted artist, the author of some excellent sketches and caricatures (fig.1). His personality and talents lent a distinctive, if somewhat lurid, hue to Romanticism and influenced several generations of artists, writers and composers.

1. Life. 2. Writings. 3. Music.

1. LIFE. His father Christoph Ludwig Hoffmann (1736–97), *Hofgerichts-Advokat* (high court barrister) and later *Justizkommissar* (attorney-at-law) and *Kriminalrat* (counsellor in criminal law), married his cousin Lovisa Albertina Doerffer (1748–96); they lived apart after 1778, and Hoffmann stayed with his mother in the house of his grandmother. The two women lived in almost complete retirement in their rooms, and the boy's education was directed by his uncle Otto Wilhelm Doerffer (1741–1811), with whom he shared a living-room and bedroom. Doerffer was well educated but unimaginative, mechanical and a strict disciplinarian; Hoffmann was quick to see his uncle's faults and could never love or respect him, although he owed to him his earliest musical education and the lifelong habit of constant hard work.

Hoffmann attended the Burgschule in Königsberg and became friends with Theodor Gottlieb von Hippel (1775–1843), later a West Prussian civil servant, whom he counted as his 'most faithful and constant friend'; from Hippel comes the only reliable information about Hoffmann's childhood, adolescence and early works. In keeping with the family tradition, Hoffmann was enrolled (unwillingly) in the faculty of law at Königsberg University (27 March 1792). At the same time he continued his studies in painting and was taught the piano by Carl Gottlieb Richter (1728–1809), thoroughbass and counterpoint by the Königsberg organist Christian Wilhelm Podbielski (1740–92) and (after Podbielski's death) by

the choirmaster Christian Otto Gladau (1770–1853), who had already been his violin teacher.

Hoffmann completed his law studies in July 1795, and on 27 August 1795 he was appointed *Auskultator* (junior lawyer) by the Königsberg administration. After extricating himself from a painful love affair, in May 1796 he moved to Glogau, where Johann Ludwig Doerffer (1743–1803), his mother's second brother, was a civil servant. There Hoffmann became engaged to his cousin Sophie Wilhelmine Doerffer (1775–1835) in 1798 (he broke off the relationship in 1802). Shortly after a journey to the Riesengebirge and Dresden he left Glogau with his uncle, who was moving to Berlin and who recommended Hoffmann, a *Referendar* (junior barrister) since 15 July 1798, for a similar position at the Berlin Kammergericht (Supreme Court). He enthusiastically attended Italian opera and the German Nationaltheater, made the acquaintance of B.A. Weber and took composition lessons from J.F. Reichardt. His earliest extant composition dates from this period: the three-act Singspiel *Die Maske* (completed in March 1799), to his own text. If the performances he saw in the Berlin theatres stimulated his musical creativity, his visits to art galleries decisively subdued his zeal as a painter. After passing his final law examination with distinction, he was appointed *Assessor* (assistant judge) at the high court in Posen (now Poznań) on 27 March 1800. There he wrote the *Kantate zur Feier des neuen Jahrhunderts*, the first of his compositions to be performed in public (New Year's Eve, 1800). His setting of Goethe's Singspiel *Scherz, List und Rache* also had its first performance in Posen; 18 years later Hoffmann still spoke warmly of this early work, whose score and parts had meanwhile been destroyed by fire.

Soon after breaking off his engagement to Sophie Doerffer, Hoffmann married Marianna Thekla Michaelina Rorer (1778–1859) on 26 July 1802. Earlier that year he had been appointed *Regierungsrat* (administrative adviser) and transferred to Płock in southern Prussia because of a well-founded suspicion that he had been drawing caricatures of authorities in the Posen garrison. His promising career was thus thwarted by an exile to provincial obscurity lasting until early 1804, during which time there could be no public performances of his music. He therefore attempted to have his compositions printed, and in May 1803 answered an advertisement by Nägeli, the publisher of the *Répertoire des clavecinistes*; under the pseudonym Giuseppo Dori he sent off a Fantasia in C minor, which met the publisher's explicit demands for 'a piano piece of large proportions, deviating from the usual sonata form and worked according to the rules of double counterpoint'. However, Nägeli rejected the piece, and a Piano Sonata in A♭ sent to Schott in Mainz likewise failed. Hoffmann even entered a literary competition organized by Kotzebue, but his comedy *Der Preis* (which took as its subject the competition itself) brought him no prize money, only the judges' commendation. A second approach to Nägeli in March 1804 with a piano sonata did not even meet with a reply, and his hope of financial independence through a legacy from his aunt Johanna Sophie Doerffer came to nothing. He did at least succeed in his constant efforts to get himself transferred from Płock, and in March 1804 he was sent to Warsaw.

In the Polish capital Hoffmann the musician had to make a completely fresh start; nevertheless, he found conditions so favourable to his musical ambitions that he could dispense with the income brought by his official position. After only a year he had an opera successfully staged (*Die lustigen Musikanten*, with text by Brentano; fig.2); he completed the D minor Mass begun in Płock, had a piano sonata published in a Polish music magazine and found, in the weekly concerts of the Ressource music society (of which he became vice-president), opportunities to try out new compositions on the public. He also conducted the society's orchestra (which was of a

sufficiently high standard to perform Beethoven's first two symphonies) and took part in its concerts as a pianist and singer. Moreover, it must have been for the Ressource concerts that he wrote his Symphony in E♭, his Quintet for harp, two violins, viola and cello and the lost Piano Quintet in D. When the dramatist Zacharias Werner commissioned him to write incidental music for his play *Das Kreuz an der Ostsee*, Hoffmann saw this as a welcome opportunity to gain a footing in the Berlin Nationaltheater, and he intended to solidify his anticipated reputation with a comic opera, *Die ungebetenen Gäste, oder Der Kanonikus von Mailand* (after Alexandre Duval). However, nothing came of all these plans: Werner's play was rejected as unperformable, and Hoffmann's Singspiel clashed with G.A. Schneider's setting of the same plot, which was already under consideration by the Berlin theatre.

After Napoleon entered Warsaw and disbanded the Prussian provincial government in 1806, Hoffmann continued to direct the music society's concerts, even though most of its members were Prussian officials who had left the city. The performances were gradually eclipsed by the concerts of Paer, who had come to Warsaw in the emperor's retinue, and Ressource soon gave up. Hoffmann, his circumstances now aggravated by material need and illness, occupied himself with preparing a new libretto from A.W. Schlegel's translation of Calderón's *La banda y la flor*.

At the beginning of June 1807, when former officials who refused to sign a declaration of submission and take an oath of allegiance were expelled from Warsaw, Hoffmann planned a move to Vienna bearing a recommendation from his colleague J.E. Hitzig. When he was not granted a pass he went to Berlin, arriving there only to learn that officials from the surrendered provinces of Prussia could not be given compensation for the loss of their positions. He advertised for the post of music director at any theatre, and was accepted by those of Lucerne and Bamberg. Having decided on the latter, he was commissioned to write a four-act opera, *Der Trank der Unsterblichkeit* (to a libretto by Count Julius von Soden), as a specimen of his work and was given the post with effect from 1 September 1808.

At last it seemed that Hoffmann was achieving his goal: not only was he free from a merely breadwinning profession, but he could also use his status as music director of a theatre to further his career as a composer. He had particular hopes for the Calderón opera completed in Berlin, which he finally called *Liebe und Eifersucht*. But circumstances again thwarted him; when he took up the new post he found another director in place of Count Soden who had appointed him. A few weeks later Hoffmann's contract as music director was cancelled, and it was only as a theatre composer that his association with the organization continued. In this capacity he wrote a large number of short commissioned compositions, including choruses and marches for plays, additional arias, and so on, nearly all of which have been lost. For two years he earned his living chiefly as a singing and piano teacher, since even the small salary due him as a theatre composer was constantly jeopardized by maladministration at the theatre. Once again he was forced to look for sources of income beyond the narrow confines in which he was working.

During the time he was without work in Berlin, Hoffmann had again made contact with Nägeli in Zürich, no longer under a pseudonym but (after his successes in Warsaw) using his own name. A firm agreement seems to have been reached, but despite an active correspondence from Bamberg lasting until November 1809 not a single work of his appeared under Nägeli's imprint. Early in 1809 he composed the *Miserere* in B♭ minor with orchestra for the Grand Duke Ferdinand, whose residence was in Würzburg, though this did not secure him an association with the court. He was more successful in his contact with Rochlitz, to whom he sent the story 'Ritter Gluck' on 12 January 1809, adding that he was prepared to send the *Allgemeine musikalische Zeitung* (*AMZ*) essays on music and reviews of musical works. Rochlitz published 'Ritter Gluck' in February, and dispatched the first works for review (including two symphonies by Friedrich Witt) at the beginning of March, inquiring in June whether Hoffmann would also review Beethoven's symphonies; the historic review of the Fifth Symphony appeared a year later, and Hoffmann remained a regular contributor to the *AMZ* until 1815.

In September 1809 Soden was compelled to resume the directorship of the Bamberg theatre, which had been ruined by bad management, and on 11 October his melodrama *Dirna*, with Hoffmann's music, was first staged (later it was presented in Donauwörth and Salzburg); no other significant dramatic composition of Hoffmann's was performed in Bamberg during his stay. His music for *Sabinus*, another melodrama by Soden, was left incomplete when the author again gave up his directorship of the theatre. Hearing of a vacancy for the position of conductor with Joseph Seconda's company based in Dresden and Leipzig, Hoffmann asked Rochlitz for a recommendation; but the request came too late – Friedrich Schneider had already been engaged. The wretched state of affairs at the Bamberg theatre briefly improved when Franz von Holbein took over the direction on 1 October 1810. Hoffmann had known Holbein since 1798 in Berlin, and he was immediately engaged as the new director's secretary, producer, scene-painter and stage designer, though not as conductor, and was also re-employed as a composer of incidental music. The melodrama *Saul*, which he had composed early in 1811 to a libretto by Seyfried, was performed that summer in Bamberg and in Würzburg as late as 1815, and he wrote the music for Holbein's heroic opera *Aurora* in 1811–12.

The mastering of unfulfilled passion remained Hoffmann's poetic mission to the end of his life; he himself hinted (diary, 27 April 1812) at the close connection between his hopeless love for his young pupil Julia Mark, the crucial experience of his Bamberg years, and the impetus of his literary production. The wine merchant, bookseller and librarian C.K. Kunz, with whom Hoffmann regularly associated, was anxious to set up as a publisher, and when, on 15 February 1813, he proposed that Hoffmann should write for him, Hoffmann accepted the offer, but delayed a binding agreement until 18 March, St Anselm's Day and Julia's 17th birthday. The first work published under that day's contract was the initial pair of volumes of *Fantasiestücke in Callots Manier* (Easter 1814), and included the 'essays' which had appeared in the *AMZ*: 'Ritter Gluck' (1809), 'Johannes Kreislers, des Kapellmeisters, musikalische Leiden' (1810), 'Gedanken über den hohen Wert der Musik' (1812) and 'Don Juan'

(1813), as well as a recasting of the main part of two *AMZ* Beethoven reviews under the title 'Beethovens Instrumentalmusik', which had already appeared in the *Zeitung für die elegante Welt* (1813) and 'Höchst zerstreute Gedanken' (1814), also reprinted from the same journal. All the earlier pieces included in the *Fantasiestücke* were inspired by music, and in those written especially for the two volumes (the foreword, *Jacques Callot*, the 'Kreisleriana' *Ombra adorata* and *Der vollkommene Maschinist*, *Nachricht von den neuesten Schicksalen des Hundes Berganza* and *Der Magnetiseur*) references to Julia are obvious.

Meanwhile Hoffmann continued to pursue his musical career. An invitation from Holbein in January 1813 proposed a move to the Würzburg theatre, but shortly afterwards Holbein resigned his directorship in Würzburg on account of politics and the plan was forgotten. In February Schneider resigned his position with Seconda (to become organist at the Leipzig Thomaskirche), and Rochlitz, remembering Hoffmann's request, recommended him to fill the vacancy with the Dresden-Leipzig company. Hoffmann left Bamberg to take up this new post on 21 April 1813. To his friends he reported that his new orchestra treated him with civility and a kind of submissiveness, which differed considerably from the foolish manners of the Bamberg musicians (letter to Speyer, 13 July 1813). As a composer he supplied Morlacchi's Italian court opera in Dresden with a duet for insertion into a work by the younger Guglielmi, *La scelta dello sposo*, but he was preoccupied with the opera *Undine*. He had come across Fouqué's short story in Bamberg in the summer of 1812, and had immediately seen in it an ideal subject for a Romantic opera; Hitzig, his former colleague and friend in Berlin, had managed to persuade Fouqué himself to prepare the libretto. Hoffmann set about composing the opera with great enthusiasm, but his work on it was constantly interrupted and it was not completed until August 1814. His financial situation compelled him to fulfil his literary obligations punctually, so that gradually his career as writer came to take priority over his career as composer. His own feelings are clear from a letter (20 July 1813) to his publisher with final instructions for the printing of the *Fantasiestücke*: 'I do not want to give my name, since that should only be known to the world by a successful musical composition'. He remained true to this principle – although *Trois canzonettes* were published in 1808 under Hoffmann's name, nearly all his writings which preceded the première of *Undine* appeared anonymously.

After falling out with the unmusical Seconda, Hoffmann was given notice on 26 February 1814; he was stunned by this dismissal, only four days after declining the offer of the music directorship in Königsberg. Although Rochlitz tried to assist him with further commissions for the *AMZ*, without a regular position he found his situation in Leipzig increasingly difficult. He produced some caricatures, pamphlets and even a musical portrayal of a battle, *Deutschlands Triumph im Siege bei Leipzig* (printed in Leipzig under a pseudonym), which used the war and its hardships for their subject. In July 1813 his old friend Hippel came to Leipzig and was able to offer him the prospect of rejoining the Prussian civil service. In his straitened circumstances Hoffmann had to seize this opportunity, though he tried his best to arrange for a subordinate post which would leave him time to pursue his musical activities; he was too brilliant a lawyer for the Prussian judiciary to contemplate this arrangement, and on 1 October 1814 he was appointed to the Kammergericht. In Berlin he vainly sought a job as theatre conductor, but was turned down in favour of the virtuoso cellist Bernhard Romberg, who was to be the conductor of *Undine*. Although Romberg's efforts were considered by many inadequate (including Hoffmann), the opera was a great success from its first performance on 3 August 1816 until, after the 14th performance, the theatre was burnt to the ground (fig.3).

Although *Undine* was never again staged during Hoffmann's lifetime (apart from an unsuccessful performance in Prague in 1821), he was soon busy with other plans. Helmina von Chezy had introduced him to Calderón's *El galan fantasma*; he was immediately enthusiastic about it and asked Carl Wilhelm Salice-Contessa to work out a libretto for him. This was to be a lighter companion-piece to *Undine*, surpassing it in effect wherever possible. On 24 June 1817 Hoffmann offered the proposed opera to the administrator of the Berlin Opera, who, though not uninterested, deferred a decision. Hoffmann was determined to compose the piece, though Salice-Contessa's work took longer than expected and was finished only in August 1818. He claimed to have composed the opera in his head before ever writing down a note; however, he delayed too long before committing his ideas to paper. The beginning of a fair copy entitled *Der Liebhaber nach dem Tode* was found in his *Nachlass*, but is now lost. During the last two years of his life he was overwhelmed with commissions for pocket-books and almanacs, and editors paid him princely sums for his stories. The literary projects closest to his heart – the second part of *Kater Murr* and *Schnellpfeffer* – were pushed into the background along with writing down the opera which was to have been his greatest musical work. For this Hitzig, his first biographer, reproached him bitterly, but Hoffmann, of course, could not have foreseen his early death.

2. Writings. Hoffmann's stature as a writer on music was recognized and duly respected throughout the 19th century; apart from his imaginative stories which so profoundly influenced Schumann and Wagner, his finest achievements were his reviews of Beethoven's works for the *AMZ*, which were widely read and contributed greatly to his contemporaries' understanding of the breakthrough contained in the composer's style. In his review of the Fifth Symphony (July 1810), he drew a distinction between the different forms assumed by Romantic talent, i.e. that which 'opens up the wondrous realm of the Infinite', in the music of the three masters of Viennese Classicism: Haydn conceived in Romantic terms the most human qualities of life; Mozart laid claim to the superhuman, the miraculous which inhabits man's spirit (*Don Giovanni* remained for Hoffmann 'the opera of all operas'); and Beethoven, setting in motion the machinery of awe, fear, horror and pain, awakened that infinite yearning which is the essence of Romanticism. This, for Hoffmann, explained why Beethoven's vocal music was not his most successful and also why his instrumental works could not satisfy the masses, who saw them as products of an imaginative but disorderly genius. His use of 'Romantic' as a term of value judgment has caused confusion, and he has been censured for attempting to classify Beethoven as a Romantic. However, Hoffmann was never aware of an

*3. Final scene of Act 3 of Hoffmann's 'Undine', Königliche Schauspiele, Berlin, 1816: design by Karl Friedrich Schinkel, gouache (Schinkelmuseum, Berlin)*

antithesis between the Classical and Romantic eras; for him, Classical and Romantic were two conceptual terms denoting respectively the paradigmatic aspect of a great work of art and the unrepeatable nature of genius. Only a detailed investigation into the structure of a work will reveal that the creative artist has not simply passed on momentary inspirations, but has 'detached himself from the inner realm of notes and imposed his rule on them as an absolute master'. Beethoven himself noted Hoffmann's perception in a letter of thanks (23 March 1820).

Hoffmann's reviews for the *AMZ*, which continued until 1815, mark the end of the old-fashioned doctrine of the Affections in music aesthetics. Coolly and methodically he distinguished between analysis of compositional technique and interpretation of the musical content. In the thorough background he provided in the introductions to his more important reviews and in his essay 'Alte und neue Kirchenmusik' (*AMZ*, 1814) he anticipated Kiesewetter's interest in the historical and his interpretation of historical data according to a particular view of the past. After 1815 he reviewed only performances for the Berlin newspapers; in this he was well served by his extensive practical experience as a conductor and a practising musician.

3. Music. In his review of Hoffmann's most important composition, the opera *Undine*, Weber (*AMZ*, 19 March 1817) praised the swift pace and forward-pressing dramatic action and had kind words for Hoffmann's restraint in avoiding excessive and inapt melodic decoration (though he criticized the tendency towards abrupt endings, which he thought partly spoilt the effectiveness of individual numbers). Unfortunately, circumstances militated against a revival of the opera. Soon after Hoffmann's death a rumour spread that not only the costumes and sets, but also the score and parts had been destroyed in the fire that disrupted the Berlin production. Throughout the 19th century all his music passed gradually into oblivion, but it again aroused interest at the turn of the century when his writings were attracting the attention of literary historians. Ellinger (1894), studying the Berlin autographs, regarded Hoffmann as basing his music entirely on Mozart and Gluck (the two masters who, besides Beethoven, he acclaimed most often in his writings), and tirelessly hunted out Mozart reminiscences in every work. Pfitzner's vocal score of *Undine* (1906) first brought a major work of Hoffmann's to public notice, but admirers of the fantastic tales expecting his music to be in a Berliozian style were disappointed. Schiedermair (1907) considered the work as a Singspiel containing arias, romances and choruses in addition to songs, and thus as partaking of the formal variety which marked Italian and French opera of its time. The demonic world was represented by the dramatic means peculiar to the late Neapolitan operatic style; the nobility and seriousness of tone, the striking choral effects and the musical depiction of nature derived from Gluck; the characterization and the depth of feeling in the music owed something to Mozart; the orchestral prominence and harmonic peculiarities were related to Beethoven; and finally certain instrumental effects came, via Spontini, from Mayr. However, Schiedermair emphasized individual features of style in which Hoffmann departed from his models and already evinced some of the characteristic traits of German Romantic opera, while the patriotic German literature on Weber and Wagner, trying to define a distinctive national style, advanced the idea of a consistent historical development from Hoffmann, Weber and Spohr, by way of Marschner, to Wagner.

Indeed, from a formal standpoint it is only a short step from the number operas *Undine* and *Aurora* to *Euryanthe* and *Lohengrin*, though Hoffmann's two serious operas deserve consideration as more than precursors. In them

he went beyond merely transferring the forms of *opera buffa* to German Singspiel, partly by giving greater scope to the ensembles and a more prominent role to the chorus. Even the lighter operas, such as *Die Maske*, *Die lustigen Musikanten*, with its deftly handled mixture of *commedia dell'arte* humour, intimate lyricism and almost masonic solemnity, and *Liebe und Eifersucht*, ought not simply to be viewed as the rearguard of Mozartian *opera buffa*, but also as ranking among the few significant German contributions to the genre. Hoffmann's six surviving operas show his sure theatrical instincts, with dramatic climaxes always accompanied by musical ones and the musical progression carefully timed to the stage action.

Only three of Hoffmann's sacred compositions are extant. The Mass in D minor (1803–5) is a serious attempt to combine strict polyphonic style with modern orchestration, avoiding the 'ostentatious frivolity' he condemned in Viennese Classicism. The *Miserere* (1809) reveals even greater contrapuntal facility and a more individual expression in the lyrical passages. The *Canzoni* are six polished miniatures, anticipating the ideals of Cecilianism, though displaying more Romantic than ideological zeal.

Becking, in the forewords to his three volumes of a collected edition (1922–7), wrote that when Hoffmann called the works of Bach or Mozart 'Romantic', he was judging their quality, for he saw music as the most Romantic of the arts, and only good music – that which transcends the everyday – is Romantic. Becking saw Hoffmann as an imitator of Mozart and came to the undemonstrable conclusion that Hoffmann had found that imitation sufficient to reaffirm Mozart's supposed Romanticism. In his view of Hoffmann's piano sonatas Becking disregarded chronology and depicted an immature composer who instinctively sought to master strict counterpoint, a 'mysterious tissue behind which lies hidden a world of fantasy', and whose initial genius was gradually stifled by his growing technical facility. But in March 1808, when he made the fair copy of the Piano Sonata in F minor, Hoffmann had already completed five Singspiele, his incidental music for *Das Kreuz an der Ostsee* and drafts of the Warsaw works, and his facility for composing in free style had long been fully developed. It was no mystical espousal of a mysterious, fantastic world, nor even an uneasiness about the formal prototype of the Classical sonata that induced Hoffmann to come to grips with double counterpoint, but primarily the demands of his publisher Nägeli. Hoffmann did not consider that this hybrid of contrapuntal and homophonic writing was in any sense marking a precedent; he specifically described the sonatas as being composed in 'the older style', and it is a mistake to regard them as characteristic works.

Hoffmann's other instrumental music conforms superficially to Classical sonata procedures. In the Symphony in E♭ (1805–6) his individuality is most apparent in the irregularly structured themes and in the lyrical flair of the slow movement. As Keil (1986) has argued, Hoffmann's sonata-form movements are dominated by the idea of unity in diversity rather than by the opposition of strongly contrasting elements found in the works of Beethoven. In the first movement of the Harp Quintet (composed before October 1807), for example, the second theme is a variation in major of the first theme. Another kind of monothematicism occurs in the opening movement of the Piano Trio (1809), whose second subject is barely distinguishable from the continual developing of the first theme from which new material is created by the fragmentation and reinterpretation of motifs. The second theme itself then undergoes the same process, in which the 'development section' is merely a continuation after a formal caesura. The build-up to the recapitulation is absent, and even the return is camouflaged with a transition into the second theme. The climax of the movement is the combination of both themes, emphasized by occurring in a remote key rather than by dynamics. Although Hoffmann could write melodies of seductive beauty (e.g. 'Abendlüftchen schweben', no.7 of *Undine*), his strength lay more in the ability to vary and develop material than in the initial inspiration. As Jean Giraud remarked: 'Is the predominance of combinatory art not a common trait of his musical and literary creations?'.

WORKS SET TO MUSIC

*composers' names in parentheses*

*Fantasiestücke in Callots Manier* (1814–15): Kreisleriana (Schumann), pf, op.16, 1838; I capricci di Callot (Malipiero), op, Rome, 1942

*Der goldne Topf*: inc. op (W. Braunfels), op.6, *c*1905; opera (W. Petersen), Darmstadt, 1941; Anselmus diák [The scholar Anselmus] (G. Kósa), op, Budapest, 1945

*Die Abenteuer der Sylvester-Nacht: die Geschichte vom verlornen Spiegelbilde*: Act 2 of Les contes d'Hoffmann (Offenbach), op, Paris, 1881

*Die Elixiere des Teufels* (1815–16): op (G. Rodwell), London, 1829

*Nachtstücke* (1816–17)

*Der Sandmann*: La poupée de Nuremberg (Adam), operetta, Paris, 1852; Coppélia (Delibes), ballet, Paris, 1870; Act 1 of Les contes d'Hoffmann (Offenbach), op, Paris, 1881; La poupée (E. Audran), operetta, Paris, 1896

*Das Majorat*: Die eiserne Pforte (J. Weigl), op, Vienna, 1823

*Klein Zaches genannt Zinnober* (1819): pf piece (Busoni), op.12 no.2 [Racconti fantastici], 1878; Zinnober (S. von Hausegger), op, Munich, 1898

*Die Serapions-Brüder* (1819–21)

*Die Bergwerke zu Falun*: planned op (Schumann), 1831; lib arr. Wagner for J. Dessauer, 1842 [not set]; Der Haideschacht (F. von Holstein), op, Dresden, 1868

*Nussknacker und Mausekönig*: pf duet (Reinecke), op.46, 1870; The Nutcracker (Tchaikovsky), ballet, St Petersburg, 1892

*Rath Krespel*: Act 3 of Les contes d'Hoffmann (Offenbach), op, Paris, 1881; Le violon de Crémone (J. Cadaux), op, unperf.

*Doge und Dogaressa*: planned op (Schumann), 1840

*Meister Martin der Küfner und seine Gesellen*: Le tonnelier de Nuremberg (Bizet), planned op, 1859; op (W. Weissheimer), 1879; Maître Martin (J. Blockx), op, 1892; op (L. Lacombe), 1897

*Das Fräulein von Scuderi*: Der Goldschmid von Toledo (J. Stern, A. Zamara, arr. of Offenbach), operetta-pastiche, Mannheim, 1919; Cardillac (Hindemith), op, Dresden, 1926

*Die Brautwahl*: op (Busoni), Hamburg, 1912

*Die Königsbraut*: Le roi Carotte (Offenbach), operetta, Paris, 1872

*Prinzessin Brambilla* (1821): op (W. Braunfels), Stuttgart, 1909

[source unknown]: Illusions, ou L'histoire d'un miracle (T. Harsányi), op, Paris, 1949

Works inspired by Hoffmann: Ein Nachtstück in E.T.A. Hoffmanns Manier (T. Rangström), str qt, 1909; Kleine Suite dem Andenken E.T.A. Hoffmanns (B. Sekles), orch, op.21 (Leipzig, *c*1910)

MUSICAL WORKS

Editions: *E.T.A. Hoffmann: Musikalische Werke*, ed. G. Becking (Leipzig, 1922–7) [B]

*E.T.A. Hoffmann: Ausgewählte musikalische Werke*, ed. G. von Dadelsen and others (Mainz, 1971–) [D]

GERHARD ALLROGGEN

**Hoffmann** [Hofmann], **Eucharius** (*b* Heldburg; *d* Stralsund, 10 May 1588). German composer and theorist. In the foreword to his *Musicae practicae praecepta* (1572) he stated that he had been Kantor at Stralsund for eight years; Johannes Crusius, who added an introduction to the treatise, mentioned that Hoffmann had been teaching music for 12 years. According to the title-pages of his printed works Hoffmann was Kantor at Stralsund until 1580 and deputy headmaster from 1582. On 28 April 1588, shortly before his death, he was appointed deacon at the Marienkirche, Stralsund.

Hoffmann's works were intended for school and church choirs, although he stated in the title of the *Geistliche Lieder* that they could easily be sung by 'lay people in church and elsewhere'. The *24 cantiones* are illustrations for teaching modal theory of the type set out by Glarean. In the *Cantica sacra* and in most pieces in the *Geistliche Lieder* the tenor part still carries the melody. The foreword to the *Geistliche Lieder* suggests a number of alternatives to performance in four parts: they may be sung 'by three voices without the alto, by three equal voices with the melody in the middle voice, by five voices as in a villanella, so that, disregarding the *regulas musicae poeticae*, the tenor sings an octave higher, as the second melodic part, or by six voices with the melody an octave lower, as a second tenor part'. Hoffmann marked these pieces 'Auff Villanellen art', by which he evidently referred to the manner of performance, since Engel has shown that at most only three of the 25 numbers are composed in the villanella style. In the *Vyff geistlike olde Ostergesenge* not only the title and the dedication but also the texts of two of the motets are in Low German dialect.

Hoffmann's treatises on music theory must have been more widely known than his compositions. The *Musicae practicae praecepta* is based on Sebald Heyden's textbook and on Heinrich Faber's *Introductio*. Like Heyden, Hoffmann introduced complete motets and mass movements by Josquin, Obrecht, Alexander Agricola and others as examples of the mensural theory that occupies more than half the treatise. The youngest composer on whom he drew was Senfl, the most frequently quoted is Josquin; this is one of the last textbooks to place Josquin in the first rank of composers. In this work, E♭ and A♭ are introduced as *ficta* accidentals in the context of the transposition of the Dorian mode into F and C. While the eight ecclesiastical modes are discussed in the *Musicae practicae praecepta*, the *Doctrina de tonis* is based on Glarean's modal teaching. It is one of the few sources that refer to *musica reservata*; Hoffmann maintained that few of the chromatic procedures coming back into fashion in vocal music may be described as *musica reservata*, 'since [*reservata*] is almost entirely reserved for certain musical instruments and has not been accepted or practised in singing'.

WORKS

Edition: *Musik in Pommern*, iv (1935), music suppl., ed. H. Engel [E]

SACRED VOCAL

24 cantiones, ad 12 tonos, 4–6vv (Wittenberg, 1577)

MARTIN RUHNKE/EGBERT HILLER, KLAUS WOLFGANG NIEMÖLLER

**Hoffmann, Gerhard** (*b* Rastenberg, Thuringia, 11 Nov 1690; *d* Rastenberg, *c*1756). German composer and wind player. According to Gerber, Hoffmann was a man outstanding in both arts and sciences. At Jena he studied mathematics and architecture, and in 1719, as architect or surveyor, he entered the service of the Duke of Weimar. Under instruction from the Weimar Kapellmeister J.W. Drese, Hoffmann then studied musical theory and later turned to the composition of cantatas and other church music, of which he left a considerable amount (presumably unpublished). As a player Hoffmann was irked by the defects of contemporary wind instruments; he is reputed to have made improvements to both the flute and the oboe. Some manuscript notes added by Walther to the first edition of his *Lexicon* refer to this work. These, however, are somewhat ambiguous and hardly justify the assumption of some scholars that Hoffmann added *g♯″* and *b♭″* keys to the oboe in about 1727. No instruments so equipped of so early a date are known. In addition Hoffmann is said to have invented a device whereby all four strings of the violin could be adjusted simultaneously to accord with the different pitch standards then in use (*Cammerton, Chorton, Cornet-Ton*, etc.) and to have experimented with different scale temperaments. In 1736 Hoffmann was elected Bürgermeister of his native town.

PHILIP BATE

**Hoffmann, Johann** (*b* Lauda, 20 April 1661; *d* Würzburg, 12 Aug 1725). German organ builder. He went to Würzburg in 1690, becoming a freeman and 'court organ maker' in 1697 and 'cathedral organ maker' in 1707. His art was based on that of his probable teacher, Johann Jost Schleich (*c*1645–1707), who introduced into Franconia the richness of the foundation stops of south-east central European organs, thereby providing the basis for the Franconian high-Baroque organ. Hoffmann's instruments were the prime examples of this tradition, along with those of such masters as J.J. Dahm, J.S. Will and J.P. Seuffert, his most important pupils. Their organs contained a large, complete diapason chorus in the *Hauptwerk*, whereas those of the *Positiv* and Pedal were quite often incomplete. There were a number of foundation flue stops in the *Hauptwerk* and *Positiv*, but few reeds and wide-scale mutation stops; the Pedal organ had only a few stops.

Hoffmann's biggest organ was built for St Stephan, Mainz (2 manuals, 23 stops; not preserved). Other instruments survive in Geusfeld, near Hassfurt (originally in Unterzell near Würzburg), Büchold, near Arnstein (originally in Kitzingen am Main), Goldbach near Aschaffenburg (originally in Allersheim, near Ochsenfürst) and Frankenthal (Pfalz). The cases are preserved of the organs at the abbey church of Gross-Comburg, near Schwäbisch Hall; the Carmelite church, Würzburg (now in St Nikolaus, Arnstein); Premonstratensien church at Oberzell, Zell am Main; Fulda Cathedral (choir organ); Neustadt (am Main) Abbey (now in the parish church, Amorbach); and Theres Abbey, near Hassfurt (now in Treysa).

HANS KLOTZ/HERMANN FISCHER

**Hoffmann** [Hofman], **Max** (*b* Gnesen [now Gniezno, Poland], 8 Dec 1873; *d* Hollywood, CA, 21 May 1963). American ragtime composer and arranger. He went to the USA in 1875 and was a violinist in an orchestra in Minneapolis at the age of 15. Shortly afterwards he published works that synthesized or collected ragtime themes: *A Rag Medley* (1897) and *Ragtime Rags* (1898). He also wrote ragtime-based popular music, such as *Yankee Land* (1904). He worked subsequently as an arranger and conductor in vaudeville and as a composer of musical scores for Broadway, including *A Parisian Model* (1906), *The Young Turk* (1910) and songs for the Rogers Brothers' burlesques. He also directed ballets featuring his wife, Gertrude Hoffmann.

Hoffmann was an early arranger and notator of ragtime. Beginning in 1896 he made syncopated arrangements of popular coon songs, which led to his larger medley arrangements. In effect, his work became a model of scoring for the nascent piano ragtime industry, and his productions helped popularize the work of such ragtime pioneers as Ernest Hogan and Ben R. Harney. Hoffmann and other transcribers and arrangers paved the way for wide popular interest in piano ragtime as a scored music and contributed to the immense popularity of the major ragtime composers Scott Joplin, Tom Turpin, James Scott and Joseph Lamb.

WILLIAM J. SCHAFER

**Hoffmann, Melchior** (*b* Bärenstein, nr Dresden, *c*1679; *d* Leipzig, 6 Oct 1715). German composer and organist. As a choirboy in the Dresden Hofkapelle, Hoffmann received his musical training from Johann Christoph Schmidt (i). He went to Leipzig in autumn 1702 and enrolled at the university to study law. He also joined the student collegium musicum founded by Telemann. When Telemann left Leipzig in June 1705, Hoffmann succeeded him as organist and music director of the Neukirche, and took over as director of Telemann's collegium musicum. He was also conductor of the Leipzig civic opera, which had been in existence since 1693 and for which he wrote a number of works. In 1709 he met the violin virtuoso Johann Georg Pisendel, who became leader of the orchestra of Hoffmann's collegium. At this time the ensemble consisted of 50 to 60 musicians and had won fame and recognition beyond the Leipzig area.

Hoffmann seems to have visited England between 1709 and 1710, but no details are known. There is no definite evidence of a visit to Italy in 1714 either, and it is unlikely that he went there. In 1713 he applied, along with J.S. Bach and three other candidates, to succeed F.W. Zachow

as organist at the Liebfrauenkirche in Halle. When Bach eventually declined the appointment on 19 March 1714 the Halle consistory offered it to Hoffmann, but although he officially accepted the post he never took up his duties in Halle, and in fact resigned on 23 July. On 9 September 1714 he married Margaretha Elisabeth Philipp and in the same month became one of the few Leipzig musicians of the time to be granted citizenship. He had been suffering from a serious illness since 1713 and died on the evening of 6 October 1715, aged only 36. He was buried in the Johannisfriedhof in Leipzig on 10 October; all the pupils of the Thomasschule attended the funeral.

Hoffmann died a prosperous citizen, regarded by his contemporaries as an important composer and a sensitive musician. The Leipzig chronicler Christoph Ernst Sicul described him in an obituary as 'a famous composer', whose collegium musicum had produced many fine musicians holding prominent positions as organists or in the Kapellen of major German courts. Gottfried Heinrich Stölzel, a member of Hoffmann's collegium from 1707 to 1710, and the Darmstadt court poet Georg Christian Lehms also paid tribute to Hoffmann's great importance in their writings, and Charles Burney regarded him as one of the finest composers of the first half of the 18th century. In spite of his early death Hoffmann left a quite extensive body of work, although only a fraction of it has survived. Very little from his secular output, and in particular from his operas, is extant, and his music only began to attract attention from musicologists when three works previously attributed to Bach (BWV53, 189 and Anh.21) were recognized as being by Hoffmann (or, in the case of BWV53, probably by him). In older studies Hoffmann has often been confused with the Breslau composer Johann Georg Hoffmann.

Melchior Hoffmann's music shows a feeling for unusual and effective orchestration. His cantata and opera arias are notable for their pleasant, attractive and accessible melodies, sometimes with a strong emotional emphasis, as in the cantata *Meine Seele rühmt und preist*. His later compositions show Italian influence.

WORKS

SACRED VOCAL

ANDREAS GLÖCKNER

**Hoffmann, Richard** (*b* Vienna, 20 April 1925). American composer of Austrian birth. Trained from childhood on the violin and in music theory, his first performance as a composer occurred on Austrian Radio as early as 1935. In the same year his family emigrated to New Zealand. He subsequently attended Auckland University College (1942–5), where he studied the organ. In 1947 he moved to the USA to study composition with Schoenberg, whose assistant he became in 1948; he completed the PhD in musicology at UCLA in 1951. He has taught at UCLA, becoming lecturer in music after Schoenberg's death, and was Assistant Professor of Theory and Composition at Oberlin College (from 1956). From 1965 he gave lectures and courses throughout the USA and in Mödling, near Vienna (from 1980), where he has conducted courses in Schoenbergian analysis. He served as an editor for a complete edition of Schoenberg's works (Mainz and Vienna, 1970). As a composer, Hoffmann quickly came under Schoenberg's influence. His later compositions show a debt to serialism, but also include aleatory features. The bulk of his output, however, including his electronic music, is based on the concept of music as 'tonsprache'. During the early 1970s he wrote conceptual pieces influenced by the Fluxus movement. After 1980 he composed a series of works dedicated to the memory of the dead, or reflecting (in a non-restaurative sense) endangered traditions. (See *LZMÖ*.)

REINHARD KAPP

**Hoffmann-Erbrecht, Lothar** (*b* Strehlen, 2 March 1925). German musicologist. After war service (1943–5) he qualified at the Hochschule für Musik, Weimar (1946–9), studied musicology with Besseler, and German and philosophy at the University of Jena, taking the doctorate there in 1951 with a dissertation on German and Italian keyboard music at the time of Bach. He worked at the university's musicology institute as a research assistant (1952–6) before taking up a similar post at Frankfurt University, where he completed the *Habilitation* in 1961 with a work on Thomas Stoltzer and later became supernumerary professor (1968) and professor (1969). Concurrently he taught at the Darmstadt Technical College (from 1961) and the Frankfurt Musikhochschule (from 1969). He retired in 1990. His main interests have been early 16th-century German music, 18th-century music, Russian music of the 19th century and early 20th and the music history of Silesia; as an editor he was responsible for two series of German 18th-century music, the Mitteldeutscher Musikarchiv and Organum, and (in collaboration with Claudio Arrau) an edition of Beethoven's piano sonatas.

KONRAD KÜSTER

**Hoffmann von Fallersleben, August Heinrich** (*b* Fallersleben, nr Brunswick, 2 April 1798; *d* Schloss Corvey, nr Höxter, 29 Jan 1874). German philologist, poet and composer. He studied at the Gymnasium in Helmstedt and later in Brunswick and Göttingen (1816), and in 1819 matriculated at Bonn. Having formed a friendship with the Grimm brothers, he made important studies in German folksong near Bonn and in Dutch literature in Holland. In Breslau he became librarian (1823) and professor (1830), but was dismissed on political grounds in 1843 and banished from Prussia until 1848. After various wanderings and holding several posts, including a period in Weimar when he became a friend of Liszt, he was appointed librarian to Prince Lippe in Corvey (1860).

As a poet and philologist, Hoffmann had a significant impact on the musical life and scholarship of his day. His *Geschichte des deutschen Kirchenliedes bis auf Luthers Zeit* (Breslau, 1832, 3/1861) is systematically written and contains important discoveries. A pioneering editor and collector of folksong, he preserved disappearing traditions and recovered forgotten repertories. For example, he edited a standard collection, *Schlesische Volkslieder mit Melodien* (with E. Richter; Leipzig, 1842), as well as *Die deutschen Gesellschaftslieder des 16. und 17. Jahrhunderts* (Leipzig, 1844). His original melodies, and above all his poems for children (*Fünfzig Kinderlieder*; Leipzig, 1843), were widely and deservedly popular; his poems were set by Brahms, Cornelius, Franz, Liszt, Loewe, Mendelssohn, Schumann and Wolf. He is, however, probably most widely known as the author of *Das Lied der Deutschen* ('Deutschland, Deutschland über Alles'), written on 26 August 1841 and authorized as Germany's national anthem on 11 August 1922 to Haydn's tune for the Emperor's Hymn. Although the words were discarded after World War II for their aggressive associations, it has been suggested by Thomas Mann in *Die Entstehung des Doktor Faustus* that Hoffmann's intention was to encourage Germans, in a time of disunity, to give their country

priority in their thoughts. The main collection of his papers is in the Berlin Staatsbibliothek.

JOHN WARRACK

**Hoffmeister, Franz Anton** (*b* Rothenburg am Neckar, 12 May 1754; *d* Vienna, 9 Feb 1812). Austrian music publisher and composer. He went to Vienna in 1768 to study law, but after qualifying, devoted his time to music, especially publishing and composing. As early as 1783, when Viennese music publishing was still in its infancy, he began to publish two series of symphonies in Lyons (printed by Guéra), and some quartets and duets for flute. On 24 January 1784 he announced in the *Wiener Zeitung* that he planned to publish all his musical works at his own expense and under his own supervision from Rudolf Gräffer's bookshop (see illustration). But in a large advertisement on 6 August 1785 he no longer mentioned

*Title-page of Hoffmeister's 'Six Quatuors Concertantes' op.11 (Vienna, c1784), published and sold by the composer from Gräffer's bookshop*

Gräffer, having established a firm in his own name at his home. This advertisement gives a list of works which had already appeared as well as a new publishing programme of three different series, including orchestral and chamber music by Haydn, Mozart, Vanhal, Albrechtsberger, Pleyel, Miča, Ordonez and other foreign composers, besides Hoffmeister's own works. Although he did not maintain his announced schedules, the business evidently flourished. Hoffmeister had connections with the Speyer publisher Bossler, whose firm acted as a kind of agent for Hoffmeister. Hence a series of announcements and some detailed reviews of works published by the Hoffmeister firm appeared in Bossler's *Musikalische Realzeitung* (later *Musikalische Korrespondenz*), particularly in 1789–91.

On 16 March 1791 Hoffmeister announced a branch in Linz, but this was publicly auctioned on 14 August 1793 and early in 1794 passed to the Vienna bookseller Johann Georg Binz (1748–1824). For a short time Hoffmeister had a connection with the firm J. Amon in Heilbronn, and they published various pieces jointly (1791–3). From January 1791, when the firm's most productive period was over, detailed advertisements began to appear in the *Wiener Zeitung* again. Hoffmeister's expenditure of energy as a composer seems to have forced the affairs of the firm into the background, and as a businessman he was something of a dilettante. For example, when the firm began to decline he sold many of its publications to the rival firm of Artaria, while continuing to publish other items under his own name. These transfers of individual works and large groups of works continued briskly from 1788. There was sometimes a further complication of the procedure, in that within individual works some parts were engraved by Hoffmeister and the rest by Artaria, Hoffmeister having transferred the publishing rights in the middle of production.

Hoffmeister apparently established a loose business connection with the bookseller J.G. Binz, who frequently advertised works published by Hoffmeister in the *Wiener Zeitung*. The management of the firm was also complicated by an association with the Leipzig printer, Christian Gottlob Täubel, who moved his business to Vienna, reputedly at Hoffmeister's instigation, and set up his music printing press (type-printing) in the suburb of Josefstadt by imperial decree on 5 September 1791. Despite his declared bankruptcy in 1792 Täubel evidently continued to work as a music printer, commissioned by the Musikalisch-typographische Verlagsgesellschaft until 1802. Whether he was Hoffmeister's investing partner or administrator until 1806 remains unclear; Hoffmeister's previous administrator, J.M. Auerhamer, died on 5 October 1793. After 1810 Täubel apparently ceased all business in Vienna. His publications of the 1790s include several theoretical works (by Petri, Türk, Wolf and others), a six-volume *Allgemeine Bibliothek für das Klavier und die Singekunst*, keyboard pieces by C.P.E. Bach and songs by Michael Haydn.

In the *Nachricht an die Musikliebhaber* of 23 February 1791 Hoffmeister announced a new subscription for symphonies, along with a large expansion of his business through the employment of new staff and the use of new presses and freshly cut type. But the first instalment, promised for 1 July 1791, was not ready until 1793, and the advertised clearer print on the best quality Venetian paper apparently failed to halt the general decline in business. By April 1793 the firm had reached the

publication number 293, but in the next ten years it added only 30 items and lacked a coherent programme; for example, in 1798 and 1799 three almanacs appeared, the bookseller Johann Baptist Schulmeister advertised works formerly published by the firm at reduced prices in 1797 and 1798, and at this time Hoffmeister began a new series of plate numbers at no.1. However, this period also marks the beginning of the firm's negotiations with Beethoven, whose Sonata op.13 and Six Variations on 'Tändeln und Scherzen' appeared in a first edition on 18 December 1799, but were soon transferred to Joseph Eder. An advertisement in the *Wiener Zeitung* (11 January 1800) mentions six minuets for two violins and bass by Beethoven (WoO9) and dances by Carl van Beethoven, all evidently lost. This unsettled policy was accompanied by frequent changes of address.

About the turn of the century Hoffmeister planned a concert tour to Prague and London with the flautist Franz Thurner, but in Leipzig he met Ambrosius Kühnel and they founded the Bureau de Musique, which eventually became the basis of the publishing firm C.F. Peters. From 1801 to 1805 the firm led a kind of double life: the business in Vienna continued uninterrupted and published under its own initiative, albeit in a limited capacity; concurrently many Viennese publications started appearing in Leipzig, with altered plate numbers, and several new publications appeared in both towns simultaneously. It is not certain who looked after Hoffmeister's office during his absences from Vienna; his wife, who may initially have worked in the business, later followed him to Leipzig. In March 1805 he resumed business in Vienna and from 6 March left Kühnel in sole charge of the Leipzig firm. Hoffmeister's last publication appeared in 1806, after which he withdrew from business and devoted himself to composition. He arranged a life annuity with Kühnel and made over his rights of publication for his remaining works to the Chemische Druckerey (founded by Senefelder in Vienna); in many cases Hoffmeister's publication numbers were retained as both firms had reached about the same number at this time.

Hoffmeister's firm in Vienna, although unresponsive to commercial opportunities, was conscientious in its choice of composers; the catalogue includes Albrechtsberger, Clementi, E.A. Förster, Mederitsch, Pleyel, Süssmayr, Vanhal and Paul Wranitzky. Beethoven, Haydn and particularly Mozart (Hoffmeister's personal friend) are all represented (Mozart by several first editions between K478 and 577, including the 'Hoffmeister' Quartet K499). Hoffmeister's connection with Kühnel, who had more flair for business, renewed his interest in publishing and prompted serious attempts to produce complete editions of the works of Bach, Haydn and Mozart.

As a composer, Hoffmeister was extraordinarily prolific. Many of his Viennese works were also popular in foreign cities: by 1803 his most successful opera, *Der Königssohn aus Ithaka* (Vienna, 1795), had been performed in Budapest, Hamburg, Prague, Temesvár (now Timişoara), Warsaw and Weimar; his numerous chamber works were published in Amsterdam, London, Paris and Venice, as well as throughout German-speaking regions. Although his symphonies were admired for their flowing melodies (Schubart) and his pedagogical works for being both pleasant and instructive (Gerber), his style is generally lacking in originality and depth.

WORKS

VOCAL

Stage (all first perf. in Vienna): Der Alchimist, *c*1790; Die bezauberte Jagd, *c*1790; Der Schiffbruch, *c*1792; Der Haushahn, *c*1795; Der Königssohn aus Ithaka (op, 2, E. Schikaneder), Wieden, 27 June 1795, *A-Wgm*, *D-Bsb*, *DS*, vs (Brunswick, n.d.); addns to Gluck: Cythère assiégée, in Ger. as Die Belagerung von Cythere, Wieden, 19 Jan 1796; Rosalinde, oder Die Macht der Feen (magic op, 3, S. Mayer), 23 April 1796, vs (Brunswick, n.d.); Der erste Kuss (M. Stegmayer), 7 Feb 1797, ov., arr. 2 vn, va, b (Vienna, n.d.); Liebe macht kurzen Process, oder Die Heyrath auf gewisse Art (Spl, 3, J. Perinet), 1801, collab. F.X. Süssmayr, J. Wöffl, vs (Brunswick, n.d.); Elysium (prol)

ALEXANDER WEINMANN

**Hoffnung, Gerard** (*b* Berlin, 22 March 1925; *d* London, 28 Sept 1959). British artist, illustrator, musician and humorist. Of German birth and Jewish parentage, he was a refugee from Nazi Germany. Educated at Hornsey and Harrow Schools of art, he taught art briefly before devoting himself to a career as a freelance cartoonist. He was a contributor to *Lilliput*, *Tatler* and *Punch* magazines, among other publications. His early drawings suggest an influence of the German illustrators Wihelm Busch (especially his musical cartoons) and Walter Trier. In particular they feature musicians and their instruments, transfigured by Hoffnung's distinctive imagination, high spirits and sense of fun (see illustration). His paintings to Ravel's opera *L'enfant et les sortilèges*, for which the librettist Colette wrote a special text, were exhibited at the Festival of Britain (1951) and subsequently published. A series of books of musical cartoons appeared almost yearly until Hoffnung's death, since when five further collections have been published. In the mid-1960s, Halas & Batchelor produced seven animated cartoon films based on these drawings.

Largely self-taught in music, Hoffnung played the tuba in amateur orchestras, in particular the Morley College Orchestra, who accompanied him in 1958 at the Royal Festival Hall in a performance of Vaughan Williams's concerto for bass tuba. In 1956 he presented and participated in the first two highly successful 'Hoffnung Music Festivals' at the Royal Festival Hall, involving distinguished composers, conductors, soloists and artists.

*Caricature of an oboist from Hoffnung's 'The Hoffnung Symphony Orchestra' (London, 1955)*

These concerts were repeated in London and Edinburgh after his death and continue to be produced in major cities throughout the world. Exhibitions of his drawings have also travelled extensively. He was a gifted raconteur and established himself as a broadcaster on radio and television.

FRITZ SPIEGL

**Hoffstetter, Johann Urban Alois** (*b* Laudenbach, nr Bad Mergentheim, 1735/36; *d* Ellingen, 26 Jan 1810). German composer, probably the brother of ROMAN HOFFSTETTER. From 1770 he was active in Ellingen as an officer of the Franconian province of the Teutonic Order, and it was there that he composed. Seven symphonies survive (of the nine listed in Unverricht's thematic catalogue nos.1 and 7 are identical, and no.8 appears to be the work of Vanhal) and 12 songs with piano accompaniment, published in Augsburg in 1789. In addition, six further symphonies and a pastorale bearing only the surname are probably attributable to Johann Hoffstetter rather than his brother.

HUBERT UNVERRICHT

**Hoffstetter, Roman** (*b* Laudenbach, nr Bad Mergentheim, 4 April 1742; *d* Miltenberg, 21 June 1815). German composer, probably the brother of JOHANN URBAN ALOIS HOFFSTETTER. He entered the nearby Benedictine monastery of Amorbach (now in Bavaria), which then belonged to the electoral archbishopric of Mainz; taking his vows on 5 June 1763, he was ordained priest on 10 September 1766. In his monastery he held the office of *regens chori*, and for a few years was also prior. After the dissolution of the monastery in 1803 he moved with his abbot to the neighbouring town of Miltenberg.

Hoffstetter came into prominence through Alan Tyson's discovery that he was probably the composer of the set of six string quartets op.3 (including the famous F major 'Serenade' in no.5) hitherto attributed to Haydn. Further researches by Finscher, Unverricht and Tyson have established his authorship for the first two quartets with some degree of certainty. His model for the *Divertimento a quattro* was Haydn, though he owed much of his musical inspiration to J.M. Kraus. Hoffstetter's musical ideas are memorable, easily accessible and popular in style, but his working out of material does not attain Haydn's concentration. Apart from three viola concertos, which might suggest that he was himself a viola player, he composed various pieces of church music. His masses show some uncertainty in tonal structure. Writing to F.S. Silverstolpe on 11 January 1802 he confessed as much, and acknowledged that 'everything that flows from Haydn's pen seems to me so beautiful and remains so deeply imprinted on my memory that I cannot prevent myself now and again from imitating something as well

as I can'. Appropriately, several of his works became known under Haydn's name.

WORKS

Str qts: 6 as op.1 (Amsterdam, *c*1770) [attrib. J. Haydn (London, 1774), cf HIII: D1, G1, C1, F1, B1, Es1]; 6 as op.2 (Mannheim, *c*1780); 2 in op.3 [attrib. Haydn (Paris, 1777), cf HIII, 13–14]; 2 qts, *c*1765 [attrib. Haydn, cf HIII: F3, F6], *CH-Bu*

Other works: 10 masses, some in Walldürn, *D-WÜd* and Hofbibliothek, Jagstberg, others lost; 3 va concs., *c*1785, *S-L*, 1 in *D-Bsb* all ed. in Fine; 6 sinfonias and further sacred works, incl. 3 vespers and 1 lit, marked 'Hofstetter', probably by Roman Hoffstetter

HUBERT UNVERRICHT

**Hofhaimer** [Hofhaymer, Hoffhaimer, Hoffheimer, Hofhamer], **Paul** [Paulus, Meister Pauls] (*b* Radstadt, 25 Jan 1459; *d* Salzburg, 1537). Austrian organist and composer. The date of his birth is derived from the non-speculative section of the astrologer Garcaeus's *Methodus* (Basle, 1570). According to the humanist Joachim Vadian, Hofhaimer was self-taught; however, Conradus Celtis wrote that he learnt to play the organ at the court of Emperor Frederick III. From 1478 he was at the court of Duke Sigmund of Tyrol in Innsbruck, and in 1480 he was given a life appointment as an organist. In 1486 he travelled at the command of his employer to Frankfurt for the coronation of Maximilian I as King of the Romans. Without giving up his previous post, Hofhaimer also served Maximilian from 1489. In that year the Hungarian queen, Beatrice, tried in vain to attract him to her court. A journey with Maximilian I's Kantorei to the Netherlands in 1494 brought him into contact with the Saxon Elector Frederick the Wise, whose court he visited again in 1494, 1498–9 and 1516. In 1498 Hofhaimer's ties with Maximilian were loosened, allowing him to make his home in Passau some years later. It cannot be shown whether he was then organist to the Bishop of Passau, nor can the possibility be excluded that he was also employed as organist to the Bavarian ducal court in Munich before 1508. At the wish of Maximilian, who in 1506 strengthened his hold on him again, he settled in Augsburg in 1507. In 1515 he reached the peak of his career when he was made a knight and a nobleman by Maximilian and the Polish king. From that time on he was allowed to call himself the 'obrister Organist' (first organist) to the emperor (see illustration). After Maximilian's death in 1519, Hofhaimer became organist at Salzburg Cathedral and organist to the Archbishop of Salzburg, Cardinal Matthäus Lang, remaining there until his death.

According to contemporary witnesses, Hofhaimer was the most important organist of his time. Vadian wrote that it was generally agreed that Hofhaimer had no equal. Another contemporary, the poet and imperial diplomat Cuspinian, called him 'musicorum princeps'. The humanists Celtis, Luscinius, Pirckheimer and Paracelsus also bore witness to his mastery. Hofhaimer seems to have been unsurpassed in the art of improvisation: 'He uses such unending variety', wrote Luscinius, 'that one can listen to him playing for years and wonder not so much where the ocean finds the water to feed all the rivers as where this man finds his tunes'. Hofhaimer shone as an organist at several sessions of the Reichstag which he visited in the emperor's retinue. He achieved a lasting influence on the younger generation of organists thanks to his considerable activity as a teacher. Two years after Hofhaimer's death, the humanist Stomius wrote: 'If the art of organ playing is flourishing everywhere today, this is mostly the result of [Hofhaimer's] teaching activity'. Among the large number of his pupils (called 'Paulomines' by Luscinius) were the following: Dionisio Memo, organist of S Marco, Venice; Hans Buchner, organist of Konstanz Cathedral; Hans Kotter, organist of the collegiate church of St Nikolaus, Fribourg; Conrad Bruman, organist of Speyer Cathedral; Johann Schachinger, organist of Passau Cathedral; and Wolfgang Grefinger, organist of the Stephansdom, Vienna.

Hofhaimer also had a considerable reputation as an expert on organs and he was called in several times when organs were being built: Bozen (now Bolzano) in 1486–7, Sterzing (now Vipiteno) in 1490, Innsbruck in 1491–2 and 1512–15, Salzburg in 1505 and Eisenerz in 1513. According to Cuspinian, he was very interested in the making and developing of instruments. He showed himself

*Positive organ, perhaps played by Paul Hofhaimer: woodcut by Hans Burgkmair I from the 'Triumphzug Maximilians', c1516–18*

more receptive to classical scholarship than almost any other organist or composer of his time.

Apparently only a fraction of Hofhaimer's compositions has survived, the loss being particularly heavy in his organ works. The only collection published under his name, *Harmoniae poeticae* (Nuremberg, 1539) consists of settings of odes by Horace. These compositions, which belong to the later part of Hofhaimer's creative career, are chordal and follow the classical taste of his age. The majority of his output must have been in the area of songwriting, for Vadian wrote that Hofhaimer used to 'compose the most charming lieder with musical settings which were by no means ordinary'. Some of the texts he set are his own. Almost without exception, the extant lieder are based on court song melodies which are usually given to the tenor, but sometimes also to other voices. They are written in bar form, often with a polyphonic *Stollen* contrasted with a fairly chordal *Abgesang*. The phrase structure is always clear, usually without the overlapping polyphony characteristic of the Franco-Flemish school. These works have an important place in the extant repertory of the late medieval German lied.

Only two of Hofhaimer's liturgical organ compositions have survived, *Recordare* and *Salve regina*. They show that the composer was a master in the art of composing over a cantus firmus. Although, in both style and expression, these pieces have many links with the past, they also show pointers to the future; the imitative handling of a cantus firmus divided into sections is part of the principle of their structure. Hofhaimer provided the keyboard transcriptions with ornaments that split up the phrase like filigree and as a result of his ornamentation technique he had a widespread influence. Some of his pupils, the Paulomines mentioned above, were not able to display the continual invention that marks his work, often falling into stereotyped patterns. Hofhaimer's music was clearly popular: it survives in many sources, and there are numerous intabulations of his pieces for keyboard or lute. (For further illustration *see* CHAPEL.)

MANFRED SCHULER

**Hofkapelle** (Ger.). Court CHAPEL.

**Hoflied.** *See* HOFWEISE.

**Hofman, Srdjan** (*b* Glina, 4 Oct 1944). Serbian composer. From 1963 to 1972 he studied composition with Rajičić and Bergamo at the Belgrade Academy of Music. He became an assistant at the Academy in 1974 and professor of composition and orchestration in 1986. After a period of neo-classical works (e.g. *Concerto dinamico*, 1971), Hofman adopted six-note serialism in a set of pieces entitled *Heksagoni* ['Hexagons']. In *Cantus de morte* (1978), for soloists, chorus and orchestra, he combined modality, serialism and aleatory techniques; in 1985 he embarked on a series of electro-acoustic works. He has participated in electronic music festivals in Bourges and Helsinki, and works of his have been performed at ISCM World Music Days in Stockholm, Essen and Timişoara. In 1994 and 1995 he won first prize at the Belgrade International Composers' Forum for *Koncertantna muzika* (1993) and *Znakovi* (1994).

ROKSANDA PEJOVIĆ

**Hofmann, Eucharius.** *See* HOFFMANN, EUCHARIUS.

**Hofmann, Heinrich (Karl Johann)** (*b* Berlin, 13 Jan 1842; *d* Gross-Tabarz, Thuringia, 16 July 1902). German composer and pianist. He received his musical education at Theodor Kullak's Neue Akademie der Tonkunst in Berlin, where from 1857 he studied with Kullak, Eduard Grell, Siegfried Dehn and Richard Wüerst and was later active as a pianist and teacher. The great success of his comic opera *Cartouche* in Berlin in 1869 aroused high expectations and encouraged him to devote himself exclusively to composition. His ensuing orchestral and choral works, notably the *Ungarische Suite* op.16, the *Frithjof-Symphonie* op.22, *Das Märchen von der schönen Melusine* op.30, the *Singuf-Rattenfängerlieder* op.62*a*, as well as his operas *Armin* and *Ännchen von Tharau*, assured his growing fame throughout Germany in the 1870s and 1880s. However, the mere fashionable eclecticism of his work did not ensure continuing success; he absorbed the various current trends without being able to enrich them. 'Heinrich Hofmann is not a highly gifted composer', said Hanslick of his work on the occasion of a successful Vienna performance, 'but a reliable, skilled practical musician, able to present commonplace ideas in a tastefully refined form.' The natural simplicity and Classical clarity of his style are best seen in his poetic keyboard works, above all in the piano duets; these and his chamber music, especially the Piano Trio op.18 and the String Sextet op.25, typify his amiable traditionalism. In 1882 he was appointed to the Royal Academy of the Arts and in 1898 was elected to its senate.

THOMAS-M. LANGNER

**Hofmann, Josef (Casimir)** [Józef Kazimierz; Dvorsky, Michel] (*b* Kraków, 20 Jan 1876; *d* Los Angeles, 16 Feb 1957). American pianist of Polish birth, son of KAZIMIERZ HOFMANN. His mother, Matylda, sang in light operas at the Kraków Theatre, where her husband was conductor. At the age of three Hofmann learnt the rudiments of music from his father, for he was one of the most

precocious musical prodigies in history, and equally gifted in mathematics, science and mechanics. He toured Europe as a pianist and composer at the age of seven, and his American début on 29 November 1887 at the Metropolitan Opera House caused an unprecedented public furore. He soon retired to Germany for further studies. In 1892, after five unsuccessful lessons with Moszkowski, he became the sole private pupil of Anton Rubinstein. Rubinstein's musical ideals greatly influenced Hofmann, who later stated that their relationship was 'the most important event of my life'.

Hofmann's reappearance before the public as a mature artist in late 1894 coincided with Rubinstein's death. Although his renown was limited in Britain, he enjoyed complete success in Russia, central Europe, South America and the USA. He became director of the recently founded Curtis Institute of Music, Philadelphia, in 1926, a position he held until 1938. He and Mary Louise Curtis Bok, the institute's founder, shaped the policies of the school, which became an ideal conservatory and produced many of the finest performing musicians of the time. After 1940 he curtailed his annual tours, and he gave his final New York recital in 1946. He spent his last years experimenting with improved piano actions and recording techniques.

Between about 1910 and 1935 Hofmann was regarded as being without equal among Romantic pianists. His playing combined faultless pedalling, the most even passage-work and the widest range of dynamics with a pellucid and chaste tone, and his sudden, improvisatory eruptions served to heighten the tension and emotional content of each piece he performed. In the first part of the 20th century his playing became an ideal to which most pianists aspired, and his influence on pianists and composers at that time was pervasive (Rachmaninoff dedicated his Third Concerto to him), though subsequently the popularity of his narrow repertory and free, Romantic style of performance waned considerably. He played Beethoven, Chopin, Schumann, Liszt and much salon music, but no Brahms or 20th-century works. He was the first professional musician ever to record (cutting several cylinders as a souvenir during a visit to Edison's laboratory in New Jersey in 1887), but ultimately made few commercial recordings. Hofmann composed more than 100 works (many under the pseudonym Michel Dvorsky), held over 70 patents for scientific and mechanical inventions and wrote two books on piano playing. His place in history adds significance to the many recordings of actual performances by him, discovered after his death. These recordings, and published evaluations of his art left by his contemporaries Anton Rubinstein, Saint-Saëns, Rachmaninoff and Stravinsky, place him with Liszt and Busoni as one of the most important of the Romantic pianists.

GREGOR BENKO/R

**Hofmann, Kazimierz** [Casimir] (*b* Kraków, 1842; *d* Berlin, 6 July 1911). Polish pianist, conductor and teacher. From 1851 to 1856 he studied at the Vienna Conservatory, where he was taught the piano by R. Fischof and harmony by Gachlehner; after graduating, he continued his musical studies in Vienna. On his return to Kraków, he studied at the university and gave piano recitals. From 1860 he played an active part in the musical life of Kraków as an accompanist, chamber musician and piano teacher; as a composer, he chiefly wrote incidental music and some stage works. He also taught theoretical subjects at the music school of the Society of the Muse. From 1868 to 1878 he was conductor of light opera at the Kraków Theatre, where he took much trouble to improve the repertory. In 1878 he succeeded Żeleński as professor of harmony and counterpoint at the Warsaw Institute of Music. He also conducted opera at the Wielki Theatre in Warsaw (1882–3). In 1886 he moved to Berlin, where he concentrated on the education of his son, the pianist JOSEF HOFMANN.

TADEUSZ PRZYBYLSKI

**Hofmann, Leopold** (*b* Vienna, 14 Aug 1738; *d* Vienna, 17 March 1793). Austrian composer. The son of the court official Georg Adam Hofmann, he showed musical gifts when very young, received instruction in singing and at the age of seven became a chorister in the court chapel of the Dowager Empress Elisabeth Christine. He took lessons in keyboard playing and composition from G.C. Wagenseil, the chapel organist, and may have taken violin lessons from Giuseppe Trani, Dittersdorf's teacher, who was also a member of the empress's musical establishment. By 1758 he was *musicus* (probably violinist) at the Michaelerkirche in Vienna and already well known as a composer of sacred works, concertos and symphonies. According to Fétis he was *regens chori* at the Peterskirche, Vienna, by 1764, although this has not been substantiated by earlier sources; only in 1766 is he recorded as Kapellmeister there (in Hiller's *Wöchentliche Nachrichten*). In September 1769 he succeeded Wagenseil as *Hofklaviermeister*, and he taught several members of the imperial family over the next five years. In 1772 he served briefly as second court organist (after Ferdinand Arbesser), and on 1 April of that year he was appointed successor to the younger Reutter as *Essential- und Gnadenbildkapellmeister* at St Stephen's Cathedral. Hofmann applied in 1774 for the post of Hofkapellmeister, following Gassmann's untimely death, but despite highest recommendations for the appointment from Count Spork, the court and chamber music director, the post went to Giuseppe Bonno in order to prevent Tobias Gsur from being appointed Hofmann's successor at St Stephen's. Joseph II's decrees concerning church music, promulgated in 1783, resulted in an inevitable decline in professional prestige for Hofmann. Although he had apparently ceased composing regularly as early as the mid-1770s, he virtually withdrew from professional life after 1783, living in prosperous semi-retirement in Oberdöbling, where he had owned property since 1776. Mozart was appointed his unsalaried adjunct in 1791 and may have directed performances of church music in his absence.

In his lifetime Hofmann enjoyed widespread fame: Nicolai apostrophized him as the founder of a Viennese 19th-century school of violin playing (as embodied in Schuppanzigh, Mayseder, the Hellmesberger family and others); Burney and Hiller both testified to his reputation

as an instrumental composer; and Dittersdorf, author of the 'anonymous' article 'Von dem wienerischen Geschmack in der Musik', which appeared in the *Wiener Diarium* of 1766 (no.26, suppl.), singled out his sacred music for special praise, describing him as 'a genius who was born for lyric poetry'. The Empress Maria Theresa acknowledged his distinguished organ playing with the gift of a silver pen; and a festival mass which he composed for the Vienna mayoralty in 1773 won him a gold medal (allegedly as Vienna's foremost musician) from the city magistrate and high praise from, among others, J.A. Hasse. Even Haydn's dislike of him – and the uncharacteristic lengths to which he went to discredit him – speaks for Hofmann's contemporary importance and personal influence.

Hofmann composed church music from his youth and left a large corpus of sacred works, which, typical of their period, combine the declining Austrian Baroque style with Neapolitan elements. Homophony dominates, and the masses in particular are rich in syllabic chordal declamation, culminating in expressive pathetic choral parlandos. The grouping of voices into two against two, or one against three, is characteristic, as is the frequent use of concertato voices. The orchestral accompaniments are skilfully composed and often make extended use of instrumental obbligatos. Hofmann's solo motets make considerable technical demands on the singers; the accompanied recitatives are highly expressive, although most arias are stylized and conform to the old Baroque da capo pattern, as do the concluding choruses with their elaborately figured accompaniments.

Among Hofmann's most important and original contributions to the symphony was the adoption of a slow introduction to the opening movement, anticipating Haydn. Although not preoccupied with the process of thematic development, his symphonies are well wrought, and a number experiment with thematic and gestural links between movements. Hofmann was a prolific and popular composer of concertos. A number of his keyboard concertos adopt the modern recapitulatory third ritornello, and he does not overuse the Tempo di menuet finale. Several of the violin concertos may have been written for his own use; his cello concertos are among the most impressive of the period, and one of his flute concertos was long attributed to Haydn. Hofmann's double concertos form an important link between the Baroque concerto grosso and the double and triple concertos of Mozart and Beethoven; his concertinos with two or more solo instruments, however, are perhaps more closely related to the symphonie concertante, although they bear little stylistic or structural similarity to the works of Mannheim and Parisian composers. Many of Hofmann's extant chamber works seem to have been written with amateur performers in mind.

WORKS

Thematic catalogues: Prohàzka (1964) [masses]; Fillion (1982) [divertimentos]; Kimball (1985) [symphonies]; Badley (1986) [concertos, concertinos]; A. Badley: *Leopold Hofmann: Thematic Catalogue* (in preparation)

SACRED VOCAL

*principal sources: Eisenstadt, Domarchiv, A-GÖ, H, KN, KR, LA, M, SEI, TU, Wgm, WIL, Wmi, Vienna, Michaelerkirche, Wn, CZ-Pnm*

Masses (for 4vv, orch, org, unless otherwise stated):

Missa alla capella, 4vv, org; Missa S Theresiae, 5vv, orch, org; Missa S Catharinae; Missa S Joannis Nepomuceni; Missa S Gabrielis; Missa S Leopoldi; Missa solemnis; Missa S Erasmi; Missa S Theclae; Missa brevis; Missa S Peregrini; Missa, C, 5vv, orch, org; 31 others (incl. significant variants); Missa, C, frag.; Requiem

Other works: 29 ants; 7 arias; 7 hymns; 1 grad; 16 lits; 38 motets and offs (incl. variants and contrafacta); 1 orat; 16 pss; 1 resp; 3 seqs; 14 tracts; 3 vespers settings

Doubtful: 2 offs (?by A. Zimmermann); Litaniae lauretanae (?by A. Zimmermann)

Lost: Oratorium S Joannis Nepomuceni; ?1 grad

SECULAR VOCAL

6 lieder in Sammlung deutscher Lieder für das Klavier, iii (Vienna, 1780), 2 ed. in DTÖ, liv, Jg.xxvii/2 (1920/*R*), 1 ed. in Friedlaender, 271; 3 lieder in Liedersammlung für Kinder und Kinderfreunde am Clavier: Winterlieder (Vienna, 1791); arietta, 1v, pf, in In questa tomba oscura (Vienna, 1808)

INSTRUMENTAL

*Principal sources: A-M, Wgm, Wn; CZ-Bm, KRa, Pnm; D-Bsb, Dl, Rtt; I-MOe; S-Skma*

Syms.: 6 sinfonie, op.1 (Paris, 1760); Sinfonia (Paris, 1767); 4 ed. in The Symphony 1720–1840, ser. B, vii (New York, 1984), 5 also ed. A. Badley (Wellington, 1995); 37 others
